Fighting a losing battle?

To the obese, dieting is often a distasteful and painful undertaking. Many patients, wavering between the good advice of their doctor and their desire for food, find the greatest difficulty in sticking to their diet. They are, in fact, fighting a losing battle. They need 'Dexedrine'.

'Dexedrine' is a safe and well-established anorectic agent that provides constant assistance to the dieting patient. In addition to its specific anorectic effect, 'Dexedrine' has a beneficial mood-elevating action which eliminates depression and irritability during dieting.

'Dexedrine' is presented in 'Spansule' sustained-release capsules to provide an all day long anorectic effect—on one capsule taken first thing in the morning.

ALDOMET

ALDOMET

‘ALDOMET’ (methyldopa) is a unique antihypertensive agent. Its development has stemmed from fundamental research on antagonists to the biosynthesis of pressor amines from aromatic amino acids.

‘ALDOMET’ provides effective lowering of standing and lying blood pressure, usually without symptomatic postural hypotension. Daily blood pressure fluctuations are minimised. Exercise hypotension rarely occurs.

‘ALDOMET’ may replace ganglion and adrenergic blocking agents in many patients including some with severe benign or malignant hypertension.

A striking feature of therapy with ‘ALDOMET’ is the general lack of severe side effects — patients usually feel well and improve symptomatically.

‘ALDOMET’ is supplied as tablets containing 250 mg. methyldopa, for oral administration. Fully detailed information on ‘ALDOMET’ is available on request.

Why the quill?

The first demonstration that blood flows through arteries under intermittent pressure was made by Galen (A.D. 130-201). He inserted a quill into an artery and observed the pulsation of the blood in the quill and its disappearance when the artery was ligated above.

in the treatment of peptic ulcer

has particular advantages

ROTER achieves a high cure rate and often gives effective control of even refractory chronic cases which have resisted other treatments.

ROTER in many cases obviates the need for hospitalization or surgical intervention.

ROTER helps patients to keep ambulant and symptom-free with a minimum of medication and with few, if any, dietary restrictions.

ROTER in general practice enables the physician to take adequate care of his gastric cases without frequent or prolonged supervision.

ROTER has no known side effects.

ROTER requires no supplementary medication such as sedatives or anti-spasmodics.

ROTER shows a saving in cost when compared with conventional methods of treatment.

depression's other face

SAROTEN

(AMITRIPTYLINE)

is the specific treatment for DEPRESSION WITH ANXIETY

The depressed patient is a common enough sight to most doctors. The anxious patient who is suffering from depression, although equally important clinically, is far more difficult to recognise. These patients often present with symptoms so similar to those associated with simple anxiety states that the underlying depression escapes unnoticed.

SAROTEN, because it has both an antidepressive and an anti-anxiety effect, simplifies the treatment of such patients. It is indicated at one end of the scale, for patients overtly depressed with a secondary anxiety component, right through to the other extreme where symptoms of anxiety predominate and depression is not obvious.

Moreover, whichever the primary cause—anxiety or depression—SAROTEN effectively controls symptoms and helps the patient once again to take an active and useful place in society.

SAROTEN is available as sugar-coated tablets in two strengths: 10 mg. and 25 mg.

ESTABLISH A NEW COMPANY IN BRITAIN

The C. H. Boehringer Sohn symbol is already familiar to British doctors, for it appears on the packs of many products which have long been considered medicaments of choice in these islands. As a result of the acceptance which their pharmaceutical specialities have won, C. H. Boehringer Sohn of Ingelheim am Rhein are now able to take a step which will enable them to give to the British Medical Profession the greatest possible service of information and advice on their use. They have established an independent company in the United Kingdom. Boehringer Ingelheim bring an enviable international reputation as organic chemists. You know of lobeline and isoprenaline. Quite possibly you have prescribed Dulcolax, Buscopan, Preludin and Persantin. Now that the pharmaceutical organisation which developed these substances is firmly and independently based in Britain, it is even more at your disposal.

