WITH A WILL!

When you are consulted about bequests for medical work that deserves support, please remember the work of the Imperial Cancer Research Fund. This pioneer body in Cancer Research was founded by the Royal Colleges of Physicians and Surgeons specially to undertake this vital work in its own laboratories. It has no official grants and is entirely supported by voluntary contributions. Please help us when you can.

Suggested wording for Bequests

'I hereby bequeath the sum of pounds free of duty to the Imperial Cancer Research Fund, Lincoln's Inn Field's, WC2 for the purpose of scientific research, and I direct that the receipt of the Honorary Treasurer shall be a good discharge for such legacy'.

'Palaprin' presents an entirely new approach to salicylate therapy because it is hardly affected by the acid gastric juice – but it is released in the alkaline intestinal medium. This 'by-pass' action of 'Palaprin' dramatically reduces the gastric irritation which so often precludes the prolonged use of aspirin even in the buffered or 'soluble' forms.

in senile
vaginitis

Ortho
Dienoestrol Cream

Discussion

The bacteriological findings confirm the accepted views on the bacteriology of the senile vagina and senile vaginitis. The bacteria are not the cause but the result of the vaginitis, which can be cured for an indefinite period by local oestrogen therapy.

In the post-menopausal patient, circulating oestrogens are reduced but not absent, and are sufficient to maintain the healthy senile vagina. If the weakened oestrogen defence is overcome, and vaginitis results, the low oestrogen level in the post-menopausal patient may be unable to restore the vaginal mucosa to normal, but as the local tissue response to oestrogens is not usually impaired, local oestrogen therapy can restore its vitality. Thereafter the reduced oestrogen levels of the post-menopausal patient can maintain the vagina in a clinically healthy state for an indefinite period in the absence of any local adverse factor such as a pessary or a severe degree of prolapse. The ease of application, duration of cure, and absence of withdrawal bleeding, make local dienioestrol cream therapy a safe and worthwhile treatment for senile vaginitis.

FOR SUPPLY OF (a) STANDARD ELASTIC NET (LASTONET)
AND (b) LIGHTWEIGHT ELASTIC NET (LASTOSHEER)

The perfect appearance and fit of our Stockings is due to the unique elastic-net weave, which gives strong but equal support in all directions, and to the fact that they are made always to individual measure.

Please give exact measurements of limb. We make all correct allowances for compression. Measurements taken from old stockings are not suitable. Measurements should preferably be taken before rising, as the leg is then in a more normal state. Please note that measurement "F" should be taken immediately above the ankle bone and not around it. Select from the above sketch the garment you require. Then quote your measurements under the appropriate heading, leaving the other spaces blank.

75-100% clearances of psoriasis

Completely cleared in 6 months: Adult male. Alphosyl therapy initiated 7th June. Marked improvement by 4th August, progressing until skin cleared of all lesions by the 6th December.

dramatic clinical results achieved by alphosyl

Impressive clinical results in the treatment of Psoriasis by ALPHOSYL indicate most strongly that this allantoin-coal tar combination deserves a trial in all cases of:

- total scalp-to-toe psoriasis
- psoriasis of many years' duration
- psoriasis involving tender areas
- psoriasis refractory to all previous treatment

The most recent controlled study, of a group of 62 patients, shows that in 55 cases (89%) psoriatic lesions were cleared 75-100%, and nearly half of them were "completely cleared".

FORMULA: *Special coal tar extract 5% and allantoin 2% in a smooth, non-greasy lotion base.*

In ALPHOSYL, for the first time, are presented in combination two powerful and proved healing agents: allantoin and a specially refined coal tar extract. The synergistic effects of these medicaments result in rapid clearance of the condition and positive stimulation of the healing process.

ALPHOSYL is notably safe to use and promotes no irritation or tolerance. It is a non-greasy, non-staining lotion vanishing on application to the skin and is thus a welcome advance cosmetically.

tiglyssin

tiglyssin

brand tigloidine hydrobromide
for relief of spasticity and spasms

non-toxic

free from side-effects

Tigloidine is related to atropine: it has, however, almost no anti-cholinergic activity, but has the atropine-like action on muscle described as 'delayed recovery'—characterised by quick fatigue.

A 'double-blind' trial showed relief of spasticity and spasms associated with paraplegia due to spinal cord injury. The patients were more cheerful and easier to manage.

A similar trial in Disseminated Sclerosis was of benefit to about half the patients though the full therapeutic effect may take up to three weeks to develop. Good results are reported in other degenerative Upper Motor Neurone Diseases.

