CICATRIN

**accelerates healing
rates by 25-50%***

Prolonged and expensive treatment of chronic ulcers may be avoided by the use of Cicatrin, the leading amino-acid/antibiotic preparation for topical application.

Further evidence of the efficacy of Cicatrin is provided by a recent controlled clinical trial to evaluate the influence of various topical applications on the healing rates of stasis ulcers. This trial shows that Cicatrin with its combination of selected amino-acids and antibiotics accelerates the healing rates by 25-50%.

It is also significant that in one group where the main difference between the two preparations was that one contained amino-acids and antibiotics (Cicatrin) and the other antibiotics only, the healing time in the Cicatrin treated group was shortened considerably both in bed rest and ambulatory cases.

Routine examination of young children's feet reveals many foot-ailments in the making. Doctors with children under their care may wish to take preventive action by instructing mothers on correct shoe-fitting for growing feet.

In Clarks experience, the vital factors are:

- 1. AMPLE TOE-ROOM** held in place by close fit at heel and instep.
- 2. CONTOUR-MEASUREMENT**—for girth as well as width and length.
- 3. FULL CHOICE OF SIZES**—with up to four width fittings in each length-size and half-size.

4. TRAINED FITTERS, with a sound instruction course on fitting children's feet.

On these factors, Clarks have built their own reputation and can give this real promise; **Freedom from all foot troubles caused by footwear, if from baby-hood none but Clarks Shoes are worn correctly fitted.**

Diabinese[†]
BRAND OF CHLORPROPAMIDE

New evidence month by month...

Advantages of substituting Diabinese

'The first advantage of chlorpropamide over tolbutamide is the convenience of a single daily dose. Second, a higher potency for chlorpropamide should ensure, on average, more effective lowering of the blood sugar levels in responsive patients... the substitution of therapy with chlorpropamide resulted in a significant improvement in blood glucose levels. It would appear, therefore, that there is an advantage in the use of chlorpropamide, particularly in respect of those patients who are less than adequately controlled by tolbutamide.'

FOR SUPPRESSION OF

severe cough

'PHYSEPTONE' LINCTUS has a direct suppressive action on the cough reflex. It is especially valuable in such conditions as bronchiectasis, pertussis, post-influenzal tracheitis, chronic passive pulmonary congestion, pulmonary tuberculosis, and other conditions requiring a powerful cough suppressant.

'PHYSEPTONE' LINCTUS is not constipating, and seldom causes other side-reactions. Although subject to D.D.A., the Linctus carries negligible risk of addiction since only a small amount of the drug is contained in each dose.

'PHYSEPTONE' LINCTUS contains 2 mgm. of methadone hydrochloride in each fluid drachm.

