## ORAL PENICILLIN FOR RESISTANT STAPHYLOCOCCI

---

The very full publication of test results on Orbenin includes combined report of clinical use in six hospitals (Lancet, (ii, 634)).

'In the six hospitals, 92 patients were treated with BRL 1621. The great majority had severe infections which would probably have deteriorated rapidly unless vigorous antibacterial therapy had been given. Of the 92 patients, 73 were cured or much improved; these cases included practically all the infections of skin and soft tissue, many of which were caused by strains of staphylococci resistant to some other major antibiotic. Most of the patients with pneumonia, and those with cystitis and enteritis, were also treated successfully.'

'Each hospital had opportunities for testing re-isolated staphylococci for the development of resistance to BRL 1621 but none was found.'

'At all the hospitals there were few side-effects and no evidence of direct toxicity.' 'Several of our cases have now been followed for eight to twelve months, without showing any late evidence of toxicity.'

Orbenin is stable in acid medium and stable to staphylococcal penicillinase. It is highly bactericidal to Gram-positive organisms including both penicillin-sensitive and penicillin-resistant staphylococci, pneumococci and streptococci. The activity of Orbenin is at least four times greater than that of methicillin.

Oral Dosage: 500mg 6 hourly

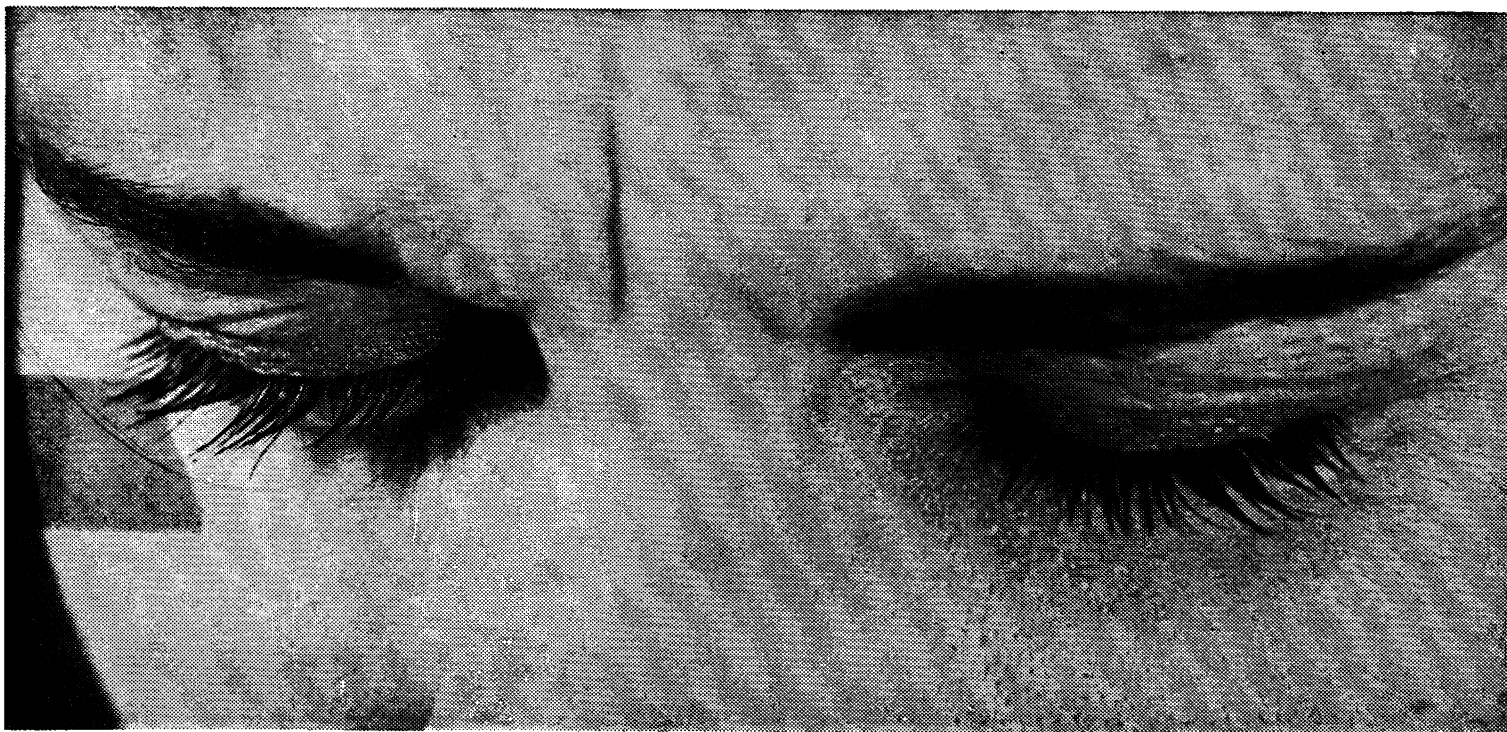

Orbenin may also be given by intra-muscular injection 250mg 6 hourly

# All the evidence points to COLOMYCIN

"A clinical and bacteriological study of forty patients has demonstrated that colistin methane sulphonate ('Colomycin') is effective in the treatment of infections with *Pseudomonas pyocyanea*. In the dosage employed, there were no serious toxic effects."

*Lancet* (1962) 2, 738.

"Two infants with meningoceles and meningitis, one infected with *Ps. pyocyanea* and the other with *Esch. coli* were included. Both these patients rapidly responded to intramuscular treatment with elimination of the infecting organism."

*Lancet* (1962) 2, 741.

"It ('Colomycin') is clinically effective in the treatment of infections due to *Ps. pyocyanea* and is thought to be the best antibiotic so far available for this purpose. The development of resistance to 'Colomycin' and toxic side-effects were insignificant."

*Brit. Med. J.* (1962) 2, 161.

"... colistin, with its great efficacy against pseudomonas and klebsiella, is a valuable addition to the antibiotic armoury."

*Lancet* (1962) 2, 741.

"One advantage in using colistin for gastrointestinal infections was the complete absence of candida in the faeces at the end of treatment, whereas with other antibiotics there are often heavy growths."

*Lancet* (1962) 2, 741.

