Where there is the remotest risk of damage to the cornea or to the outer ear due to *Ps. aeruginosa*, the only really effective prophylactic is polymyxin.

Together with Terramycin and hydrocortisone, polymyxin is the third major constituent of Terra-Cortril eye . ear suspension.

Thus combined, these three constituents provide the broadest and most certain therapeutic action against eye and ear infections.

**The Terramycin constituent**  
Effective against a broad range of pathogenic organisms.

**The hydrocortisone constituent**  
Suppresses inflammation and alleviates pain and pruritus. Prevents scarring. Penetrates the anterior chamber in therapeutic concentration. Minimizes residual damage.

**The polymyxin constituent**  
Effective against *Ps. aeruginosa*. Without toxic or sensitizing properties when employed topically.

**Pack**  
Available in a 5 ml. tube, which is provided with a special nozzle.

taeniocide

**eliminates tapeworm completely**

YOMESAN kills off the patient's tapeworm safely, comfortably\* and quickly. Yomesan, taken in the morning, attacks and kills the tapeworm almost at once, ready for expulsion the same day (stubborn patients may take a little longer, and need a little help to pass their tapeworm). And because Yomesan *kills* the worm, there is no need to search for its head in the stools.

\* Yomesan does its job without protracted preliminary fasting or purging, and is not absorbed into the patient's system.

Mortha is a combination of morphine and tetrahydroaminacrine (T.H.A.) T.H.A. is a respiratory stimulant and a stimulant of the central nervous system which will arouse patients from barbiturate or morphine coma. Mortha is especially indicated for intractable pain due to cancer, and postoperatively, in particular after chest surgery. Mortha presents the following advantages:

- 1) Pain is relieved and the patient remains alert and co-operative.
- 2) Respiratory depression is avoided.
- 3) The hazard of morphine addiction is reduced.

Mortha is subject to D.D.A. restrictions.

# EMERGENCY SPLINTING

In the emergency treatment of fractures in remote locations or at the scene of large-scale accidents—under any conditions in fact where hospital treatment may be delayed—'gutter' splints made from Gypsona slabs are more adaptable, more efficient and more easily applied than orthodox wooden splints.

- \* **easy application**
- \* **conformity to shape of limb**
- \* **strong, rigid support**
- \* **reduced risk of complications**
- \* **minimal pain in transit**

Gypsona emergency splinting has been devised to aid the transport of fracture casualties from accidents over long distances. Gypsona splints are not intended to replace plaster casts, to bear weight nor to give long term support to fractures after reduction—although some fracture units have in fact used them successfully for on-the-spot treatment followed up by X-ray control. Unlike casts, Gypsona splints do not encircle the limb. A typical splint consists of two or three gutters made from slabs applied longitudinally and kept in position by a spiral cotton bandage which can quickly be slit open and re-applied if necessary.

# with **Gypsona**

Simple, standard techniques are described in the booklet 'Emergency Splinting with Gypsona'. Single copies or quantities for tutorial purposes are available free to the medical profession. The 16 mm. sound and colour film 'Emergency Splinting' is available on loan.

## Which would you recommend for patients with arterial disease?

In planning diets for patients with arterial disease and coronary heart disease, many doctors recommend the substitution of a vegetable fat to aid in lowering the patient's serum cholesterol level. Look carefully at the two bottles above: which would you recommend to a patient? **ANSWER:** They are identical. The bottle on the right contains Mazola Corn Oil, labelled with its fatty-acids percentages. The bottle on the left contains *exactly the same oil*, and bears the label under which it is sold in thousands of grocery stores throughout the country. **The *Scholl* name on the prescription ensures support and comfort to meet each patient's need**

*'There is no wisdom in useless and hopeless sorrow'*

*Samuel Johnson*

One of the most persistent features in depressive illness is a feeling of futility. The patient is hopeless without adequate cause. There is no longer any depth in joy—or even in natural sorrow. The morbid cycle cannot be broken by lighter moments; there are no lighter moments. Guilt, self-depreciation, despair and the ever-present futility interlock in a grim pattern that can very quickly make life a dark parody, not purposeful, not even worth-while.

