Synadrin

Regd. Trade Mark

new compound for the treatment of patients with angina pectoris

Synadrin is a specific coronary vasodilator, and is chemically unrelated to any known treatment for coronary disease. Its specific activity has been demonstrated in animal experiments¹¹⁻¹⁷ and it has been tested in over 1,000 patients¹⁻¹⁰. Results of trials so far reported have been promising and Synadrin has been described as "an effective drug for treating angina pectoris."¹

Effective and safe

Synadrin has been shown to reduce the frequency of anginal attacks. It is particularly successful in patients with coronary ischaemia with or without previous infarction. It produces prolonged improvement of the coronary blood supply, and consistent treatment over a period of weeks produces the best results. Synadrin is well tolerated and its safety has been shown by use in more than 1,000 patients over the last two years.

Psoriasis

All the time fresh evidence is received of Alphosyl's effectiveness in cases of psoriasis, even in those which have defied other treatment for years.

Excellent clinical trials. In a recent controlled study¹ of 62 cases of psoriatic lesions, 29 were completely cleared after use of Alphosyl and altogether 55 cases obtained between 75 per cent and 100 per cent clearance. In no case was the condition less than 50 per cent cleared.

Patients observed included those with total scalp-to-toe psoriasis, psoriasis of many years' duration, psoriasis involving tender areas and psoriasis refractory to all previous treatment.

These results confirm others obtained under comparable conditions.

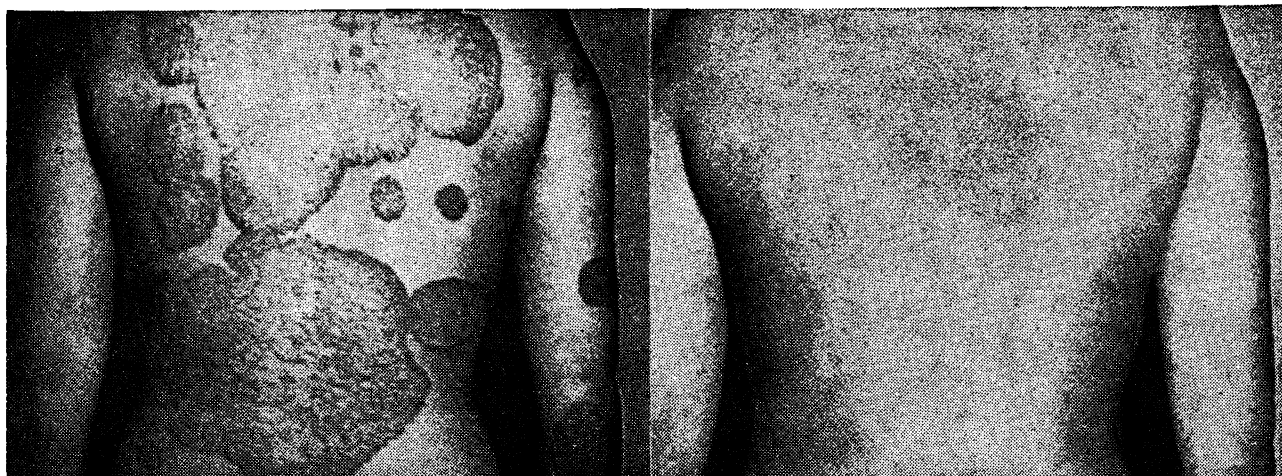

Why Alphosyl is so successful. In Alphosyl allantoin and a special refined coal tar extract are presented together for the first time. Allantoin has been found to be particularly effective in loosening psoriatic scales,² while the keratoplastic effect of coal tar is well known.² Alphosyl is non-greasy and non-staining and vanishes on application.

Freedom from side effects. Alphosyl is notably safe,^{2,3} being free from the risks which are found in other forms of treatment such as arsenicals, mercury, corticosteroids, X-ray, etc. It certainly deserves a trial in all cases of psoriasis, for which it is so widely prescribed.

