A New Serial Publication . . .

International Review of EXPERIMENTAL PATHOLOGY

Edited by G. W. RICHTER and
M. A. EPSTEIN

Volume 1, 1962, 454 pp., 107s. 6d.

This new serial publication provides timely reviews on important problems of experimental pathology in its widest sense. It emphasizes current advances in the understanding of pathological changes made possible by new knowledge in the fields of cell biology, biochemistry, molecular biology, statistics, and other fundamental fields. Subjects are selected for review in those areas showing the greatest progress or having special topical significance.

Contents: G. J. V. NOSSAL, Genetic Control of Lymphopoiesis, Plasma Cell Formation and Antibody Production. P. DUSTIN, Jr., Arteriolar Hyalinosis. S. BENCOSME and B. J. BLOOD VESSELS and LYMPHATICS

Edited by D. I. ABRAMSON

1962, 812 pp., 186s.

This work assembles current data on the embryology, anatomy, physiology, pharmacology, biochemistry, and pathology of arteries and arterioles, veins and venules, and lymphatics. Fifty-nine scientists have contributed sections devoted to their particular areas of research. An extensive bibliography is appended to each chapter.

Sections on: General Considerations of the Circulation of the Blood. Special Vascular Beds. Disorders Affecting the Arterial or Venous Circulation. Lymphatic System. Author Index—Subject Index.

It's true of so many patients, for the liquid glucose in Lucozade is only one quarter as sweet as sucrose, and one third as sweet as dextrose. Also, as the doctor knows, it supplies needed calories more quickly. That is why Lucozade is such a useful therapeutic aid, and why the doctor too approves of ...

one certain fact in hypertension

It is suitable for all grades of hypertension

Satisfactory response in most patients

More than 280 papers provide a positive clinical background

Easy to administer—one dose daily

Long-term control readily maintained

In wide clinical use for over three years

Named the drug of choice by many authorities

It is currently thought that the adequate control of hypertension before the onset of clinical complications such as heart failure, may be important, especially in the younger patient. Such long term treatment demands a drug that will maintain control of blood pressure if necessary over several years. In this respect, Ismelin is the drug of choice because of the high percentage of patients who have a satisfactory initial response to therapy, and the fact that only a very few become resistant to it. No comparable drug has these qualities combined with a relative freedom from serious side-effects.

In widespread use for three years, both in hospital and general practice, Ismelin has proved to be consistently effective, simple to administer and well tolerated. With only one dose daily, blood pressure can be satisfactorily controlled in a high proportion of patients.

Stainless-steel storage vessels for Minadex

Microscopical examination of Minadex emulsion

The growing demand for Minadex has had a tonic effect on its production. An ultra modern stainless steel plant, remote-controlled, now produces a record quantity of this most widely used vitamin-mineral syrup. Much of the popularity of Minadex is due to the quality of its emulsion of vitamins A and D. To maintain the standard, every batch is examined for globule size which, for acceptance, must not exceed 3 microns in diameter. Streamlined methods of manufacture and some thirty years experience of vitamin production are reasons why Minadex can still be sold at its pre-war price. The same experience, care and control which goes into the production of Minadex is behind every one of the vitamin preparations made by Glaxo.

ATROMID

TRADE MARK

For the control of blood abnormalities in Coronary Artery Disease

'Atromid', an original product of I.C.I. research, represents a new departure that could make a significant contribution to resolving the problem of coronary artery disease.

'Atromid' restores towards normal the serum levels of triglycerides, cholesterol and uric acid.

'Atromid' also favourably affects the thrombogenic mechanisms, so being the first compound to influence lipid levels and coagulation mechanisms of thrombosis at one and the same time.

CLINICAL EXPERIENCE

Over 1,500 patients have now been treated for periods from a few weeks to two years. In the great majority of cases, serum triglycerides, serum cholesterol and serum uric acid levels return to normal or near normal.

INDICATIONS AND DOSAGE

'Atromid' is indicated in those patients who, because they exhibit raised serum lipid levels are considered to carry an enhanced risk of developing coronary artery disease.

The average daily dosage is 8 capsules given in divided doses after meals, e.g. 3 capsules after breakfast, with 2 capsules after the midday meal and 3 capsules after the evening meal. Each 250 mg. 'Atromid' capsule contains 244.5 mg. ethyl chlorophenoxyisobutyrate and 5.5 mg. Androsterone.

CHD AND CLO

SIGNIFICANCE OF MODERN COD LIVER OIL

1. A field study of CHD (Coronary Heart Disease) is being conducted in the town of Framingham, Massachusetts, by the National Heart Institute of the United States Public Health Service. More than 5,000 of the townspeople have been studied for 8 years, and the results so far obtained have been reported¹.