Synadrin

Regd. Trade Mark

new compound for the treatment of patients with angina pectoris

Synadrin is a specific coronary vasodilator, and is chemically unrelated to any known treatment for coronary disease. Its specific activity has been demonstrated in animal experiments¹⁸⁻²⁴, but the final test of the value of a new drug is in clinical trial in human patients. Synadrin has been tested in over 1,000 patients, and results of trials so far reported have been promising¹⁻¹⁷.

Effective and safe

Synadrin has been shown to reduce the frequency of anginal attacks. It is particularly successful in patients with coronary ischaemia with or without previous infarction. It produces prolonged improvement of the coronary blood supply, and consistent treatment over a period of weeks produces the best results. Synadrin is well tolerated and its safety has been shown by use in more than 1,000 patients over the last two years.

Drapolene specific for napkin rash

The success of Drapolene as a preventive and treatment of napkin rash is due to its activity against the urea splitting organisms which are known to be the causative factor of this common skin condition.

Drapolene is formulated in a pleasant water miscible base which promotes residual activity, thus preventing the liberation of free urinary ammonia.

Drapolene is quick acting, even where an ulcerated condition has developed. It also assists cleansing of the affected area.

*brand tigloidine hydrobromide
for relief of spasticity and
spasms associated with
upper motor neurone disease*

tiglyssin

Tigloidine is a minor alkaloid of the atropine series, but is almost totally devoid of anticholinergic activity. It has however been shown (1) to share with atropine an effect on muscle characterised by quick fatigue on rapidly repeated stimulation. For this reason, its possible therapeutic effect on pathologically increased muscle tone was investigated, and useful activity subsequently reported in Parkinsonism (2), Huntington's chorea (3) and spastic paraplegia (4, 5).

In controlled trials Tigloidine has been found to reduce spasms and spasticity to a useful extent in approximately fifty per cent of patients suffering from upper motor neurone disease: an incidence and degree of improvement greater than were produced by a matching placebo. The effect of the drug in any individual patient is unpredictable; patients whose clinical state is similar do not necessarily benefit to the same extent. In patients who do respond, however, the effect of the drug appears to be well maintained—in one trial (4) no loss was seen after periods of administration up to a year.

The effect of Tigloidine is, of course, purely palliative, it has no curative effect on the cause of spasticity, nor can it slow down the advances of progressive CNS disease.

DOSE AND ADMINISTRATION

The daily dose for adults is 1-2G, divided into three and taken with meals. A suitable starting dose is 0.75G, and this should be slowly increased until no further improvement occurs or mild atropine-like side-effects appear. Administration for 3-4 weeks is usually needed for the full effect to develop.

ergotamine alone is not enough

To combat an incipient attack of migraine, oral ergotamine alone is inadequate. It needs the potentiating effect of caffeine. **Above all, it needs a rapidly acting anti-emetic to counter its main defect as well as the vomiting resulting from migraine itself.**

'Migril' contains every one of the necessary ingredients—ergotamine tartrate, caffeine, and the proven anti-emetic cyclizine hydrochloride. 'Migril', the ever-present companion of thousands of migraine sufferers, is their reliable insurance against an attack.

(soap-free washing tablet)

An entirely new and soap-free way to cleanse and care for skin in health or disease.

Used with hard or soft, cold or warm water, it will efficiently cleanse the skin without upsetting its normal, slightly acid, pH.

Sevana is proving a valuable help in the management of eczematous skin conditions or other dermatoses where soap cannot be tolerated.

Patients should be recommended to buy it from retail pharmacists.

Sevana owes its cleansing properties to sulphated fatty alcohols, the low molecular weight fractions of which have been excluded to avoid possible irritancy.

Only Nulacin provides intragastric milk-alkali drip therapy for the ambulatory patient

“In view of the ineffectiveness of most of the tableted antacids, the milk-alkali tablet (Nulacin) would appear to be the antacid of choice for ambulatory therapy.”