WHY WE ARE MENTIONING MUCUS

Put an ulcer patient on an anticholinergic drug like Daricon, and two things happen. One—gastric acid secretion is inhibited. Two—and almost as important—gastric juice is rendered more mucoid as a result. What exactly is the rôle of mucus in the stomach? Mucus is adhesive, cohesive, highly viscous, adsorbs pepsin, neutralizes acid.¹ And '... in the treatment of peptic ulcer, anticholinergic drugs [like Daricon] will have a beneficial effect because of their action on the mucus secretion as well as because of their action on acid secretion'.²

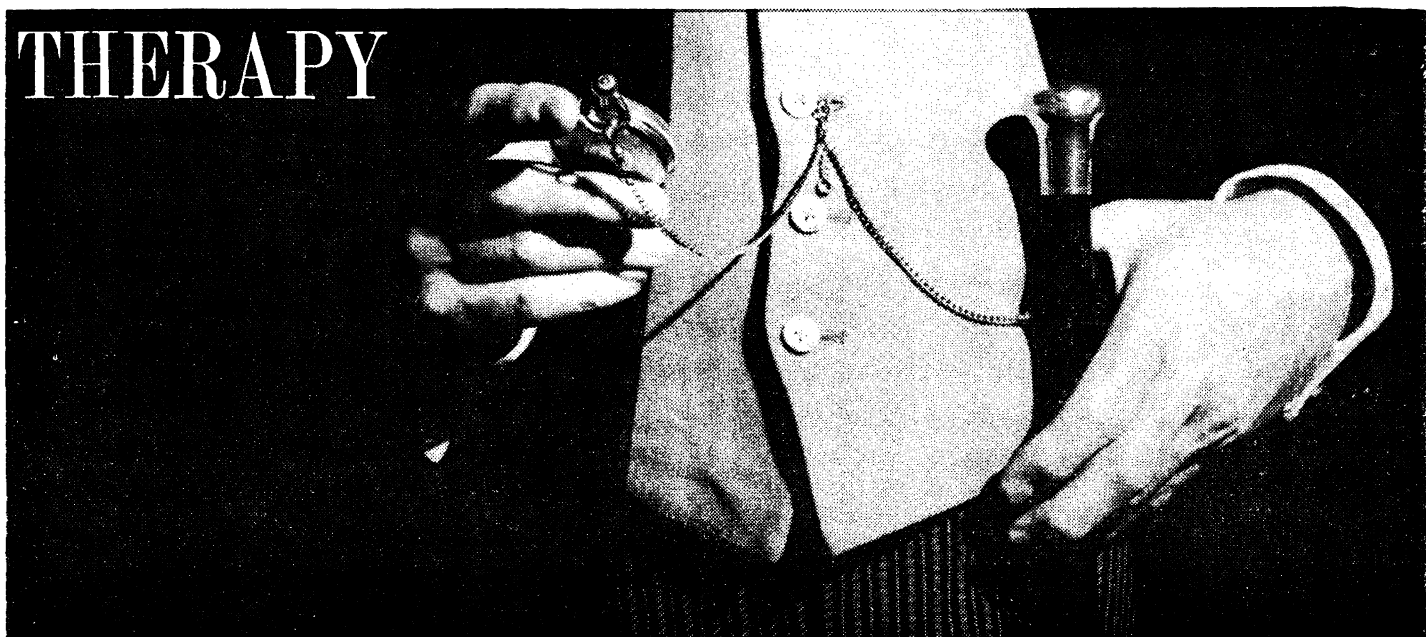

All anticholinergic drugs have this effect, but not all have as prolonged an action as Daricon. Daricon exerts an antisecretory action lasting up to twelve hours. And Daricon is *naturally* long acting. No need for coatings to prolong its effectiveness.