DOSAGE

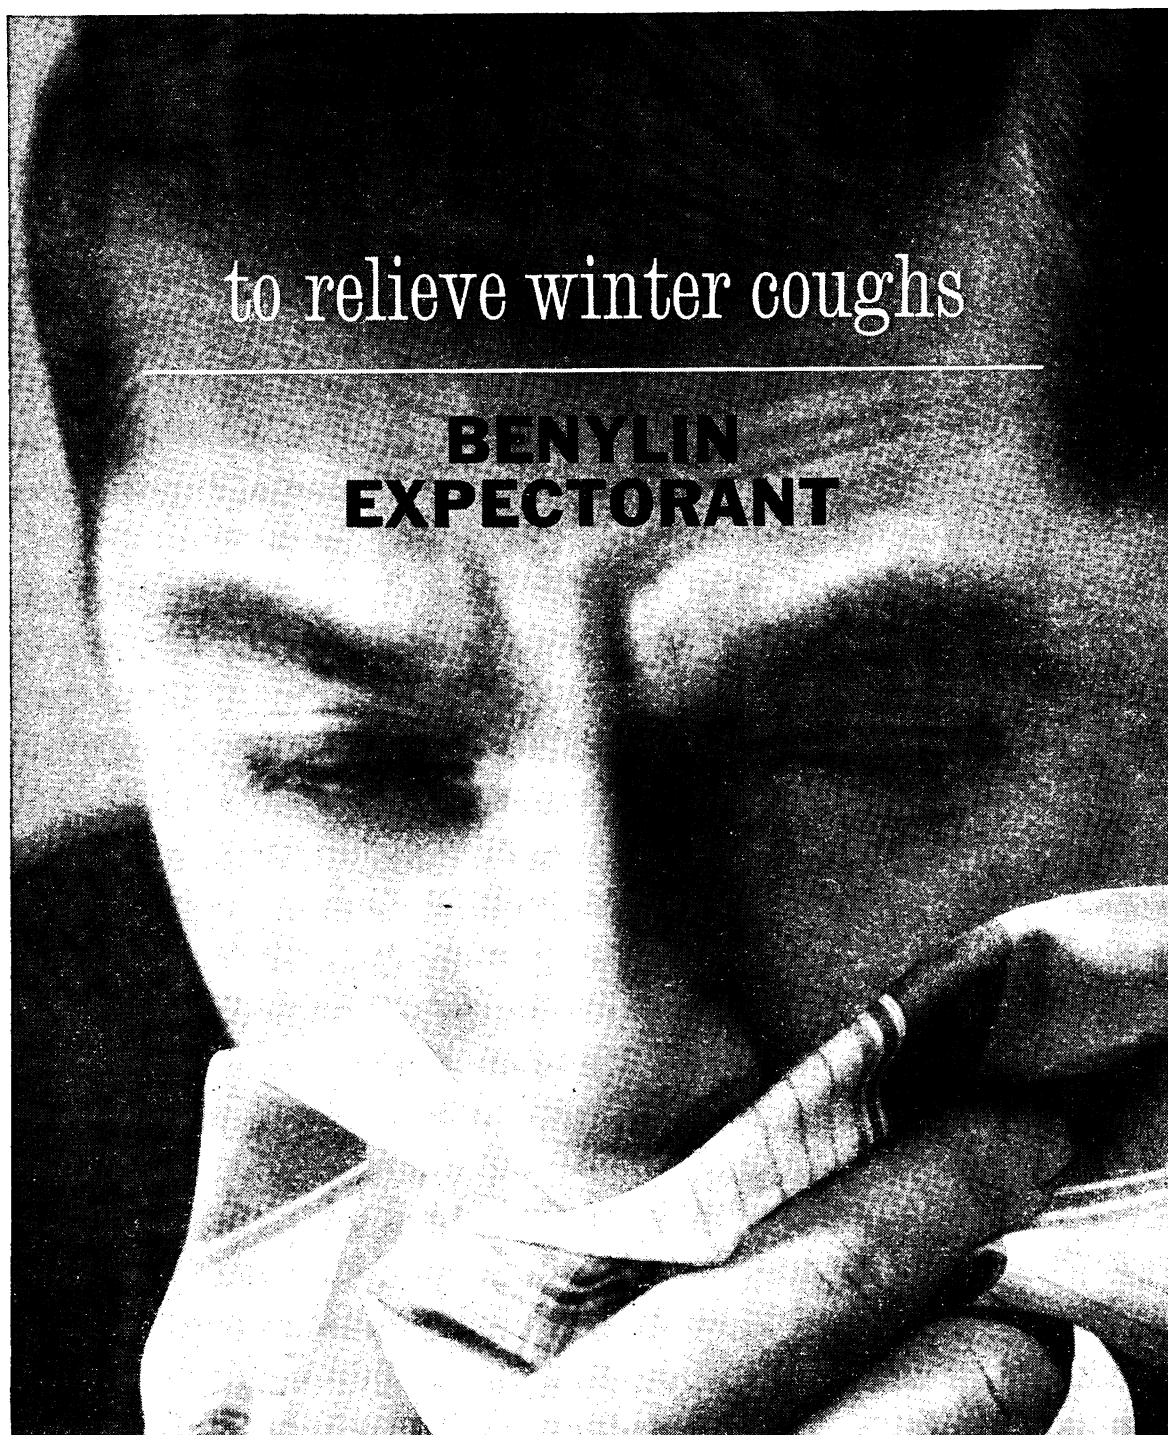

Adults: 1 fl. dr. three- to four-hourly.

