

### for a fresh start in the treatment of eye, ear and nasal conditions

# Betnesol

Betnesol drops and ointments are beneficial in the treatment of acute and self-limiting eye conditions caused by trauma, infection or other irritants. Clear diagnosis and close observation of the patient Is important. Betnesol-N may be used when infection is present or suspected.

Betnesol and Betnesol-N drops are effective in inflammatory conditions of the ear such as otitis externa.

New BETNESOL-N NASAL SPRAY gives rapid relief in mild hay fever. In severe attacks Betnelan tablets may also be needed. The Betnesol range includes four other preparations—cream, ointment, lotion and spray lotion—for use against common skin conditions and are available with or without neomycin.

The new Betnesol range of topical corticosteroids introduced by Glaxo is designed to make prescribing simpler, less costly and even more effective. In one range there is everything needed for topical corticosteroid treatment. The seven preparations contain the new highly effective topical steroid betamethasone phosphate, and a complementary range of Betnesol-N preparations includes neomycin. There is now only one name to remember-Betnesol-with the suffix N if an antibiotic is required. Each preparation is in one strength only and each of the eye, ear and nasal preparations is in one pack size only. Betnesol is effective in very low concentrations-most preparations contain only 0.1% betamethasone phosphate. Being soluble in water Betnesol makes very close contact with inflamed tissues and so achieves a most effective response. The cost of Betnesol preparations compares very favourably with that of many other steroids in common use.

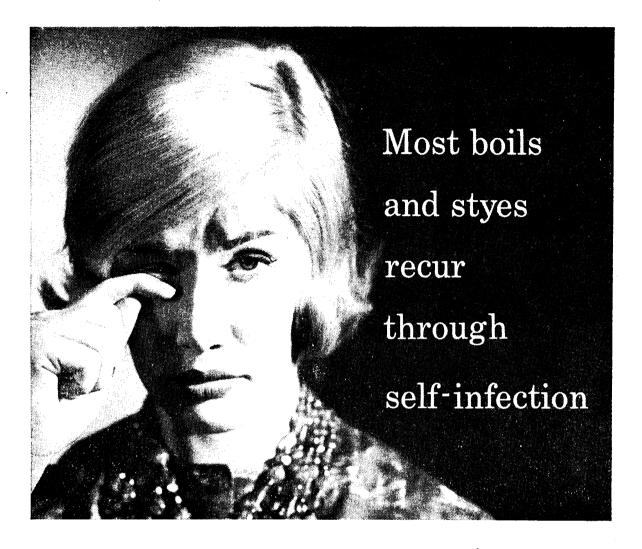

The new range of Betnesol topicals follows the introduction by Glaxo of Betnelan—betamethasone tablets for systemic use. Betnesol is designed to bring new simplicity to topical corticosteroid treatment and to combine effectiveness with economy.

#### only one name and one strength to remember

The names Betnesol and Betnelan are Glaxo trade marks

GLAXO LABORATORIES LIMITED

## ... you can break the cycle with Naseptin

At least 85% of patients with recurrent boils and styes carry the causative staphylococcus in the anterior nares. Treatment of the anterior nares with 'Naseptin' greatly reduces the number of recurrences of infection. 'Naseptin' is easy and economical to apply. Sensitivity reactions are most unlikely and bacterial resistance has not been observed. 2, 3, 4

# is Gelusil Lac

ADVANCED COMBINED-ACTION THERAPYFOR PEPTIC ULCERATION

Gelusil Lac combines antacids with milk in the form of dried low-fat, high-protein milk solids. The antacids\* are those recommended in the current British National Formulary. Gelusil Lac is a natural up-to-date development from Gelusil. It makes the treatment of peptic ulceration simpler for the patient. Its composition, method of action and presentation are in keeping with current medical thinking.

Gelusil Lac is easily and quickly prepared by pouring the contents of a sachet or one dessertspoonful into half a glass of water and stirring.

Indications: Peptic ulceration; hyperacidity; hiatus hernia; oesophagitis. Presentation: Gelusil Lac is conveniently packed in slim, one-dose sachets, easily carried and immediately available to the patient at home or at work. Supplied in cartons of 10 sachets of 8 G. each. Also available in dispensing tins of 200 G.

Dosage: I sachet or one dessertspoonful (8 G.) to be mixed with haif a tumbler of water and taken as required. A ready-mixed dose may be left by the bedside in case of early morning waking.

\*Formula: Each 8 G. sachet contains: magnesium trisilicate 1.0 G.; aluminium hydroxide 0.5 G.; low-fat milk solids 6.5 G.

