"In a forty-two-day therapeutic evaluation of a standardized senna preparation in tablet and granule forms (Senokot) given to 40 chronically constipated patients ranging in age from 55 to 93 years, constipation was corrected in 29 and improved in 11 patients. In the last three weeks of the study, normal stools were maintained in 27 patients with intermittent doses every two or three days. The need for enemas was eliminated in 10 of the 20 patients and sharply reduced in 9 of the remaining 10. Recurrent faecal impactions in 11 patients were prevented during the course of therapy."

Pleasantly flavoured and free from grittiness, Droxalin Tablets command ready patient acceptance, bringing quick relief from pain without secondary acid rise or harmful side effects.

# Whatever the Season...

'Actifed' relieves nasal and respiratory congestion from the inside. It is taken by mouth and reaches areas inaccessible to sprays and nasal drops.

Rapidity of action is an outstanding feature of 'Actifed' products — relief of symptoms is felt within 10 to 30 minutes.

'Actifed' combines the most potent antihistamine, triprolidine, with pseudoephedrine, a powerful vasoconstrictor and bronchodilator. Unlike its

analogue ephedrine, pseudoephedrine causes no marked central stimulation.

With 'Actifed' there is no risk of secondary engorgement or inhibitions of ciliary activity. 'Actifed' Tablets are recommended for adults, while the Syrup is particularly suitable for children. Also available — 'Actifed' Compound Linctus, which contains codeine in addition to the other two ingredients, for relief of coughs or coughs and congestion.

## THE OUTCAST

"The fairest things in life are Death and Birth And of these two the fairer thing is death?" *Ode to the Setting Sun* Francis Thompson  
Was Francis Thompson a depressive? One strongly suspects so. Certainly he was a mystic and predisposed to bouts of severe melancholy. He saw himself as an outcast, alone—he felt that life was not worth living; he was preoccupied with death. Many of your patients may show just such a morbid thought-pattern. For these modern-day sufferers effective therapy is possible: the treatment is NARDIL.

## IN MILD TO MODERATE DEPRESSION

NARDIL is safe and is effective at low dosage levels. Toxic effects on blood or liver are extremely rare. NARDIL acts quickly. Response is usually seen within the first weeks or even days of treatment. NARDIL provides reliable treatment for depressives—often the problem patients of a busy practice.

# LUCY BALDWIN APPARATUS FOR OBSTETRIC ANALGESIA

The Lucy Baldwin Apparatus is designed for the administration of nitrous oxide and oxygen mixtures for analgesia in obstetric practice. Gas mixture, which may be varied between 70% nitrous oxide/30% oxygen and 100% oxygen, conforms accurately to the value selected on the control dial no matter how draw-off conditions may change. The analgesic properties of nitrous oxide may thus be exploited to the full whilst at the same time maintaining adequate oxygenation. The gas mixture flows only in response to the patient's inspirations and safety cut-off valves eliminate any possibility of inhalation of pure nitrous oxide in the event of undetected failure of the oxygen supply. We shall be glad to send you illustrated literature on request.

PROGRESS WITH BETAMETHASONE

a new product  
for the treatment of

**HAY FEVER**

# Betnesol-N nasal spray

This latest addition to the Betnesol range of topical corticosteroids contains betamethasone phosphate, neomycin, and a vasoconstrictor.

The betamethasone is presented as the disodium phosphate, which is soluble, and can therefore reach the inflamed tissues more readily. Thus it provides most efficient local therapy.

The anti-inflammatory action of the corticosteroid is supplemented by the decongestive effect of naphazoline. A lower than usual concentration minimises any risk of the 'rebound phenomenon' which may sometimes follow too intensive use of vasoconstrictors.

The antibiotic neomycin is included to control infection that may be associated with the primary condition. It has a wide range of activity and very low risk of sensitisation. Mild attacks of hay fever can often be controlled by the use of this new spray alone. Severe cases, however, may need systemic corticosteroid treatment in addition, and for this purpose Betnelan tablets are particularly well suited. The tablets, recently introduced by Glaxo, contain betamethasone alcohol. A few days' treatment will usually control the condition rapidly, but local application of the spray should normally be continued.