The effect of 'Tiglyssin' is palliative. Apart from relieving spasticity and spasms, which helps rehabilitation and reveals any useful remaining function, patients become more cheerful and comfortable—most important, nursing is made easier.

INDICATIONS :

Spasticity and spasms associated with :

- partial or complete rupture of the cord.
- disseminated sclerosis.
- transverse myelitis.
- cerebro-vascular accidents.
- subacute combined degeneration of the cord.

The therapeutic daily dose for adults is 1-2 gm. divided into three, with meals. An initial daily dose of 0.75 to 1.0 G. is suggested, and this should be slowly increased until no further improvement occurs or until mild atropine-like effects appear.

Is there a DROXALIN in the house?

FROM Harley Street to the quietest country practice, doctors are regularly prescribing Droxalin Tablets in the treatment of gastric ulcer, hyperacidity and sickness of pregnancy.

Droxalin Tablets, prepared by special manufacturing techniques, combine the two most preferred acid adsorbents—aluminium hydroxide and magnesium trisilicate—to provide exceptionally rapid adsorption of gastric hydrochloric acid, so essential in the treatment of gastric ulcer.

Pleasantly flavoured and free from grittiness, Droxalin Tablets command ready patient acceptance, bringing quick relief from pain without secondary acid rise or harmful side effects.

In the letters we receive, doctors tell of Droxalin efficacy, not only in their practices, but in their own homes where, apparently, whenever a gastric crisis occurs the cry goes out, "Is there a Droxalin in the house?"

IN THE LETTERS WE RECEIVE, DOCTORS SPEAK HIGHLY OF DROXALIN AS:

Giving instant relief from abdominal discomfort in Duodenal Ulcer

Being an excellent tablet for Indigestion and, in particular, for the Indigestion of Pregnancy.

Bringing rapid relief to abdominal pain and discomfort due to Hyperchlorhydria and Peptic Ulcer.

Being an excellent remedy for Acute Dyspepsia.

CAN'T FIND HIS LAND- LEGS

Master Mariner, 42. Lost his command last year through failing eyesight. Physically in good shape (good appetite) but complains of increasing depression. Cheers up in company but feels 'very low' when alone, especially at end of day. Also has difficulty in getting to sleep. Unmarried—says the sea was his whole life and life ashore 'can't compare'.

Treatment:
Nardil

IN MILD TO MODERATE DEPRESSION

NARDIL is safe and is effective at low dosage levels.

Toxic effects on blood or liver are extremely rare. NARDIL acts quickly. Response is usually seen within the first weeks or even days of treatment. NARDIL provides reliable treatment for depressives—often the problem patients of a busy practice.

a better-retained form of B₁₂ from GLAXO, the B₁₂ people

In 1948 a Glaxo research team achieved independently the isolation of the active principle of liver now known as vitamin B₁₂

Neo-Cytamen

injection of hydroxocobalamin (vitamin B_{12b})

Hydroxocobalamin, (vitamin B_{12b}) and cyanocobalamin have approximately equal haemopoietic effect in pernicious anaemia, but hydroxocobalamin (**Neo-Cytamen**) is believed to be closer to the form in which vitamin B₁₂ is normally used by the body. Following a substantial dose, it is much more effectively retained than cyanocobalamin, giving consistently higher levels in the blood; dispersal from the injection site is slower, accumulation in the liver is as good or better, and urinary loss of vitamin is considerably less. This more efficient retention may be explained by the increased binding to serum protein characteristic of hydroxocobalamin.

Neo-Cytamen offers particular clinical advantage when a 'depot' preparation is needed to give prolonged B₁₂ serum levels from a high dose. In such cases, the greater retention of hydroxocobalamin may permit higher serum B₁₂ levels to be maintained between injections. For this purpose, Neo-Cytamen is to be preferred to depot preparations of cyanocobalamin which contain substances not found in nature.

Neo-Cytamen is issued in strengths containing 250 and 1,000 micrograms hydroxocobalamin per ml in boxes of 6 one ml ampoules.

LOSS IN URINE

following a single 1,000 microgram intramuscular injection of hydroxocobalamin, only 27% is lost in the urine during the first seventy-two hours compared with 69% cyanocobalamin when given in the same dosage.

LEVELS IN THE BLOOD

A 1,000 microgram injection can produce within five hours a 96-fold rise in the B₁₂ serum level; by the second to fourth week this level may be 2.5 times higher than after administration of an identical dose of cyanocobalamin.

Organidin combines the mucolytic properties of the glyceryl ethers such as glyceryl guaiacolate with those of the iodides, and is far more potent than either the iodides or glyceryl ethers alone. It contains no free iodine or inorganic iodides and gives a negative starch test. Gastric irritation does not occur, and the product is suitable for both children and adults. Taken in milk or water it is almost tasteless, and the liquid can be employed as an ingredient of a cough mixture if so desired.