(Medical Times 1958, 1: 74)

NULACIN TABLETS have been developed so that when allowed to dissolve slowly in the mouth, they give continuous milk-alkali drip therapy and provide a treatment of peptic ulcer and other conditions associated with hyperacidity. The effectiveness of Nulacin therapy has been established by clinical work in many countries. The following are a few references to the literature:

The debilitated patient, whether recovering from severe illness or operation or suffering from a chronic disease, is greatly benefited by the addition of nutritionally generous supplements of vitamins of the B complex and ascorbic acid. Such patients often need also mild sedation.

A combination of the necessary vitamins with a relatively low dose of phenobarbitone is now available as Tropenal.

Tropenal

INDICATIONS

- (1) Anxiety states with restlessness, especially associated with hypertension, alcoholic withdrawal or peptic ulcer.
- (2) Progressive illness in which insomnia is associated with a need for the greatest nutritional support—e.g. congestive heart disease, cachectic states.
- (3) During convalescence, to speed recovery by promoting good appetite and a quiet frame of mind associated with nutritional adequacy.
- (4) Insomnia not induced by pain.

FORMULA		
Each tablet contains		
Aneurine hydrochloride B.P.	...	5 mg.
Riboflavin B.P.	...	5 mg.
Pyridoxine B.P.C.	...	2 mg.
Nicotinamide B.P.	...	15 mg.
Ascorbic acid B.P.	...	50 mg.
Phenobarbitone B.P.	...	32 mg. ($\frac{1}{2}$ gr.)

In designing the formula, it was necessary to bear in mind the known antagonism between barbiturates and the vitamins of the B complex: also the theoretical possibility that the effects might cancel each other out. But preliminary trials have shown that on account of the varying speeds of action and other factors not fully understood, the combination is clinically effective.

DOSAGE

One to two tablets daily.
Tablets in packs of 100 and 500.

Gastric acid upsurge?
Mucaine helps you provide
more effective relief

Many patients call it heartburn, others indigestion — you know it as oesophagitis. Whenever your patients are troubled by acid upsurge into the oesophagus you can now provide, with Mucaine*, more effective relief than with normal antacid therapy by itself. Mucaine is a new approach to the treatment of heartburn, presenting Wyeth's new unique type of surface anaesthetic, oxethazaine, in an antacid base. Oxethazaine is poorly absorbed and notably stable in acid or alkaline conditions, a combination of properties which will allow you to prescribe effective symptomatic relief with few side-effects.

Each 5 ml. of Mucaine contains 10 mg. of oxethazaine with 4.75 ml. of Aluminium Hydroxide Gel. B.P. and 100 mg. of Magnesium Hydroxide B.P.C.

Packs: Mucaine is available in bottles of 12 fl. oz.

Helping
feet to
grow up
healthy...

Members of the medical profession know only too well that poorly made, ill-fitting shoes can damage feet seriously in the growing years and lead to all kinds of health complications in later life. But do you know how thoroughly Clarks have tackled the problem? Clarks Children's shoes are available in four widths in every size and half-size at specially appointed retailers throughout the country. The trained assistant uses the famous Clarks Footgauge, which measures length and girth as well as width, to see that shoes fit perfectly, *all ways*. And Clarks shoes are carefully designed to look after feet as they grow. They are designed to give firm but gentle support at instep and heel, yet to leave plenty of room for toes to grow. Clarks shoes worn from babyhood onwards are the surest safeguard for children's feet.

Betnesol

the soluble steroid

Betnesol is a tablet of *soluble* betamethasone phosphate. It dissolves spontaneously in water to form a palatable, tinted, particle-free solution for oral administration.

Greater consistency of therapeutic effect

By reducing particle size of corticosteroids, efficiency of their absorption is increased. The ultimate attainable is a true solution, the form in which Betnesol is taken. This ensures maximum absorption, the most consistent therapeutic effect, and allows reduction of dosage in certain cases.

Less dyspepsia

Because no solid steroid reaches the stomach, the incidence of gastric disturbance is even less with Betnesol than it already is with betamethasone alcohol (Betnelan).

Betnesol Tablets give further good reasons for making betamethasone your *standard* corticosteroid for treating such conditions as asthma, allergies and dermatoses. This compound has enhanced anti-inflammatory activity, and negligible effect on sodium and potassium balance. It offers renewed benefit to patients on long-term steroid treatment.

