

New literature on family planning

A recent survey has shown that over 70% of married women under 45 years of age are in favour of Family Planning, which explains why Doctors are receiving more and more requests for information.

These new booklets and leaflets give the latest information on conception control and will save Doctors' time when dealing with these enquiries.

The Condom protective as a Contraceptive. Written by the Director of Research at the National Committee on Maternal Health Inc., New York. This authority on the statistical evaluation of family planning analyses the effectiveness and acceptability of the protective in detail.

Modern Family Planning. A new booklet discussing the various methods of family planning written in simple language suitable for distribution to interested patients.

Diaphragm or Protective

A comparison of the two leading methods of conception control.

The case against Coitus Interruptus

An indictment of this method of conception control—its failure rate and its physical and mental effects.

The married woman's views on contraception. A survey based on facts revealed by a recent investigation of the opinions of married women about family planning.

Contraception—the facts about recent developments. An enquiry into the stage reached in the development of oral contraception—the advances to date, the interest of the general public, the known disadvantages and the long-term dangers.

Some criticism has, in the past, been levelled at Protectives on the grounds that they reduce sensitivity. A recent development by the London Rubber Company almost entirely overcomes such objections.

SUMMER SINUSITIS AND RINUREL

Sinusitis is often aggravated by summer conditions—hot weather, dusty roads, hay fever and other allergies. Rinurel controls symptoms due to infection and allergy. Rinurel tablets effectively provide relief from sinus headache, hay fever and the misery of a summer cold. The clinical features of sinus conditions cannot be relieved by a single drug, and a formulation is necessary. Rinurel contains two analgesics, a decongestant and an antihistamine and provides comprehensive control of sinus headache, congestion, pyrexia and rhinorrhoea.

FORMULA

Paracetamol 150 mg. Phenacetin 150 mg.
Phenylpropanolamine hydrochloride 25 mg.
Phenyltoloxamine dihydrogen citrate 22 mg.

DOSAGE

Two tablets initially followed by one every 4 hours.
Prophylactically one tablet every 4 hours. Not
more than 6 tablets to be taken in 24 hours.

Lucofen

is a new compound for appetite limitation, pharmacologically different from all other anorectics

Advantages: Lucofen acts without interfering with meal anticipation—without the frustration and irritability caused by many weight reducing programmes.

The resultant weight loss is gradual, safe and dependable. Lucofen is free from the disadvantages of the usual amphetamine-like drugs. Lucofen causes no restlessness, sleeplessness or addiction. It is especially useful in combating the evening hunger felt by many patients. There is evidence of fat mobilisation.

Dosage: The recommended dose is one tablet three times a day before meals, or three tablets with breakfast. This dosage normally results in an average loss of 1 lb. to 1½ lbs. per week.

