Pro-Actidil', in reality three special tablets in one, gives sustained relief to the allergic patient. It contains triprolidine hydrochloride, the most potent of the anti-histamines, specially formulated to give continuous action for up to 24 hours in most patients.

If given in the evening, four to five hours before retiring, 'Pro-Actidil' ensures a good night's sleep for the patient, free from sneezing, irritation and restlessness. Any side-effects, such as drowsiness, should therefore occur at bedtime.

'Pro-Actidil' is recommended for adults and children over ten years.

STELADEX SPANSULE

sustained-release capsules answer every requirement in obesity therapy

For the child, as for the adult, obesity often brings a curtailment of activity, and diminished social esteem. These sequelae can lead to further overeating as an escape from mental stress. Hence, paradoxically enough, many patients who are overweight eat excessively *because* they are overweight.

'Steladex Spansule' sustained-release capsules answer every requirement in obesity therapy. They effectively curb the appetite; they allay stress and emotional tension; and they leave the patient calm and composed—able to carry on normal daily activities during the rigours of strict dieting.

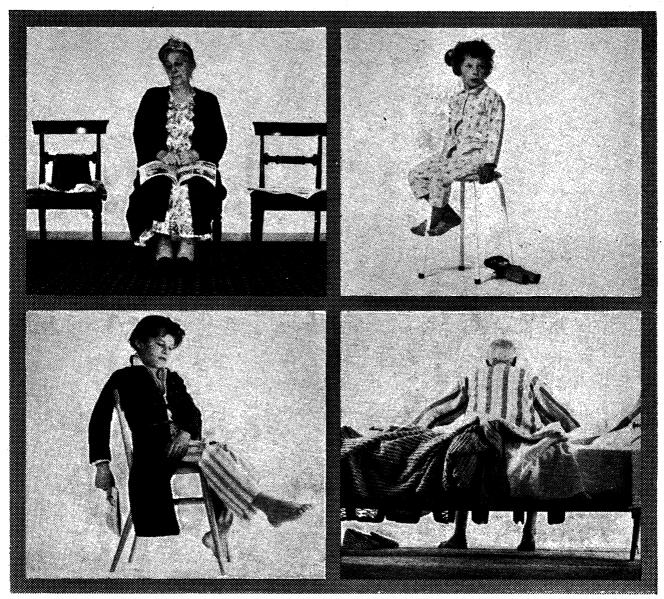

Smith Kline & French Laboratories Ltd Welwyn Garden City, Herts

'Steladex Spansule' sustained-release capsules each contain 10 mg. 'Dexedrine' (brand of dexamphetamine sulphate) and 2 mg. 'Stelazine' (brand of trifluoperazine).

'Steladex', 'Stelazine', 'Dexedrine' and 'Spansule' are trade marks. Brit. Pat. Nos. 715305, 742007, 813861, 857547

yomesan

taeniacide

eliminates tapeworm completely

YOMESAN kills off the patient's tapeworm safely, comfortably* and quickly. Yomesan, taken in the morning, attacks and kills the tapeworm almost at once, ready for expulsion the same day (stubborn patients may take a little longer, and need a little help to pass their tapeworm). And because Yomesan kills the worm, there is no need to search for its head in the stools.

* Yomesan does its job without protracted preliminary fasting or purging, and is not absorbed into the patient's system.

indications:

Taenia Saginata (beef tapeworm)
Taenia Solium (pork tapeworm)
Diphyllobothrium latum (fish tapeworm)
Hymenolepis nana (dwarf tapeworm)
Yomesan is not absorbed from the intestine and has no effect in cysticercosis and echinococcosis.

dosage:

Adults: 2 tablets, followed an hour later by another two.
Children over 8 years—adult dosage;
Children under 8 years—half adult dose, i.e. one tablet, followed an hour later by another one.

administration:

Tablets should be chewed thoroughly and washed down with a little water.

presentation:

4 tablets of 0.5 gm.

composition:

5-Chloro-N-(2-chloro-4-nitrophenyl) salicylamide.

