

a fresh start for corticoid therapy

Betnelan

an entirely new
anti-inflammatory steroid

Here is a steroid having increased anti-inflammatory activity with a decreased possibility of side effects. Betnelan, a most potent steroid available for clinical use,

is devoid of salt retention activity
has negligible effect on potassium balance
causes no mental depression

and shows promise of clinical superiority in other respects. For short-term therapy a "2:1:½" dosage scheme is suggested. For example, in acute asthma, severe eczema, urticaria, shock and other conditions for which corticoids are indicated systemically, the dosage may be
2 tablets t.i.d. for 2 days followed by
1 tablet t.i.d. for 2 days and
½ tablet t.i.d. for 2 days
For maintenance, dosage need be no more than ½ tablet twice daily.

BETNELAN is presented as scored tablets containing 0.5 milligrams betamethasone in bottles of 30, 100 and 500.

Dose for dose, Betnelan is the lowest priced of all corticosteroids available.

Betnelan (betamethasone) is an entirely new parent compound developed in Britain by Glaxo Laboratories Ltd. Its merits are derived from its unique chemical structure—the beta position of 16 methyl group in the formula 16β-methyl-9α-fluoroprednisolone (betamethasone) representing more than 20 new stages of manufacturing complexity.

Lucofen

Whenever Sir John Falstaff felt an urge to eat—he ate. Bread, sugar, meat, capons—washed down with flagons of sack—all helped to create “that stuffed cloak-bag of guts, that roasted Manningtree ox with the pudding in his belly”.

Look at him! Look at your patients too; wouldn't they benefit from Lucofen, a new treatment for obesity through appetite limitation? In the treatment of obesity, the active co-operation of the patient is essential. Lucofen secures this co-operation, because his normal anticipation of meals is unaffected—but he will be satisfied much earlier. Eating sensibly and taking Lucofen, the co-operative patient is more ready to help the doctor and himself.

Lucofen, 1-(p-chlorophenyl)-2-methyl-2-aminopropane hydrochloride acts without the frustration and irritability caused by many weight-reducing programmes.

The resultant weight loss is gradual, safe and dependable. Lucofen is free from the disadvantages of the usual amphetamine-like drugs, and thus causes no restlessness, sleeplessness or addiction. It is especially useful in combating the evening hunger felt by many patients. There is evidence of fat mobilisation.

Dosage: The recommended dose is one tablet (25 mg.) three times a day before meals, or three tablets before breakfast. This dosage normally results in an average loss of 1 lb. to 1½ lbs. per week.

Presentation: Bottles of 50 and 500 tablets.

* The action of Shakespeare's *Henry IV Part I* covers the years preceding the battle of Shrewsbury, July 1403. Falstaff at this time was “some fifty, or by'r lady, inclining to three score”. He owes his name, and perhaps more, to the denigrated soldier Sir John Fastolf (1378-1459).

Eczema (INFECTIVE)

Acute Infective Eczema before treatment

After 5 days' treatment (Cambison 0.5% twice a day)

Steroid ointments are frequently successful in varieties of eczema that have resisted other therapy

They have the advantage of being anti-allergic, anti-inflammatory and anti-pruritic. Even severe itching is usually relieved in a few hours, and hyperaemia, swelling, and exudation reduced during the first day of treatment.

Cambison ointment combines the steroid prednisolone with a two-fold protection against infection. Not only does it include the antibiotic neomycin, which is highly effective against staphylococci and streptococci, but also a quinolylurea compound with chemotherapeutic action particularly directed against gram-positive organisms. This combination widens the antimicrobial spectrum and enhances the antibacterial effect.

Cambison is indicated in cases of acute and chronic eczema and dermatitis, particularly where infection is present or threatened.

Packs: Tubes of 5G and 20G. Available with prednisolone 0.25% or 0.5%

Samson Wright's Applied Physiology

Revised by **CYRIL A. KEELE**, *Professor of Pharmacology and Therapeutics, University of London, at the Middlesex Hospital Medical School, and* **ERIC NEIL**, *John Astor Professor of Physiology, University of London, at the Middlesex Hospital Medical School, with the collaboration of* **JOHN B. JEPSON**

Professor Samson Wright had begun preliminary work on the 10th Edition of his *Applied Physiology* before his death in March 1956. At first the new editors thought that they might produce a new edition based very largely on the text of the 9th Edition published in 1952. However, the tremendous advances which have taken place in physiology since that time soon made them realise that such a course was quite impracticable and they decided that a much more drastic revision was necessary if the 10th Edition was to catch the spirit of Samson Wright's whole approach to the subject. They have therefore made radical changes in nearly all sections of the book.

Firstly they have added a new section on the Special Senses, the Ear and the Eye. This fills a gap which has been criticised in the past. Secondly they have entirely rewritten the sections on the Kidney and Body Water, Heart and Circulation, Respiration, and Muscle and the Nervous System; and thirdly, they have extensively revised the sections on Blood, Endocrine Glands, Metabolism, and Nutrition.