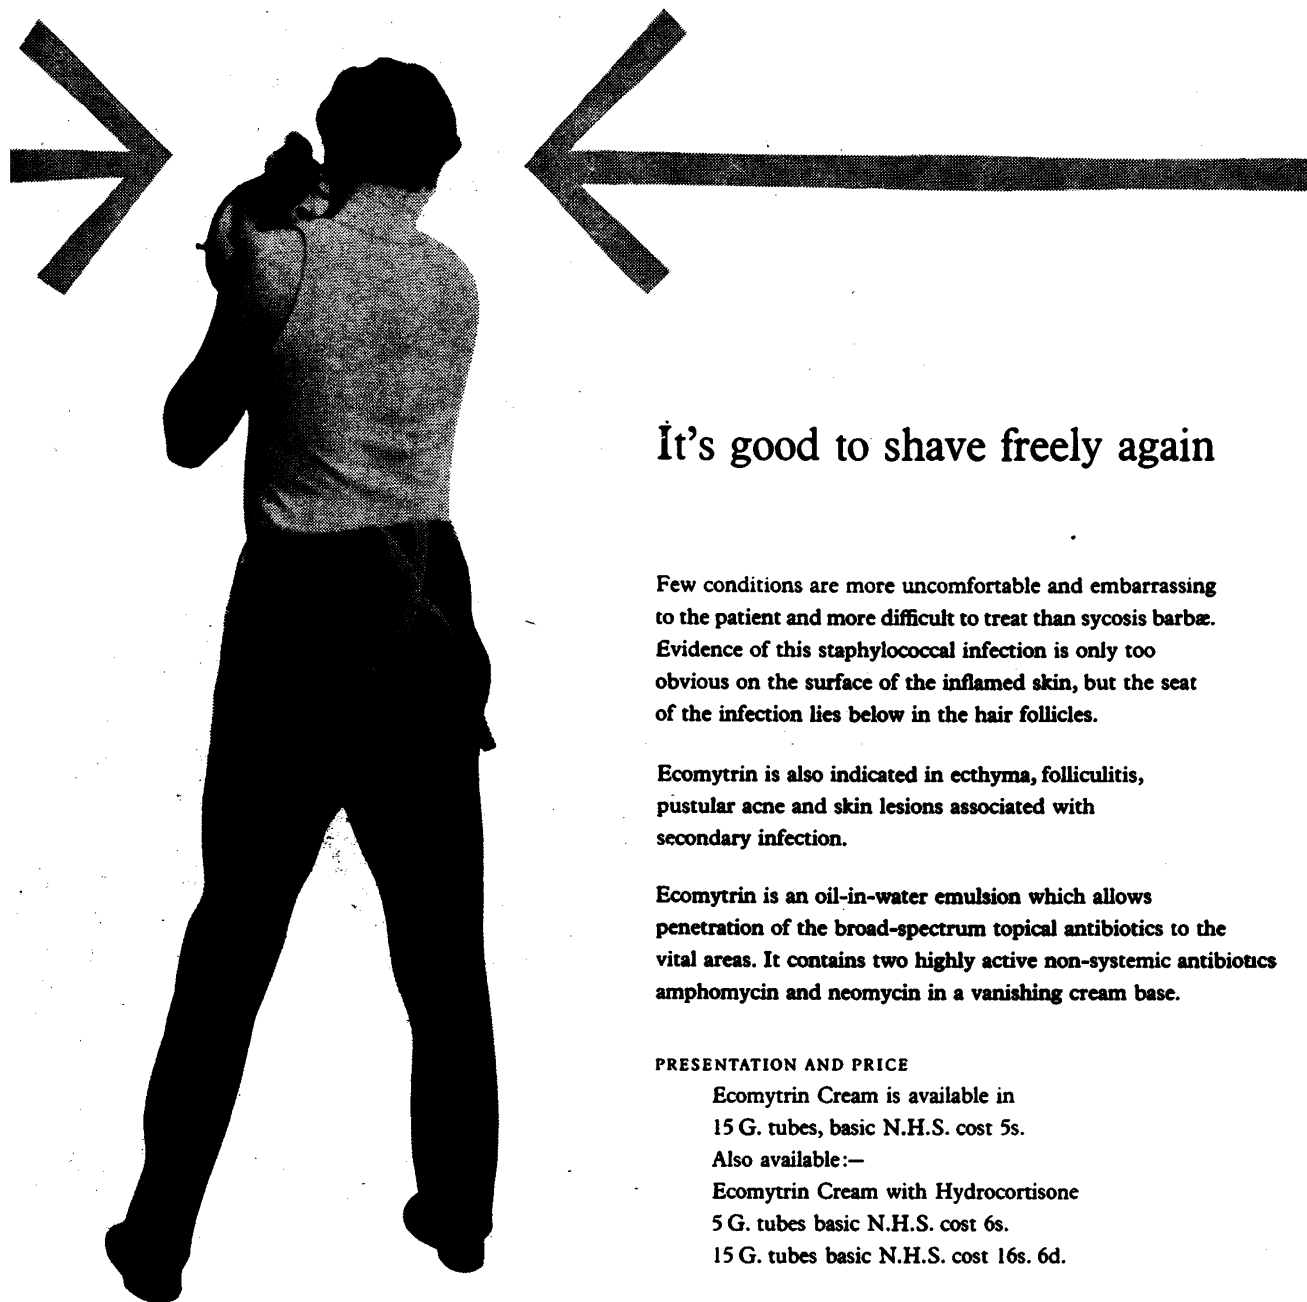

Formula: Each Lucofen tablet contains 25 mg. of 1-(*p*-chlorophenyl)-2-methyl-2-aminopropane hydrochloride.

