LEDERMYCIN

With the dramatic introduction of AUREOMYCIN† chlortetracycline in 1948, Lederle Laboratories not only provided the medical profession with the first tetracycline — it established its leadership in broad spectrum research. Today this lead is more apparent than ever. After seven years of extensive clinical use ACHROMYCIN* tetracycline is now the most widely prescribed tetracycline — a striking tribute to its effectiveness and reliability in all its many forms of administration. Now, LEDERMYCIN* demethylchlortetracycline the latest and by far the most active of the tetracyclines is emerging as a distinct refinement in tetracycline therapy. Characterized by its increased potency and simplicity of dosage, LEDERMYCIN* carries on a worthy tradition of progress in medical research.

'Palaprin' presents an entirely new approach to salicylate therapy because it is hardly affected by the acid gastric juice – but it is released in the alkaline intestinal medium. This 'by-pass' action of 'Palaprin' dramatically reduces the gastric irritation which so often precludes the prolonged use of aspirin even in the buffered or 'soluble' forms.

For the man whose job causes worry— and gastric distress

People with worrying and exacting jobs often suffer from gastric disorders. 'Stelabid' is specific for such disorders. 'Tyrimide', the powerful and long-acting anticholinergic component in 'Stelabid' relieves pain in gastro-intestinal disorders; it inhibits hypermotility and spasm and reduces excessive gastric secretion. The 'Stelazine' constituent in 'Stelabid' prevents nausea and vomiting and allays the mental stress and strain that can provoke and aggravate gastric disturbances. Exceptionally long-acting, 'Stelabid' ensures night and day relief of pain on a convenient b.d. dosage regimen.

**STELABID —relieves physical pain and mental strain

Each 'Stelabid' tablet contains 1 mg. 'Stelazine' (brand of trifluoperazine) and 5 mg. 'Tyrimide' (brand of isopropamide). Available in containers of 30 and 250.

OXYPHENCYCLIMINE HYDROCHLORIDE

A new anticholinergic of unusually high potency with a *natural* prolonged action

Caridan—*is selectively effective*. Caridan acts mainly on the gastric secretions and gastric muscular spasm. It has very little effect in therapeutic doses on the pupil, salivary secretions or heart rate.

Caridan—*is potent*. The antisecretory action is about three times that of isopropamide iodide and six times that of propantheline bromide.

Caridan—*is long-acting*. It has at least four times the duration of action of propantheline bromide.

Caridan—*is convenient*. Because of its natural prolonged action Caridan need only be taken twice daily for 24-hour control.

Caridan—*is well tolerated*. Caridan produces few side effects and when these are encountered they are of a mild transient nature.

Indications. Caridan is indicated for the relief of pain and symptoms associated with gastric ulcer, duodenal ulcer, jejunal ulcer, functional bowel syndrome, biliary tract dysfunction, ulcerative colitis, and other gastro-intestinal disorders characterized by spasm, hypermotility and hypersecretion.

ASTHMA

Betnelan

Betnelan, the new oral steroid (betamethasone) developed by Glaxo, is particularly suitable for use with other measures in the treatment of severe asthma. Betnelan is not suggested for milder cases which are adequately controlled by other measures.

Periodic Acute Attack

Betnelan is indicated when the conventional management of asthma is interrupted by acute attacks. Short-term therapy with Betnelan should control the exacerbation and allow conventional measures to be resumed.

Severe Attack

In attacks of extreme severity (status asthmaticus) all recognised measures must be taken. Corticosteroid injections (Efcortelan Soluble or Predsol Injection) should be given initially, while at the same time oral treatment with Betnelan should be started. When there is no immediate threat to life, Betnelan alone will be found adequate.

Severe Chronic Asthma

When existing treatment gives only slight relief and the patient's activities remain restricted, Betnelan can be of special help. Continuous administration may be necessary and is well justified by enabling a reasonably useful life to be followed. Treatment should begin with a short, intensive course of Betnelan, using bronchodilators and other measures. Dosage of Betnelan should be decreased gradually until the minimum level is found for reducing symptoms to tolerable limits. Often this may be no more than half a tablet twice daily.

