'Palaprin' presents an entirely new approach to salicylate therapy because it is hardly affected by the acid gastric juice – but it is released in the alkaline intestinal medium. This 'by-pass' action of 'Palaprin' dramatically reduces the gastric irritation which so often precludes the prolonged use of aspirin even in the buffered or 'soluble' forms.

**Extract:** "Constipation presents a considerable institutional problem in geriatric care.

"In a forty-two-day therapeutic evaluation of a standardized senna preparation in tablet and granule forms (Senokot) given to 40 chronically constipated patients ranging in age from 55 to 93 years, constipation was corrected in 29 and improved in 11 patients. In the last three weeks of the study, normal stools were maintained in 27 patients with intermittent doses every two or three days. The need for enemas was eliminated in 10 of the 20 patients and sharply reduced in 9 of the remaining 10. Recurrent faecal impactions in 11 patients were prevented during the course of therapy."

## THE LIGHT AND THE DARK

Life has its lighter moments. But the man who lives under a severe mental or emotional strain has little share in them. For he is overwhelmed by his worries and anxieties, and gives way to feelings of despair, despondency, or hopelessness.

In these dark moments of his life, he needs tangible help.

'Drinamyl' can provide that help. It exerts a balanced calming and mood-elevating effect which is invaluable in treating such patients. 'Drinamyl' rapidly brings about a renewed sense of well-being that enables the patient to carry out normal daily activities calmly and confidently. In clinical use now for over a decade, 'Drinamyl' has become the standard treatment for mental and emotional distress in everyday life.

# BRONCHITIS

The well established formula for chronic bronchitis is **TERCOLIX**. This dislodges the habitual mucoid sputum; relieves wheeziness, breathlessness and distressing fits of coughing; makes expectoration easy by liquifying tenacious mucus. Each teaspoonful contains Codein Phosph.  $\frac{1}{4}$  grain combined with Terpin Hydrate, Menthol, Pine and Eucalyptus oils to provide a warm, soothing, sedative effect. Dosage: Two teaspoonfuls in warm water, before retiring—sipped slowly—free the air passages of accumulated mucus and ensure a good night's sleep. Where the critical point has been reached and the bronchial tubes are swollen, soggy and unduly sensitive, daily maintenance doses are strongly recommended. Samples for clinical trial are available on request.

## Trouble brewing

When they fall ill, old people living alone and often inadequately nourished present the doctor with a patient physically unprepared to withstand surgery. Patients like these can be built up to a more robust state with the help of 'Anapolon', the new anabolic agent. 'Anapolon' restores the metabolic balance and stimulates appetite. It helps to strengthen debilitated patients and shortens convalescence.

Whenever protein reserves are depleted, as in febrile or wasting disease, post-menopausal and senile osteoporosis, and surgical procedures especially in the elderly, decided benefit can be obtained from a course of 'Anapolon'.

CHILBLAINS

**ADAPRIN**

**Tablets for Chilblains**

Among predisposing factors to chilblains are assumed to be defective peripheral circulation and diminished coagulability of the blood.

Each Adaprin tablet contains nicotinamide (50 mg.) and acetomenaphthone (10 mg.) as the logical drugs to counteract these defects. Nicotinamide is preferred to nicotinic acid because of the unpleasant symptoms of rapid vasodilatation associated with the latter compound. Adaprin is non-toxic and may safely be given to children and adults for long periods for prevention. Relief from existing chilblains may be expected in a few days. In containers of 25, 100, and 500 tablets.

**PAVACOL**

**Syrup and Pastilles for Coughs**

**Pavacol Syrup (Improved Formula)**—a distinctively flavoured cough remedy containing papaverine and pholcodine. Papaverine relaxes the bronchi by direct action. Pholcodine, the new ingredient, is a central cough suppressant which is as effective as heroin (diamorphine), but without the disadvantages of that dangerous drug. Pholcodine is much less toxic even than codeine, and it does not cause constipation. Pavacol Syrup and Pavacol Diabetic Syrup are supplied in bottles of 4, 16 and 80 ozs.

**Pavacol Pastilles**—contain the powerful, wide-range, quaternary ammonium antiseptic, Octaphen, together with the antitussive compounds, papaverine and codeine, and the demulcents and volatile oils present in Pavacol Syrup. For the prophylaxis and treatment of bacterial and fungal infections of the mouth and throat—and for symptomatic treatment of cough. In tins of 24 pastilles.

# HERE IS A BASIC POLICY THAT MIGHT ERADICATE MALARIA

These words\* pay striking tribute to the exceptional value of 'DARACLOR', especially in mass eradication schemes.

Fortnightly doses of 'DARACLOR' (pyrimethamine and chloroquine) were given to 1,200 Africans in Kenya. The parasite rate dropped from 70 per cent to zero in less than 3 months. The author comments: "... this method has the advantage of being much cheaper than the insecticidal approach . . . here is a basic policy that might eradicate malaria from Equatorial Africa."

'DARACLOR' is effective both as a preventive and as a remedy for the acute attack. *The medical practitioner can therefore prescribe one product to meet all prophylactic and therapeutic demands.*

'DARACLOR' is of low toxicity and is suitable for all patients, including babies and expectant mothers.