A NEW DEAL FOR DOCTORS JOINING THE ROYAL ARMY MEDICAL CORPS

Short service and permanent commissions are now open to both men and women graduates as general practitioners and specialists under excellent new terms.

ENTRY AND PROMOTION

A fully registered practitioner now enters the R.A.M.C. in the *minimum* rank of Captain, earning £2,000 a year. After five years he is promoted to Major, earning £2,300; after a further 8 years a permanent commissioned officer can become a Lieutenant-Colonel, earning £2,760 a year. All permanent officers can be employed up to the age of 65. Short service commissions are for three or five years and may lead to permanent commissions.

These figures include marriage and ration allowances but do not include diploma or specialist pay. Most officers can expect to reach the rank of full Colonel, and there is opportunity for promotion to still higher ranks.

CIVIL EXPERIENCE

Credit is given for civilian experience, which means, for example, a candidate with six years' practice will enter as a Major.

PROFESSIONAL OPPORTUNITY

Opportunities for permanent officers to specialise are excellent and they can achieve consultant status. Non-specialists may now be employed in general practice up to the rank of Colonel.

PENSIONS GRANTS GRATUITIES

For permanent officers there is an initial £1,500 grant, a generous non-contributory pension and tax-free terminal grant. On leaving, short service officers receive tax-free gratuities of £1,500 after three years or £3,000 after five years.

PRE-REGISTRATION COMMISSIONS

Medical graduates may be granted permanent or short service commissions as Lieutenants during their pre-registration year. Married, they can earn up to £1,339 a year, and on registration are promoted to Captain. Short service officers then serve a minimum period of three years, earning tax-free gratuities ranging from £1,700 to £3,200.

STUDENT CADETSHIPS

Medical students who have completed their pre-clinical studies may be granted permanent or short service commissions as Second Lieutenants. All tuition fees are paid and with allowances, if married, they can receive £1,090 a year. On registration short service officers serve for a minimum period of five years, earning tax-free gratuities ranging from £1,400 to £2,600.

Further details of terms and conditions of service, pay, pensions and gratuities, from: Major-General J.C. Barnetson, O.B.E., Q.H.P., M.B., Deputy Director-General, Army Medical Services, The War Office (HN/3), London, S.W.1. Tel. No: GROsvenor 8040, Ext. 740.

APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose (unless otherwise specified) one copy each of 3 recent **★** testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given. House Officers should submit a separate application for each post for which they apply. Canvassing of members of the Board of Advisory Appointments Committee will lead to disqualification (Statutory Instrument 1950, No. 1259, N.H.S.).

★ SERVICE MEMBERS may have difficulty in supplying recent testimonials, but this should not deter them from applying.

SERVICES

THE MEDICAL SERVICE OF THE ROYAL NAVY VACANCIES FOR MEDICAL OFFICERS

The Royal Navy offers Short Service Commissions of 3 or 5 years' duration to registered medical practitioners of British nationality. Opportunity exists for transfer to Permanent Commission, by selection, after one year's service. There are facilities for postgraduate study and training for higher degrees with a view to specialization, in the case of officers entered on 5-year short service and on Permanent Commissions. Specialties include Underwater Physiology, Nuclear and Aviation Medicine, as well as the usual clinical subjects.

Pay:

On entry a Surgeon Lieutenant's basic pay will be £1,423 per annum, if married and over the age of 25 his pay and allowances will be £2,002 per annum.

Additional allowances are paid for children's education, disturbances involving essential moves of family, and for service overseas.

Gratuities and Pensions:

Gratuities are payable on completion of short service commissions:

3 years' service, £1,500 tax free

5 years' service, £3,000 tax free

Those officers accepted for Permanent Commissions receive £1,500 (Taxable).

Service becomes pensionable after 16 years.

For further details apply to:

THE MEDICAL DIRECTOR-GENERAL OF THE ROYAL NAVY,
Medical Department (Admiralty), Queen Anne's Mansions, St. James's Park, London S.W.1.