Presentation: Bottles of 50 and 500 tablets.

Summary: In the treatment of obesity, the active co-operation of the patient is essential. Lucofen secures this co-operation, because his normal anticipation of meals and pleasure in eating is unaffected—but he will be satisfied much earlier. Eating sensibly and taking Lucofen, the co-operative patient is more ready to help the doctor and himself.

Betnelan

an entirely new
anti-inflammatory steroid

Here is a steroid having increased anti-inflammatory activity with a decreased possibility of side effects. Betnelan, a most potent steroid available for clinical use,

is devoid of salt retention activity
has negligible effect on potassium balance
causes no mental depression

and shows promise of clinical superiority in other respects. For short-term therapy a "2:1:½" dosage scheme is suggested. For example, in acute asthma, severe eczema, urticaria, shock and other conditions for which corticoids are indicated systemically, the dosage may be

2 tablets t.i.d. for 2 days followed by

1 tablet t.i.d. for 2 days and

½ tablet t.i.d. for 2 days

For maintenance, dosage need be no more than ½ tablet twice-daily.

BETNELAN is presented as scored tablets containing 0.5 milligrams betamethasone in bottles of 30, 100 and 500.

Dose for dose, Betnelan is the lowest priced of all corticosteroids available.

Betnelan (betamethasone) is an entirely new parent compound developed in Britain by Glaxo Laboratories Ltd. Its merits are derived from its unique chemical structure—the beta position of 16 methyl group in the formula 16β-methyl-9α-fluoroprednisolone (betamethasone) representing more than 20 new stages of manufacturing complexity.

Corn Oil, Cholesterol and Coronary Heart Disease

In 1957, 26% of all male deaths between the ages of 45 and 64 in England and Wales were caused by coronary heart disease. Despite considerable research, the cause or causes of this disease have still not been proved. However, it has been suggested from preliminary clinical trials that there may be a connection between high level blood cholesterol and the incidence of coronary heart disease.

FATS AND CHOLESTEROL On this subject, an eminent authority on nutrition has written, '... the important point is to increase E.F.A. and to decrease non-E.F.A. and excessive carbohydrate (which gives rise to non-E.F.A. in the body). Not all unsaturated fats or oils are good sources of E.F.A.: the best sources are the vegetable seed oils, and of these corn (or maize) oil has proved slightly superior to others in detailed trials of lowering serum cholesterol in man.'

DIETARY ADVICE

To avoid raising the level of cholesterol in the blood, many doctors recommend their patients to reduce their daily intake of animal fats by the substitution of a vegetable oil which contains the essential fatty acids. One that is particularly recommended is Mazola Corn Oil. Mazola is made from specially selected maize, which gives an oil rich in the most important of the essential fatty acids—linoleic acid. For this reason, it helps to reduce blood cholesterol. Mazola can be used for frying, grilling, baking and for salad dressings.

If you would like to know more about Mazola Corn Oil—its benefits and uses—please write to us for a free copy of the booklet 'The relation of dietary fats to chronic degenerative diseases'.

dramatic clinical results in psoriasis

followed by medical successes
throughout the United Kingdom

Though modern medicaments have brought almost dramatic relief to many forms of skin affection, Psoriasis has so far remained intractable. Its aetiology continues to baffle investigation and many forms of tried therapy have yielded only partial or temporary results.

