"The danger of superinfection with monilia and other fungi occurring during oral broad-spectrum antibiotic therapy is a real one, especially if dosage is heavy and treatment prolonged. For this reason it is a wise precaution to administer an antifungal compound with the broad

spectrum antibiotic and both nystatin and amphotericin B have been used for this purpose. Preparations are available in which one of these anti-fungal drugs is combined with a broad-spectrum antibiotic in a single tablet [capsule] and have much to recommend them."

Diagnosis?—Follicular tonsillitis. What the mother didn't even bother to say was that the only fluid this little girl will accept is Lucozade. It's true of so many patients, for the liquid glucose in Lucozade is only one quarter as sweet as sucrose, and one third as sweet as dextrose. Also, as the doctor knows, it supplies needed calories more quickly. That is why Lucozade is such a useful therapeutic aid, and why the doctor too approves of . . .

Counteracting protein loss in the elderly

In the elderly, the lack of interest in food is both cause and result of failing energy and vitality. ORABOLIN ensures full use of such nitrogen as is available in the food, thus counteracting body protein loss; the renewed vigour and appetite lead to improved independence and gain in weight. ORABOLIN is effective in doses as low as 0.05 mg. per kilo body weight, well tolerated and free from liver toxicity or other harmful effects.

ORBENIN^{REGD.} (BRL 1621) SODIUM CLOXACILLIN

ORAL PENICILLIN ACTIVE AGAINST RESISTANT STAPHYLOCOCCI

ORBENIN is indicated for immediate use in known or suspected resistant staphylococcal infections, and in mixed Gram-positive infections (e.g. infected burns) where resistant staphylococci may be present.

- Orbenin is stable to staphylococcal penicillinase and highly effective against 'resistant' staphylococci. Its activity is four times that of methicillin.
- Orbenin is also highly effective against other Gram-positive organisms, including streptococci, pneumococci and penicillin-sensitive staphylococci.
- Orbenin is bactericidal; it is acid-stable and well absorbed by either the oral or intramuscular routes.

Dosage by mouth is 500 mg. 6 hourly. Dosage by intramuscular injection is 250 mg. four to six hourly

one certain fact in hypertension

It is suitable for all grades of hypertension

Satisfactory response in most patients

More than 250 papers provide a positive clinical background

Easy to administer—one dose daily

Long-term control readily maintained

In wide clinical use for over three years

Named the drug of choice by many authorities

Ismelin has been successfully used for over three years in the treatment of all grades of hypertension. It remains the drug of choice where positive control of blood pressure is desirable on a long term basis. Ismelin offers a unique combination of properties in providing satisfactory treatment for hypertension in nearly 90% of patients, with a single daily dose and with relative freedom from side-effects. Because of its superior control and ease of use it is now widely prescribed in general practice.

There is an increasing body of opinion in favour of the adequate treatment of hypertension at a sufficiently early stage to prevent or minimise serious secondary degenerative changes in the cardiovascular system. Such far-sighted therapy demands a drug that will maintain effective control in a majority of cases without undue inconvenience to the patient and with reasonable economy. Ismelin, alone or in combination with a thiazide diuretic such as Navidrex, is the nearest approach to this ideal.

The importance of safety in the control of diabetes

Nowhere is safety more important than in drugs intended for long-term—even life-long—use. One reason for the extensive use of Rastinon in oral anti-diabetic therapy is that no serious side-effects are associated with the product even after its use in some two million patients. The few side-effects reported have been transient and have rarely necessitated cessation of treatment.

Rastinon is the standard oral treatment of diabetes and is especially indicated for patients in whom the condition is first diagnosed at middle age.

Rastinon tablets are remarkable for their safety, simplicity, effectiveness and economy.

for control of SEVERE ASTHMA

Betnelan (betamethasone) is the recent anti-inflammatory steroid developed by Glaxo. It has proved remarkably effective in the treatment of severe asthma when other measures have proved inadequate.

Although dosage should be varied to suit the individual, in general practice a short-term course of 21 Betnelan tablets given over 6 days, is usually sufficient to achieve control. Side effects are no problem in short-term use and treatment is inexpensive.