Certainly Daricon gets results, both in duodenal and gastric ulceration. This is typical of the evidence: 'Good symptomatic responses were achieved and maintained in 77 [of 80] duodenal patients, in all 7 patients with gastric ulcers, in both jejunal patients, and in 5 of those with hiatus hernia and associated peptic oesophagitis. ... Response of ulcer symptoms including severe night pain occurred promptly after initiation of therapy with oxyphenyclimine [Daricon]'.³

Dulcolax the predictable laxative. Dulcolax is not a special-purpose laxative. By virtue of its proven efficacy and simplicity of use it may be considered the obvious evacuant whenever a bowel movement is required. In chronic constipation, in constipation arising from prolonged bed-rest, in paediatrics or geriatrics, wherever there is a constipated patient young or old, sick or well, Dulcolax will be found to be safe, acceptable, and effective. The resultant motion is gentle and effortless, and the stool formed and soft. There is seldom diarrhoea or rebound constipation. Dulcolax is predictable. Two tablets taken on a full stomach can be relied upon to produce a motion within 10 to 12 hours, so dosage at night is unlikely to disturb sleep. When taken on an empty stomach, Dulcolax tablets bring about a bowel movement within 6 to 7 hours. A Dulcolax suppository (Bisacodyl BNF) produces a motion within an hour, in most cases within 20 minutes. Usual dosage: 1-2 tablets at night or 1 suppository in the morning.

'OTOSPORIN' clears infected ears

The modern method of treatment in otitis externa, chronic suppurative otitis media, and infected mastoid cavities, is 'Otosporin' brand Drops.

'Otosporin' is an aqueous suspension containing both neomycin and polymyxin B sulphate which are together effective against practically all the bacteria found in ear infections. They are unlikely to induce bacterial resistance or skin sensitisation, and neither of them gives rise to cross-resistance or cross-sensitisation to penicillin and other antibiotics. Their effectiveness is visibly enhanced by the hydrocortisone in 'Otosporin': this, by reducing inflammation, not only relieves pain, but provides greater access for the antibiotics

for control of SEVERE ASTHMA

Betnelan (betamethasone) is the recent anti-inflammatory steroid developed by Glaxo. It has proved remarkably effective in the treatment of severe asthma when other measures have proved inadequate. *Although dosage should be varied to suit the individual, in general practice a short-term course of 21 Betnelan tablets given over 6 days, is usually sufficient to achieve control.* Side effects are no problem in short-term use and treatment is inexpensive.