"Sixty-three strains of gram-negative bacilli, obtained from routine cultures in a children's hospital, were all shown to be sensitive to colistin methane sulphonate ('Colomycin')."

*Lancet* (1962) 2, 741.

in infections due to *Ps. pyocyanea* and coliform organisms.

Clinical reports on COLOMYCIN clearly show that it is a valuable addition to the antibiotic armamentarium in treating infections due to Gram-negative organisms. It is of outstanding value in the treatment of gastroenteritis, urinary tract and other systemic infections, as these references from recently published medical papers demonstrate.

# The importance of safety in the control of diabetes

Nowhere is safety more important than in drugs intended for long-term—even life-long—use. One reason for the extensive use of Rastinon in oral anti-diabetic therapy is that no serious side-effects are associated with the product even after its use in some two million patients. The few side-effects reported have been transient and have rarely necessitated cessation of treatment.

Rastinon is the standard oral treatment of diabetes and is especially indicated for patients in whom the condition is first diagnosed at middle age.

Rastinon tablets are remarkable for their safety, simplicity, effectiveness and economy.

In a comparative study\* of hospital patients with oedema, "combined spironolactone and chlorothiazide therapy was significantly more effective than chlorothiazide alone." The diuretic response was enhanced, and the effect of chlorothiazide on potassium balance diminished by the concomitant administration of spironolactone. "The additive diuretic effect of combined spironolactone and chlorothiazide therapy constitutes further evidence that these drugs interfere with separate sodium reabsorptive mechanisms."

# CRYSTAPEN G

INJECTION · TABLETS · SYRUP

Despite the very many antibiotics now available penicillin G remains the first choice for the treatment of the majority of acute septic infections.

It is generally agreed that other substances are used only if bacteriological or other factors indicate specific need or if the administration of penicillin G in full dosage fails to produce response.

The early treatment of boils, carbuncles, abscesses and other soft tissue infections is essential if treatment is to be effective. Crystapen (soluble sodium penicillin G Glaxo) with its rapid bactericidal action, is a logical first choice for the treatment of such conditions.

It is also cheap to use and frequently costs only a quarter as much as alternative antibiotics.

The name Crystapen is a Glaxo trade mark

# a new antacid palatable effective economical

Alcin is a new antacid offering several important advantages. It provides safe and effective treatment of symptoms associated with gastric hyperacidity and peptic ulceration.