Hay Fever

In severe attacks, uncontrolled by normal therapy, the condition usually responds rapidly to short-term Betnelan therapy.

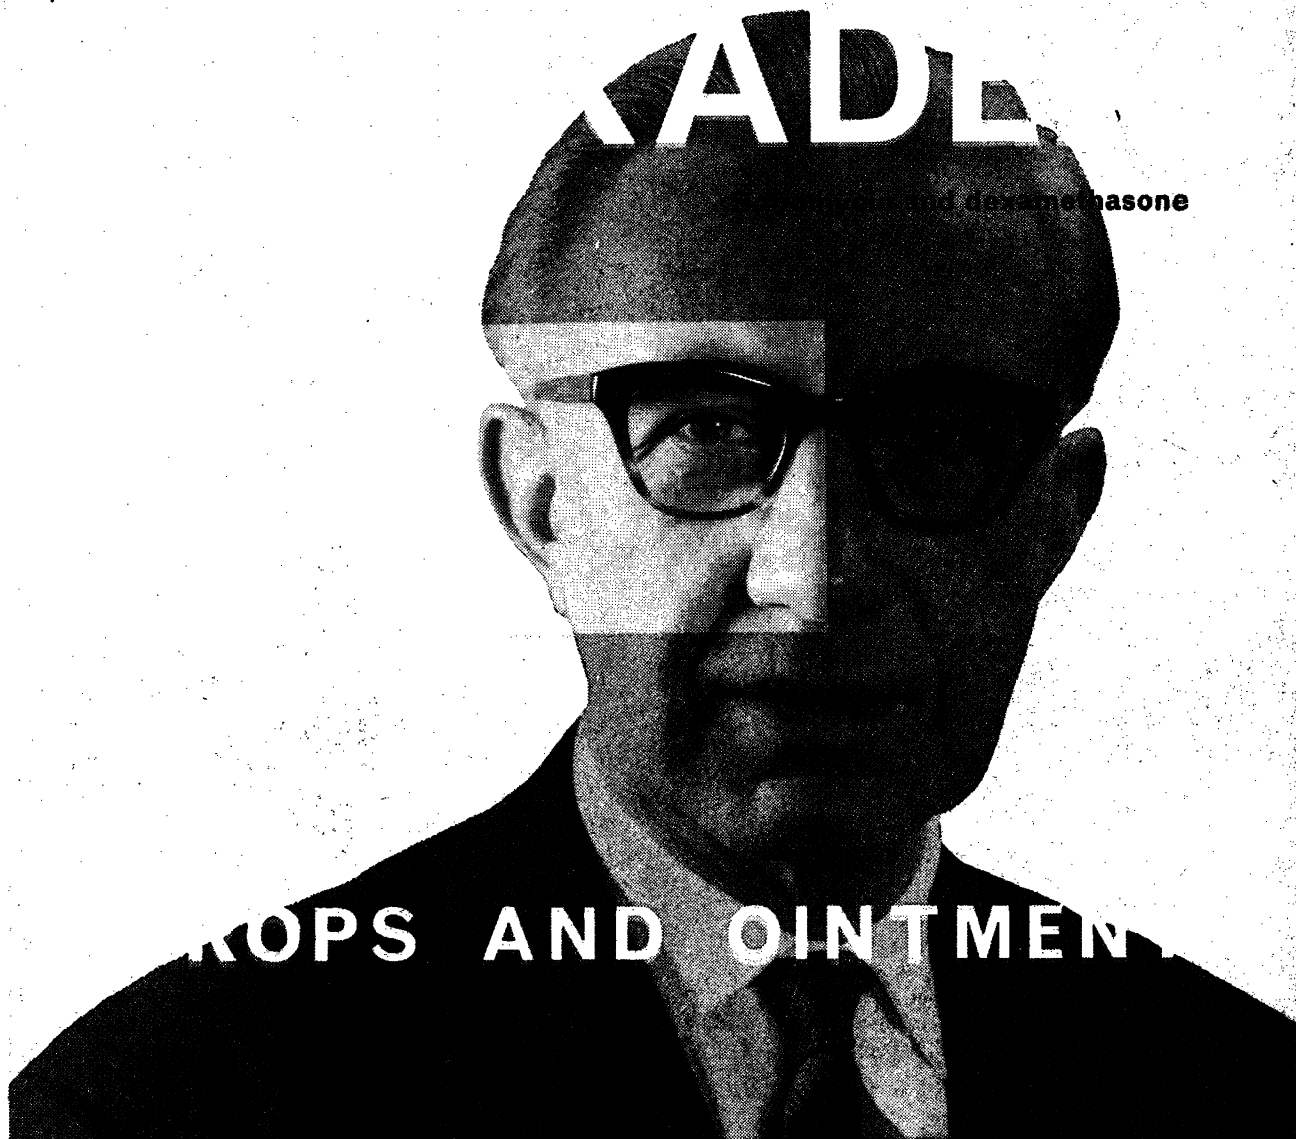

the new anti inflammatory steroid

Betnelan is presented as scored tablets containing 0.5 milligrams betamethasone in bottles of 30, 100 and 500.

romotal

TETRAHYDROAMINACRINE (TACRINE) HYDROCHLORIDE
'ROMOTAL' IS AN ADJUVANT TO MORPHINE; GIVEN
WITH 'ROMOTAL', MORPHINE PRODUCES ANALGESIA
WITHOUT UNWANTED SIDE-ACTIONS.

Tacrine has two groups of properties :

Central: stimulant to the central nervous system and respiratory centre.

Peripheral: anticholinesterase and anticholineacetylase actions, making Tacrine (1) a curare antagonist and (2) able to potentiate and prolong succinylcholine neuromuscular block.

A mixture of Tacrine and morphine provides freedom from pain without mental sluggishness or respiratory depression, morphine habituation and addiction develop more slowly, and withdrawal symptoms are absent.

INDICATIONS:

'ROMOTAL' + MORPHINE

1. When prolonged administration of a potent analgesic is needed, e.g. in painful malignant disease, painful advanced arthritis.
2. When respiratory depression or suppression of the cough reflex are undesirable, e.g. in post-operative pain, especially after thoracotomy or upper abdominal operations.

DOSE: The dose of morphine is that needed to give freedom from pain for at least six hours: of 'Romotal', that needed to keep the patient alert and clear-headed. In practice, a suitable starting dose is 15 mg. of morphine with 15 mg. of 'Romotal'; the morphine may be increased by 5 mg. stages as necessary but more than 15 mg. of 'Romotal' is rarely needed.

'ROMOTAL' ALONE:

3. As a respiratory stimulant in cases of poisoning by barbiturates or narcotics.
4. As a decurarising agent and succinylcholine potentiator.