Now ALPHOSYL—after extensive clinical trials and medical successes throughout the United Kingdom—shows promise of bringing total clearances in many cases of Psoriasis.

In ALPHOSYL, for the first time, are presented in combination two agents: allantoin and a specially refined coal tar extract. The synergistic effects of these medicaments result in rapid clearance of the condition itself and positive stimulation of the healing process.

ALPHOSYL LOTION combines these two valuable agents in one preparation and has had impressive results where other medications have failed.

The successes obtained with ALPHOSYL indicate that it deserves a trial in all cases of Psoriasis—no matter how extensive the area of infection, how long the duration of the condition, or whatever the therapy previously used. Lofenalac

Low-phenylalanine diet for phenylketonurics

Dear Doctor,

Since Fölling called attention to phenylketonuria 23 years ago, many aspects of the condition have been clarified and defined. Moreover, the introduction of simple diagnostic tests have switched emphasis from detection to effective management. Once you've found your phenylketonuric what do you do with him or her? This question will become more important as mass-screening programmes are organised throughout the country.

Lofenalac is the answer. Lofenalac is a scientifically balanced, low phenylalanine diet, suitable for both infants and children. Formulated with an enzymatically prepared casein hydrolysate and with a vegetable fat content of high iodine number it is palatable and easily managed. It is a complete diet for infants and forms the main basis of diet for the older phenylketonuric child.

Why Lofenalac especially? Mead Johnson are in a unique position: over 50 years of research on infant and invalid diets has given us incomparable experience with this kind of product.

A Completely New Antidepressant Agent

The Merck Sharp & Dohme Research Laboratories have discovered and developed an important, new, single chemical agent for the treatment of depression, *whether or not accompanied by anxiety*. This new agent is amitriptyline hydrochloride, which will be known as 'TRYPTIZOL'.

'TRYPTIZOL' is chemically different from all other antidepressant agents and has the outstanding clinical advantage of both antidepressant and anti-anxiety actions.

Other major advantages are:

- ▶ incidence of postural hypotension much less marked than with other agents.
- ▶ early and dramatic improvement in sleep patterns may be expected.
- ▶ neither parkinsonism, liver toxicity, nor blood dyscrasias reported during widespread clinical trials.

THE JOURNAL OF SURGICAL RESEARCH

A new periodical dedicated to critical selection and prompt publication of experimental work contributing to the advance of surgical science

Edited by CHARLES G. CHILD, M.D., *University of Michigan*

It is planned that this important new journal, the first to be devoted entirely to surgical research, will have an international appeal. Editorial policy will be broad; consideration will be given to reports of research which illuminate the nature of surgical disease or which suggest new methods for its study, its recognition or its management.

Commencing with May issue, the Journal will be published bi-monthly. Inspection copy can be sent on application.

Annual subscription to SIX consecutive numbers £3 15s. 0d.

KLING* conforming bandages

KLING Conforming Bandages stay put wherever put, but are light, airy and comfortable to wear. Dressings are held firmly in place on any part of the body without discomfort to the patient.

Two-way stretch allows the bandage to conform to contours around joints and bony prominences and the self-adherent turns will not slip.

KLING Bandages are impregnated with lauryl dimethyl benzyl ammonium bromide to minimize cross-infection.

"but how can dandruff cause this doctor?..."

The patient may find it hard to believe that there can possibly be any connection between the spots on her face and the condition of her scalp. But regular shampooing with SEBODERM will provide convincing proof. It will rid the scalp of infection and her troublesome facial condition will clear up too.