# ANXIETY SYMPTOMS AND MARRIAGE

All too frequently the underlying cause of numerous anxiety symptoms in young married patients is the fear of an unwanted pregnancy brought about by the use of unreliable contraceptive methods. Three million people, for example, still practice coitus interruptus.

Fortunately, today, married people are less inhibited in their attitudes towards the subject of family planning and more and more they turn to you, their family doctor, for advice.

Specially published to assist you with enquiries of this sort is a number of factual leaflets and booklets, among them a new edition of Modern Family Planning suitable for patients when the need arises. Others in the series (for purely professional reading) are Fertility Control in General Practice and The Condom as a Contraceptive (both written by Christopher Tietze, M.D.); A Married Woman's Views on Contraception; Modern Contraceptive Technique; Diaphragm or Protective? and The Case Against Coitus Interruptus.

If you would like copies of any of these publications, please write stating titles and quantities required to Medical Division, (Dept. 12c), London Rubber Industries Ltd., Hall Lane, London, E.4.

### added Vitamin C

New Regal Full Cream Milk contains OPTIMAL Vitamins C & D

The golden-lacquered lining of the New Regal can does not rust or discolour after opening.

These unique features are found only in New Regal Milk—the best and safest for infant feeding, hospital dietary and general home consumption.

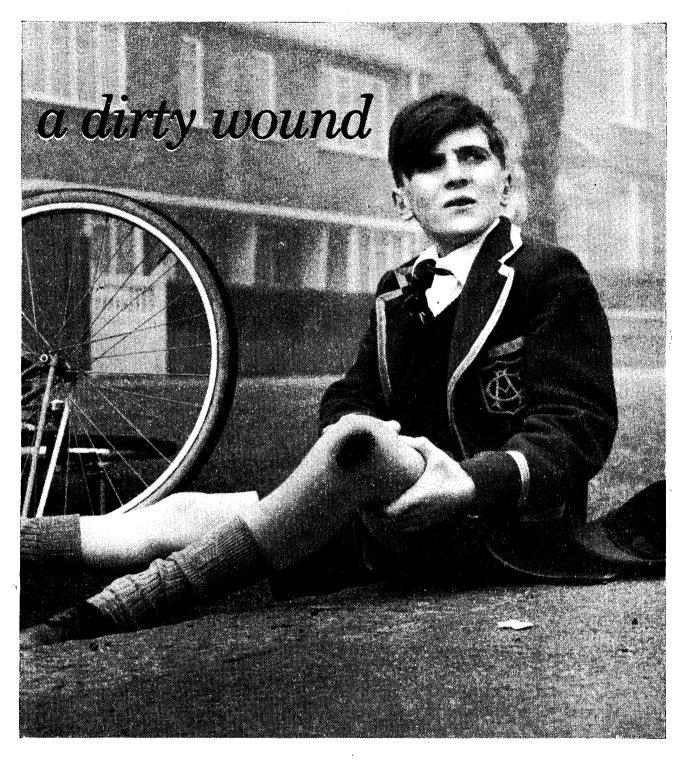

## NEW REGAL HALF-CREAM MILK

(also in golden-lacquered cans)
This milk is specially formulated to meet the specific demands of premature, marasmic or other babies unable to tolerate a full-cream feed. It is invaluable, too, for all adults on 'reduced fat' diets.

## .UCOPHAG

(METFORMIN HCL, DIMETHYLDIGUANIDE HYDROCHLORIDE)

### Important New Evidence on the place of GLUCOPHAGE in the therapy of **Diabetes Mellitus**

#### NON-TOXIC

The diguanides are non-toxic on human subjects in doses which can be tolerated without digestive upsets (1).

#### IN NEWLY DIAGNOSED DIABETICS

Of 13 patients treated the only definite failure was a case of carcinoma of the pancreas with diabetes mellitus (2).

### SULPHONYLUREA **FAILURES**

The most potent form of oral therapy for diabetes at present available is a diguanide combination with chlorpropamide. Patients who fail to respond to chlorpropamide, or become resistant to it can be controlled by combined treatment.—Gastrointestinal side-effects are unusual (3).

#### IN BRITTLE DIABETICS

The diguanides may be used to supplement insulin treatment in patients where diabetes is difficult to control on insulin alone. In some cases big variations of blood sugar are eliminated and hypoglycaemic episodes reduced (3).

#### For patients with marked involvement of trunk and abdominal muscles

pencer

#### IS the support of choice

Spencer Supports are therapeutically effective as treatment aid in convalescent and chronic poliomyelitis, especially where there is involvement of trunk and abdominal muscles. The patient pictured at left is a typical example. This female child is shown 16 months following acute poliomyelitis. Note residual paralysis of abdominal muscles, scoliosis, and marked lordosis. Treatment for this patient included Spencer Spinal Support (as shown) to help maintain and correct body alignment and to help prevent further development of deformity. A Spencer abdominal Spring Pad\* was incorrected in the support to aid requirement and to compare the for paralysed porated in the support to aid respiration and to compensate for paralysed abdominal muscles.