THE BRITISH DRUG HOUSES LTD · LONDON, N.1.

...do you recommend an external wedge on the shoes?

But the wedges soon wear away; and very often the child is made to feel self-conscious because his shoes look different from other children's. As the diagram on the left clearly shows, any external wedge to heel disturbs the plane of forepart and heel. Surely it's more logical to have a wedge built-in between the inner and the outer sole—where it can correctly corset the foot, remain invisible, and completely unaffected by wear or repair of the shoe. That is how Start-rite INNERAZE shoes are made—on remedial lasts specially adapted to accommodate the internal wedge. That is why they are the only practical and thoroughly effective solution to this problem.

Information from Mr. W. J. Peake, James Southall & Co. Ltd., Crome Road, Norwich. NOR 60A

is Gelusil Lac

ADVANCED COMBINED-ACTION THERAPY FOR PEPTIC ULCERATION

Gelusil Lac combines antacids with milk in the form of dried low-fat, high-protein milk solids. The antacids* are those recommended in the current British National Formulary. Gelusil Lac is a natural up-to-date development from Gelusil. It makes the treatment of peptic ulceration simpler for the patient. Its composition, method of action and presentation are in keeping with current medical thinking.

Gelusil Lac is easily and quickly prepared by pouring the contents of a sachet or one dessertspoonful into half a glass of water and stirring.

Indications: Peptic ulceration; hyperacidity; hiatus hernia; oesophagitis. Presentation: Gelusil Lac is conveniently packed in slim, one-dose sachets, easily carried and immediately available to the patient at home or at work. Supplied in cartons of 10 sachets of 8 G. each. Also available in dispensing tins of 200 G.

Dosage: 1 sachet or one dessertspoonful (8 G.) to be mixed with half a tumbler of water and taken as required. A ready-mixed dose may be left by the bedside in case of early morning waking.

*Formula: Each 8 G. sachet contains: magnesium trisilicate 1.0 G.; aluminium hydroxide 0.5 G.; low-fat milk solids 6.5 G.

Modern Trends in Anaesthesia—2

Aspects of Hydrogen Ion Regulation and Biochemistry in Anaesthesia

Edited by Frankis T. Evans and T. Cecil Gray

Price 60s.

The second volume in this series fills the gaps not already covered by modern literature and makes up to-date information readily available.

The anaesthetist (in the full sense of the American term "Anesthesiologist") has come to be regarded as the clinical physiologist and pharmacologist to the surgical team and even to some medical teams involved in the treatment of respiratory, cardiovascular and convulsive diseases. The field in which he is expert must now be extended to include certain aspects of biochemistry. Hence the decision to ask experts, some of whom are anaesthetists and some from outside the specialty, to contribute to this symposium on the biochemical aspects of anaesthesia.

Modern Trends in Endocrinology Second Series Edited by H. Gardiner-Hill

Price 75s.

In this second volume, as in the first, will be found a collection of endocrine topics covering a wide and integrated field. They have been chosen to highlight the fronts on which advances of special interest have been or are being made. It has also been the objective to fill in some of the gaps which were unavoidable in the first series owing to shortage of space, and in addition to deal with similar topics or even the same topic from a different angle.

Drugs in Anaesthetic Practice By F. G. Wood-Smith and H. C. Stewart

Price 63s.

This book has been written as a work of reference for practising anaesthetists and for students studying for higher examinations in anaesthesia. Surgical students will also find it useful as an ever-increasing curriculum requires a knowledge of many of the drugs and problems discussed.

It includes not only the drugs which produce anaesthesia and analgesia and those controlling their complications but others which may have some influence on their course.

The drugs described have been classified and grouped according to their main actions and the purposes for which they are used. Each section is preceded by a general article on individual drugs. Other articles have been included to link up the various sections.

Where there is the remotest risk of damage to the cornea or to the outer ear due to Ps. aeroginosa. the only really effective prophylactic is polymyxin. Together with Terramycin and hydrocortisone, polymyxin is the third major constituent of Terra-Cortril eye ear suspension.