Betnelan

GLAXO LABORATORIES LIMITED

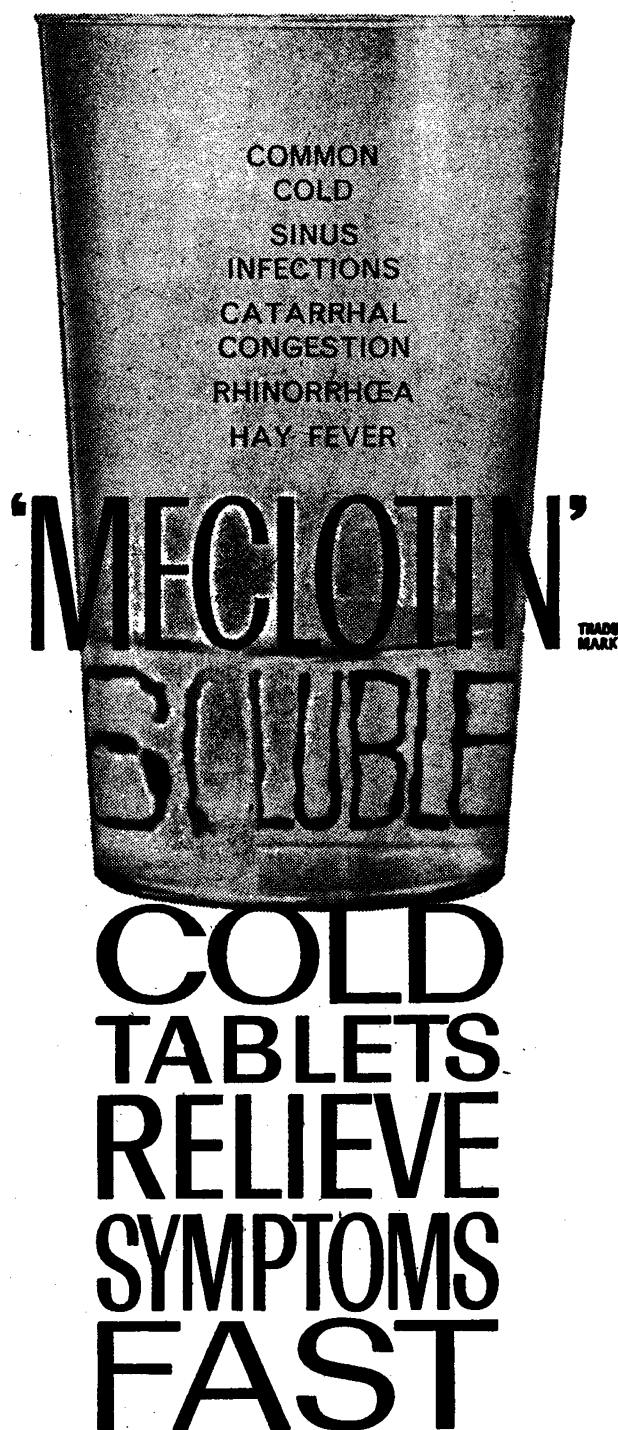

When conventional treatment of less severe asthma is interrupted by an acute attack, short-term Betnelan therapy can restore control. When the attack is extremely severe (status asthmaticus) all recognised measures which may include injectable corticosteroids (Betnesol Injection is recommended) should be taken, at least initially. At the same time oral treatment with Betnelan can be started to maintain control. Betnelan is presented as scored tablets of 0.5 milligrams betamethasone in bottles of 30, 100 and 500. Half-strength tablets of 0.25 mg are also available in similar quantities.

NEW—soluble corticosteroid tablets **BETNESOL TABLETS**

Acne

to

Whilst acne may never present as a serious medical problem the embarrassing disfigurements which it produces may nonetheless present an important problem to the patient.

Until the systemic disturbances which underlie the condition are more fully elucidated, the prospects for the development of a specific invariably curative therapy seem remote and the main recourse in the meantime continues to be treatment with topical preparations.

Quatrasol, a new development in topical bactericidal-antiseborrhoeic agents, presents a 15% concentration of cetyltrimethylammonium-10-undecanoic acid complex in lotion form.

Applied to the lesions three or four times a day, Quatrasol lotion offers an effective control of the acne process in a high proportion of cases, even in pustular and cystic conditions of many years' duration which have failed to respond to previous treatments with keratolytics, antibiotics and local corticosteroids.

Quatrasol lotion is issued in packs of 28 ml., basic N.H.S. price 6/- (+P.T.).

New for chronic bronchitis

Two recent reports have confirmed Alupent's effectiveness in the relief and prevention of bronchospasm associated with chronic bronchitis.^{1, 2}

Even greater convenience of use is now added to its clinical advantages by the introduction of the ALUPENT METERED AEROSOL. The ALUPENT METERED AEROSOL delivers a dry spray of minute but separate particles of Alupent into the inhaled airstream and thence directly to the surfaces of the bronchioles. Its unique metering valve ensures that dosage is precise, consistent, and economical.

To the chronic bronchitic patient the ALUPENT METERED AEROSOL represents an effective, unobtrusive and instantly-to-hand prophylaxis against bronchospasm or treatment of an actual attack.