DOSE: See special instructions.

HYDRATENE

HYDRATENE is a new complex which utilizes the time-proven value of Chloral Hydrate as a safe, effective, mild hypnotic, and Paracetamol, the modern analgesic that is singularly free from side effects or habituation.

It is a comprehensive hypnotic, safer than barbiturates, for insomnia when pain is present in either adults or children.

Presented in this compound form both the odour and taste of Chloral Hydrate are markedly reduced.

Dosage : 1-3 tablets as may be directed by the physician.

Available in packings of 25 and 250.

Basic NHS prices: 2/6 and 13/4.

Each Hydratene tablet contains the equivalent of

Chloral Hydrate	4 grains.
Paracetamol	6 grains.

-and that includes
her Anglepoise**

Progressive hospital managements reckon they're on a good thing in Anglepoise . . . have done so for years. It solves the bed lighting problem . . . the weakest patient can operate it at a finger touch . . . it can be put *exactly* where required . . . moved out of the way when not needed—at a finger touch. It doesn't disturb nearby patients and it is silent in operation.

Anglepoise comes in a variety of sizes and base fittings . . . table, wall and trolley. It has many practical uses in Surgery, Dispensary and Consulting Rooms. If you would like to know more about this 1001-angle lamp, write today for illustrated booklets—free on request from Sole Makers:

For a brighter outlook after 'flu

Those 'after 'flu blues' respond rapidly to the tonic effect of Minadex. Famous for over twenty years, Minadex has no official equivalent. It is a safe, effective and utterly reliable combination of vitamins A and D, iron, glycerophosphates and copper; its appetising orange flavour appeals to children and adults alike . . . even its price is a tonic!