**Palatability** Having an absence of chalkiness and an agreeable flavour, Alcin is non-nauseating.

**Buffering Activity** Alcin not only rapidly neutralises excess acid, but at the same time its sustained buffering activity maintains the level of acidity of the gastric contents within the desired range.

**Safety** Alcin is safe for prolonged administra-

tion. There is no risk from overdosage as Alcin cannot cause either alkalosis or acid rebound.

**No Digestive tract ill-effects** Alcin has no known laxative or constipating effects.

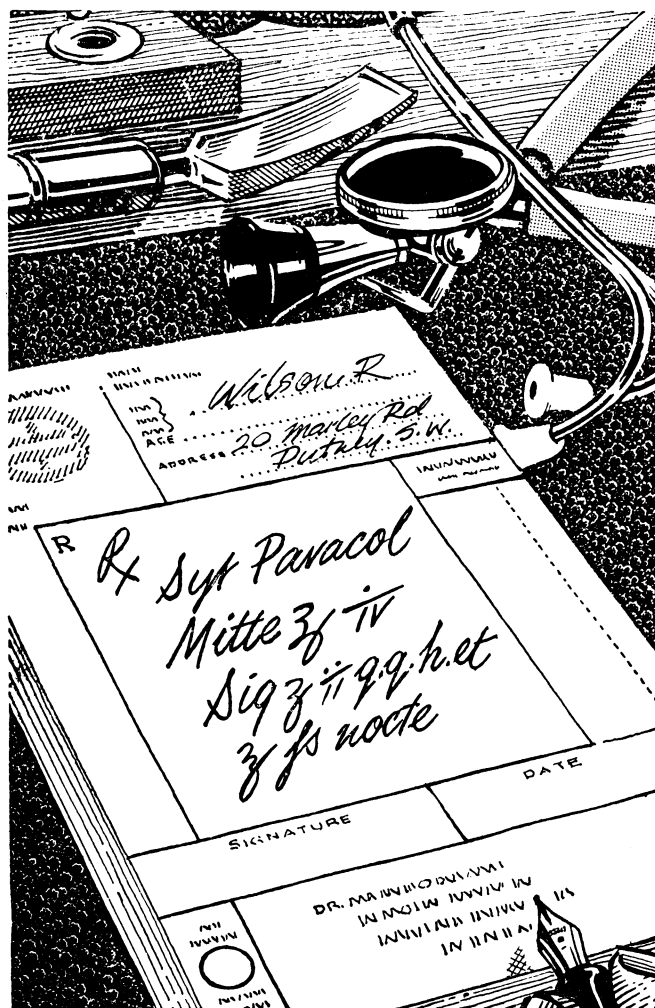

**Economy** Alcin is economical in use. The basic N.H.S. cost of 50 tablets is 1/9½d.

**Composition:** Each tablet contains 360 mg. anhydrous co-prepared sodium magnesium aluminium silicate and basic magnesium aluminate.

for effective treatment of  
Coughs and Bronchitis

**ECONOMY:** The cost of Pavacol at the dispensing pack rate to chemists is only 7d. per fluid ounce.

**DUAL ACTIVITY:** Pavacol relieves Cough by acting in two ways:—

- 1 The pholcodine content exhibits a cough suppressant effect comparable with that of Heroin but without the latter's disadvantages in being addictive and constipating;
- 2 The Papaverine content relaxes plain muscle by direct action and the resultant bronchodilatation makes it easier for the patient to cough up sputum.

**DIABETIC SYRUP ALSO AVAILABLE**—Pavacol Diabetic contains the same ingredients as ordinary Pavacol Syrup but carbohydrates are omitted: Indications, dosage and price are identical.

## The problem of the dirty mouth

Even in 1963, the dangers, and the unpleasantness, of the dirty mouth are still present in the post-operative period, as well as in many fevers; the geriatric patient being especially prone to them. Careful attention to oral hygiene will usually, of course, keep the patient comfortable and prevent complications. Such attention, however, is very time-consuming to the nurse; and it is not often realised that for most patients it can be replaced or supplemented by the use of chewing gum.

The regular use of chewing gum, by stimulating salivary flow, keeps the mouth clean in the most natural way possible. The patient is in a sense providing his own nursing care with the minimum of energy expenditure by himself.

