Feospan puts iron in its place

new product
S&F

'Feospan' & 'Spansule' are trade marks
Brit. Pat. No. 742007 SF:PA92(Co)

One quarter of all patients given standard iron therapy abandon treatment rather than endure its gastric side effects.*

'Feospan Spansule' sustained-release capsules have been designed to reduce these side effects to the minimum—**by putting iron in its place.**

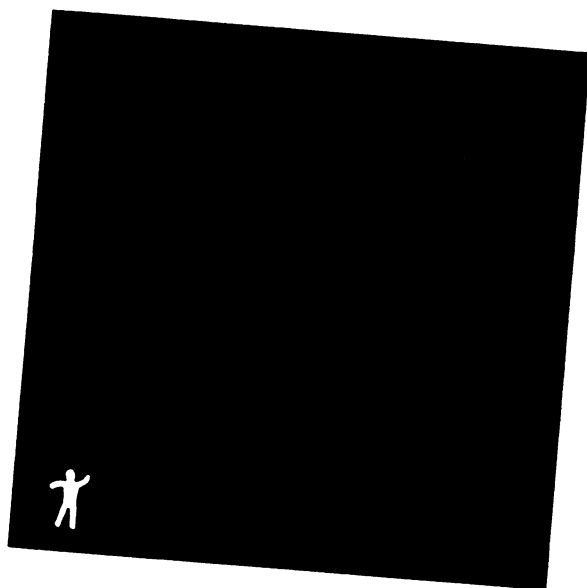

Each capsule contains ferrous sulphate distributed among hundreds of specially coated pellets. These pellets release only a small amount of iron in the stomach, where irritation is most likely to occur. The rest is put where it does most good and least harm—in the small intestine, where iron absorption is greatest. In this way, ferrous sulphate is assimilated far more efficiently than in standard presentations. Better use is

made of less iron, and as a result gastro-intestinal irritation is minimal.

Each 'Feospan Spansule' sustained-release capsule contains 150 mg. exsiccated ferrous sulphate and 3 mg. aneurine hydrochloride (Vitamin B₁₂).

'ICIPEN' in Winter Infections

"The nearest approach to the activity of penicillin G against important pathogenic organisms such as haemolytic streptococci and pneumococci is that of penicillin V."

Brit. med. J., 1960, ii, 1695.

This recent study confirms that penicillin V retains a prominent place in the oral treatment of penicillin-sensitive infections.

'Icpen' tablets provide effective therapy for all these infections. The tablets each contain 300 mg. potassium penicillin V and, taken three times a day, they provide therapeutic blood levels adequate for treatment.

The basic N.H.S. cost of one day's prophylaxis, namely 1 tablet twice daily, is 1/6½d. This represents a substantial saving in cost compared with other antibiotics.

'ICIPEN' is easily remembered, easily written and only one strength of tablet is supplied.

a fresh start in corticosteroid therapy

Betnelan

the entirely new
anti-inflammatory steroid

Betnelan names betamethasone, an entirely new compound developed in Britain by Glaxo Laboratories Ltd. It is effective in low doses in acute asthma, severe eczema, severe allergic urticaria, shock and other conditions for which corticosteroids are indicated systemically. Betnelan is devoid of salt retention activity, has negligible effect on potassium balance, causes no mental depression, has no muscle weakening effect and shows promise of clinical superiority in other respects.

