THE PROBLEM OF CHOICE

when symptoms of depression and anxiety co-exist

THE PREPARATION OF CHOICE

PARSTELIN

A tranquillizer or an antidepressant?

Either will relieve some of the symptoms.

Neither will necessarily relieve *a//* the symptoms.

'Parstelin' solves this problem in the most logical and convenient way—optimum doses of the rapid-acting antidepressant 'Parnate' and the versatile tranquillizer 'Stelazine' are combined in a single tablet.

'Parstelin' swiftly lifts depression, calms anxiety and restores normal resiliency of mood in patients whose symptoms extend beyond the range of a single psychotropic drug. Typical indications include emotional fatigue, the menopausal syndrome, and many psychosomatic disorders.

'Parstelin' tablets, each containing 10 mg. 'Parnate' and 1 mg. 'Stelazine',

are available in containers of 50 and 500.

"Nulacin has revolutionized the treatment of duodenal ulcer"

Proc. R. Soc. Med., 1958, 51, 1063.

Nulacin tablets, dissolved slowly in the mouth, provide intragastric milk-alkali drip therapy, obviating the necessity for a tube. Treatment is easy and convenient for the ambulant as well as the bedridden patient. Nulacin may be relied on to provide an effective treatment for peptic ulcer as well as other conditions associated with gastric hyperacidity. No undesirable

side effects occur and no cases of alkalosis or acid rebound due to Nulacin have ever been reported. The safety and effectiveness of Nulacin therapy has been proven by *in vivo* clinical work carried out in many countries.

Nulacin tablets have no B.P. equivalent. The basic N.H.S. price of the 25-tablet tube is 2/-.

'OTOSPORIN'

clears infected ears

The modern method of treatment in otitis externa, chronic suppurative otitis media, and infected mastoid cavities, is 'Otosporin' brand Drops.

'Otosporin' is an aqueous suspension containing both neomycin and polymyxin B sulphate which are together effective against practically all the bacteria found in ear infections.

They are unlikely to induce bacterial resistance or skin sensitisation, and neither of them gives rise to cross-resistance or cross-sensitisation to penicillin and other antibiotics. Their effectiveness is visibly enhanced by the hydrocortisone in 'Otosporin'; this, by reducing inflammation, not only relieves pain, but provides greater access for the antibiotics

'ICIPEN'

'ICIPEN' provides effective penicillin V therapy for winter ailments. It is especially useful in the treatment of upper respiratory tract infections, pneumonia, acute sinusitis, scarlet fever and otitis media.

'ICIPEN' presents the potassium salt of penicillin V in convenient dosage forms. One tablet of 'Icipen' V 300 three times a day is adequate for most infections due to penicillin-sensitive organisms.

'ICIPEN' Syrup is a pleasantly-flavoured preparation especially suitable for children.

The basic N.H.S. cost for one day's treatment with Icipen V 300 tablets is 2/4d.

'ICIPEN' V 300 TABLETS

Each tablet contains 300 mg. penicillin V as potassium salt. In packs of 12, 100 and 500.

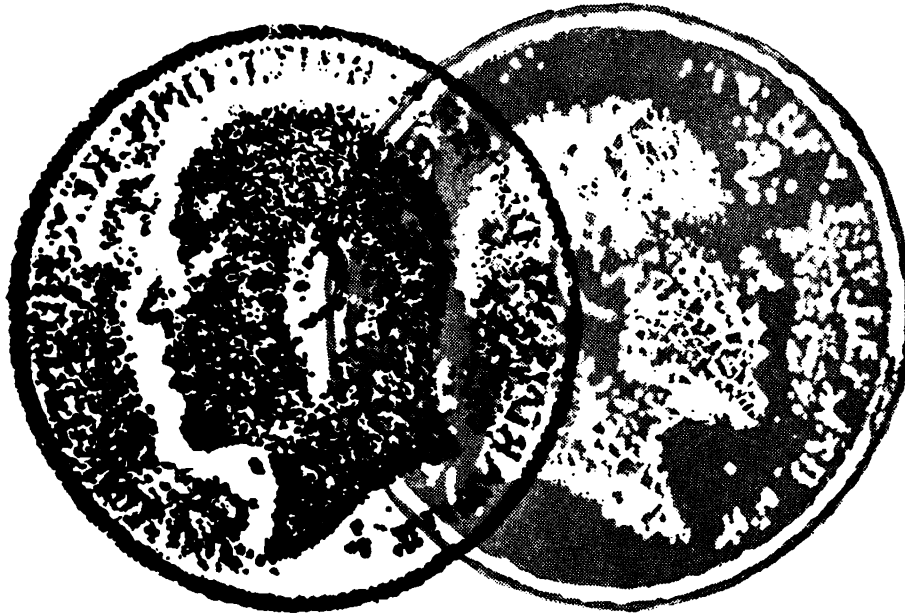

'ICIPEN' V SYRUP

Each teaspoonful (5 ml.) contains 150 mg. penicillin V as potassium salt. Available in bottles of 30 and 60 ml. Basic N.H.S. cost 4/3d. and 6/11d. respectively.