Thus combined, these three constituents provide the broadest and most certain therapeutic action against eye and ear infections.

Ismelin'-Navidrex K

concepts of treatment

It is now widely accepted that the addition of a thiazide diuretic such as Navidrex to the more potent hypotensive agents increases their effectiveness and decreases side-effects.

Effective in a wide range of patients

Almost all patients respond to Ismelin-Navidrex K which is suitable for all grades and types of hypertension (except phaeochromocytoma)

Simplifies treatment

Ismelin, Navidrex and a potassium supplement in one tablet provide complete therapy in the most convenient way. The special formulation prevents gastric upsets or failure of tablet disintegration.

Ismelin-Navidrex K tablets contain 10 mg. Ismelin, 0.15 mg. Navidrex and 400 mg. potassium chloride. Basic N.H.S. price of 100 tablets: 31s. 4d.

Often two sides of the same coin

depression and anxiety

Depression may frequently be associated with a strong anxiety component, and vice versa. Thus, in practice, the distinction is frequently blurred, and may escape even the most expert diagnosis. Difficulties in diagnosis have led to the misuse of tranquillisers—particularly their use in depression masked by anxiety. In such cases the underlying depression may be deepened. On the other hand the high failure rate of many antidepressants is due to their inability to control the concurrent anxiety. 'Tryptizol', a single compound, treats the depression and also the anxiety and agitation that commonly accompany it.

TRYPTIZOL

AMITRIPTYLINE HYDROCHLORIDE

effectively treats depression and promptly relieves accompanying anxiety and tension

for a fresh start in the treatment of **eye, ear and nasal conditions**

Betnesol

Betnesol drops and ointments are beneficial in the treatment of acute and self-limiting eye conditions caused by trauma, infection, chemical burns or other irritants. Betnesol-N may be used when infection is present or suspected.

Betnesol and Betnesol-N drops are effective in inflammatory conditions of the ear such as otitis externa. The drops may also be used in the treatment of hay fever and of vaso-motor and non-seasonal allergic rhinitis. The Betnesol range includes four other preparations—cream, ointment, lotion and spray lotion—for use against common skin conditions and are available with or without neomycin.

The new Betnesol range of topical corticosteroids introduced by Glaxo is designed to make prescribing simpler, less costly and even more effective. In one range there is everything needed for topical corticosteroid treatment. The six preparations contain the new highly effective topical steroid betamethasone phosphate, and a complementary range of Betnesol-N preparations includes neomycin. There is now only one name to remember—Betnesol—with the suffix N if an antibiotic is required. Each preparation is in one strength only and each of the eye, ear and nasal preparations in one pack size only.

Betnesol is effective in very low concentrations—most preparations contain only 0.1% betamethasone

preparations contain only 0.1% betamethasone phosphate. Being soluble in water Betnesol makes very close contact with inflamed tissues and so achieves a most effective response. The cost of Betnesol preparations compares very favourably with that of many other steroids in common use.

The new range of Betnesol topicals follows the introduction by Glaxo of Betnelan—betamethasone tablets for systemic use. Betnesol is designed to bring new simplicity to topical corticosteroid treatment and to combine effectiveness with economy.