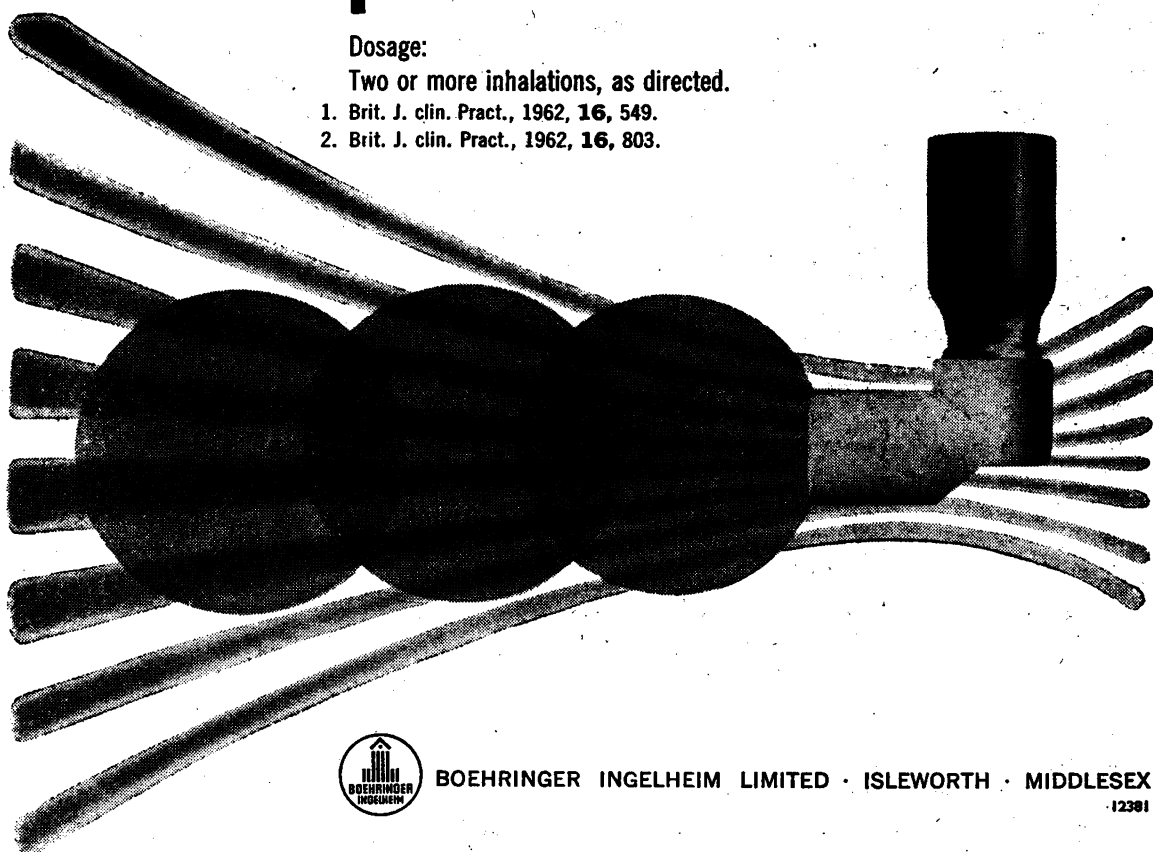

Alupent **Metered Aerosol**

Trade Mark 1-(3, 5-dihydroxyphenyl)-2-isopropylamino-ethanol sulphate.

Spencer Support shown open revealing inner abdominal section.

RELIEVES SYMPTOMS,

PROMOTES A SENSE OF WELL-BEING

It has been found that practically every ptotic patient experienced relief of symptoms, increased energy and sense of well-being following application of proper support.

The doctor can rely upon Spencer for *proper support* because each Spencer is individually designed, cut, and made for each patient from detailed measurements and a complete description of that patient's body and posture.

With a Spencer, the co-relation of abdominal and back support induces correct posture, modifies an unfavourable tilt. Ptosed organs are lifted to normal position to improve circulation. Better digestion, elimination, respiration often result.