Child patients, of course, need no encouragement to chew gum. The older patient may need encouraging—but not once he has appreciated the very obvious cleansing and refreshing effect that chewing gum has upon the mouth. Chewing gum is also of value to patients who are forbidden to smoke.

The research carried out by Searle during the last eight years into oral contraception has led to a considerable number of publications in the world medical press. Many of these publications deal specifically with the two Searle oral contraceptive products, CONOVID\* and CONOVID-E† and are the basis of an information service available to the medical profession on request. This consists of fully documented reference manuals on CONOVID and CONOVID-E, a booklet in question and answer form dealing with many of the inquiries received regarding the use of the two products, and a booklet for patients available in quantity to the medical profession for distribution to their patients.

The outstanding advantage of both PRESSURISED ISO-BROVON and PRESSURISED BROVON inhalants is that the units and their tough shatter-proof plastic covering are transparent. The user has full warning, therefore, when the inhalant is running low. The importance of this will be appreciated by any asthmatic who has experienced panic on discovering at the start of an attack that the container is empty.

# PRESSURISED ISO-BROVON and PRESSURISED BROVON INHALANTS

*immediate and sustained relief  
... at the touch of a button*

The physician has at his command *two sound antispasmodic products* to meet the particular needs of each patient.

## ← PRESSURISED ISO-BROVON INHALANT

### COMPOSITION:

Isoprenaline Hydrochloride.....0.25%  
Atropine Methonitrate.....0.14%  
in an inert propellant

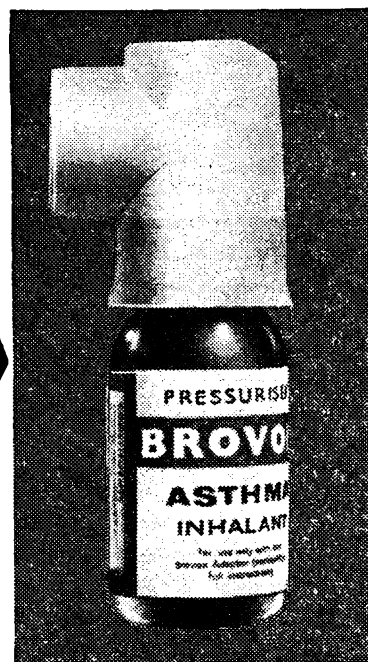

This inhalant combines the alternative powerful broncho-dilator, isoprenaline hydrochloride, for rapid action, with atropine methonitrate to provide sustained relief.

## → PRESSURISED BROVON INHALANT

### COMPOSITION:

Adrenaline.....0.50%  
Atropine methonitrate.....0.14%  
Chlorbutol.....0.50%  
in an inert propellant

This inhalant combines the rapid broncho-dilatory action of adrenaline, to give immediate relief, with the prolonged action of atropine methonitrate, which ensures sustained relief.

## HIGH PRODUCTION OF UTILISABLE AEROSOL

By the incorporation of a new and unique device in PRESSURISED ISO-BROVON and PRESSURISED BROVON Inhalants, about 80% of the particles yielded are within the optimum range for penetration into the finest ramifications of the bronchial tree, and for absorption there.

## HIGH SPEED OF ACTION

Using a manually-operated inhaler, inhalation occupies 2 to 3 minutes. Using PRESSURISED ISO-BROVON and PRESSURISED BROVON Inhalants, inhalation is completed in a few seconds, thus diminishing the risk of emphysema, or of an attack proving fatal.

## COMPLETE SAFETY

PRESSURISED ISO-BROVON and PRESSURISED BROVON Inhalants are entirely safe and non-toxic.