The 4 features of Elastoplast

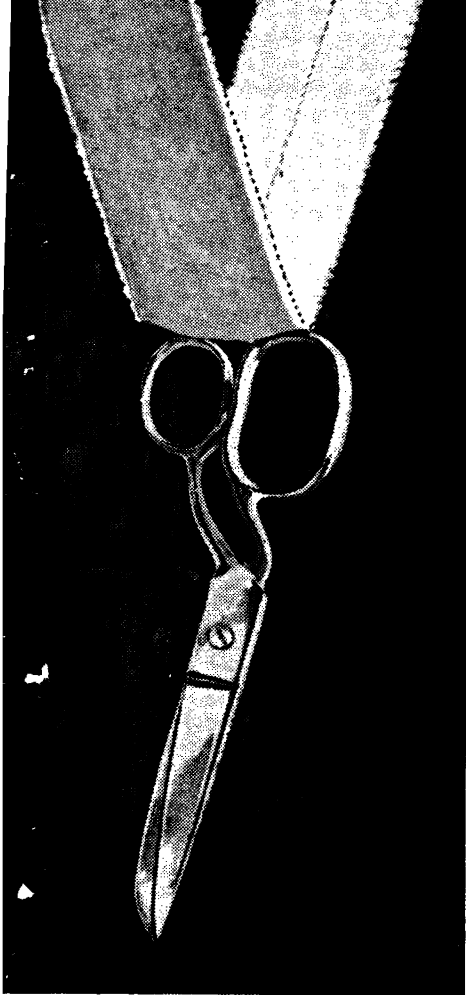

During 30 years of development, stringent laboratory standards have been laid down to ensure the superiority of Elastoplast bandage. But there are four simple working standards, which you can easily demonstrate for yourself, by which an Elastic adhesive bandage can be judged. Only Elastoplast conforms to all four. Try them yourself!

2 STRETCH AND REGAIN

Stick the first three inches of an Elastoplast bandage to the edge of a table top. Mark a foot length of it with paper clips and stretch it firmly as far as it will go. The foot length will extend to 21 inches with little effort—a 75% increase. When you let it go it will return to nearly its original length; no more than 13 inches. In most surgical techniques, this stretch and regain is critically important. It is at its maximum in Elastoplast.

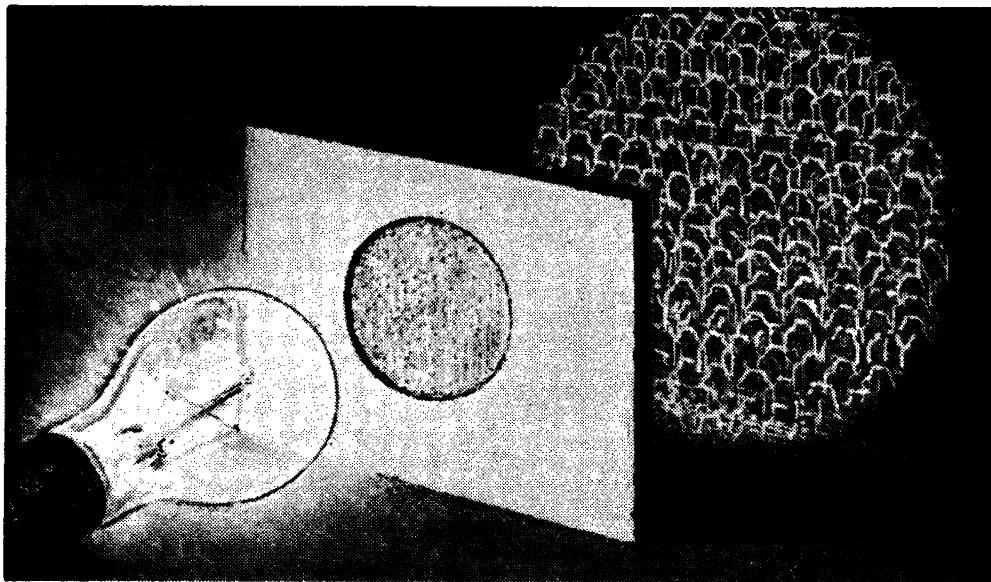

Only Elastoplast has all

TRY THESE TESTS FOR YOURSELF

1 POSITIVE ADHESION

Press the handle of a pair of heavy scissors on to the adhesive halfway along a strip of Elastoplast and suspend the scissors from it. You will be surprised how long they hang before they fall. Elastoplast has always been known for its powerful adhesive spread, which sticks at the moment of contact and keeps the bandage firmly in position during the longest treatment.