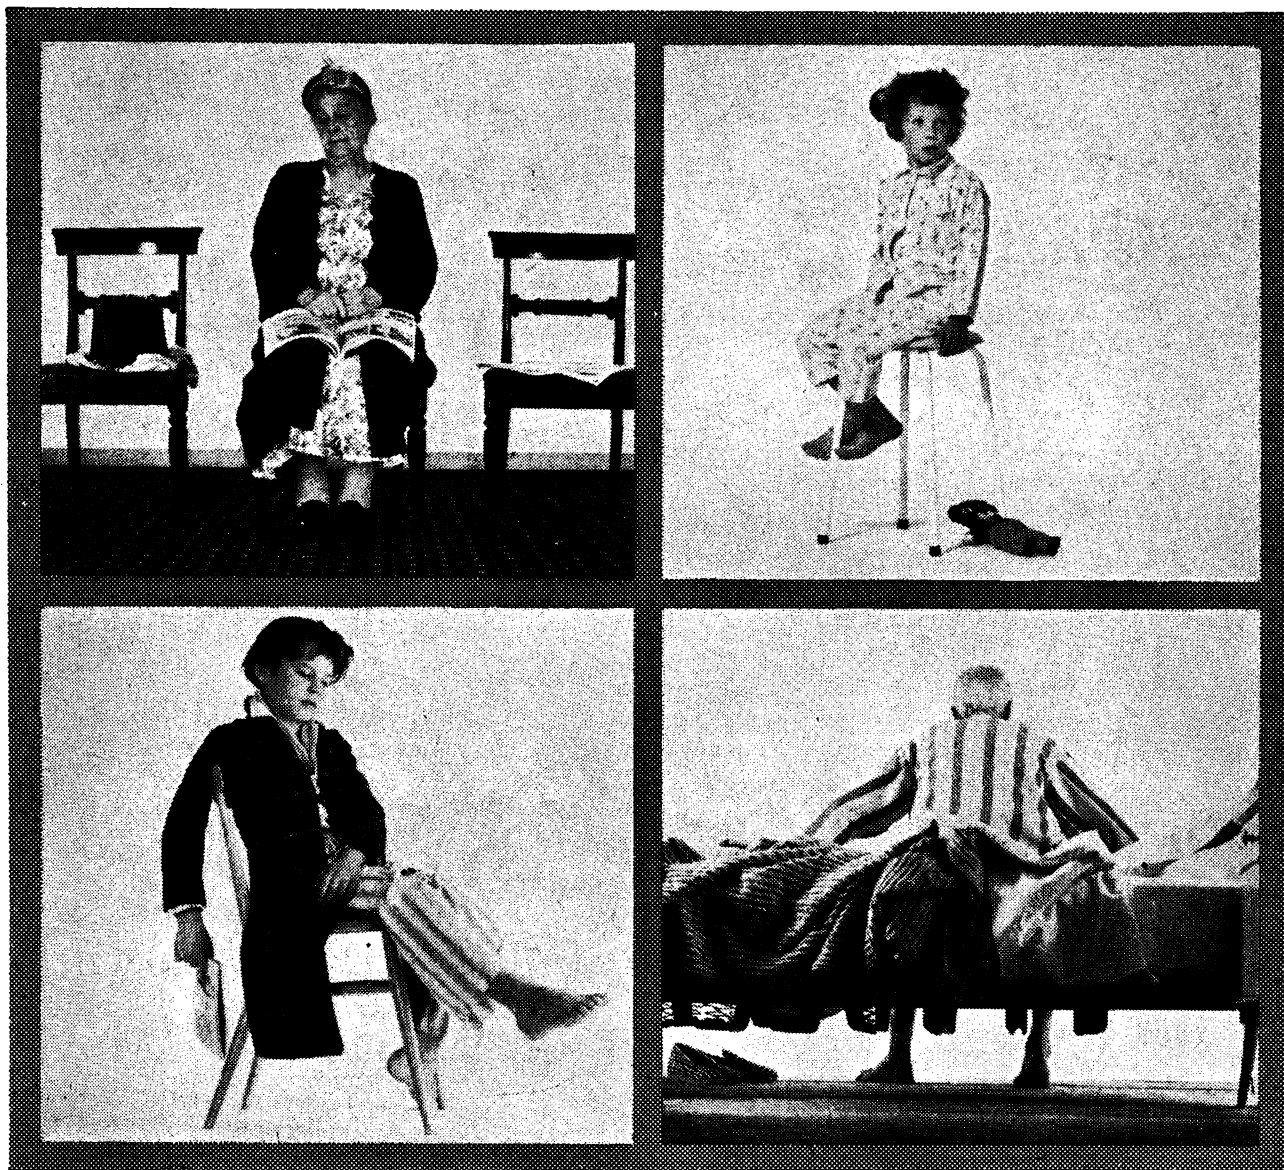

Each tablet of Betnelan contains 0.5 milligram betamethasone and for short-term therapy a "2:1:½" dosage scheme is suggested. For example, 2 tablets t.i.d. for 2 days followed by 1 tablet t.i.d. for 2 days and ½ tablet t.i.d. for 2 days. For maintenance, dosage need be no more than ½ tablet twice daily.