Betnelan

GLAXO LABORATORIES LIMITED

When conventional treatment of less severe asthma is interrupted by an acute attack, short-term Betnelan therapy can restore control. When the attack is extremely severe (status asthmaticus) all recognised measures which may include injectable corticosteroids (Betnesol Injection is recommended) should be taken, at least initially. At the same time oral treatment with Betnelan can be started to maintain control. Betnelan is presented as scored tablets of 0.5 milligrams betamethasone in bottles of 30, 100 and 500. Half-strength tablets of 0.25 mg are also available in similar quantities.

NEW—soluble corticosteroid tablets **BETNESOL TABLETS**

Betamethasone disodium phosphate in a form which dissolves spontaneously in water to provide a palatable solution. This new form of betamethasone ensures maximum efficiency of absorption and greater tolerance in patients liable to dyspepsia.

The names Betnelan and Betnesol are Glaxo trade marks.

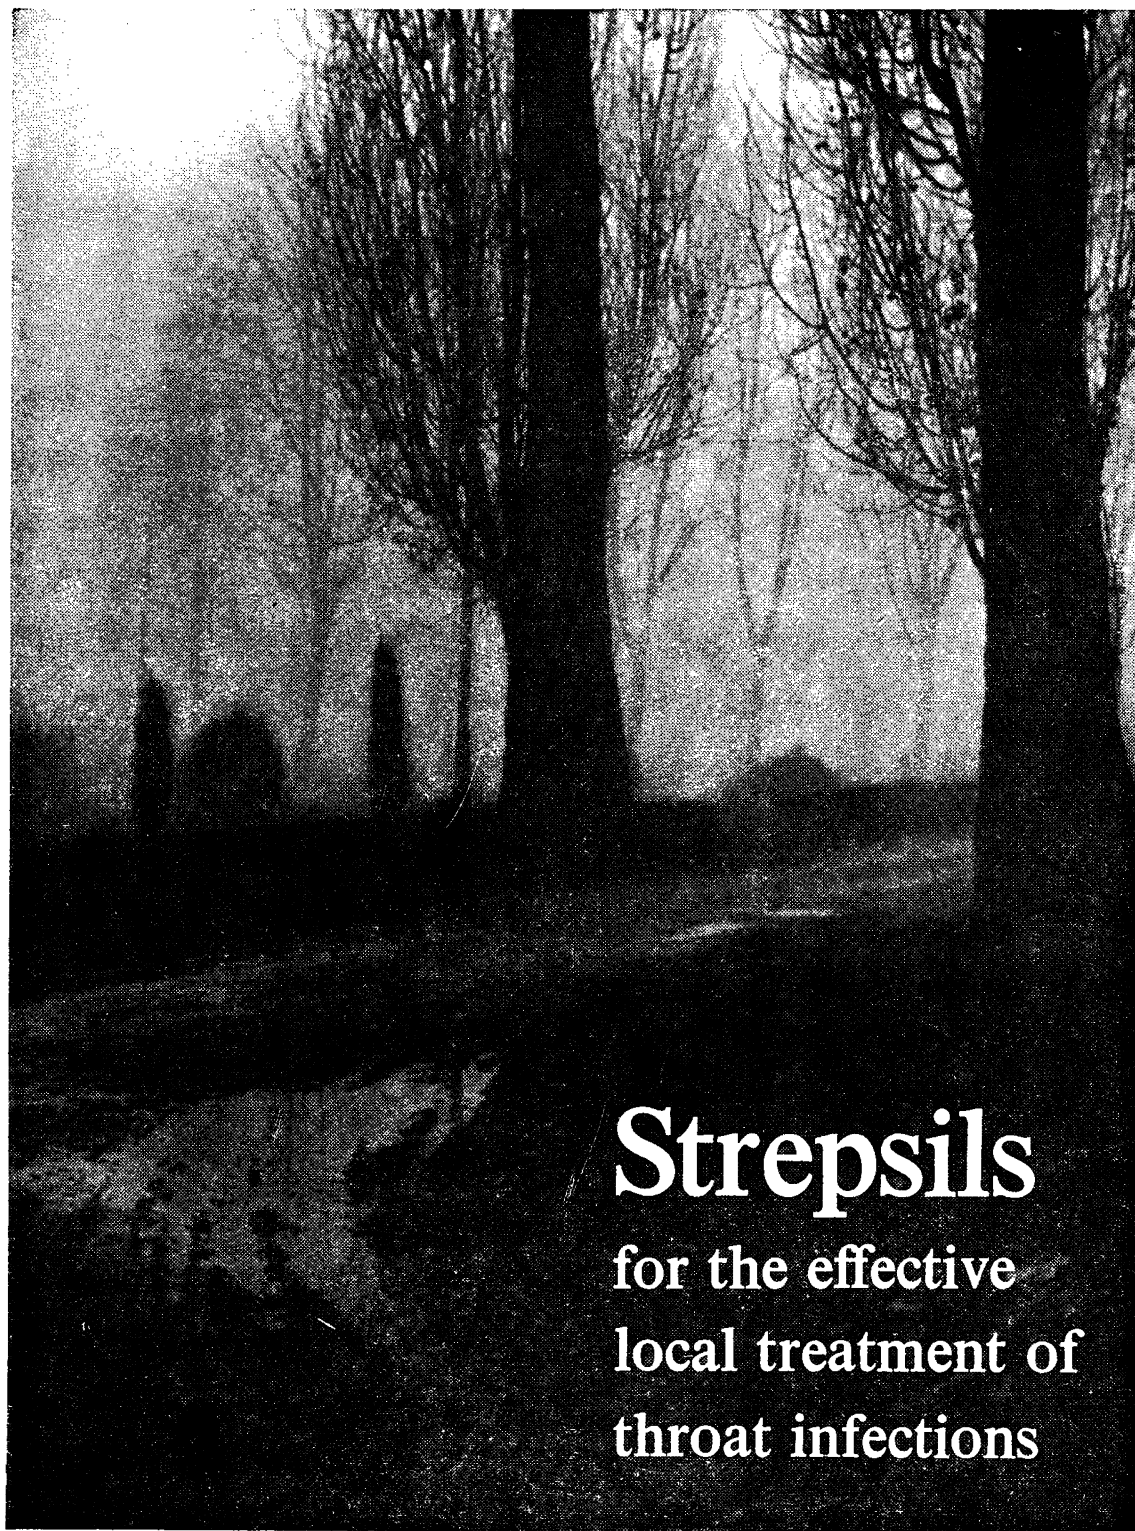

TRANSVASIN RELIEVES MUSCLE SPASM

Muscle spasm caused by physical injury or rheumatic lesions is rapidly relieved by the application of Transvasin. The esters of nicotinic, salicylic and p-amino benzoic acids penetrate the skin and are concentrated at the point of injury. Transvasin is an effective and economical therapy.

Transvasin contains ethyl and n-hexyl nicotinate, ethyl p-aminobenzoate, 2% each and tetrahydrofurfuryl salicylate 14%. The N.H.S. price of the 30g. tube is 2/6d and the cost of an average application of the cream is under 1d.

ROTER

has particular
advantages

ROTER achieves a high cure rate and often gives effective control of ever refractory chronic cases which have resisted other treatments.

ROTER in many cases obviates the need for hospitalization or surgical intervention.

ROTER helps patients to keep ambulant and symptom-free with a minimum of medication and with few, if any, dietary restrictions.

ROTER in general practice enables the physician to take adequate care of his gastric cases without frequent or prolonged supervision.

ROTER has no known side effects.

ROTER requires no supplementary medication such as sedatives or anti-spasmodics.

ROTER shows a saving in cost when compared with conventional methods of treatment.