# My car's **Firestone** Safe

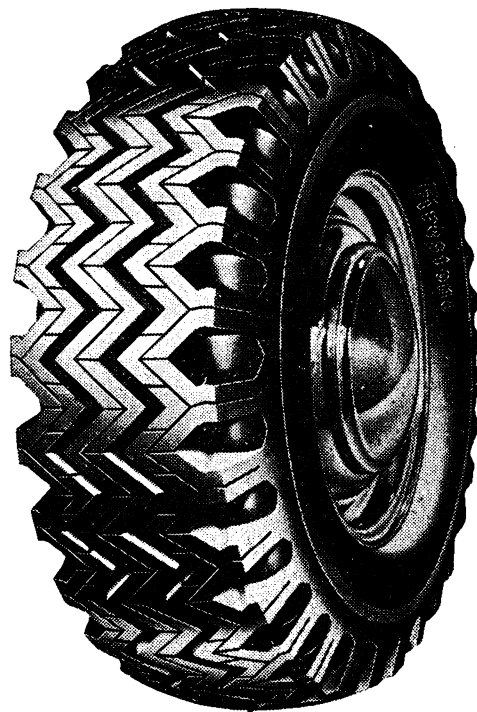

## Is yours?

Typical doctor's car, isn't it? Conservative, comfortable, reliable—just what one's patients expect their doctor to be. Quite right, too. They like to feel that I'll be there when I'm wanted. It's not always so easy, though—that's why I take the trouble to fit Firestone Town & Country. Marvellous grip, especially now they're made with Rubber-X\*. I'd always prescribe them for a car you have to rely on.

# Good General Practice

In the Royal Army Medical Corps you can practise medicine in very good conditions. Well-equipped surgeries with medical assistants are provided, allowing you to do your best work, and devote more time to the care of your patients. There is great scope for the family doctor, particularly overseas, as the Royal Army Medical Corps looks after a very large number of women and children.

Great importance is attached to post-graduate study, and, during their service, permanent officers are given the opportunity of sitting for diplomas, such as D.C.H., D.Obst.R.C.O.G.

There is a large and comprehensive hospital service, consisting of thirty military hospitals at home and overseas, with consultant opinion readily available to you. As a general practitioner you are welcomed in the hospital to consult with your brother officers and follow up your cases.

Married quarters are provided, and you can count on regular off-duty periods with opportunities for games and social activities; there is generous annual leave on full pay without the trouble or expense of finding a locum.

**FULLY REGISTERED PRACTITIONERS** may apply for permanent or short service commissions. Minimum entry salary: £2,000 p.a. There is opportunity for specialist training. Permanent officers are guaranteed employment to age 65.

**DOCTORS IN PRE-REGISTRATION YEAR** are also eligible for commissions. Minimum salary: £850 with free board and lodging.

**MEDICAL STUDENTS** are eligible for cadetships: Minimum salary: £890 p.a.

ALL SALARY SCALES INCLUDE MARRIAGE ALLOWANCE

# NATURAL ACTION BULK LAXATIVE

**D**EFICIENT intestinal bulk is one of the main causes of constipation. In such cases Andrews is particularly useful. It swells the bowel content by osmosis and stimulates peristalsis. In this perfectly natural way, Andrews induces a mild aperient action that does not irritate the intestine.

Andrews relieves constipation arising from decreased food intake during illness or restricted diet. It is also mildly antacid and relieves gastric discomfort; it helps to check biliousness and sick headaches. Andrews is readily acceptable because of its pleasant taste and refreshing effervescence.

## Reliable relief with Buscopan

The monthly problem of spasmodic dysmenorrhoea can be solved in all but a few difficult cases by antispasmodic therapy with Buscopan.<sup>1,2</sup> Buscopan is not an analgesic. Its effect is specific as it has a direct action on the para-sympathetic innervation of the uterus where it relieves the spasm without significant side-effects.