The merits of betamethasone derive from its unique chemical structure formed by introducing a methyl group, (CH₃), in the beta position on the molecule of 9-fluoro prednisolone. This represents more than 20 new stages of manufacturing complexity.

Volume I—now ready**PYE'S SURGICAL HANDICRAFT**

18th Edition in 2 volumes

Edited by HAMILTON BAILEY

In this recast edition the text has been brought up to date and the illustrations for the most part re-made and new ones included. The format has been altered and the appeal of the book will be widened by its issue in two small handy volumes—Vol. I, General; Vol. II, Special.

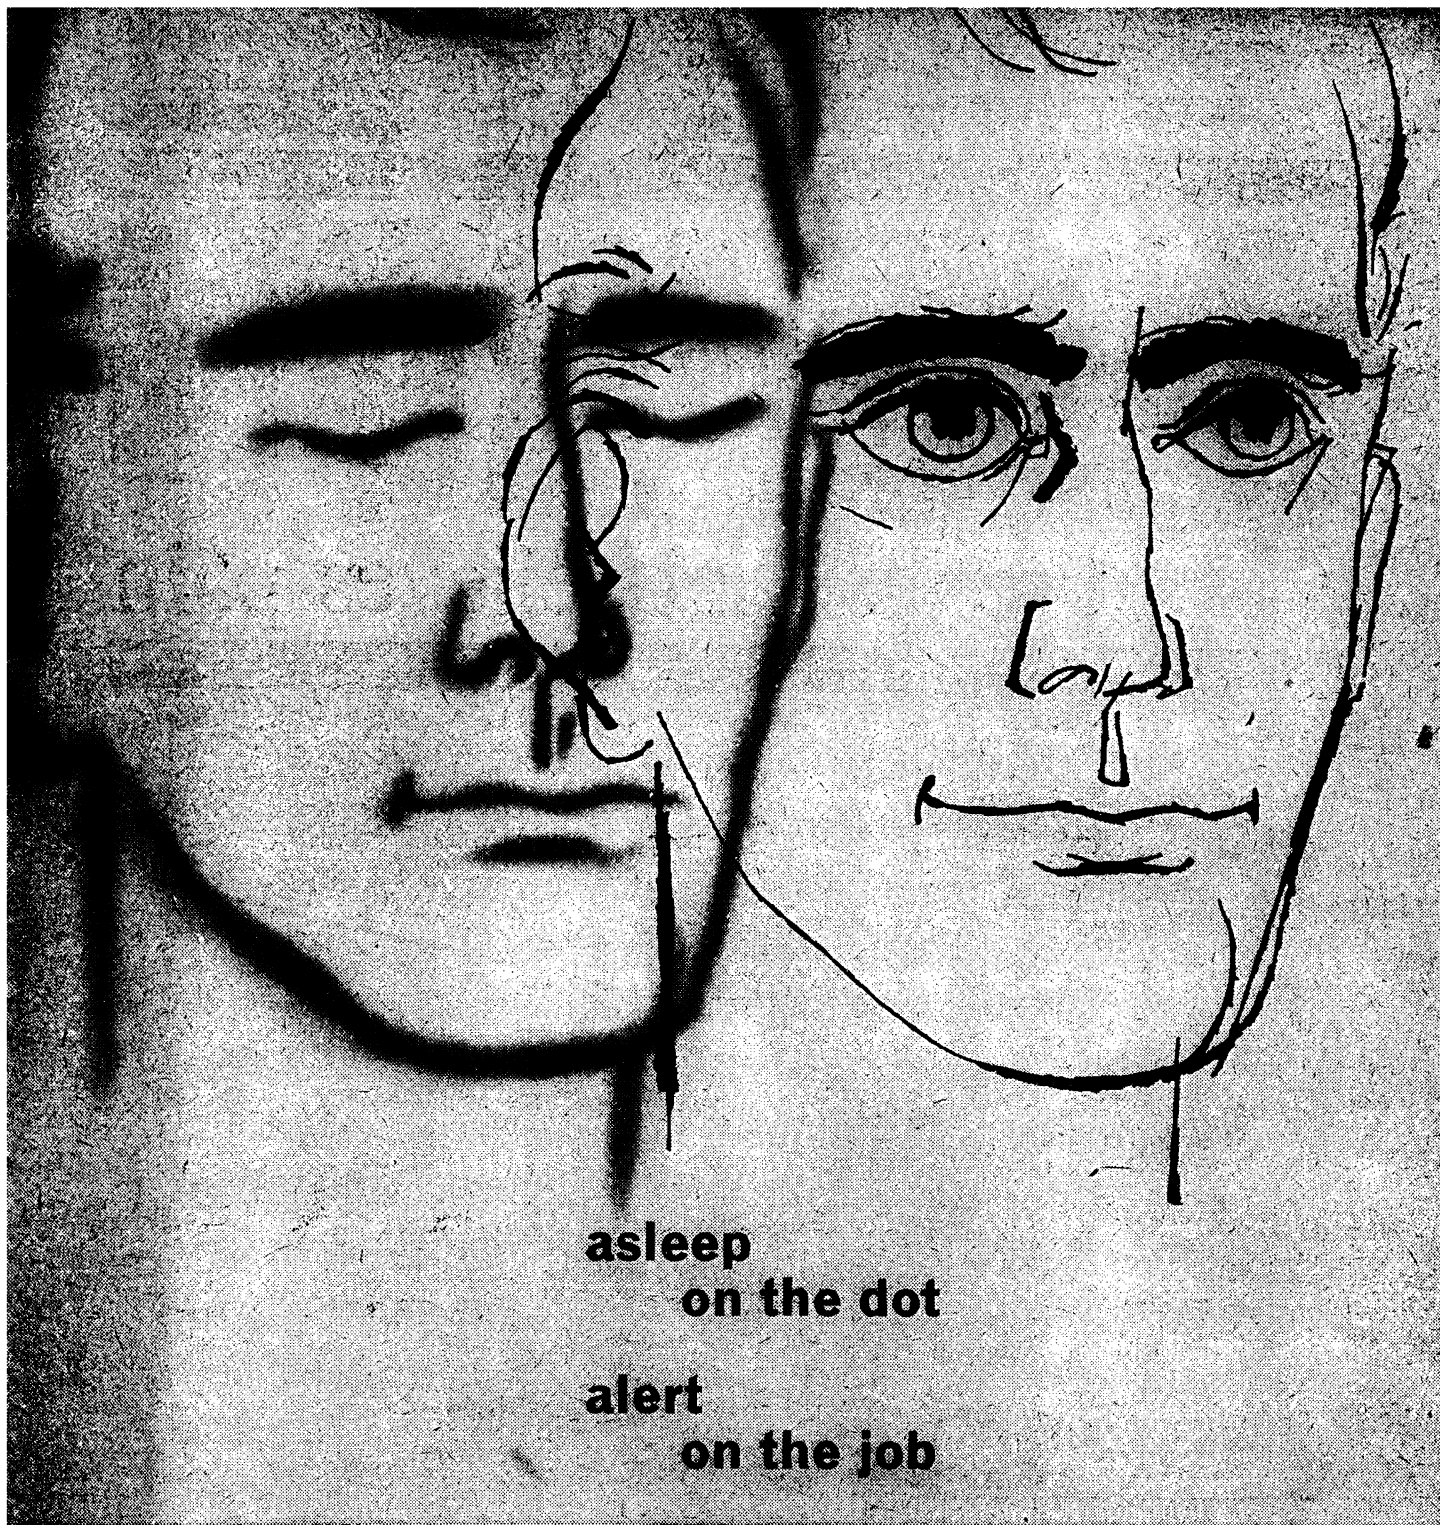

In many instances the medical student will purchase Volume I, there to find information of a practical character which he is expected to know, but on which, in these days of a crowded curriculum, he receives little or no specific instruction. Likewise the student nurse aiming to specialize in general surgery will discover in the pages of Volume I a great deal of just that information which is lacking in her manuals. When the medical student who uses Volume I qualifies, he will not fail to acquire Volume II, for therein will be found guidance in the extending scope of his activities.

Vol. I—504 pages with 414 illustrations. 40s., post 2s. 3d.

Two new additions to the WANDER range of Pasinah products will provide greater convenience for your patients during their tuberculotherapy and gain their closer collaboration because each will give a full daily regimen in only six cachets ●●●●●●

PASINAH-6PH **WANDER** **PASINAH-302**

for regimens of 10 g. Sodium PAS and 200 mg. Isoniazid.