SEBODERM

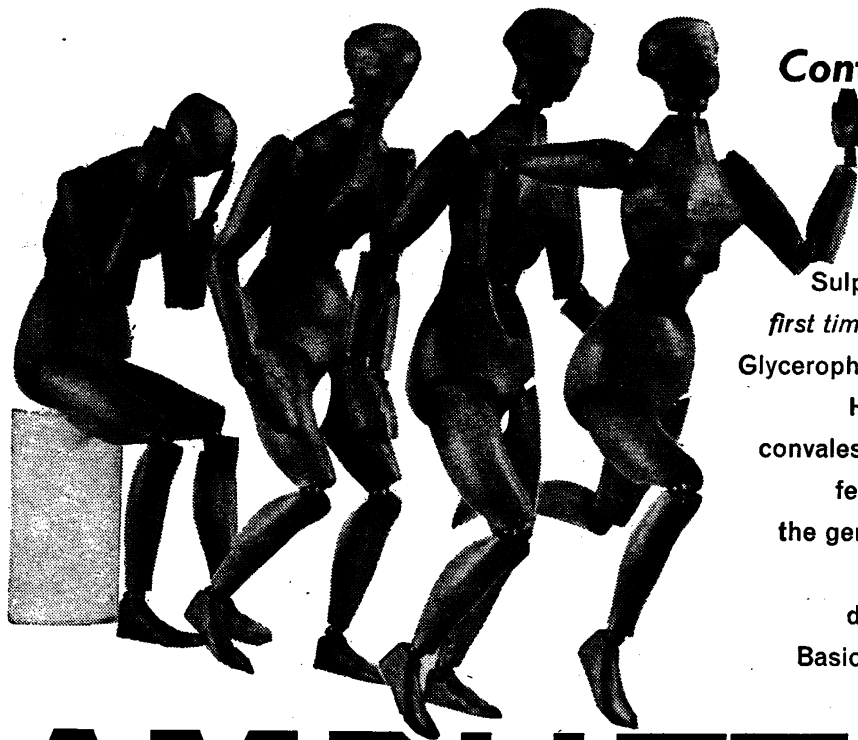

SEBODERM contains the cationic bactericidal detergent Cetrimide B.P. (15.6%) and Lanolin (1%) in elegant form which was described as 'the most valuable recent addition to dandruff therapy.' BRIT. MED. J, 1956, 2, 92.

NULACIN

"has revolutionized the treatment of duodenal ulcer"*

simply

safely

Nulacin tablets, dissolved slowly in the mouth, provide intragastric milk-alkali drip therapy, obviating the necessity for a tube. Treatment is easy and convenient for the ambulant as well as the bedridden patient. Nulacin may be relied on to provide an effective treatment for peptic ulcer as well as other conditions associated with gastric hyperacidity. No undesirable side effects occur and no cases of alkalosis or acid rebound due to Nulacin have ever been reported. The safety and effectiveness of Nulacin therapy has been proven by 'in vivo' clinical work carried out in many countries.

effectively

economically

Nulacin tablets have no B.P. equivalent. The basic N.H.S. price of the 25 tablet tube is 2/-.

GASTRIC ANALYSIS 1 Superimposed gruel fractional test-meal curves of five cases of duodenal ulcer.

GASTRIC ANALYSIS 2 Same patients as in first graph, two days later, showing the striking neutralizing effect of sucking Nulacin tablets (3 an hour). Note the return of acidity when Nulacin is discontinued.

A Ross Microreader where you want it

The full value of using microrecords in Hospital administration is only obtained if the micro-reader can be located in the room where the consultation is taking place.

This is just what the Ross Microreader was designed to achieve. It is compact and portable and will stand conveniently on table or desk. It is a universal reader in that it will project any type of microrecord, 35 mm. or 16 mm.; cards or film; opaques or transparencies. Miniature X-rays can be viewed with equal facility and even microscope slides can be examined using the special microscope objective.

It is less costly than the conventional, bulky, single purpose reader, thus making it an economical proposition to have several conveniently situated reading stations instead of one.

May we send further details of the ROSS microreader; or we should be pleased to submit one for examination and trial.

A sunscreen for both short and long U/V

UVISTAT Cream in Photodermatoses

The longer wavelengths (above 320 m μ) of the ultraviolet spectrum are important in the initiation of light reactions in photosensitive patients.

Paraaminobenzoate sunscreen creams absorb only in the narrow normal sunburn region of the spectrum (290-310 m μ).