Children: Best prescribed as a 1 to 7 dilution in Syrup, B.P. Dosage of *dilution* (four-hourly) : under 10 years, 1 fl. dr. ; 10 years and over, 2 fl. dr.

A Combined Effort

The Russian troika, pulled by the combined effort of three horses, was a popular and safe means of transport. In antibacterial therapy, too, the combined effort of three sulphonamides is more effective and safe than that of a single sulphonamide, which accounts for the popularity of 'Sulphatriad' over the past fifteen years.

In 'Penitriad', the combined effort of three sulphonamides is enhanced by that of penicillin V-K, 'Penitriad' being effective against infections caused by both sulphonamide- and penicillin-susceptible organisms.

Psoriasis

All the time fresh evidence is received of Alphosyl's effectiveness in cases of psoriasis, even in those which have defied other treatment for years.

Excellent clinical trials. In a recent controlled study¹ of 62 cases of psoriatic lesions, 29 were completely cleared after use of Alphosyl and altogether 55 cases obtained between 75 per cent and 100 per cent clearance. In no case was the condition less than 50 per cent cleared.

Patients observed included those with total scalp-to-toe psoriasis, psoriasis of many years' duration, psoriasis involving tender areas and psoriasis refractory to all previous treatment.

These results confirm others obtained under comparable conditions.

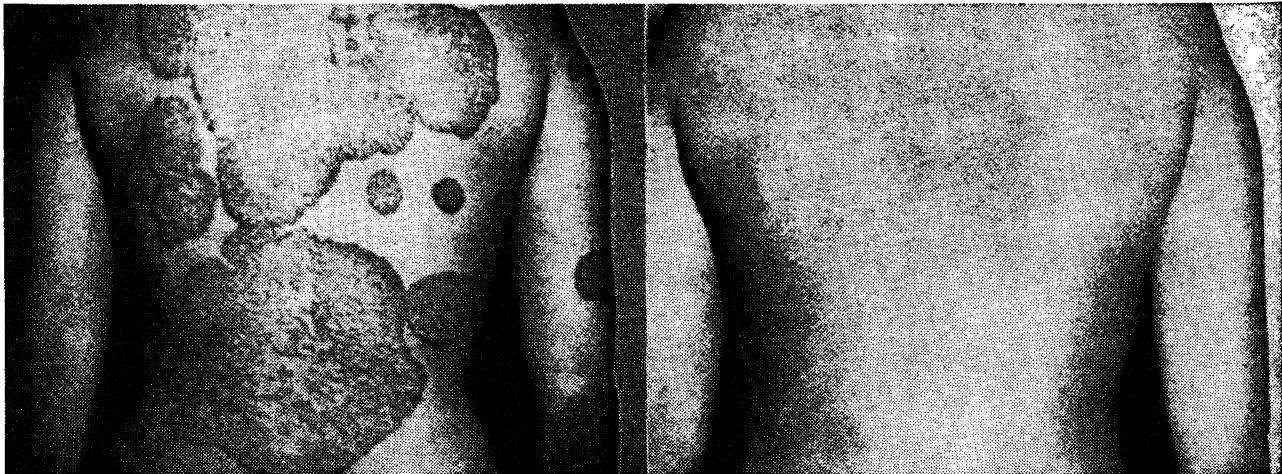

Why Alphosyl is so successful. In Alphosyl allantoin and a special refined coal tar extract are presented together for the first time. Allantoin has been found to be particularly effective in loosening psoriatic scales,² while the keratoplastic effect of coal tar is well known.² Alphosyl is non-greasy and non-staining and vanishes on application.

Freedom from side effects. Alphosyl is notably safe,^{2,3} being free from the risks which are found in other forms of treatment such as arsenicals, mercury, corticosteroids, X-ray, etc. It certainly deserves a trial in all cases of psoriasis, for which it is so widely prescribed.