Each 'Pasinah-6PH' cachet contains:

Sodium Aminosalicylate B.P. . . . 1.67 g.
Isoniazid B.P. 33.3 mg.
thus giving in 6 cachets the total daily drug
quantities (10 g. Sodium PAS and 200 mg.
Isoniazid) which the M.R.C. originally recom-
mended to be given in eight '10PH' cachets.

for regimens of 12 g. Sodium PAS and 300 mg. Isoniazid.

Each 'Pasinah-302' cachet contains:

Sodium Aminosalicylate B.P. 2 g.
Isoniazid B.P. 50 mg.
thus giving in 6 cachets the above daily drug
quantities.

Note—For easier swallowing 'Pasinah-6PH' and 'Pasinah-302' cachets are smooth, without sharp edges.

*℞ 'PASINAH-6PH' and 'PASINAH-302', and reduce the known dangers which may result from drug default. Flexibility of single dosage is maintained: 3 cachets twice daily or 2 cachets three times daily, according to your instruction.
Packs: Tins of 180 cachets (30 days' supply) and 540 cachets (90 days' supply) packed in daily units of 6 cachets.*

PERIFENIL

for the patient with Angina

FOR THE ANGINA

Peritrate is an established coronary vasodilator, increasing coronary blood flow and maintaining its effect for 4 to 5 hours. Nardil, perhaps by virtue of its MAO inhibitory action, also increases coronary blood flow and cardiac output.

FOR THE PATIENT

Nardil, the exemplar of the newer anti-depressants, relieves the depressive or psychosomatic element seen in many anginal patients.

Both the constituents of Perifenil have just received the cachet of official approval, for it is proposed to include monographs on both substances in the 1963 British Pharmacopoeia.

Each Perifenil tablet contains:—

Peritrate (pentaerythritol tetranitrate) 20 mg.

Nardil (phenelzine) 7.5 mg.

DOSAGE

One tablet four times a day before meals.

in the treatment of peptic ulcer

has particular advantages

ROTHER achieves a high cure rate and often gives effective control of even refractory chronic cases which have resisted other treatments.

ROTHER in many cases obviates the need for hospitalization or surgical intervention.

ROTHER helps patients to keep ambulant and symptom-free with a minimum of medication and with few, if any, dietary restrictions.

ROTHER in general practice enables the physician to take adequate care of his gastric cases without frequent or prolonged supervision.

ROTHER has no known side effects.

ROTHER requires no supplementary medication such as sedatives or anti-spasmodics.

ROTHER shows a saving in cost when compared with conventional methods of treatment.

The modern method of relieving nasal and respiratory congestion is simply the swallowing of 'Actifed' Tablets (or Syrup for children). These products bring safe, rapid and prolonged relief without risk of secondary engorgement or inhibition of ciliary activity.

'Actifed' Tablets and Syrup contain triprolidine hydrochloride and pseudoephedrine.

'Actifed' Compound Linctus combines the properties of 'Actifed' with the cough suppressant action of codeine phosphate. It is particularly useful if the cough is associated with respiratory congestion, e.g. in the common cold or in bronchial asthma.

LUCY BALDWIN APPARATUS FOR OBSTETRIC ANALGESIA

The Lucy Baldwin Apparatus is designed for the administration of nitrous oxide and oxygen mixtures for analgesia in obstetric practice. Gas mixture, which may be varied between 70% nitrous oxide/30% oxygen and 100% oxygen, conforms accurately to the value selected on the control dial no matter how draw-off conditions may change. The analgesic properties of nitrous oxide may thus be exploited to the full whilst at the same time maintaining adequate oxygenation. The gas mixture flows only in response to the patient's inspirations and safety cut-off valves eliminate any possibility of inhalation of pure nitrous oxide in the event of undetected failure of the oxygen supply. We shall be glad to send you illustrated literature on request.

PARENTROVITE IN GENERAL PRACTICE

Parentrovite, a high potency injectable preparation of the vitamin B complex with vitamin C, is being found of increasing usefulness in general practice. Introduced originally for the treatment of acute psychiatric emergencies such as coma or delirium from alcohol or drug overdosage, it has since been found to be of much wider application for conditions not uncommonly met in patients being nursed in their own homes. Many a patient can now, with appropriate dosage, be kept at home instead of having to be admitted to a general or a mental hospital.