UVISTAT CREAM absorbs over a wide range (250-350 m μ) when applied to the skin in a cosmetically acceptable vanishing cream.

UVISTAT CREAM affords protection in acute solar eczema, chronic polymorphic light eruptions and prurigo aestivale. It is also indicated in lupus erythematosus, herpes labialis, rosacea and other dermatoses aggravated by light. It causes neither irritation nor sensitisation.

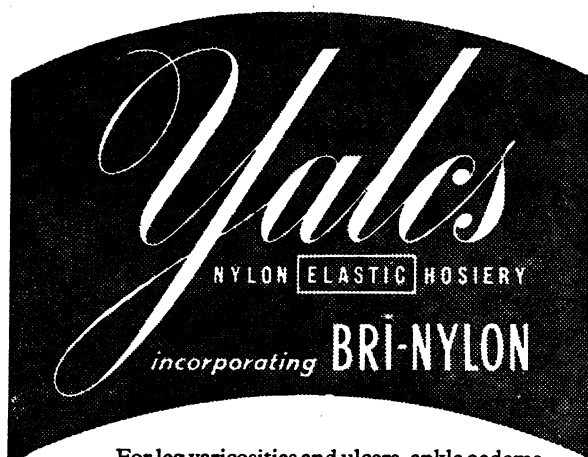

UVISTAT CREAM containing 10% 2-hydroxy-4-methoxy-4'-methylbenzophenone in a vanishing cream base, is available in 50 gm. tubes.

HOW MANY JOURNALS SHOULD YOU READ?

Once a man has applied himself to the practice of medicine he is in duty bound to keep himself informed on every advance in medical knowledge—and how can he do this except by reading?

The literature pours from the printing presses of the world, some of it of lasting significance, some ill-founded or misguided. How can a busy man pick his way through this maze?

ABSTRACTS OF WORLD MEDICINE does it for you . . .

This journal covers the whole field of clinical medicine and allied medical sciences in each issue, and presents to you each month concise, informative, readable abstracts of the best of the original papers published throughout the world—selected from over 1,500 medical journals.

Medical Experience in the Royal Air Force

Doctors under 33, both men and women, are assured of a progressive career in the Royal Air Force. Junior and senior ranks have ample opportunity for good class general practice and those with the necessary experience and qualifications can expect to be employed throughout their subsequent career as specialists in the clinical subjects or in aviation physiology. Generous leave is allowed for post-graduate study and courses.

Rank and seniority on appointment is related to previous experience. General practitioners are promoted on a length of service/time basis to Wing Commander, and specialists to Group Captain. Subsequent promotion to higher ranks is by selection.

Total emoluments (for the married officer) range from £1,307 p.a. for a Flying Officer to £4,902 p.a. for an Air Marshal. In addition officers selected as Junior Specialists (in the ranks up to and including Wing Commander) are eligible for additional pay of £109 a year whilst employed on the appropriate specialist duties, and recognized Specialists (in the ranks up to Air Vice Marshal) are eligible for additional pay of £292 a year. Ample pensions and terminal grants are paid on retirement and all suitable retired officers may be re-employed in clinical posts at a salary of £2,165 (plus pension).

Normally appointments are in the first instance to a short service commission of 3 or 5 years for which tax-free gratuities of £1,500 or £3,000 are payable.

CHIEF MEDICAL ADVISER

A well qualified Medical Practitioner, preferably of Senior Registrar Status, is required as CHIEF MEDICAL ADVISER to Benger Laboratories Limited—one of the companies in the Fisons Group.

This is an important appointment carrying a high salary.

The Chief Medical Adviser will report directly to the Managing Director, and his responsibilities can briefly be divided under the following headings:

1. Arranging, supervising, and assessing all clinical trials of the Company's new or existing therapeutic agents in close liaison with the pharmacological and other departments of the Research Laboratories.
2. General supervision of the work of the Medical Department covering:
 - (a) preparation of medical briefs on all products for marketing and other purposes
 - (b) general liaison with outside clinicians, and official bodies on the medical aspects of the company's products
 - (c) the provision of medical information and advice
 - (d) the medical aspects of the training of representatives.