The Manager, Rif Hotel, Tangier, Morocco

There may be an ill and icy wind blowing these days, but there is a group of people who are rubbing their hands together and it is not necessarily because they are cold. The Travel and Holiday industry must be receiving a stupendous post of enquiries not only from the wise "early bookers" but also from the escapists—and aren't we all?—trying to transport themselves to the sunshine of the spring and summer seasons. Vital statistics are being studied, but for a change they relate to climatic temperatures, hours of sunshine and rates of exchange.

Unfortunately in making one's choice there are certain limitations to be borne in mind, the chief being time, money and school holidays. If time is of no importance, holidays can be taken either early or late when resorts and holiday centres in this country and overseas which normally are crowded seem so much more friendly and the services that much better. From choice late spring is ideal in many respects in this country—the evenings are drawing out, the sun usually becoming strong and the countryside clean and fresh. The south coast down to Cornwall and then right up to Scotland has as good a record as can be expected.

On the Continent you can begin to take your holidays with

Suggestions

certainly from early April onwards, and in fact if you are touring either by car or coach this month has much to be commended. April and May are perfect for going further afield to possibly Egypt, Tangiers or Morocco because you can see the sights in comfort and without having to bother too much about the heat of the sun, particularly during the middle of the day.

If money is no great obstruction then cruising or flying to the Bahamas, West Indies or North or South America can come well within reach even if time is relatively limited.

School holidays have always, of course, been a concern, but there are many helpful factors these days such as the so-called vacation holidays which are organized by education authorities sometimes on an international exchange basis or independently by the schools themselves. Many hotels, of course, specialize in accommodation for children.

Although there is little doubt that Continental holidays will prove as great an attraction as ever the hotels and resorts in this country have taken up the challenge and the result is better service, better amenities and greater attractions which are now evident everywhere.

one certain fact in hypertension

It is suitable for all grades of hypertension

Satisfactory response in most patients

More than 250 papers provide a positive clinical background

Easy to administer—one dose daily

Long-term control readily maintained

In wide clinical use for over three years

Named the drug of choice by many authorities

Ismelin has been found to provide satisfactory long term treatment of hypertension in a high proportion of patients. Tolerance and drug resistance are rarely a problem with Ismelin. A single dose daily controls blood pressure adequately and once dosage has been stabilised there is little risk of the pressure rising between visits.

Ismelin is well-tolerated by the majority of patients ; side effects rarely interrupt treatment. The high proportion of patients responding satisfactorily to Ismelin fully justifies its rapidly extending use in general practice.

SERVICES

You can earn £2000 a year on entry in the Royal Air Force

New Conditions for Registered Practitioners

Under a new scheme announced by the Air Ministry, if you are a qualified doctor you can enter the Royal Air Force immediately after full registration and be commissioned as a Flight Lieutenant, earning, with full allowances, £2,000 a year. If you have post-graduate experience you can be granted up to seven years back-dated seniority; a doctor with six years civilian experience will be appointed Squadron Leader on entry, earning, with full allowances, £2,300 a year.

Tax free gratuities are payable on completion of short service commissions. These are £1,500 after three years or £3,000 after five years.

You can be offered a permanent commission and guaranteed pensionable employment to the age of 65 with excellent prospects of promotion to Group Captain rank and a salary of well over £3,000 a year. If you are married and serving at a Station you may be allocated an official married quarter. This will be a comfortably furnished house near your surgery.

You will have full clinical freedom and your practice will normally include the families of serving members of the Royal Air Force. You will have opportunities for specialising, and study leave is granted on full pay and allowances to permanent officers who wish to read for further qualifications.