## Often two sides of the same coin

### depression and anxiety

Depression may frequently be associated with a strong anxiety component, and *vice versa*. Thus, in practice, the distinction is frequently blurred, and may escape even the most expert diagnosis. Difficulties in diagnosis have led to the misuse of tranquillisers—particularly their use in depression masked by anxiety. In such cases the underlying depression may be deepened. On the other hand the high failure rate of many antidepressants is due to their inability to control the concurrent anxiety. 'Tryptizol', a single compound, treats the depression and also the anxiety and agitation that commonly accompany it.

# Safety *with efficiency* in antiseptics

Long and comprehensive experience has fully demonstrated the value of Dettol in general practice, obstetrics and surgery.

**It is well-tolerated on the skin and tissues in high concentrations.**

**It is an efficient bactericide :—**

Dettol will destroy the following organisms in 10 minutes at 20 degrees C. in the dilutions given:—

Staph. aureus:	.....	.....	.....	1 in 200
S. typhi:	.....	.....	.....	1 in 350
Strept. pyogenes:	.....	.....	.....	1 in 500
Bact. coli:	.....	.....	.....	1 in 250
Ps. pyocyanea:	.....	.....	.....	1 in 40
Myco. tuberculosis:	.....	.....	.....	1 in 200
Sh. shigae:	.....	.....	.....	1 in 400

Different strains can vary widely in resistance, but the figures quoted are representative.

**Dettol efficiency is well maintained in the presence of organic material.**

A dilution of 1 in 50 will kill Staph. aureus in the presence of 25% blood in 5 minutes.

**It is compatible with soap.**

"Unlike the other antiseptics, Dettol appeared to have its activity increased by the presence of soap, and against Staph. pyogenes the effect was one of true synergism." (British Medical Journal, 28th July, 1956.)

**It is non-poisonous.**

**It does not stain linen, etc.**

**It is stable in solution.**

To restore  
full  
vigour

Whatever the illness, whether infection, metabolic disorder or a condition requiring surgical intervention, the patient needs full nutritional support for the restoration of health. And this implies more than a good mixed diet. Not only must the appetite be stimulated but the tissues must respond to the extra demands for full physiological activity, and this means supplying them with more than the usual intake of vitamins, especially of the B complex and ascorbic acid. For these purposes the three preparations BEFORTISS, BECOVITE and OROVITE are designed, the elixir being pleasantly flavoured and acceptable to patients of all ages.

**Befortiss** for maintenance *B-Complex* therapy  
Tablets (100). 1 ml., Ampoules (boxes of 5). Elixir (6 fl. ozs.)

**Becovite** for intensive *B-Complex* therapy

## The penicillin with a tradition

Crystapen is no new and virtually untried antibiotic—it's a product that has proven itself through and through during years of daily use in hospitals, clinics and doctors' surgeries the world over. Crystapen is the *soluble* form of penicillin—sodium penicillin. It dissolves readily when sterile water is added, giving a clear, pure solution. Solutions can be kept for 24 hours at room temperature or seven days if refrigerated.

Crystapen gives a high destructive level of penicillin in the blood and produces a swift clinical response. It is essential whenever a considerable overspill of penicillin from blood to tissues is required—that is whenever infections are acute, not readily susceptible or in less accessible areas. A single large daily dose has been shown by long experience to be the most effective and least expensive.

Its speed of action, certainty and safety (as well as outstanding economy) make Crystapen the logical first choice for treating most bacterial infections.

The modern method of relieving nasal and respiratory congestion is simply the swallowing of 'Actifed' Tablets (or Syrup for children). These products bring safe, rapid and prolonged relief without risk of secondary engorgement or inhibition of ciliary activity.

'Actifed' Tablets and Syrup contain triprolidine hydrochloride and pseudoephedrine.

'Actifed' Compound Linctus combines the properties of 'Actifed' with the cough suppressant action of codeine phosphate. It is particularly useful if the cough is associated with respiratory congestion, e.g. in the common cold or in bronchial asthma.

# EMERGENCY SPLINTING

In the emergency treatment of fractures in remote locations or at the scene of large-scale accidents—under any conditions in fact where hospital treatment may be delayed—'gutter' splints made from Gypsona slabs are more adaptable, more efficient and more easily applied than orthodox wooden splints.

- \* **easy application**
- \* **conformity to shape of limb**
- \* **strong, rigid support**
- \* **reduced risk of complications**
- \* **minimal pain in transit**

Gypsona emergency splinting has been devised to aid the transport of fracture casualties from accidents over long distances. Gypsona splints are not intended to replace plaster casts, to bear weight nor to give long term support to fractures after reduction—although some fracture units have in fact used them successfully for on-the-spot treatment followed up by X-ray control. Unlike casts, Gypsona splints do not encircle the limb. A typical splint consists of two or three gutters made from slabs applied longitudinally and kept in position by a spiral cotton bandage which can quickly be slit open and re-applied if necessary.