Often two sides of the same coin

depression and anxiety

Depression may frequently be associated with a strong anxiety component, and *vice versa*. Thus, in practice, the distinction is frequently blurred, and may escape even the most expert diagnosis. Difficulties in diagnosis have led to the misuse of tranquillisers—particularly their use in depression masked by anxiety. In such cases the underlying depression may be deepened. On the other hand the high failure rate of many antidepressants is due to their inability to control the concurrent anxiety. 'Tryptizol', a single compound, treats the depression and also the anxiety and agitation that commonly accompany it.

A case for Bufferin...

BUFFERIN contains the exclusive combination of anti-acids called Di-Aluminate. This prevents gastric distress even when taken in massive doses as for rheumatism and arthritis.

A clinical investigation carried out at the Robert Breck Brigham Hospital in Boston showed that 70% of arthritics who had a proved intolerance to straight aspirin were able to take Bufferin without gastric distress.

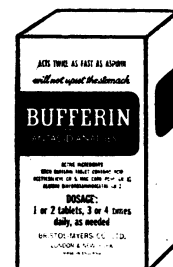

Bufferin in the Management of Rheumatic Arthritis, J.A.M.A. 158; 386, June 4, 1955.

BUFFERIN works twice as fast as plain, non-soluble aspirin. *The Lancet, Feb. 6, 1960.*

BUFFERIN has unique advantages in cases of Common Colds, Flu, Rheumatic Fever. In fact, whenever there is any suggestion of aspirin intolerance, Bufferin is indicated.

BUFFERIN has no equivalent in the B.P. or National Formulary.

THE BOYLE

ANAESTHETIC APPARATUS
SAFE: DEPENDABLE: ACCURATE

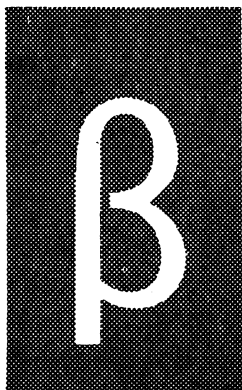

BRITISH OXYGEN know what the anaesthetist expects from anaesthetic apparatus. They designed the Boyle to meet his needs. It allows him to control gas flow and vapour concentrations both quickly and accurately. It is easy to operate so that he can devote more time to his patient: it reduces the possibility of human error and provides all the main and ancillary services he may need. The design of THE BOYLE ANAESTHETIC APPARATUS is based on long experience. It is a good example of the way in which BRITISH OXYGEN keeps in touch with the most recent developments in modern anaesthesia. If you would like to know more about The Boyle Apparatus, we shall be glad to send you fully illustrated literature.

INTRODUCING

Halves the cost of griseofulvin treatment for ringworm infections

'FULCIN', introduced by I.C.I. in 1959, marked a new era in the treatment of fungal infections of the skin, hair and nails. Continued research has shown that the absorption of the drug when given orally is greatly improved by increasing its fineness.

'FULCIN' FORTE is 'Fulcin' in a finely divided form. It produces the same clinical response as the original 'Fulcin' at half the dosage.

Indications

- All cases of Tinea capitis and favus (avoids X-ray epilation)
- Tinea of the nails
- Tinea cruris and Tinea corporis
- Chronic ringworm of the feet
- Tinea barbae

A daily dose of 0.5 gramme (1 'FULCIN' FORTE tablet four times a day) is adequate for most cases.

ONE WEEK'S TREATMENT NOW COSTS APPROXIMATELY 8/5d.

A Ross Microreader where you want it

The full value of using microrecords in Hospital administration is only obtained if the micro-reader can be located in the room where the consultation is taking place.

This is just what the Ross Microreader was designed to achieve. It is compact and portable and will stand conveniently on table or desk. It is a universal reader in that it will project any type of microrecord, 35 mm. or 16 mm.; cards or film; opaques or transparencies. Miniature X-rays can be viewed with equal facility and even microscope slides can be examined using the special microscope objective.

It is less costly than the conventional, bulky, single purpose reader, thus making it an economical proposition to have several conveniently situated reading stations instead of one.

May we send further details of the ROSS microreader; or we should be pleased to submit one for examination and trial.

A modest advance in cancer chemotherapy (CYCLOPHOSPHAMIDE)

A step towards tumour-specificity for a cytotoxic alkylating agent.

A nitrogen mustard derivative which has potent anti-tumour effect with significantly less severe, more predictable and more generally reversible depression of bone marrow.

An agent tolerated by the veins (without intimal irritation or thrombosis), by the subcutaneous tissue (if an injection should go astray), by the serous membranes (pleura and peritoneum), by the gastrointestinal tract (less nausea and vomiting), and by healing wound tissue (when given as an adjunct to surgical removal of cancer).

INDICATIONS

1. Malignant reticuloses, including Hodgkin's disease and multiple myeloma (except where the disease is strictly localised and suitable for radiotherapy).
2. Operable solid cancer, especially of lung, breast or ovary. Here Endoxana is used as an adjunct to surgery.