In the treatment of depressive illness, speedy relief of symptoms is often vital. And although drugs cannot solve all the

patient's problems, they can be immensely valuable in ridding the patient of his—or her—distressing symptoms and in helping to restore a normal view of life.

'Parnate'\* is exceptional among anti-depressants for the speed with which it takes effect. Response is usually well established within a week, and can be achieved even more rapidly by the use of higher dosage. Similarly, the effects wear off quickly after discontinuance.

'Parnate' (brand of tranlycypromine) is available as tablets of 10 mg., in containers of 50 and 500. Full prescribing information will gladly be sent on request.

## no need to sugar this pill

Fersamal tablets differ from other iron tablets in that they contain ferrous fumarate, a form of iron that is palatable and stable enough to need no sugar coating. It is well absorbed and well tolerated and rarely causes gastro-intestinal upset, even in patients who are unable to tolerate other iron salts.

Being small, Fersamal tablets are easy to swallow although they may be chewed or crushed if preferred. Their dull brown colour makes them unattractive to children, but they are unlikely to be harmful even if taken accidentally.

Each Fersamal tablet contains 200 mg. anhydrous ferrous fumarate. This provides a high content of ferrous iron at low cost.

## Hypopotassaemia?

Why physicians prescribe  
**'HydroSALURIC'-K**

REGD.

the diuretic **WITH** potassium

'HydroSALURIC'-K (tablets: hydrochlorothiazide, 25 mg.; potassium chloride, 572 mg.) can be prescribed with confidence in the treatment of debilitated oedematous or hypertensive patients with poor appetite, where the possibility of hypopotassaemia is always present. The potassium chloride component gives a measure of insurance against hypopotassaemia. 'HydroSALURIC'-K is invaluable in patients also undergoing digitalis therapy to whom an adequate potassium intake is particularly essential.

IN ONE PRESCRIPTION, 'HydroSALURIC'-K offers *the dependable diuretic hydrochlorothiazide together with potassium chloride*, the latter enclosed in a special type of enteric coating to avoid nausea and vomiting.

In the elderly, the lack of interest in food is both cause and result of failing energy and vitality. ORABOLIN reverses body protein wastage and ensures full use of such nitrogen as is available in the food ; the renewed vigour and appetite lead to improved stamina and gain in weight. ORABOLIN, effective in doses as low as 0.05 mg. per kilo body weight, is well tolerated and is free from liver toxicity or other harmful effects.

# Fighting a losing battle?

To the obese, dieting is often a distasteful and painful undertaking. Many patients, wavering between the good advice of their doctor and their desire for food, find the greatest difficulty in sticking to their diet. They are, in fact, fighting a losing battle. They need 'Dexedrine'.

'Dexedrine' is a safe and well-established anorectic agent that provides constant assistance to the dieting patient. In addition to its specific anorectic effect, 'Dexedrine' has a beneficial mood-elevating action which eliminates depression and irritability during dieting.

'Dexedrine' is presented in 'Spansule' sustained-release capsules to provide an all day long anorectic effect—on one capsule taken first thing in the morning.

## The queen of spas

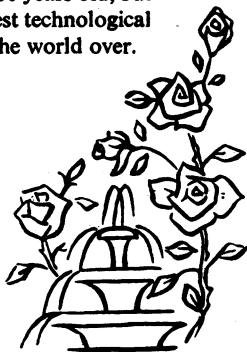

set luxuriously amidst the natural beauty of the Black Forest, is one of the oldest and possibly the finest in the world, with the hottest springs in Europe. (158°F)

The thermal waters are helpful in the treatment of many diseases. Natural healing processes are stimulated by the combined effect of the temperature, mineral content and massaging action of these pure thermal waters.

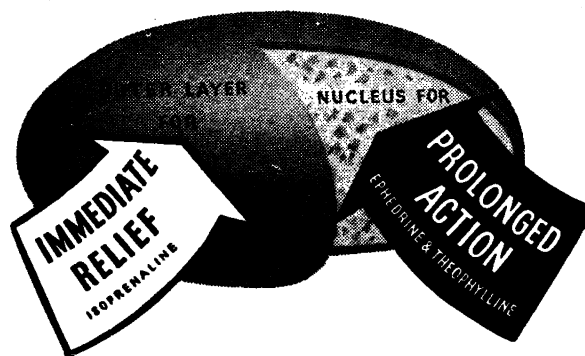

Early balneological treatment has often alleviated suffering from rheumatism, arthritis and similar complaints.