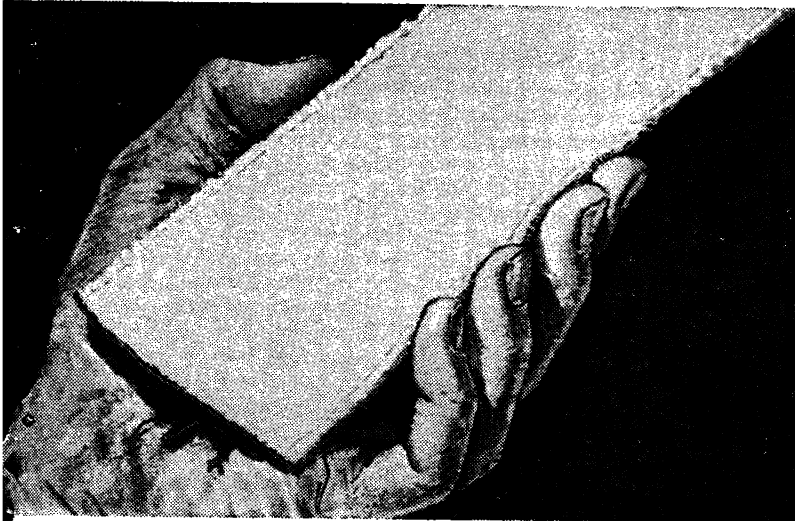

3 EVEN, ALL-OVER POROSITY

Cut a hole about 2 inches in diameter in a piece of card and stretch a piece of Elastoplast over it. Hold it between a clear electric lamp and a white surface so that the pores project images of the filament. See how close, even and uninterrupted the filament pattern is. This even porosity, over the whole adhesive surface, is characteristic of Elastoplast. It leaves no occluded patches or bands of skin beneath the bandage, even when there is more than one layer.

4 SOFT NON-ADHESIVE EDGES

Feel the softness of the selvedge of an Elastoplast bandage and note that it is neither sharply cut nor ragged, but luxuriously fluffy. This is why Elastoplast does not cut nor mark the skin. The edges are free from adhesive so that the bandage cannot stick to the clothing and does not ruck during weeks or months of wear.

bland fluid—

ROBINSON'S makes it easy

Barley water has long been recognised as the ideal treatment in cases where large amounts of liquid form part of the prescription. With its high solids content, smooth demulcent barley water—hot or cold—is especially suitable in gastro-intestinal complaints where the internal membranes are inflamed and tender.

Robinson's Lemon Barley and Orange Barley provide a convenient form of natural, wholesome barley water freshened with lemon and orange and perfectly balanced for rapid absorption.

Robinson's 'Patent' Barley gives a quickly prepared home-brew of barley water that can be mixed with milk or flavoured with any fruit juice that the patient prefers. A half-pound pack makes 96 glassfuls of fresh barley water.

BRONCHITIS

The well established formula for chronic bronchitis is TERCOLIX. This dislodges the habitual mucoid sputum; relieves wheeziness, breathlessness and distressing fits of coughing; makes expectoration easy by liquifying tenacious mucus. Each teaspoonful contains Codein Phosph. $\frac{1}{4}$ grain combined with Terpin Hydrate, Menthol, Pine and Eucalyptus oils to provide a warm, soothing, sedative effect. Dosage: Two teaspoonfuls in warm water, before retiring—sipped slowly—free the air passages of accumulated mucus and ensure a good night's sleep. Where the critical point has been reached and the bronchial tubes are swollen, soggy and unduly sensitive, daily maintenance doses are strongly recommended. Samples for clinical trial are available on request.

**ANNOUNCEMENT
OF FELLOWSHIP IN MENTALLY RETARDED
CHILDREN AND PHYSICALLY
HANDICAPPED CHILDREN**

A fellowship programme to start July 1, 1962, for training and research in the broad area of mental retardation, deviant child development, and physically handicapping conditions is being sponsored by the Child Development Clinic of the Department of Pediatrics and the Hospital School for Severely Handicapped Children at the State University of Iowa.

The Hospital School has a residential programme for 60 severely physically handicapped children with reasonably normal intelligence and also conducts an out-patient programme. All types of physical handicaps are considered, but especially cerebral palsy. The Child Development Clinic is concerned especially with mentally retarded children, but some children with psychosomatic disorders or other forms of neurological defect are also seen. While there are some in-patient activities, the Child Development Clinic operates chiefly as an out-patient unit. Both the Hospital School and the Child Development Clinic operate in conjunction with the Department of Pediatrics.