The formula is based on the fact that normal cerebral function depends on the oxidation of glucose and that any interference with the underlying biochemical mechanisms can cause symptoms of mental disturbance. Severe infections, burns, trauma, cerebral vascular accidents, surgical operations and "stresses" of all kinds can be as potent as drugs and alcohol in causing interference with the enzyme systems responsible for glucose oxidation and resultant failure of return to health.

To reverse such changes and to restore normal cerebral function, massive doses of the B vitamins and ascorbic acid are needed—doses out of all proportion to normal nutritional needs. The vitamins are used here not as nutrients but as potent drugs employed pharmacologically.

Conditions Reported Responsive to Parentrovite

The after-effects of influenza, pneumonia and other severe infections,
Post-operative depression and confusion,
Physical and mental disability after cerebral vascular disorders,
Alcoholism, acute and chronic,
Habituation to barbiturates,
Debility with loss of memory in old people.

Parentrovite

tiglyssin

tiglyssin

brand tigloidine hydrobromide
for relief of spasticity and spasms

non-toxic

free from side-effects

Tigloidine is related to atropine: it has, however, almost no anti-cholinergic activity, but has the atropine-like action on muscle described as 'delayed recovery'—characterised by quick fatigue.

A 'double-blind' trial showed relief of spasticity and spasms associated with paraplegia due to spinal cord injury. The patients were more cheerful and easier to manage.

A similar trial in Disseminated Sclerosis was of benefit to about half the patients though the full therapeutic effect may take up to three weeks to develop. Good results are reported in other degenerative Upper Motor Neurone Diseases.

The effect of 'Tiglyssin' is palliative. Apart from relieving spasticity and spasms, which helps rehabilitation and reveals any useful remaining function, patients become more cheerful and comfortable—most important, nursing is made easier.

INDICATIONS :

Spasticity and spasms associated with :

- partial or complete rupture of the cord.
- disseminated sclerosis.
- transverse myelitis.
- cerebro-vascular accidents.
- subacute combined degeneration of the cord.

The therapeutic daily dose for adults is 1-2 gm. divided into three, with meals. An initial daily dose of 0.75 to 1.0 G. is suggested, and this should be slowly increased until no further improvement occurs or until mild atropine-like effects appear.

SALT-FREE MARMITE

Salt-free Marmite is an unsalted yeast extract which has in the past been supplied chiefly to hospitals, but is now available through chemists in 4 oz. and 8 oz. jars. Salt-free Marmite is suitable for inclusion in low-sodium diets and there is, in fact, a growing demand for this extract from patients who have to adhere to a salt-free regime.

Salt-free Marmite adds a pleasant piquant flavour to the rather monotonous dishes permitted in low-sodium diets. Moreover, it is a source of all known factors of the vitamin B complex and its high potassium content is of importance to patients on certain oral diuretic drugs which tend to deplete the potassium stores of the body.

EFFICIENCY ECONOMY IN OXYGEN THERAPY

WITH AN ENTIRELY
NEW TYPE OF
DISPOSABLE MASK

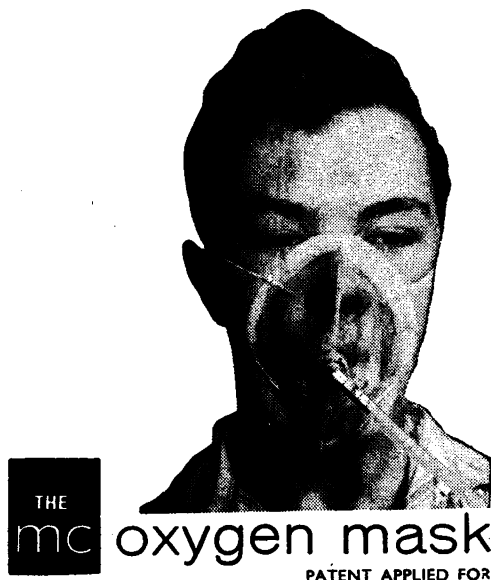

Rate of flow of oxygen 2 litres/minute. This oxygenates the blood in all cases except where a shunt is present.

No accumulation of carbon dioxide. Due to its size, shape and position of oxygen inflow pipe, there is an organized movement of gases. **Controlled percentage of inspired oxygen.** This is of extreme importance in respiratory failure, where CO₂ narcosis must be avoided. The MC Mask can oxygenate the blood without increasing the level of CO₂.

Transparent—lips can be seen.