Experience has indicated that the vehicle employed in the topical treatment of dermatological conditions may be as important as, or even more important than the medicament which it contains (*Practitioner*, 1960, 184, 610).

Lacto-Calamine, the vehicle for hydrocortisone in Cortoderm and Cortoderm-N is cooling, astringent and antipruritic. It is cosmetically acceptable and has stood the test of time.

You just dispose of the Steriseal syringe after use

THIS is the Sterile Disposable Hypodermic Syringe made by Shrimpton Steriseal Limited, Washford Mills, Redditch, Worcestershire, from 'Diakon' I.C.I. acrylic polymer. The Steriseal syringe contributes towards safety and time saving in the modern hospital.

The syringe is sterilised after assembly and sealed in an airtight pack until used. It is intended to be used once only, then destroyed, to avoid any possibility of cross-infection. No time or money is wasted on re-sterilizing.

'Diakon' is a material that can be moulded at low cost and high speed to tight dimensional tolerances. For this reason, light, accurately-formed and highly transparent syringes like the 'Steriseal' can now be made at a price that makes single-use an economic proposition.

'DIAKON' POLYMER

'Diakon' is the registered trade mark for the acrylic polymer manufactured by I.C.I.

BRONCHITIS

The well established formula for chronic bronchitis is **TERCOLIX**. This dislodges the habitual mucoid sputum; relieves wheeziness, breathlessness and distressing fits of coughing; makes expectoration easy by liquifying tenacious mucus. Each teaspoonful contains Codein Phosph. $\frac{1}{2}$ grain combined with Terpin Hydrate, Menthol, Pine and Eucalyptus oils to provide a warm, soothing, sedative effect. Dosage: Two teaspoonfuls in warm water, before retiring—sipped slowly—free the air passages of accumulated mucus and ensure a good night's sleep. Where the critical point has been reached and the bronchial tubes are swollen, soggy and unduly sensitive, daily maintenance doses are strongly recommended. Samples for clinical trial are available on request.

REFRESHER COURSE FOR GENERAL PRACTITIONERS

Third Collection with classified contents list to volumes 1, 2, and 3
Price 25s. (by post 26s. 9d.)

Each book contains a collection of sixty Refresher Course articles from the *British Medical Journal*. Each article, written by an acknowledged expert, has been revised by its author. The articles cover a wide range. Their object is to refresh the reader's memory of what is old and well-established and to tell him about new developments.

They are invaluable to general practitioners and residents as practical reference books, to specialists as a means of keeping in touch with developments outside their own field, and to final-year students as up-to-date and reliable text-books.

The Third Collection has a cumulative classified contents list to the three volumes of "Refresher Course for General Practitioners."

MONASH UNIVERSITY
Melbourne, Australia**FACULTY OF MEDICINE**
FOUR FOUNDATION CHAIRS

Monash University invites applications from persons qualified to fill the following Chairs in the Faculty of Medicine:

MEDICINE **PATHOLOGY**
SURGERY **MICROBIOLOGY**

The University, which opened in March, 1961, with 101 first-year medical students in a total of 360 students (Arts, Economics and Political Science, Engineering, Medicine and Science), is planned to take 8,000 full-time students by 1968. Teaching in Medicine, Surgery, Pathology and Microbiology will start early in 1964 (fourth of the six-year medical course).

Twenty acres have been reserved for the Medical School and University Hospital, and the first stage of the Medical School, comprising Anatomy, Biochemistry, Physiology and Pharmacology Departments, will be built in 1962. The second stage is expected to start in 1964. The University Hospital, which is being planned as part of and continuous with the Medical School, will contain at least 800 beds, including paediatrics and psychiatry, in addition to general medicine, surgery and the specialties, and it is hoped that it will be built by 1970.

Until the University Hospital is functioning the Chair of Medicine will be located at Prince Henry's Hospital, and the Chairs of Surgery, Pathology and Microbiology at Alfred Hospital.