The success of treatment at Baden-Baden is not only ensured by a reputation 2,000 years old, but by unceasing attention to the latest technological developments in hydrotherapy the world over.

## INAPASADE twice a day

### TASTELESS NON-IRRITANT GRANULES

INAPASADE is the easiest and most pleasant way of taking PAS and isoniazid—combined in non-irritant, tasteless granules that are swallowed effortlessly with a drink. *Only two doses a day provide 12 G. sodium PAS with 300 mg. isoniazid.* By removing the unpleasantness

associated with this treatment and eliminating the inconvenient midday dose, Inapasade secures the enthusiastic co-operation of the TB patient at home and helps to obviate lapses in treatment. *Tins of 60 and 120 one-dose packets and bulk granules pack for hospitals.*

# Only Nulacin provides intragastric milk-alkali drip therapy for the ambulatory patient

“In view of the ineffectiveness of most of the tableted antacids, the milk-alkali tablet (Nulacin) would appear to be the antacid of choice for ambulatory therapy.”  
(Medical Times 1958, 1: 74)

**NULACIN TABLETS** have been developed so that when allowed to dissolve slowly in the mouth, they give continuous milk-alkali drip therapy and provide a treatment of peptic ulcer and other conditions associated with hyperacidity. The effectiveness of Nulacin therapy has been established by clinical work in many countries. The following are a few references to the literature:

# **BRONCHITIS**

The well established formula for chronic bronchitis is **TERCOLIX**. This dislodges the habitual mucoid sputum; relieves wheeziness, breathlessness and distressing fits of coughing; makes expectoration easy by liquifying tenacious mucus. Each teaspoonful contains Codein Phosph.  $\frac{1}{4}$  grain combined with Terpin Hydrate, Menthol, Pine and Eucalyptus oils to provide a warm, soothing, sedative effect. Dosage: Two teaspoonfuls in warm water, before retiring—sipped slowly—free the air passages of accumulated mucus and ensure a good night's sleep. Where the critical point has been reached and the bronchial tubes are swollen, soggy and unduly sensitive, daily maintenance doses are strongly recommended. Samples for clinical trial are available on request.

# geriden

GERIDEN is a simple, effective, and economical treatment for the elderly patient with mild senile retrogression. Confusion and irritability are often diminished, there is an increased awareness of surroundings, and attention to personal hygiene improves. Treatment with GERIDEN enables many such patients to continue their lives in the community, and at the same time relieves the constant strain on those who care for them.

... for those who care for her ...

Each GERIDEN tablet contains  
Leptazol 100 mg., Nicotinic Acid  
50 mg.

GERIDEN is available as tablets  
in containers of 100 and 250  
and as Elixir in bottles of 4 fl. oz.

### DRUGS IN THE TREATMENT OF DISEASE

Medium 8vo. 570 pages. Price 35s. (by post 36s. 9d.)

An authoritative guide to the use and comparative efficacy of many drugs developed in recent years. It assists the practising doctor to compare the newer drugs with each other and with those older remedies that are still the best of their kind. Information is also given regarding toxic and side effects.

Compiled from the series of articles published in the *British Medical Journal*, the book presents an up-to-date, indexed, authority on medicinal treatment—of considerable help to the doctor in choosing the best drug for his patient.

## Availability of Vitamins in Yeast

Deficiencies of single factors of the Vitamin B Group do not occur. Accordingly, even if a deficiency condition appears to result from the lack of an individual factor of the group and it is considered necessary to give intensive treatment with this factor, *the entire Vitamin B Complex should always be administered concurrently.*

It is, however, extremely important, in view of suggestions in recent publications, that the vehicle selected as a source of the entire B Complex does not withhold its vitamin content from the patient.

Human experiments show that the rich, natural vitamin potency of Aluzyme is totally available to the human system.

- Aluzyme is not advertised to the public and may be prescribed under J.S.C. Classification Category "S."