only one name and one strength to remember

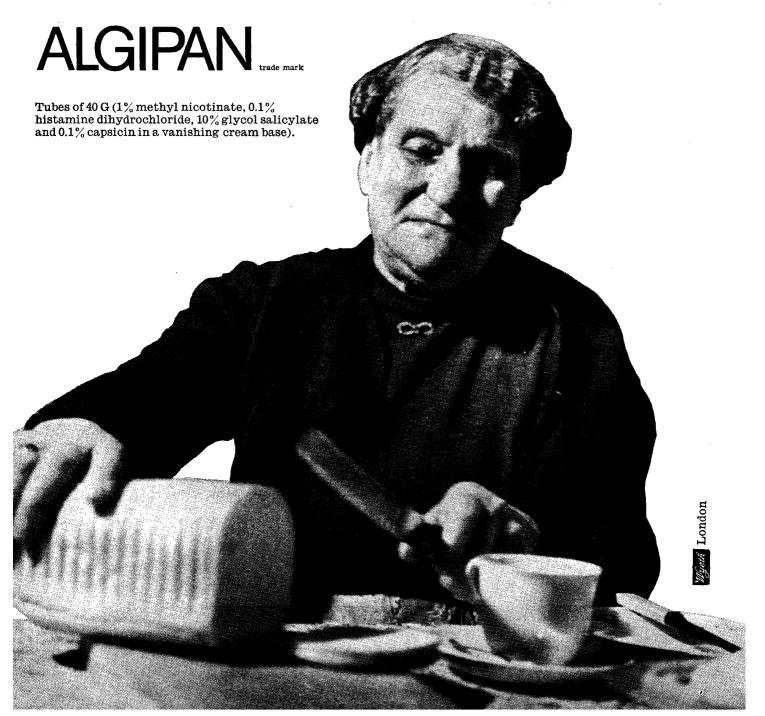

The names Betnelan and Betnesol are Glaxo trade marks

PRESENTATION AND BASIC N.H.S. PRICE:
Pack of 50 Tablets 4/6

A modest advance in cancer chemotherapy (CYCLOPHOSPHAMIDE)

A step towards tumour-specificity for a cytotoxic alkylating agent.

A nitrogen mustard derivative which has potent anti-tumour effect with significantly less severe, more predictable and more generally reversitle depression of bone marrow.

An agent tolerated by the veins (without intimal irritation or thrombosis), by the subcutaneous tissue (if an injection should go astray), by the serous membranes (pleura and peritoneum), by the gastrointestinal tract (less nausea and vomiting), and by healing wound tissue (when given as an adjunct to surgical removal of cancer).

INDICATIONS

- 1. Malignant reticuloses, including Hodgkin's disease and multiple myeloma (except where the disease is strictly localised and suitable for radiotherapy).
- 2. Operable solid cancer, especially of lung, breast or ovary. Here Endoxana is used as an adjunct to surgery.

Wherever the prognosis is poor, both in operable and inoperable malignant disease, continuous maintenance treatment by mouth with Endoxana is recommended.

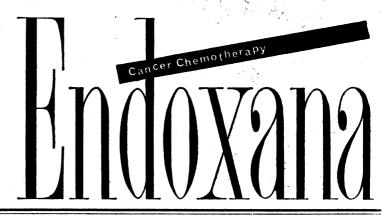

Note: Endoxana causes alopecia of varying degree in a proportion of patients, though this is a temporary effect.

Available in ampoules of 100 mg., 200 mg., 500 mg., and 1,000 mg. for intravenous and intracavitatory injection, and in tablets of 50 mg. for oral maintenance treatment.

Beg, borrow or buy some -before you go

The well established formula tor chronic bronchitis is TERCOLIX. This dislodges the habitual mucoid sputum; relieves wheeziness, breathlessness and distressing fits of coughing; makes expectoration easy by liquifying tenacious mucus. Each teaspoonful contains Codein Phosph. I grain combined with Terpin Hydrate, Menthol, Pine and Eucalyptus oils to provide a warm, soothing, sedative effect. Dosage: Two teaspoonfuls in warm water, before retiring—sipped slowly—free the air passages of accumulated mucus and ensure a good night's sleep. Where the critical point has been reached and the bronchial tubes are swollen, soggy and unduly sensitive, daily maintenance doses are strongly recommended. Samples for clinical trial are available on request.

INDUSTRIAL APPOINTMENTS

Attention is drawn to the British Medical Association's statement of policy on the Remuneration of Industrial Medical Officers (as revised in the light of the Report of the Royal Commission on Doctors' and Dentists' Remuneration, 1960, and approved by the Representative Body, 1961), which is available on request from the Secretary.