This is a key appointment calling for a medical practitioner who can bring real enthusiasm and skilled judgment to the task of assessing the clinical efficacy and value of possible new and original therapeutic agents.

The Chief Medical Adviser will be supported by the appropriate staff, some of whom will also be qualified medical practitioners. Conditions of service are excellent, including membership of contributory pension schemes.

Applications, giving as much information as possible, should be addressed to the Secretary, Benger Laboratories Limited, Holmes Chapel, Cheshire. They will be dealt with in strict confidence. If preferred, a printed application form will be sent on request. (5755)

MENTAL HEALTH RESEARCH FUND

STUDENT PRIZES AND TRAVELLING FELLOWSHIP IN PSYCHIATRY

The Mental Health Research Fund awards annually to medical students and doctors in their pre-registration year three Monetary Prizes and a Travelling Fellowship as the result of an essay competition on a subject relating to mental health, and a subsequent interview.

Applicants gaining the top three places in the essay competition will be given prizes of £100, £50 and £25 respectively.

The Travelling Fellowship, tenable in a psychiatric or other department for up to six months, will be awarded as the result of an interview combined with consideration of the candidate's undergraduate record. Persons interviewed will be chosen from the top ten in the essay competition. The travelling fellowship will normally be taken up at the end of the pre-registration year or, in the event of it being awarded to a medical student, may be taken up after qualification.

The subject for the essay this year is "Discuss the Role that Parental Attitudes Play in Shaping the Personality of the Child."

The panel of examiners consists of two members of the Research Committee of the Mental Health Research Fund and one member of the Association of Teachers of Psychiatry in Undergraduate Medical Schools.

Essays should be sent, before March 1, 1962, to the Secretary, Research Committee, Mental Health Research Fund, 39 Queen Anne Street, London W.1 (Tel. WELbeck 1272), from whom further details may be obtained. (5756)

**ST. ANDREW'S HOSPITAL FOR NERVOUS
AND MENTAL DISORDERS, NORTHAMPTON****President: The Earl Spencer**

Medical Superintendent: Thomas Tennent, M.D., F.R.C.P., D.P.H., D.P.M.

This registered hospital is situated in 130 acres of park and pleasure grounds. Patients, both male and female, who are suffering from incipient mental disorders, or who wish to prevent recurrent attacks of mental trouble, are received for treatment. Careful clinical, biochemical, bacteriological and pathological examinations. Private rooms with special nurses, male and female, in the hospital or in one of the numerous villas in the grounds of the various branches can be provided.

WANTAGE HOUSE

This is a Reception Hospital in detached grounds with a separate entrance to which patients can be admitted. It is equipped with all the apparatus for the complete investigation and treatment of mental and nervous disorders by the most modern methods; insulin treatment is available for suitable cases. It also contains laboratories for biochemical, bacteriological and pathological research. Psychotherapeutic treatment is employed when indicated.

MOULTON PARK

Two miles from the Main Hospital there are several villas situated in a park and farm of 600 acres. Milk, meat, fruit and vegetables are supplied to the hospital from the farm, gardens and orchards of Moulton Park. Occupational therapy is a feature of this branch, and patients are given every facility for occupying themselves in farming, gardening and fruit growing.

BRYN-Y-NEUADD HALL

The seaside home of St. Andrew's Hospital is beautifully situated in a park of 330 acres at Llanfairfechan, amidst the finest scenery in North Wales. On the north-west side of the estate a mile of sea-coast forms the boundary. Patients may visit this branch for a short seaside change or for longer periods. The hospital has its own private bathing house on the seashore. There is trout fishing in the park.

For terms and further particulars apply to the Medical Superintendent (Telephone No. 34354 Northampton), who can be seen in London by appointment.