Stainless-steel storage vessels for Minadex

Microscopical examination of Minadex emulsion

The growing demand for Minadex has had a tonic effect on its production. An ultra modern stainless steel plant, remote-controlled, now produces a record quantity of this most widely used vitamin-mineral syrup. Much of the popularity of Minadex is due to the quality of its emulsion of vitamins A and D. To maintain the standard, every batch is examined for globule size which, for acceptance, must not exceed 3 microns in diameter. Streamlined methods of manufacture and some thirty years experience of vitamin production are reasons why Minadex can still be sold at its pre-war price. The same experience, care and control which goes into the production of Minadex is behind every one of the vitamin preparations made by Glaxo.

SUSTAC^{*} SUSTAINED ACTION GLYCERYL TRINITRATE

GIVES YOUR PATIENTS LASTING CONFIDENCE

Continuous and controlled therapy

One SUSTAC tablet gives continuous and controlled release of glyceryl trinitrate independent of pH for 12 hours after ingestion. Uniform release of the drug is ensured by a superior 'membrane' construction giving your patients protection approximately 20 times longer than with sublingually administered nitroglycerin.

Fewer attacks; increased confidence

SUSTAC can markedly reduce the number of anginal attacks. The freedom from attacks thus secured by SUSTAC eliminates much of the fear associated with the condition and helps the patient to regain confidence and live a more normal life.

Simple regimen

One SUSTAC tablet in the morning and one at bedtime is usually all the dosage necessary. This simple regimen is convenient for the patient and lessens the risk of 'missed doses' as well as avoiding the psychological disadvantages often associated with frequent medication.

THE ROYAL NAVY offers you MORE

YOU CAN SERVE almost anywhere in almost any field of Naval activity, combining your calling as a doctor with the stimulus of a life as a commissioned officer in the Royal Navy. You could serve in almost any vessel from a frigate to an aircraft carrier; sail with the fleet to the Far East or work with a squadron in the West Indies. You could apply your care to Royal Marines Commandos, among parachutists, frogmen or rock climbers. You could fly with the Fleet Air Arm as a specialist in aviation medicine or investigate the problems of deep diving and advanced submarine development. You could work in a laboratory, hospital or medical school; serve at home or abroad, on shore or afloat; or study any one of a variety of subjects ranging from radio-biology to tropical diseases. And throughout your service as a Naval Medical Officer you would be working with the finest equipment in complete clinical freedom—and perhaps a greater opportunity to exercise your versatility than would ever be possible in civilian life.

YOU CAN ENTER BY ONE OF THREE METHODS All schemes lead to Short Service Commissions of 3-5 years' duration. Holders of such commissions can apply for permanent commissions after one year following appointment as Surgeon Lieutenant.

ANTIBIOTIC-INDUCED DIARRHOEA[★]

There is good evidence in continental literature, for which further confirmation is being sought in this country, that this troublesome complication of broad-spectrum antibiotic treatment can be relieved or prevented by administering living antibiotic-resistant *Lactobacillus acidophilus* in the form of ENPAC.

The lactobacilli can be shown to establish themselves and multiply in the bowel, and their presence is inimical to that of pathogens, including, according to some reports, *Salmonella* species, and to *Candida* and staphylococci.

"Patients in hospital who have had an operation, and a course of 'broad-spectrum' antibiotics, sometimes develop diarrhoea which may be severe and even fatal."—*Lancet* Annotations, 25th February, 1961.

Lacto-Calamine is cooling, astringent, antipruritic, protective, aesthetically acceptable and free from the risk of sensitisation attributed to some vehicles.

Both Cortoderm and Cortoderm-N present hydrocortisone in a cream base of Lacto-Calamine. Cortoderm-N contains 0.5% neomycin for infected dermatoses.

For economical treatment, both products are presented with 1.0%, 0.5% and 0.25% hydrocortisone. After initial treatment with 1.0% you can cut the strength (and the cost) as the condition is brought under control.

A modest advance in cancer chemotherapy (CYCLOPHOSPHAMIDE)

A step towards tumour-specificity for a cytotoxic alkylating agent.

A nitrogen mustard derivative which has potent anti-tumour effect with significantly less severe, more predictable and more generally reversible depression of bone marrow.

An agent tolerated by the veins (without intimal irritation or thrombosis), by the subcutaneous tissue (if an injection should go astray), by the serous membranes (pleura and peritoneum), by the gastrointestinal tract (less nausea and vomiting), and by healing wound tissue (when given as an adjunct to surgical removal of cancer).