Alfred Hospital is a general teaching hospital of 483 beds, which for over seventy years has been affiliated with the University of Melbourne for clinical teaching, and contains the Clinical Research Unit (Medicine), Baker Medical Research Institute, and the Diabetic and Metabolic Unit. There is an animal operating theatre. The Professor of Surgery will take over the suite at present occupied by the Professor of Surgery, University of Melbourne.

Prince Henry's Hospital, also a general teaching hospital of 395 beds, has similarly been affiliated with the University of Melbourne for ten years. An area of 8,000 square feet, in shell form at present, will be converted for the Department of Medicine.

A building costing £750,000 will be erected in 1962-63 at Alfred Hospital to contain the University Departments of Pathology and Microbiology and the hospital Morbid Anatomy Department. The present Director of Pathology appointed by the hospital will remain in charge of the routine hospital pathology and microbiology, but when the Professors to be appointed under this advertisement move with their departments to the University Hospital on its establishment they will be Heads of the corresponding services in the University Hospital.

Salaries: For the Chairs of Medicine and Surgery, subject to negotiation but within the range £A.4,250-£A.5,200; for the Chairs of Pathology and Microbiology, subject to negotiation but within the range £A.4,250-£A.4,700, depending in all cases on qualifications and experience. In addition the Professors will be able to engage in a limited amount of private consultant practice on conditions approved by the Council. Superannuation will be available on the F.S.S.U. pattern.

The Dean of Medicine (Professor R. R. Andrew, M.D., F.R.C.P.) will be in London in June, 1962, to interview applicants. Full information on application procedure, conditions of appointment, superannuation, travel and removal allowances, study leave and housing, is available from the Secretary, the Association of Universities of the British Commonwealth (Branch Office), Marlborough House, Pall Mall, London S.W.1, or the Registrar of the University, P.O. Box 92, Clayton, Victoria, Australia.

Closing date: Applications close on April 30, 1962.

The Council reserves the right to appoint to any of these Chairs by invitation at any stage. (6556)

STAPHYLOCOCCAL SUPERINFECTIONS

"Patients in hospital who have had an operation, and a course of 'broad-spectrum' antibiotics, sometimes develop diarrhoea which may be severe and even fatal."

Lancet Annotations, 25th February, 1961

ENPAC

LACTOBACILLUS ACIDOPHILUS PREPARATION

For the prophylaxis and treatment of staphylococcal super infections.

"It was found that the staphylococci increased in both groups at the beginning of antibiotic treatment. Staphylococci continued to increase in the patients taking the antibiotic alone, but in those taking 'ENPAC' there was a pronounced drop in numbers."

Lancet—May 4th, 1957. pp. 899—901

ST. ANDREW'S HOSPITAL FOR NERVOUS AND MENTAL DISORDERS NORTHAMPTON

President: The Earl Spencer.

Medical Superintendent:

Thomas Tennent, M.D., F.R.C.P., D.P.H., D.P.M. This private hospital receives patients, both male and female, suffering from nervous and mental disorders, including alcoholism and senile illnesses. The fees range from fourteen guineas per week. Private rooms with special nurses can be provided, either in the hospital or in one of the villas in the grounds. The hospital is situated in 130 acres of pleasant grounds, which provide all recreational facilities. These include a nine-hole golf course, sports ground, tennis courts, etc.

WANTAGE HOUSE

This is a separate reception unit to which patients may be admitted. It is equipped for the complete investigation of nervous and mental disorders by the most modern methods. All forms of treatment are available. It contains laboratories for biochemical, bacteriological and pathological research.

MOULTON PARK

Some two miles from the main hospital is the farm of approximately 600 acres. Occupational therapy is a feature of this branch, and patients are given every facility for occupying themselves in farming, gardening, fruit growing, etc.

BRYN-Y-NEUADD HALL

The seaside home of the hospital is beautifully situated in a park of 330 acres at Llanfairfechan, amidst the finest scenery in North Wales. On the north-west side of the estate a mile of sea coast forms the boundary. Patients may visit this home for a short seaside change or for longer periods. The hospital has its own private bathing house on the seashore.

For terms and further particulars apply to the Medical Superintendent (Telephone No. 34354, Northampton), who can be seen in London by appointment.