Duties would include close association with the children in the in-patient groups and helping with out-patient evaluations. Ample opportunity would be provided to do investigative work, the exact nature of which would be determined by the interests of the Fellow. Attending certain national or regional meetings and attending certain post-graduate courses would be a part of the fellowship programme.

An appointment of Fellow in the Department of Pediatrics will be offered with a stipend of \$6,000 annually. Applications can be made to Dr. Robert B. Kugel, Department of Pediatrics, University Hospitals, Iowa City, Iowa. (6901)

GOVERNMENT OF KENYA

Applications are invited for two posts in the grade of Medical Officer. Candidates must possess qualifications registrable in the United Kingdom. Possession of a D.P.H. is desirable but not essential.

The duties on which officers will be employed include Public Health, Clinical Medicine, and Hospital Administration. Kenya is a country at present in a dynamic state of evolution and the opportunities for doctors possessing initiative and imagination are considerable.

Appointments will be on contract for two tours each of two years, in the salary scale £1,617 to £2,664 a year. Initial salary will be determined by qualifications and approved experience. On satisfactory completion of service the officer will be eligible for a gratuity (taxable) of 25% of salary. Free passages for the officer, his wife and dependent children on appointment and on leave after each tour. Government quarters, with heavy furniture, usually available at a rental varying from £60 to £115 a year. Approximately 14 weeks' home leave on full pay after each tour; local leave of 16 days in each tour also granted. N.H.S. superannuation rights may be safeguarded.

It is considered that doctors contemplating a career in the public health service will find such an appointment an opportunity for gaining valuable experience in a developing field of public health, where the problems are thrown into sharper relief than in a more developed community.

Application should be made (giving full name) to Director of Recruitment, Department of Technical Co-operation, 3 Sanctuary Buildings, Great Smith Street, S.W.1. Please quote L1/RC.205/80/03. (7197)

BOWDEN HOUSE

HARROW-ON-THE-HILL, MIDDLESEX
Established in 1911. Tel.: BYRON 1011 and 4772 (Incorporated Association not carried on for profit)

A private clinic for the treatment of patients suffering from early nervous disorders, alcoholism, and drug addiction. The clinic is situated in six acres of grounds within half an hour of Central London, and can accommodate 25 inpatients and an additional number of day patients. It is staffed by a resident medical officer and fully trained State Registered Nurses. Specialist services are fully available when required. Apply Medical Director.

ST. ANDREW'S HOSPITAL FOR NERVOUS AND MENTAL DISORDERS NORTHAMPTON

President: The Earl Spencer.

Medical Superintendent:

Thomas Tennent, M.D., F.R.C.P., D.P.H., D.P.M.

This private hospital receives patients, both male and female, suffering from nervous and mental disorders, including alcoholism and senile illnesses. The fees range from fourteen guineas per week. Private rooms with special nurses can be provided, either in the hospital or in one of the villas in the grounds. The hospital is situated in 130 acres of pleasant grounds, which provide all recreational facilities. These include a nine-hole golf course, sports ground, tennis courts, etc.

WANTAGE HOUSE

This is a separate reception unit to which patients may be admitted. It is equipped for the complete investigation of nervous and mental disorders by the most modern methods. All forms of treatment are available. It contains laboratories for biochemical, bacteriological and pathological research.

MOULTON PARK

Some two miles from the main hospital is the farm of approximately 600 acres. Occupational therapy is a feature of this branch, and patients are given every facility for occupying themselves in farming, gardening, fruit growing, etc.

BRYN-Y-NEUADD HALL

The seaside home of the hospital is beautifully situated in a park of 330 acres at Llanfairfechan, amidst the finest scenery in North Wales. On the north-west side of the estate a mile of sea coast forms the boundary. Patients may visit this home for a short seaside change or for longer periods. The hospital has its own private bathing house on the seashore.

For terms and further particulars apply to the Medical Superintendent (Telephone No. 34354, Northampton), who can be seen in London by appointment.

A natural action laxative

When advising a laxative, medical preference usually favours the use of a product which acts in a perfectly natural way. Andrews meets this demand admirably. Its effect is to increase the fluid content in the bowel by osmosis and so induce a mild and natural aperient action that does not irritate the intestine.

Andrews will be found particularly useful for relieving constipation arising from decreased food intake, either during illness or restricted diet.

Andrews has further advantages, it is mildly antacid and relieves gastric discomfort. It also improves the flow of bile and helps to check biliousness and sick headaches.

The pleasant taste and refreshing effervescence of Andrews make it readily acceptable to most patients.