**BETNESOL-N NASAL SPRAY** 0.02% betamethasone phosphate 0.5% neomycin sulphate 0.02% naphazoline nitrate. 15 ml plastic squeeze bottles.

## FOR GERIATRIC PATIENTS safe, comfortable, effective HERNIAL SUPPORT

Because each Spencer Support is designed in order to meet the patient's individual needs, results are demonstrably superior.

The patient shown on left, aged 74, developed a left ventral hernia following surgery fourteen years previously. A left inguinal hernia resulted from the long wearing of a cast following a hip injury 3 years ago. "Stock" supports proved ineffective. A Spencer Support as shown was prescribed with excellent results. Her Spencer gives safe, comfortable and effective control of the hernias—improves and maintains posture—protects and supports the weak muscles of old age. With the aid of her Spencer, the patient runs her household, does all her own work, and—as she says—still has time "to enjoy life."

Prescribe Spencer with confidence for men, women, children—for abdomen, back, breasts. No case is too difficult for Spencer Designers!

# A NEW DEAL FOR DOCTORS JOINING THE ROYAL ARMY MEDICAL CORPS

Short service and permanent commissions are now open to both men and women graduates as general practitioners and specialists under excellent new terms.

## ENTRY AND PROMOTION

A fully registered practitioner now enters the R.A.M.C. in the *minimum* rank of Captain, earning £2,000 a year. After five years he is promoted to Major, earning £2,300; after a further 8 years a permanent commissioned officer can become a Lieutenant-Colonel, earning £2,760 a year. All permanent officers can be employed up to the age of 65. Short service commissions are for three or five years and may lead to permanent commissions.

These figures include marriage and ration allowances but do not include diploma or specialist pay. Most officers can expect to reach the rank of full Colonel, and there is opportunity for promotion to still higher ranks.

## CIVIL EXPERIENCE

Credit is given for civilian experience, which means, for example, a candidate with six years' practice will enter as a Major.

## PROFESSIONAL OPPORTUNITY

Opportunities for permanent officers to specialise are excellent and they can achieve consultant status. Non-specialists may now be employed in general practice up to the rank of Colonel.

## PENSIONS GRANTS GRATUITIES

For permanent officers there is an initial £1,500 grant, a generous non-contributory pension and tax-free terminal grant. On leaving, short service officers receive tax-free gratuities of £1,500 after three years or £3,000 after five years.

## PRE-REGISTRATION COMMISSIONS

Medical graduates may be granted permanent or short service commissions as Lieutenants during their pre-registration year. Married, they can earn up to £1,339 a year, and on registration are promoted to Captain. Short service officers then serve a minimum period of three years, earning tax-free gratuities ranging from £1,700 to £3,200.

## STUDENT CADETSHIPS

Medical students who have completed their pre-clinical studies may be granted permanent or short service commissions as Second Lieutenants. All tuition fees are paid and with allowances, if married, they can receive £1,090 a year. On registration short service officers serve for a minimum period of five years, earning tax-free gratuities ranging from £1,400 to £2,600.

Further details of terms and conditions of service, pay, pensions and gratuities, from: Major-General J. C. Barnetson, O.B.E., Q.H.P., M.B., Deputy Director-General, Army Medical Services, The War Office (HN/1), London, S.W.1. Tel. No: GROsvenor 8040, Ext. 740.

## APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose (unless otherwise specified) one copy each of 3 recent ★ testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given.

House Officers should submit a separate application for each post for which they apply.

Canvassing of members of the Board or Advisory Appointments Committee will lead to disqualification (Statutory Instrument 1950, No. 1259, N.H.S.).

★ *SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.*

## THE PROBLEM OF CHOICE

*when symptoms of depression and anxiety co-exist*

A tranquillizer or an antidepressant?  
Either will relieve some of the symptoms.  
Neither will necessarily relieve *all* the symptoms.

'Parstelin' solves this problem in the most logical and convenient way—optimum doses of the rapid-acting antidepressant 'Parnate' and the versatile tranquillizer 'Stelazine' are combined in a single tablet.

'Parstelin' swiftly lifts depression, calms anxiety and restores normal resiliency of mood in patients whose symptoms extend beyond the range of a single psychotropic drug. Typical indications include emotional fatigue, the menopausal syndrome, and many psychosomatic disorders.