In producing this 10th Edition of *Applied Physiology* they are fully aware of the difficulties involved in trying to follow in Samson Wright's footsteps, but they have throughout attempted to fulfil his original aim, to present physiology as a basis for the understanding of medicine.

Professor Cyril Keele was a student of Samson Wright from 1924 and, after qualification and five years of clinical work, he was so stimulated and attracted by his exposition of physiology that he joined his staff in 1933 and was a member of his department until he helped him to establish a separate department of pharmacology in 1938. He continued to teach certain aspects of physiology, including clinical demonstrations, for many years after this, and this explains how a pharmacologist comes to be associated with a true physiologist in what it is hoped and believed will be a fruitful partnership. Professor Eric Neil worked with Samson Wright as Reader in Physiology in the University of London for a number of years and succeeded him as John Astor Professor of Physiology on his death.

The new format of the book with its large double-column pages has been introduced primarily for economic reasons, and those who dislike double columns should realise that although production costs have increased by nearly fifty per cent. since the 9th Edition was published the price of this new edition has increased by only eight-and-a-half per cent. It is hoped that the much clearer type face used, the more prominent and more logically arranged headings, the elimination of footnotes, and the concentration of references at the end of each section will make this new edition much easier to read than its predecessors.

Laevosan

an advance in carbohydrate supportive therapy

Recent biochemical investigations have established the shorter metabolic pathway followed by LAEVULOSE into the energy releasing system. The liver is capable of synthesizing 35-40% of glycogen from LAEVULOSE, as compared with only 12% from glucose.

Clinical experience has shown that infusions of LAEVULOSE are less irritant to the vein intima than dextrose. When infusions of concentrations as high as 20% have been given there have been no signs of thrombophlebitis. Owing to new and more economical methods of processing, this valuable carbohydrate is now available for general clinical use as a sterile pyrogen-free solution for intravenous injections as "LAEVOSAN." A remarkable advance in the treatment of superficial fungal infections

Given by mouth, 'Fulcin' is the first reliable systemic treatment for superficial fungus infections. Widespread clinical experience has proved that mycoses caused by various species of dermatophytes respond to treatment and that the drug is generally well tolerated. A daily dose of 1 gramme (1 'Fulcin' tablet 4 times a day) is adequate in most cases. For children, doses of 250 mg. to 500 mg. daily are used.

Can home cooking ever be second best?

You've probably often said to a mother on the subject of weaning, "Make sure there is plenty of variety in your baby's diet." But, although she may grasp the importance of variety, she probably has no very clear idea as to how she is to provide it.

This is one of the reasons why so many medical practitioners go on to recommend Heinz Baby Foods. With 31 Strained Foods, and 16 Junior Foods for the older baby, they offer a simple and practical way of achieving the variety you advise.

H EINZ Baby Foods are prepared from the finest ingredients, which are inspected at every stage of production. They're cooked by a special process which keeps loss of mineral salts, vitamins and soluble nutrients down to the minimum. Finally, they're finely sieved or chopped to exactly the right consistency.

Endless variety all the year round. Carefully, hygienically cooked foods made from the finest ingredients. And there's yet another reason why Heinz can justifiably claim that their Baby Foods are better than home-prepared. Heinz Baby Foods, as the basis of her baby's diet, give a mother more time to spend with her baby, and so promote that calm, close relationship between mother and child which is probably just as important as a well-balanced diet.

Anabolex

the protein anabolizing, non-virilizing steroid promotes
—a return to appetite—an increase in weight—a sense of well-being

PATIENTS who are run down or who are recovering from illness frequently suffer from faulty protein metabolism. They are in negative nitrogen balance. Protein, in effect, is being broken down and lost faster than it is being built up.

Anabolex (androstanolone) restores the physiological balance. Many clinical trials have shown that, following the administration of Anabolex, there is an immediate return of the body's capacity to build up protein. The patient feels better, eats better and gains weight.

Here, then, is a physiological "tonic" with a wide therapeutic range. The weakness, lassitude, lack of energy and interest associated with many pathological states may be rapidly overcome by the administration of Anabolex.

Anabolex can be safely given to patients of all ages and both sexes; in therapeutic doses, its virilizing properties are almost negligible. The only known contra-indication is prostatic carcinoma.

*Anabolex is a
registered trade mark*

PRESENTATION: In vials of 25 and 100 tablets, each tablet containing 25 mg. Androstanolone. Basic N.H.S. cost 20/- and 70/- respectively. Anabolex is exempt from purchase tax. Samples and literature will be gladly sent on application.

INDICATIONS Middle-aged or elderly people who are debilitated or "run down." Preparation for and recovery from planned surgery. Convalescent patients. Premature infants. The child or adolescent who is under weight. Anorexia, Asthenia, Malnutrition, Wasting diseases.

THE NEW ANTI-CONVULSANT FOR PETIT-MAL

Greater therapeutic effect - fewer side effects

A recent comment on Emeside (Ethosuximide) states that "evidence is accumulating to suggest that ethosuximide (ethylmethylsuccinimide) may be the most effective drug yet discovered for the control of petit-mal epilepsy" (1).