INDICATIONS

1. Malignant reticulosos, including Hodgkin's disease and multiple myeloma (except where the disease is strictly localised and suitable for radiotherapy).
2. Operable solid cancer, especially of lung, breast or ovary. Here Endoxana is used as an adjunct to surgery.

Wherever the prognosis is poor, both in operable and inoperable malignant disease, continuous maintenance treatment by mouth with Endoxana is recommended.

NOTE: Endoxana causes alopecia of varying degree in a proportion of patients, though this is a temporary effect.

Available in ampoules of 100 mg., 200 mg., 500 mg., and 1,000 mg. for intravenous and intracavitary injection, and in tablets of 50 mg. for oral maintenance treatment.

Cancer Chemotherapy

RYOTOL Ear Drops are the result of extensive clinical research, following very successful results in the veterinary field.

The formula was developed particularly to combat *Ps. pyocyanea*, the highly resistant organism which causes abundant pus and which, unaffected by penicillin, sulphonamides and other bactericides, is present in 90% of cases of chronically discharging ears.

RYOTOL is lethal to *Ps. pyocyanea* and also to *Staphylococcus aureus*, *Proteus vulgaris* and *Streptococcus pyogenes* found in C.S.O.M. and Otitis Externa.

Formula:

Monophenyl ether of ethylene glycol	2.0%	v/v
Phenylmercuric Nitrate	0.1%	w/v
Phenyl-dimethyl iso-pyrazolone	5%	w/v

in a stabilised non-irritant base.

Good General Practice

In the Royal Army Medical Corps you can practise medicine in very good conditions. Well-equipped surgeries with medical assistants are provided, allowing you to do your best work, and devote more time to the care of your patients. There is great scope for the family doctor, particularly overseas, as the Royal Army Medical Corps looks after a very large number of women and children.

Great importance is attached to post-graduate study, and, during their service, permanent officers are given the opportunity of sitting for diplomas, such as D.C.H., D.Obst.R.C.O.G.

There is a large and comprehensive hospital service, consisting of thirty military hospitals at home and overseas, with consultant opinion readily available to you. As a general practitioner you are welcomed in the hospital to consult with your brother officers and follow up your cases.

Married quarters are provided, and you can count on regular off-duty periods with opportunities for games and social activities; there is generous annual leave on full pay without the trouble or expense of finding a locum.

FULLY REGISTERED PRACTITIONERS may apply for permanent or short service commissions. Minimum entry salary: £2,000 p.a. There is opportunity for specialist training. Permanent officers are guaranteed employment to age 65.

DOCTORS IN PRE-REGISTRATION YEAR are also eligible for commissions. Minimum salary: £850 with free board and lodging.

MEDICAL STUDENTS are eligible for cadetships: Minimum salary: £890 p.a.

ALL SALARY SCALES INCLUDE MARRIAGE ALLOWANCE

APPOINTMENTS

Applicants should state name, address, age, nationality, qualifications, and enclose (unless otherwise specified) one copy each of 3 recent ★ testimonials with short statement of experience and appointments held. Applications should be sent at once if no closing date is given. House Officers should submit a separate application for each post for which they apply. Cavassing of members of the Board or Advisory Appointments Committee will lead to disqualification (Statutory Instrument 1950, No. 1259, N.H.S.).

★ **SERVICE MEMBERS** may have difficulty in supplying recent testimonials, but this should not deter them from applying.

SERVICES

You can earn £2000 a year on entry in the Royal Air Force

New Conditions for Registered Practitioners

Under a new scheme announced by the Air Ministry, if you are a qualified doctor you can enter the Royal Air Force immediately after full registration and be commissioned as a Flight Lieutenant, earning, with full allowances, £2,000 a year. If you have post-graduate experience you can be granted up to seven years back-dated seniority; a doctor with six years civilian experience will be appointed Squadron Leader on entry, earning, with full allowances, £2,300 a year.

Tax free gratuities are payable on completion of short service commissions. These are £1,500 after three years or £3,000 after five years.