'Pre-Registration Year' Scheme

If you are a medical graduate you may be commissioned in the Royal Air Force immediately in the rank of Flying Officer. You may then spend your pre-registration year seconded to a civilian hospital. This means that during your year as house physician or surgeon you may earn, with full

pay and allowances, up to £1,339 a year. On registration, you will become a Flight Lieutenant with possible earnings of £2,000 a year. To qualify for this scheme you must undertake to serve for at least three years after full registration. Your pre-registration year counts towards your gratuity following a short service commission and towards retired pay on a permanent commission. The gratuity on completion of a three year commission is £1,500 plus £200 for the full pre-registration year; on completing a five year commission the gratuity is £3,000 plus £200 for the full pre-registration year. These gratuities are tax free.

'Medical Cadetship' Scheme

If you are a medical student and have passed your second M.B. examination or the equivalent you may be commissioned *now* in the Royal Air Force. During the remainder of your medical training your fees will be paid and you will receive the full pay and allowances of a Pilot Officer which can amount to £1,090 a year.

To qualify for this scheme, you must undertake to serve for at least five years in the Medical Branch of the Royal Air Force after full registration.

At the end of the five years you may enter civilian practice with a tax free gratuity of between £1,400 and £2,600, or you may be selected for a permanent commission which guarantees pensionable employment to the age of 65 and which may take you to the most senior ranks in the Service.

For full information on the new conditions for doctors, specialists, graduates and cadets in the Royal Air Force, write to the Director-General of Medical Services, Air Ministry (M.A.1), (HN 893 U), 1 Tavistock Square, London, W.C.1.

The Royal Air Force

GOVERNMENTAL

MEDICAL OFFICER

(part-time) required for H.M. Detention Centre, Kirkclevington, near Yarm, York-shire.

Salary £325 per annum, subject to review. For details of hours of attendance, duties, conditions of service, etc., apply in writing to the Establishment Officer (JB 705), Prison Commission, Horseferry House, Dean Ryle Street, London S.W.1. (1891)

MERCHANT NAVY

Royal Fleet Auxiliary Service

Doctors are required to serve in Royal Fleet Auxiliary Vessels in the Far East. The appointments are for approximately 12 months in the first place, but continuous and pensionable employment can be offered to suitable applicants. The commencing salary is £112 or £116 monthly, depending on the class of ship, plus an allowance of from about 15% to about 30%, depending upon the ship's location. Food and accommodation is free, but uniform must be provided at the officer's own expense.

Leave is earned at the rate of 75 days' pay per annum, and a cash bonus of 66 days' pay per annum is also given. It is pointed out that service in the Merchant Navy away from U.K. for a complete fiscal year entitles an officer to reclaim income tax paid. Apply to Director of Stores (3B), Admiralty, Little Road, Fulham, S.W.8 or 'phone FUL 1244, Ext. 2187. (1892)

PRISON COMMISSION
PRISON MEDICAL OFFICERS

At least three pensionable posts in England and Wales for registered medical practitioners (men) aged at least 28 on February 1, 1963, with sound knowledge of medical and surgical practice, preferably with experience in psychological medicine. D.P.M. an advantage. Duties are mainly clinical, including responsibility for the physical and mental health of persons in custody; supervision of the hospital and general hygiene of the establishment; provision of medical and psychiatric reports to the Prison Commissioners and to the Courts. There are opportunities for research into mental and physical disorders. National starting salary: £1,726 at 28 to £2,611 at 40 or over (possibly higher at 41 or over). Scale maximum £2,925. Promotion prospects. Write Civil Service Commission, Burlington Gardens, London W.1, for application form, quoting 5616/63/7. Closing date February 8, 1963. (1893)

INDUSTRIAL
APPOINTMENTS

Attention is drawn to the British Medical Association's statement of policy on the Remuneration of Industrial Medical Officers (as revised in the light of the Report of the Royal Commission on Doctors' and Dentists' Remuneration, 1960, and approved by the Representative Body, 1961), which is available on request from the Secretary.