MEDICAL OFFICER

Applications are invited from registered medical practitioners for the post of Medical Officer in the Medical Services of T. Wall & Sons (Meat & Handy Foods) Limited. Applicants should have considerable all round

experience. The successful candidate will be responsible to the Company Medical Officer. The Medical Officer will be sited at the Hayes, Middlesex, factory and will be responsible for its medical services, involving the supervision of a Medical Department and staff, which includes a full-time secretary.

The work will include the medical screening of new employees, advice to local manage-ment on matters of rehabilitation, environ-mental medicine, and assistance in carrying out the Company policy of preventive medicine. Experience in general practice would be an advantage, and the work calls for a doctor genuinely interested in occupational health in all its aspects.

The Medical Officer will be provided with a car. Salary will be in accordance with age and experience, but will not be less than the scale laid down by the B.M.A. Candidates are asked to give a full account of their professional career and to state why they wish to practise occupational medicine. Applications, together with the names of three referees, should be submitted to the Principal Medical Adviser, Unilever House, Blackfriars, E.C.4, not later than April 6,

THE UNIVERSITY OF SHEFFIELD IN ASSOCIATION WITH THE DERBY HOSPITALS

A refresher course for general practitioners will be held in Derby during the week beginning Monday, July 9. The fee is five guineas. N.H.S. practitioners are (subject to certain conditions) eligible to have the course fee paid for on their behalf and to receive also certain allowances (travelling expenses, subsistence, locum fees). As the number who can be accepted is limited, enquiries and applications (stating whether or not the latter are made under the scheme for N.H.S. practitioners and whether residential accommodation is desired) should be addressed, as soon as possible, to the Director of Postgraduate Clinical Studies, Faculty of Medicine, the University, Sheffield 10.

UNIVERSITY OF GLASGOW

DIPLOMA IN CLINICAL PSYCHOLOGY
A Course of Instruction over two years, leading to the Diploma in Clinical Psychology, will commence in July, 1962. An initial hospital attachment will be followed by a course of formal instruction covering three academic terms. The final 12 months of the course will be devoted to practical training in a mental hospital. A limited number of paid appointments under the Regional Hospital Board is available, permitting attendance on the course.

The fee for the full course, including examina-tion fee, is £90. This is payable in two instal-ments, £80 for the first year and £10 for the second.

second.

Applicants must be First or Second Class Honours graduates in Psychology of a British or other recognized university. Further details, application forms, and regulations may be obtained from the Professor of Psychological Medicine, Southern General Hospital, Glasgow S.W.1. The closing date for the submission of applications is July 15, 1962.

UNIVERSITY OF LONDON (British Postgraduate Medical Federation) Institute of Neurology (Queen Square)

Two Courses of Clinical Demonstrations open to postgraduates will be held at the National Hospital, Queen Square, on Wednesdays at 4.15 p.m., from April 11 to June 20, 1962, inclusive, and on Saturdays at 10.30 a.m. from April 7 to June 30, 1962, inclusive. The fee for attending either of these courses is three guineas.

Applications for a ticket should be made to the Dean, Institute of Neurology, the National Hospital, Queen Square, W.C.1, and a remittance to cover the fee enclosed. Only postal applications will be considered.

UNIVERSITY OF ST. ANDREWS

REFRESHER COURSE FOR GENERAL PRACTITIONERS

A two weeks' course will be held in Queen's College, Dundee, and associated hospitals from June 18 to 29, 1962. Teaching will be by lecture-demonstrations and clinical rounds, with emphasis on recent advances in diagnosis and treatment. Accommodation available in students' residence at moderate cost. Course fee £10 10s. Financial

assistance, subject to certain conditions, from Department of Health for Scotland. Last date for enrolment, May 12, 1962. Further particulars and application forms from Dean of the Faculty of Medicine, Queen's College, Dundee. (8623)

ST. VINCENT'S HOSPITAL Dublin

MEENAN PRIZE
This triennial prize limited to ex-students of the hospital, value £100, will be awarded again this year. For further information, please apply to the Hon. Sceretary, Medical Board, before May 31, 1962. (8622)