Overall reduction of attacks has been reported in 75% of cases, with complete control over two years in 42%, satisfactory control in 24% and partial control in 18% of 242 patients. ^{(2), (3).}

Tolerance has not been found and such side effects as have been observed are mild, disappear on reduction of dosage and in most cases do not recur after a subsequent increase. Careful observation of patients is, however, emphasized pending long-term evaluation in clinical trials now proceeding in this country.

EMESIDE may safely be combined with other anti-convulsants

The fact that the walls of the dishes made by the most up-to-date manufacturing processes are free from bubbles, streaks, rings and discoloration guarantees undisturbed examination and accurate counting of the microbe colonies.

Its material, in accordance with the use to which the dish is put, resists perfectly to chemical and thermal effects.

The glass does not contain any harmful internal tension detectable with an optical stress tester, and this circumstance guarantees the high breaking strength necessary during sterilization in an autoclave.

SUCCESS*

*proves Dunlop best
-for you*

- * **SUCCESS** with the car manufacturers: the majority of British car manufacturers choose Dunlop tyres.
- * **SUCCESS** in developing the most comprehensive tyre-testing and tyre-proving facilities in Europe.
- * **SUCCESS** in winning the Ferodo Trophy for the best British Commonwealth contribution to motor racing in 1960.
- * **SUCCESS** with the British motoring public: far more motorists replace with Dunlop than with any other tyre.

Jack Brabham, World Champion driver for the second year running, always relies on Dunlop tyres. Whether driving with his family on highways and byways on Dunlop 'Gold Seal' or dicing at 180 m.p.h. in a world championship Grand Prix on the famous racing tyre, he knows that Dunlop give him the best there is . . . the best in road-holding and cornering . . . the best in trouble-free performance . . . above all, the best in built-in safety. You, too, can rely on Dunlop for safer, better, more confident motoring!

MENTAL HEALTH RESEARCH FUND**STUDENT PRIZES AND TRAVELLING FELLOWSHIP IN PSYCHIATRY**

The Mental Health Research Fund awards annually to medical students and doctors in their pre-registration year three Monetary Prizes and a Travelling Fellowship as the result of an essay competition on a subject relating to mental health, and a subsequent interview.

Applicants gaining the top three places in the essay competition will be given prizes of £100, £50 and £25 respectively.

The Travelling Fellowship, tenable in a psychiatric or other department for up to six months, will be awarded as the result of an interview combined with consideration of the candidate's undergraduate record. Persons interviewed will be chosen from the top ten in the essay competition. The travelling fellowship will normally be taken up at the end of the pre-registration year or, in the event of it being awarded to a medical student, may be taken up after qualification.

The subject for the essay this year is "Discuss the Role that Parental Attitudes Play in Shaping the Personality of the Child."

The panel of examiners consists of two members of the Research Committee of the Mental Health Research Fund and one member of the Association of Teachers of Psychiatry in Undergraduate Medical Schools.

Essays should be sent, before March 1, 1962, to the Secretary, Research Committee, Mental Health Research Fund, 39 Queen Anne Street, London W.1 (Tel. WELbeck 1272), from whom further details may be obtained. (5756)

NULACIN "has revolutionized the treatment of duodenal ulcer"*

simply

safely

Nulacin tablets, dissolved slowly in the mouth, provide intragastric milk-alkali drip therapy, obviating the necessity for a tube. Treatment is easy and convenient for the ambulant as well as the bedridden patient. Nulacin may be relied on to provide an effective treatment for peptic ulcer as well as other conditions associated with gastric hyperacidity. No undesirable side effects occur and no cases of alkalosis or acid rebound due to Nulacin have ever been reported. The safety and effectiveness of Nulacin therapy has been proven by 'in vivo' clinical work carried out in many countries.

effectively

*Proc. R. Soc. Med., 1958, 51, 1063

economically

Nulacin tablets have no B.P. equivalent. The basic N.H.S. price of the 25 tablet tube is 2/-.

GASTRIC ANALYSIS 1 Superimposed gruel fractional test-meal curves of five cases of duodenal ulcer.

GASTRIC ANALYSIS 2 Same patients as in first graph, two days later, showing the striking neutralizing effect of sucking Nulacin tablets (3 an hour). Note the return of acidity when Nulacin is discontinued.

NULACIN is a **HORLICKS** pharmaceutical product

A significant advance in the treatment of AMOEBIASIS

FURAMIDE *

offers for the first time a specific and highly effective treatment for amoebiasis, which is entirely suitable for the ambulant patient. No special diet—no injections—no enemas. Just a simple, 'three times a day' dosage schedule for 10 days.

FURAMIDE

supersedes E.B.I. and broad-spectrum antibiotics (except where the liver is involved).

Cure rates of 75–80% in the acute stage and of 90–100% in the chronic state may be expected. Symptoms are relieved within a few days.

Furamide is completely non-toxic, causes no serious side effects and is suitable for patients of all ages.

Further details gladly sent on request.

* An exclusive product of Boots Research.

Furamide tablets each contain 0.5G Entamide (dioxanide) Furoate and are supplied in containers of 15 and 250.