THE UNIVERSITY OF SHEFFIELD

Vice-Chancellor:

J. M. Whittaker, M.A., D.Sc., F.R.S.

Department of Anaesthetics

The University of Sheffield, in conjunction with the United Sheffield Hospitals, proposes in the near future to establish an independent department of Anaesthetics under the direction of a Senior Lecturer-in-Charge, and applications in respect of this appointment are now invited. The University's salary scale for a Senior Lecturer-in-Charge of a department is £2,350 per annum, rising by annual increments of £100 to a maximum of £3,500, but the intention both of the University and of the Hospitals is to seek an applicant whose qualifications and experience would justify an initial salary at or near the top of the scale. The post is a full-time one, but the person appointed will be granted the honorary status of Consultant in the National Health Service provided he possesses suitable qualifications and experience, and will be expected to undertake a substantial number of clinical sessions in the United Sheffield Hospitals.

Further information and instructions as to applications may be obtained from the undersigned, to whom applications (70 copies, one copy from an overseas candidate will suffice) should be sent before March 2, 1963. If a referee named by a candidate is abroad, the candidate may invite the referee to send a confidential report direct to the Registrar without waiting for an enquiry from the University.

Should the successful candidate be resident overseas, the question of the University's contribution towards his expenses in coming to England to take up the post will be a matter for negotiation between him and the University.—A. W. Chapman, Registrar. (1867)

SCHOLARSHIPS

MEDICAL RESEARCH COUNCIL

The Medical Research Council invite further applications for the following Special Scholarships for the academic year 1963-64.

FRENCH GOVERNMENT EXCHANGE SCHOLARSHIPS IN MEDICAL SCIENCE

Under the terms of a reciprocal arrangement with the Centre National de la Recherche Scientifique, the Medical Research Council invite applications from British workers in medical science for two Scholarships tenable at research institutions in France during the academic year 1963-64. The scheme is intended for young graduates in Medicine or Science who have already had some experience in a branch of medical science. Candidates must be of British nationality and have at least a working knowledge of French.

The scholarships will be of a minimum value of 610 new francs (approximately £45) a month, the exact rate depending on the scholar's qualifications and experience, and married men will receive supplementary allowance (payable in sterling by the Council); the grade appropriate to each individual will be decided by the C.N.R.S. in consultation with the Council. Provision will also be made for travelling expenses to and from the place of work.

Further particulars of these awards and forms of application may be obtained from the Secretary, Medical Research Council, 20 Park Crescent, W.1, with whom applications must be lodged not later than March 15, 1963. (1764)

ST. ANDREW'S HOSPITAL FOR NERVOUS AND MENTAL DISORDERS**NORTHAMPTON**

President: The Earl Spencer.

Medical Superintendent:

D. J. O'Connell, M.D., D.P.M.

This private hospital receives patients, both male and female, suffering from nervous and mental disorders, including alcoholism and senile illnesses. The fees range from fourteen guineas per week. Private rooms with special nurses can be provided either in the hospital or in one of the villas in the grounds. The hospital is situated in 130 acres of pleasant grounds, which provide all recreational facilities. These include a nine-hole golf course, gardening, fruit growing, etc.

WANTAGE HOUSE

This is a separate reception unit to which patients may be admitted. It is equipped for the complete investigation of nervous and mental disorders by the most modern methods. All forms of treatment are available. It contains laboratories for biochemical, bacteriological and pathological research.

MOULTON PARK

Some two miles from the main hospital is the farm of approximately 600 acres. Occupational therapy is a feature of this branch, and patients are given every facility for occupying themselves in farming, gardening, fruit growing, etc.

BRYN-Y-NEUADD HALL

The seaside home of the hospital is beautifully situated in a park of 330 acres in Llanfairfechan, amidst the finest scenery in North Wales. On the north-west side of the estate a mile of sea coast forms the boundary. Patients may visit this home for a short seaside change or for longer periods. The hospital has its own private bathing house on the seashore.

For terms and further particulars apply to the Medical Superintendent (Telephone No. 34354, Northampton), who can be seen in London by appointment.