SPECIAL RISK TRIO

EVERYDAY USAGE OF MODERN COD LIVER OIL

1. Rickets or osteomalacia has been found recently in 35 out of 74 Pakistani adults and children living in Glasgow¹. The response to treatment suggested vitamin D deficiency to be responsible. Although most of the families concerned seemed reasonably well fed, it was thought that the lack of vitamin D was partly dietary in origin and partly due to a lack of sunlight relative to the Pakistanis' skin pigmentation.

The *British Medical Journal*² commented 'Practitioners responsible for the welfare of coloured immigrants, and particularly their children, should be on the alert for early signs of rickets . . . slow growth, irritability, excessive sweating, and muscular hypotonia . . . In such cases dosing with vitamin D should be started at once, and the diet should be checked for its adequacy in calcium.'

2. One interesting feature to emerge from this Glasgow study was that children between the ages of 5 and 15 were the most seriously affected. The striking absence of rickets in children under 5 was ascribed to their consumption of welfare foods, of which the relevant one in this case was, of course, cod liver oil.

The importance to young children of a routine dietary supplement containing vitamin D is thus emphasised. After its first introduction the value of any effective prophylactic measure is necessarily undramatic and is therefore easily forgotten. The Glasgow study may help to re-emphasise the importance of routine cod liver oil administration to young children.

3. A third group of persons (apart from coloured people and young children), many of whom will benefit from cod liver oil, is that of old people. *The Lancet*³ said apropos of the Glasgow study: ' . . . the supply of vitamin D in northern cities is still marginal . . . '. It is, of course, old people, especially those living alone, who tend to skip or skimp their meals; and many of them will therefore benefit from a small daily intake of cod liver oil. It has the advantage for them, not only of supplying vitamins A and D, but of being a concentrated energy source, and of having, by virtue of its poly-unsaturates, a marked hypocholesterolaemic action.

. Holiday

Holidays in the "good old days" must have been a matter much more easily settled than is the case to-day. Seemingly our grand-parents, according to class and caste, merely had to choose between Margate and Ramsgate or Bournemouth and Torquay, the not so wealthy and not so healthy between Harrogate or Bath, the more affluent between the German or the French Spas. The more venturesome arranged an interview with Mr. Cook to discuss the possible dangers, moral or otherwise, of visiting the capitals of Europe or "making the Grand Tour."

Now, however, the possibilities are so wide and the demand so great that the Tours and Travel Agencies consider it necessary to begin to whet our appetites even before the Christmas dinner has been properly digested.

To save a lot of time, trouble and expense so-called "packaged" tours where everything is arranged are strong favourites. However, many of the resorts abroad, particularly in Austria, Italy and Spain, are so popular that decisions must be made early in the year so that planes, trains and ferries can be booked or else disappointment or additional expense are bound to follow.

The modern trend, however, of having to book early has much to commend it. The dull winter months can be considerably brightened by the colourful presentations that come so readily, and so acceptably for a change, through the letterbox.

The anticipation of these two or three weeks away from the cares of the surgery is better than a tonic or tranquilliser.

The variety of types of holidays is quite fascinating and even frightening—you can tour all over the world, pony trek, paint, walk, camp, etc. You can cruise in a

luxury liner through the Aegean Sea or the Atlantic : meander in a launch through the English or European canals : fly just where you like—breakfast in London, lunch in Corsica or the Costa Brava and afterwards have that siesta you can enjoy without shame.

Digressing back to the "good old days," do you remember the hansom cab clip-clopping behind yours on the way to the station, full of domestics and nannies and other paraphernalia ? Of course not, but anyway it is so much easier now because you can rent a house, be it in Cornwall or Cannes, with reliable "foreigners" laid on as part of the service and baby-sitting problems are readily solved.

Never mind where you want to go, how you want to travel or what you want to see, arrangements can be made, the ruins of ancient Rome, the Casbah, the "snow-clad mountains and the sun-drenched desert," all are quite simple.