Wherever the prognosis is poor, both in operable and inoperable malignant disease, continuous maintenance treatment by mouth with Endoxana is recommended.

NOTE: Endoxana causes alopecia of varying degree in a proportion of patients, though this is a temporary effect.

Available in ampoules of 100 mg., 200 mg., 500 mg., and 1,000 mg. for intravenous and intracavitary injection, and in tablets of 50 mg. for oral maintenance treatment.

BRONCHITIS

The well established formula for chronic bronchitis is **TERCOLIX**. This dislodges the habitual mucoid sputum; relieves wheeziness, breathlessness and distressing fits of coughing; makes expectoration easy by liquifying tenacious mucus. Each teaspoonful contains Codein Phosph. $\frac{1}{4}$ grain combined with Terpin Hydrate, Menthol, Pine and Eucalyptus oils to provide a warm, soothing, sedative effect. Dosage: Two teaspoonfuls in warm water, before retiring—sipped slowly—free the air passages of accumulated mucus and ensure a good night's sleep. Where the critical point has been reached and the bronchial tubes are swollen, soggy and unduly sensitive, daily maintenance doses are strongly recommended. Samples for clinical trial are available on request.

Oversea (Vacant)—contd.**ANNOUNCEMENT
OF FELLOWSHIP IN MENTALLY RETARDED
CHILDREN AND PHYSICALLY
HANDICAPPED CHILDREN**

A fellowship programme to start July 1, 1962, for training and research in the broad area of mental retardation, deviant child development, and physically handicapped conditions is being sponsored by the Child Development Clinic of the Department of Pediatrics and the Hospital School for Severely Handicapped Children at the State University of Iowa.

The Hospital School has a residential programme for 60 severely physically handicapped children with reasonably normal intelligence and also conducts an out-patient programme. All types of physical handicaps are considered, but especially cerebral palsy. The Child Development Clinic is concerned especially with mentally retarded children, but some children with psychosomatic disorders or other forms of neurological defect are also seen. While there are some in-patient activities, the Child Development Clinic operates chiefly as an out-patient unit. Both the Hospital School and the Child Development Clinic operate in conjunction with the Department of Pediatrics.

Duties would include close association with the children in the in-patient groups and helping with out-patient evaluations. Ample opportunity would be provided to do investigative work, the exact nature of which would be determined by the interests of the Fellow. Attending certain national or regional meetings and attending certain post-graduate courses would be a part of the fellowship programme.

An appointment of Fellow in the Department of Pediatrics will be offered with a stipend of \$6,000 annually. Applications can be made to Dr. Robert B. Kugel, Department of Pediatrics, University Hospitals, Iowa City, Iowa. (6901)

APPLICATIONS ARE INVITED FOR ROTATING Internships and Assistant Residencies in (a) Medicine, (b) Surgery. Salary for Interns \$175 per month, plus maintenance. Helping
feet to
grow up
healthy...

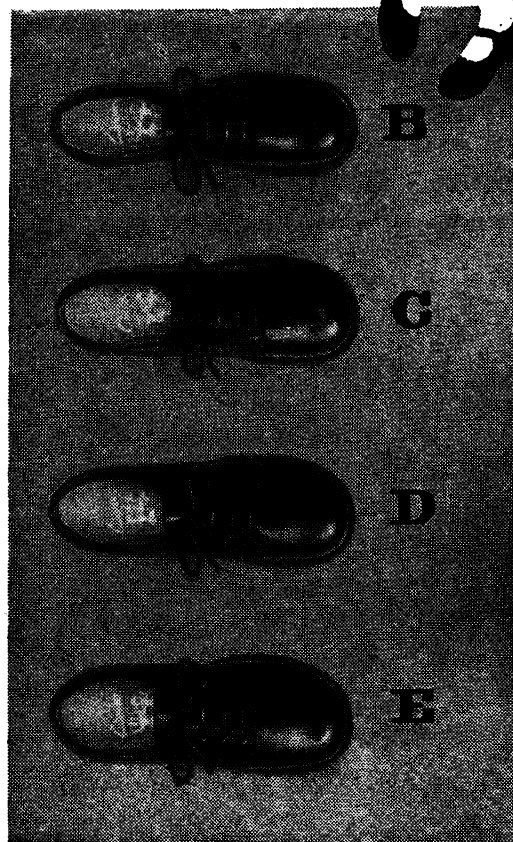

Members of the medical profession know only too well that poorly made, ill-fitting shoes can damage feet seriously in the growing years and lead to all kinds of health complications in later life. But do you know how thoroughly Clarks have tackled the problem? Clarks Children's shoes are available in four widths in every size and half-size at specially appointed retailers throughout the country. The trained assistant uses the famous Clarks Footgauge, which measures length and girth as well as width, to see that shoes fit perfectly, *all ways*. And Clarks shoes are carefully designed to look after feet as they grow. They are designed to give firm but gentle support at instep and heel, yet to leave plenty of room for toes to grow. Clarks shoes worn from babyhood onwards are the surest safeguard for children's feet.