Oxygen economy. The rate of flow of 2 litres/minute results in more than 60% longer duration of oxygen cylinders and saving in hire and refill cost. The MC Mask can be used quickly and effectively by the ambulatory patient.

BRONCHITIS

The well established formula for chronic bronchitis is TERCOLIX. This dislodges the habitual mucoid sputum; relieves wheeziness, breathlessness and distressing fits of coughing; makes expectoration easy by liquifying tenacious mucus. Each teaspoonful contains Codein Phosph. $\frac{1}{4}$ grain combined with Terpin Hydrate, Menthol, Pine and Eucalyptus oils to provide a warm, soothing, sedative effect. Dosage: Two teaspoonfuls in warm water, before retiring—sipped slowly—free the air passages of accumulated mucus and ensure a good night's sleep. Where the critical point has been reached and the bronchial tubes are swollen, soggy and unduly sensitive, daily maintenance doses are strongly recommended. Samples for clinical trial are available on request.

WESSEX REGIONAL HOSPITAL BOARD**SENIOR REGISTRAR IN JUVENILE
PSYCHIATRY**

required at the Regional Adolescent Psychiatric Unit and St. James' Hospital, Portsmouth. This is a four-year Senior Registrar appointment designed to offer comprehensive training and experience in both child and adolescent psychiatry. The first two years in post will be at the new 30-bedded Adolescent Psychiatric Unit, Leigh House, Chandler's Ford, near Winchester. Leigh House offers in-patient treatment for both male and female adolescents with disorders of the neurotic type, and is associated with outside children's psychiatric clinics, where additional training and experience will be available. The second two years will be spent in the Department of Child Psychiatry, St. James' Hospital, Portsmouth, which comprises an observation section, a therapeutic hostel, and out-patient clinics. There is close liaison with the general hospital and paediatric services, and experience will also be available in the E.E.G. Department and in child neurology. Opportunities for original investigations will be provided in both hospitals. Candidates should possess the D.P.M. or equivalent qualification, and preferably should have experience in adult psychiatry or in paediatrics. Further information may be obtained from the Senior Administrative Medical Officer to the Board. Canvassing will disqualify, but arrangements to visit the hospitals may be made with the Secretaries of the Eastleigh Sub-Group of Hospitals, Mount Hospital, Bishopstoke, Eastleigh, Hants, and of the St. James' Hospital, Milton, Portsmouth. Applications (seven copies), stating age, experience, qualifications, and the names and addresses of three referees, should reach the Secretary of the Board, Highcroft, Romsey Road, Winchester, not later than January 13, 1962. ST. ANDREW'S HOSPITAL FOR NERVOUS AND MENTAL DISORDERS NORTHAMPTON

President: The Earl Spencer.
Medical Superintendent:

Thomas Tennent, M.D., F.R.C.P., D.P.H., D.P.M.
This private hospital receives patients, both male and female, suffering from nervous and mental disorders, including alcoholism and senile illnesses. The fees range from fourteen guineas per week. Private rooms with special nurses can be provided, either in the hospital or in one of the villas in the grounds. The hospital is situated in 130 acres of pleasant grounds, which provide all recreational facilities. These include a nine-hole golf course, sports ground, tennis courts, etc.

WANTAGE HOUSE

This is a separate reception unit to which patients may be admitted. It is equipped for the complete investigation of nervous and mental disorders by the most modern methods. All forms of treatment are available. It contains laboratories for biochemical, bacteriological and pathological research.

MOULTON PARK

Some two miles from the main hospital is the farm of approximately 600 acres. Occupational therapy is a feature of this branch, and patients are given every facility for occupying themselves in farming, gardening, fruit growing, etc.

BRYN-Y-NEUADD HALL

The seaside home of the hospital is beautifully situated in a park of 330 acres at Llanfairfechan, amidst the finest scenery in North Wales. On the north-west side of the estate a mile of sea coast forms the boundary. Patients may visit this home for a short seaside change or for longer periods. The hospital has its own private bathing house on the seashore.

Summary of Clinical Report

"in a series of 115 patients treated with ferrous aminoacetosulphate ('plesmet') the incidence of gastro-intestinal symptoms was 1.7%. In view of its minimal toxicity and relatively low cost, it is suggested that this iron chelate preparation is a most effective preparation for the treatment of iron-deficiency anaemia by the oral route."