Spencer is the support of choice because: each Spencer Support is individually designed, cut, and made according to the medical indications for each patient. \* Patented.

# A natural action laxative

When advising a laxative, medical preference usually favours the use of a product which acts in a perfectly natural way. Andrews meets this demand admirably. Its effect is to increase the fluid content in the bowel by osmosis and so induce a mild and natural aperient action that does not irritate the intestine.

Andrews will be found particularly useful for relieving constipation arising from decreased food intake, either during illness or restricted diet.

Andrews has further advantages, it is mildly antacid and relieves gastric discomfort. It also improves the flow of bile and helps to check biliousness and sick headaches.

The pleasant taste and refreshing effervescence of Andrews make it readily acceptable to most patients.

## LUCY BALDWIN APPARATUS FOR OBSTETRIC ANALGESIA

The Lucy Baldwin Apparatus is designed for the administration of nitrous oxide and oxygen mixtures for analgesia in obstetric practice. Gas mixture, which may be varied between 70% nitrous oxide/30% oxygen and 100% oxygen, conforms accurately to the value selected on the control dial no matter how draw-off conditions may change. The analgesic properties of nitrous oxide may thus be exploited to the full whilst at the same time maintaining adequate oxygenation. The gas mixture flows only in response to the patient's inspirations and safety cut-off valves eliminate any possibility of inhalation of pure nitrous oxide in the event of undetected failure of the oxygen supply. We shall be glad to send you illustrated literature on request.

## 'OTOSPORIN' clears infected ears

The modern method of treatment in otitis externa, chronic suppurative otitis media, and infected mastoid cavities, is 'Otosporin' brand Drops.

'Otosporin' is an aqueous suspension containing
both neomycin and polymyxin B sulphate
which are together effective against practically
all the bacteria found in ear infections.
They are unlikely to induce bacterial resistance or skin
sensitisation, and neither of them gives rise to
cross-resistance or cross-sensitisation to penicillin and
other antibiotics. Their effectiveness is visibly
enhanced by the hydrocortisone in 'Otosporin';
this, by reducing inflammation, not only
relieves pain, but provides greater access for
the antibiotics

Brand

a new and highly effective topical corticosteroid, provides impressive anti-inflammatory and anti-allergic activity.

# 'DRENISON' with NEOMYCIN

provides the necessary steroid-antibiotic combination where the skin condition is complicated by potential or actual infection.

'Drenison' and 'Drenison' with Neomycin are available in both a vanishing cream and an ointment base, in tubes of 5G. and 15G.

# A Ross Microreader where you want it

The full value of using microrecords in Hospital administration is only obtained if the microreader can be located in the room where the consultation is taking place.

This is just what the Ross Microreader was designed to achieve. It is compact and portable and will stand conveniently on table or desk. It is a universal reader in that it will project any type of microrecord, 35 mm. or 16 mm.; cards or film; opaques or transparencies. Miniature X-rays can be viewed with equal facility and even microscope slides can be examined using the special microscope objective.

It is less costly than the conventional, bulky, single purpose reader, thus making it an economical proposition to have several conveniently situated reading stations instead of one.

May we send further details of the ROSS microreader; or we should be pleased to submit one for examination and trial.

the future to chance and perhaps deprive his wife and children of the security they need. For a monthly premium of only £2.3.10d., a father aged 30 next birthday can provide a capital sum of £1,000 for his dependents when he dies PLUS a tax-free annual income of £500 for the balance of a period of 20 years from the date of the policy, should he die within that period. (After 20 years, the premium would fall to £1.5.9d.) Please write for a copy of our Family Security prospectus.

# BRONCHITIS

The well established formula for chronic bronchitis is TERCOLIX. This dislodges the habitual mucoid sputum; relieves wheeziness, breathlessness and distressing fits of coughing; makes expectoration easy by liquifying tenacious mucus. Each teaspoonful contains Codein Phosph. \$\frac{1}{4}\$ grain combined with Terpin Hydrate, Menthol, Pine and Eucalyptus oils to provide a warm, soothing, sedative effect. Dosage: Two teaspoonfuls in warm water, before retiring—sipped slowly—free the air passages of accumulated mucus and ensure a good night's sleep. Where the critical point has been reached and the bronchial tubes are swollen, soggy and unduly sensitive, daily maintenance doses are strongly recommended. Samples for clinical trial are available on request.