# with **Gypsona**

Simple, standard techniques are described in the booklet 'Emergency Splinting with Gypsona'. Single copies or quantities for tutorial purposes are available free to the medical profession. The 16 mm. sound and colour film 'Emergency Splinting' is available on loan.

*Proc. R. Soc. Med., 1958, 51, 1063.*

Nulacin tablets, dissolved slowly in the mouth, provide intragastric milk-alkali drip therapy, obviating the necessity for a tube. Treatment is easy and convenient for the ambulant as well as the bedridden patient. Nulacin may be relied on to provide an effective treatment for peptic ulcer as well as other conditions associated with gastric hyperacidity. No undesirable

side effects occur and no cases of alkalosis or acid rebound due to Nulacin have ever been reported. The safety and effectiveness of Nulacin therapy has been proven by *in vivo* clinical work carried out in many countries.

Nulacin tablets have no B.P. equivalent. The basic N.H.S. price of the 25-tablet tube is 2/-.

## THE MEDICAL SERVICE OF THE ROYAL NAVY

### VACANCIES FOR MEDICAL OFFICERS

The Royal Navy offers Short Service Commissions of 3 or 5 years' duration to registered medical practitioners. Opportunity exists for transfer to Permanent Commission, by selection, after one year's service. There are facilities for postgraduate study and training for higher degrees with a view to specialization, in the case of officers entered on 5-year short service and on Permanent Commissions. Specialities include Underwater Physiology, Nuclear and Aviation Medicine, as well as the usual clinical subjects.

**Pay:** On entry a Surgeon Lieutenant married and over the age of 25 years will receive £1,195, with annual pay increments thereafter and a tax-free ration allowance of £112 p.a. if unaccommodated. Additional allowances are paid for children's education, disturbances involving essential moves of family, and for service overseas.

#### Gratuities and Pensions:

Gratuities are payable on completion of short service commissions:

3 years' service £1,500 tax free

5 years' service £3,000 tax free

Those officers accepted for Permanent Commissions receive £1,500 (Taxable).

Service becomes pensionable after 16 years.

**POSTGRADUATE MEDICAL EDUCATION**  
**COMBINED CLINICAL AND MEDICAL SCIENCES COURSE**

Graduates in Medicine and Surgery are invited to make application for a combined Clinical and Medical Sciences Course to be held in Queen's College, Dundee, from October, 1962, to March, 1963.

All those taking the Combined Clinical and Medical Sciences Course will have:

(1) A Clinical attachment in the special subject of their choice. In 1962-63 the following subjects will be offered:

General Surgery	Haematology	Psychiatry
Cardiology	Infectious Diseases	Ophthalmology
Cardio-Vascular Surgery	Respiratory Diseases	Oto-Rhino-Laryngology
Endocrinology	Obstetrics	Orthopaedics
Dermatology	Gynaecology	Radiology
	Paediatrics	

(2) A supervisor who would guide their reading and laboratory work in relation to the specialty, and  
 (3) All would attend the medical sciences course.

The number accepted for this educational programme will be small and only one or at the most two candidates will get an attachment in each special subject.

The Eastern Regional Hospital Board will give the successful candidate an honorary clinical assistantship within the Unit where he is studying the special subject of his choice.

The Supervisor will not only guide the reading and laboratory work of the student but will in appropriate cases allow him to take part in current research programmes.

The objective of the medical sciences course which all the postgraduates, whether medical, surgical, or other specialists, will follow is to bring the postgraduate student up to date on current trends in the medical sciences which are of importance to future medical developments.

In addition to this course, the Medical School offers weekly open postgraduate lectures by distinguished visitors and a course of lectures on scientific methods which postgraduate students in the school will be free to attend.

The fee for the course will be £36. Applications should be submitted before September 1, 1962, to the Dean of the Faculty of Medicine, University of St. Andrews, Queen's College, Dundee, from whom further information may be obtained.

**POSTGRADUATE COURSE IN ANATOMY AND PHYSIOLOGY**

Graduates in Medicine and Surgery are invited to make application for a Course in Anatomy and Physiology (including Biochemistry) to be held in the pre-clinical Departments of St. Salvator's College, University of St. Andrews, from October, 1962, to March, 1963.

The number of graduates accepted for this course will be small. They will be attached to, and expected to take some part in, the work of the Anatomy and Physiology Departments.

Instruction will be given, formally and informally, in systematic, practical, and applied aspects of Anatomy, Physiology, and Biochemistry, and students will be afforded opportunity of gaining experience in methods to be individually selected. They will be required to take part in the tutorial discussions both with members of staff and with medical undergraduates, and to make themselves familiar with current teaching.

The Anatomy Department is responsible for the teaching of Histology, and has particular interest in Bone, Arthrology, Heart, and Central Nervous System.

The Department of Physiology and Biochemistry operates a course in Applied Physiology and Biochemistry for senior medical students, and is equipped to supervise techniques in Neurophysiology and Neurochemistry, Protein and Carbohydrate Chemistry, and various aspects of Medical Biophysics.

The fee for the course will be £36. Applications should be submitted before September 1, 1962, to the Dean of the Faculty of Medicine, University of St. Andrews, Queen's College, Dundee, from whom further information may be obtained. (6208)