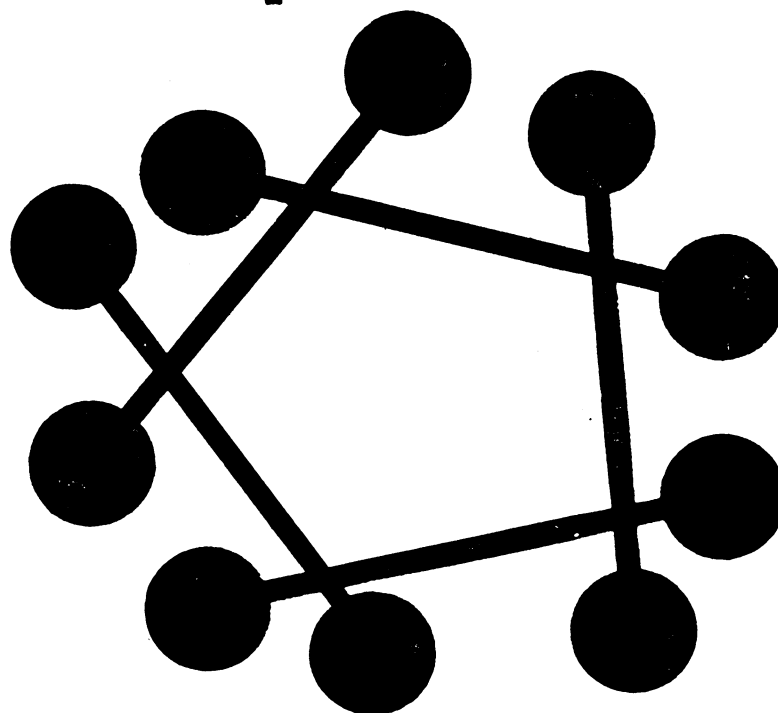

Treatment with Buscopan should ideally be commenced two or three days before the anticipated onset of menstruation. The normal dose is two tablets three times daily.

# THE ROYAL NAVY offers you MORE

YOU CAN SERVE almost anywhere in almost any field of Naval activity, combining your calling as a doctor with the stimulus of a life as a commissioned officer in the Royal Navy. You could serve in almost any vessel from a frigate to an aircraft carrier, sail with the fleet to the Far East or work with a squadron in the West Indies. You could apply your care to Royal Marines Commands, among parachutists, frogmen or rock climbers. You could fly with the Fleet Air Arm as a specialist in aviation medicine or investigate the problems of deep diving and advanced submarine development. You could work in a laboratory, hospital or medical school; serve at home or abroad, on shore or afloat; or study any one of a variety of subjects ranging from radio-biology to tropical diseases. And throughout your service as a Naval Medical Officer you would be working with the finest equipment in complete clinical freedom—and perhaps a greater opportunity to exercise your versatility than would ever be possible in civilian life.

**YOU CAN ENTER BY ONE OF THREE METHODS** All schemes lead to Short Service Commissions of 3-5 years' duration. Holders of such commissions can apply for permanent commissions after one year following appointment as Surgeon Lieutenant.

## THE UNIVERSITY OF SHEFFIELD

Vice-Chancellor:  
J. M. Whitaker, M.A., D.Sc., F.R.S.  
Department of Anaesthetics

The University of Sheffield, in conjunction with the United Sheffield Hospitals, proposes in the near future to establish an independent Department of Anaesthetics under the direction of a Senior Lecturer-in-Charge, and applications in respect of this appointment are now invited. The University's salary scale for a Senior-Lecturer-in-Charge of a clinical department is £2,400 per annum, rising by annual increments of £100 to a maximum of £3,500, but the intention both of the University and of the Hospitals is to seek an applicant whose qualifications and experience would justify an initial salary at or near the top of the scale. The post is a full-time one, but the person appointed will be granted the honorary status of Consultant in the National Health Service, provided he possesses suitable qualifications and experience, and will be expected to undertake a substantial number of clinical sessions in the United Sheffield Hospitals.

Further information and instructions as to applications may be obtained from the undersigned, to whom applications (20 copies, one copy from an overseas candidate will suffice) should be sent before March 2, 1963. If a referee named by a candidate is abroad, the candidate may write the referee a confidential letter without direct to the Registrar, without waiting for an enquiry from the University. Should the successful candidate be resident overseas, the question of the University's contributing towards his expenses in travel to England to take up the post will be a matter for negotiation between him and the University.—A. W. Chapman, Registrar. (1867)

Awards are made with the aim of maintaining and improving the quality of administration in the National Health Service outside London.

The Course, which covers three consecutive academic terms of full-time study, is open to both medical and non-medical candidates. Candidates for these Grants should be University graduates or hold approved professional qualifications. The course is particularly commended to administrators now in post in the National Health Service whose employing authorities have an educational policy providing for secondment or sabbatical leave for advanced study.

The successful applicants will be expected to take up the Grants for the Course commencing on October 8, 1963.

Further particulars may be obtained from the Secretary to the University.

Letters of application (six copies), including the names of two referees, should be lodged not later than April 30, 1963.—Charles H. Stewart, Secretary to the University. (2218)