Great holidays, trouble free. Give the burden of arrangements to

SERVICES

You can earn £2000 a year on entry in the Royal Air Force

New Conditions for Registered Practitioners

Under a new scheme announced by the Air Ministry, if you are a qualified doctor you can enter the Royal Air Force immediately after full registration and be commissioned as a Flight Lieutenant, earning, with full allowances, £2,000 a year. If you have post-graduate experience you can be granted up to seven years back-dated seniority; a doctor with six years civilian experience will be appointed Squadron Leader on entry, earning, with full allowances, £2,300 a year.

Tax free gratuities are payable on completion of short service commissions. These are £1,500 after three years or £3,000 after five years.

You can be offered a permanent commission and guaranteed pensionable employment to the age of 65 with excellent prospects of promotion to Group Captain rank and a salary of well over £3,000 a year. If you are married and serving at a Station you may be allocated an official married quarter. This will be a comfortably furnished house near your surgery.

You will have full clinical freedom and your practice will normally include the families of serving members of the Royal Air Force. You will have opportunities for specialising, and study leave is granted on full pay and allowances to permanent officers who wish to read for further qualifications.

'Pre-Registration Year' Scheme

If you are a medical graduate you may be commissioned in the Royal Air Force immediately in the rank of Flying Officer. You may then spend your pre-registration year seconded to a civilian hospital. This means that during your year as house physician or surgeon you may earn, with full

pay and allowances, up to £1,339 a year. On registration, you will become a Flight Lieutenant with possible earnings of £2,000 a year. To qualify for this scheme you must undertake to serve for at least three years after full registration. Your pre-registration year counts towards your gratuity following a short service commission and towards retired pay on a permanent commission. The gratuity on completion of a three year commission is £1,500 plus £200 for the full pre-registration year; on completing a five year commission the gratuity is £3,000 plus £200 for the full pre-registration year. These gratuities are tax free.

'Medical Cadetship' Scheme

If you are a medical student and have passed your second M.B. examination or the equivalent you may be commissioned *now* in the Royal Air Force. During the remainder of your medical training your fees will be paid and you will receive the full pay and allowances of a Pilot Officer which can amount to £1,090 a year.

To qualify for this scheme, you must undertake to serve for at least five years in the Medical Branch of the Royal Air Force after full registration.

At the end of the five years you may enter civilian practice with a tax free gratuity of between £1,400 and £2,600, or you may be selected for a permanent commission which guarantees pensionable employment to the age of 65 and which may take you to the most senior ranks in the Service.

For full information on the new conditions for doctors, specialists, graduates and cadets in the Royal Air Force, write to the Director-General of Medical Services, Air Ministry (M.A.1), (HN 893 T), 1 Tavistock Square, London, W.C.1.

**ST. ANDREW'S HOSPITAL
FOR NERVOUS AND MENTAL
DISORDERS****NORTHAMPTON**

President: The Earl Spencer.
Medical Superintendent:
D. J. O'Connell, M.D., D.P.M.

This private hospital receives patients, both male and female, suffering from nervous and mental disorders, including alcoholism and senile illnesses. The fees range from fourteen guineas per week. Private rooms with special nurses can be provided either in the hospital or in one of the villas in the grounds. The hospital is situated in 130 acres of pleasant grounds, which provide all recreational facilities. These include a nine-hole golf course, sports ground, tennis courts, etc.

WANTAGE HOUSE

This is a separate reception unit to which patients may be admitted. It is equipped for the complete investigation of nervous and mental disorders by the most modern methods. All forms of treatment are available. It contains laboratories for biochemical, bacteriological and pathological research.

MOLTON PARK

Some two miles from the main hospital is the farm of approximately 600 acres. Occupational therapy is a feature of this branch, and patients are given every facility for occupying themselves in farming, gardening, fruit growing, etc.

BRYN-Y-NEUADD HALL

The seaside home of the hospital is beautifully situated in a park of 330 acres in Llanfairfechan, amidst the finest scenery in North Wales. On the north-west side of the estate a mile of sea coast forms the boundary. Patients may visit this home for a short seaside change or for longer periods. The hospital has its own private bathing house on the seafront.

For terms and further particulars apply to the Medical Superintendent (Telephone No. 34354, Northampton), who can be seen in London by appointment.