You can be offered a permanent commission and guaranteed pensionable employment to the age of 65 with excellent prospects of promotion to Group Captain rank and a salary of well over £3,000 a year. If you are married and serving at a Station you may be allocated an official married quarter. This will be a comfortably furnished house near your surgery.

You will have full clinical freedom and your practice will normally include the families of serving members of the Royal Air Force. You will have opportunities for specialising, and study leave is granted on full pay and allowances to permanent officers who wish to read for further qualifications.

'Pre-Registration Year' Scheme

If you are a medical graduate you may be commissioned in the Royal Air Force immediately in the rank of Flying Officer. You may then spend your pre-registration year seconded to a civilian hospital. This means that during your year as house physician or surgeon you may earn, with full

pay and allowances, up to £1,339 a year. On registration, you will become a Flight Lieutenant with possible earnings of £2,000 a year. To qualify for this scheme you must undertake to serve for at least three years after full registration. Your pre-registration year counts towards your gratuity following a short service commission and towards retired pay on a permanent commission. The gratuity on completion of a three year commission is £1,500 plus £200 for the full pre-registration year; on completing a five year commission the gratuity is £3,000 plus £200 for the full pre-registration year. These gratuities are tax free.

'Medical Cadetship' Scheme

If you are a medical student and have passed your second M.B. examination or the equivalent you may be commissioned *now* in the Royal Air Force. During the remainder of your medical training your fees will be paid and you will receive the full pay and allowances of a Pilot Officer which can amount to £1,090 a year.

To qualify for this scheme, you must undertake to serve for at least five years in the Medical Branch of the Royal Air Force after full registration.

At the end of the five years you may enter civilian practice with a tax free gratuity of between £1,400 and £2,600, or you may be selected for a permanent commission which guarantees pensionable employment to the age of 65 and which may take you to the most senior ranks in the Service.

For full information on the new conditions for doctors, specialists, graduates and cadets in the Royal Air Force, write to the Director-General of Medical Services, Air Ministry (M.A.1), (HN 893 V), 1 Tavistock Square, London, W.C.1.

information on oral contraception

The research carried out by Searle during the last eight years into oral contraception has led to a considerable number of publications in the world medical press. Many of these publications deal specifically with the two Searle oral contraceptive products, CONOVID* and CONOVID-E† and are the basis of an information service available to the medical profession on request. This consists of fully documented reference manuals on CONOVID and CONOVID-E, a booklet in question and answer form dealing with many of the inquiries received regarding the use of the two products, and a booklet for patients available in quantity to the medical profession for distribution to their patients.

TRANSVASIN RELIEVES MUSCLE SPASM

Muscle spasm caused by physical injury or rheumatic lesions is rapidly relieved by the application of Transvasin. The esters of nicotinic, salicylic and p-amino benzoic acids penetrate the skin and are concentrated at the point of injury. Transvasin is an effective and economical therapy.

Transvasin contains ethyl and n-hexyl nicotinate, ethyl p-aminobenzoate, 2% each and tetrahydrofurfuryl salicylate 14%. The N.H.S. price of the 30g. tube is 2/6d and the cost of an average application of the cream is under 1d.

THE NUFFIELD FOUNDATION SCHOLARSHIPS IN FOOD SCIENCE
The Nuffield Foundation, with the aim of helping to advance fundamental research in food science, is prepared to offer annually up to five Research Scholarships for science graduates and up to three Research Scholarships for medical or veterinary graduates. The Foundation hopes these awards will be helpful in attracting more people to make a career in the field of food science research. The awards, tenable for periods of up to four years, are intended to provide suitable graduates with research experience to Ph.D. level, together with some formal training in selected subjects. The choice of subjects for study and research will be related to a candidate's background and interests, with special reference to toxicology, pharmacology or pathology. The value of the awards, which will be fixed according to age, qualifications and experience, should make them of considerable interest. The awards can be supplemented by the amount of fees, marriage and child allowances, and, in appropriate cases, research expenses. The scholarships are open to men and women holders of a science, medical or veterinary degree of a U.K. or other Commonwealth university. Applications may be submitted by March 1 or July 1, 1963. Further particulars and forms of application are available from the Director, the Nuffield Foundation, Nuffield Lodge, Regent's Park, N.W.1. (2470)