Services—contd.

You can earn £2000 a year on entry in the Royal Air Force

New Conditions for Registered Practitioners

Under a new scheme announced by the Air Ministry, if you are a qualified doctor you can enter the Royal Air Force immediately after full registration and be commissioned as a Flight Lieutenant, earning, with full allowances, £2,000 a year. If you have post-graduate experience you can be granted up to seven years back-dated seniority; a doctor with six years' civilian experience will be appointed Squadron Leader on entry, earning, with full allowances, £2,300 a year.

Tax free gratuities are payable on completion of short service commissions. These are £1,500 after three years or £3,000 after five years.

You can be offered a permanent commission which guarantees pensionable employment to the age of 65 and excellent prospects of promotion to Group Captain rank and a salary of well over £3,000 a year. If you are married and serving at a Station you may be allocated an official married quarter. This will be a comfortably furnished house near your surgery.

You will have full clinical freedom and your practice will normally include the families of serving members of the Royal Air Force. You will have opportunities for specialising, and study leave is granted on full pay and allowances to permanent officers who wish to read for further qualifications.

'Pre-Registration Year' Scheme
If you are a medical graduate you may be commissioned in the Royal Air Force immediately in the rank of Flying Officer. You may then spend your pre-registration year seconded to a civilian hospital. This means that during your year as house physician or surgeon you may earn,

with full pay and allowances, up to £1,339 a year. On registration, you will become a Flight Lieutenant with possible earnings of £2,000 a year. To qualify for this scheme you must undertake to serve for at least three years after full registration. Your pre-registration year counts towards your gratuity following a short service commission and towards retired pay on a permanent commission. The gratuity on completion of a three year commission is £1,500 plus £200 for the full pre-registration year; on completing a five year commission the gratuity is £3,000 plus £200 for the full pre-registration year. These gratuities are tax free.

'Medical Cadetship' Scheme

If you are a medical student and have passed your second M.B. examination or the equivalent you may be commissioned now in the Royal Air Force. During the remainder of your medical training your fees will be paid and you will receive the full pay and allowances of a Pilot Officer which can amount to £1,090 a year.

To qualify for this scheme, you must undertake to serve for at least five years in the Medical Branch of the Royal Air Force after full registration.

At the end of the five years you may enter civilian practice with a tax free gratuity of between £1,400 and £2,600, or you may be selected for a permanent commission which guarantees pensionable employment to the age of 65 and which may take you to the most senior ranks in the Service.

Terra-Cortril® Spray

brand of oxytetracycline and hydrocortisone

... the new non-touch technique for

burns

infected dermatoses

leg ulcers

Spray treatment applies the full potency of Terra-Cortril directly on to the inflamed area. Its effect is immediate because the action is not retarded by a base.

Infection is prevented, inflammation and pain reduced, scar tissue development decisively checked and the healing process accelerated. Spray treatment prevents softening of surrounding tissue sometimes caused by dressings or ointments. The spray has a soothing effect much welcomed by patients.

Patients and nurses will find it easy and simple to use. Any part of the body can be sprayed in a few seconds.

Dressings may not be required. Spray treatment can be used with modern exposure techniques.

A HOME FOR £15

Over two million Algerians are soon to be released from prison camps. Free to search for shelter and land. As you read this they stand longing to return. They are a sad sight. Years of privation and long periods of sickness have left them with little reserve of strength. Most are destitute. They return to villages which have often been razed to the ground. We have sent them 20,000 saucepans and 5,400 metal basins. CAN YOU HELP US? Old people and tiny children plead for shelter.

You can rehouse a family in a good strong tent for £15. To them this is a paradise of a home. Size of tent is 14 ft. by 7 ft. by 7 ft. Can you and your friends provide a home?

Please help and help quickly. If your gift is small it will go with others. We receive all gifts with gratitude.

Voluntary workers will forward your gift without one penny of deduction.

The Rt. Hon. JAMES GRIFFITHS, P.C., M.P.,

Hon. Treasurer,