In men aged 30-49 at the start of the study 'The risk [of developing CHD] increased more than fivefold from low to high levels of serum cholesterol . . . It is clear that men with low serum cholesterol levels and low blood pressure, who do not smoke cigarettes, have less than a third the standard risk . . .

'It is believed that the Framingham enquiry and other similar investigations have demonstrated beyond question that certain characteristics are associated with the development of coronary heart disease . . . Meanwhile, since the [remedial] procedures advocated are not considered hazardous, it seems reasonable to recommend that persons with high risk characteristics should attempt to change them in a favourable direction.'

2. The dietary procedures commonly advocated for the lowering of serum cholesterol levels are:

- (a) A moderate reduction of total fat consumption (say, by one quarter).
- (b) Reduction of consumption of heavy and refined carbohydrates—chocolate, toffee, ice cream, puddings, pastry, heavy cakes, biscuits, white bread; fruit and vegetables being taken *ad lib*.
- (c) Substitution of poly-unsaturated oils for a majority of the saturated fat in the diet. This means *inter alia* an increased consumption of fish, poultry, liver, kidney, and cottage cheese, in place of bacon, ham, pork, lamb, mutton, sausages, tongue, ordinary cheese, and cream and eggs; and, nearly always, the consumption of a liquid source of poly-unsaturates.

3. A highly concentrated liquid source of poly-unsaturates is Cod Liver Oil (CLO), of which 2 tablespoonsful a day has been shown² to be superior to corn oil in its effect on plasma cholesterol levels. In addition, unlike vegetable oils, CLO supplies vitamins A and D.

Psoriasis

All the time fresh evidence is received of Alphosyl's effectiveness in cases of psoriasis, even in those which have defied other treatment for years.

Excellent clinical trials. In a recent controlled study¹ of 62 cases of psoriatic lesions, 29 were completely cleared after use of Alphosyl and altogether 55 cases obtained between 75 per cent and 100 per cent clearance. In no case was the condition less than 50 per cent cleared.

Patients observed included those with total scalp-to-toe psoriasis, psoriasis of many years' duration, psoriasis involving tender areas and psoriasis refractory to all previous treatment.

These results confirm others obtained under comparable conditions.

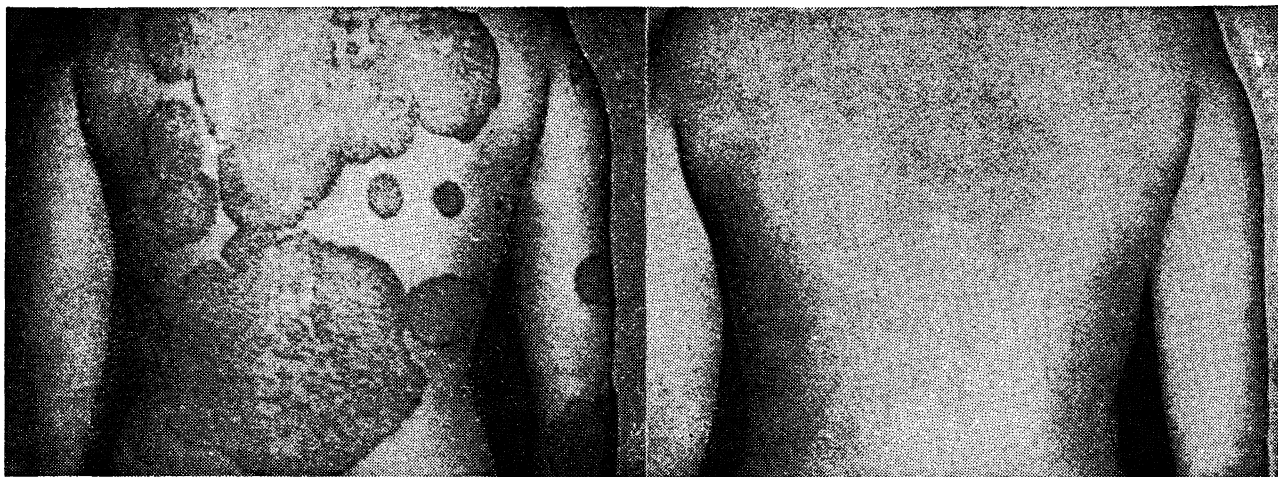

Why Alphosyl is so successful. In Alphosyl allantoin and a special refined coal tar extract are presented together for the first time. Allantoin has been found to be particularly effective in loosening psoriatic scales,² while the keratoplastic effect of coal tar is well known.² Alphosyl is non-greasy and non-staining and vanishes on application.

Freedom from side effects. Alphosyl is notably safe,^{2,3} being free from the risks which are found in other forms of treatment such as arsenicals, mercury, corticosteroids, X-ray, etc. It certainly deserves a trial in all cases of psoriasis, for which it is so widely prescribed.

CRYSTAPEN G

INJECTION · TABLETS · SYRUP

Despite the very many antibiotics now available penicillin G remains the first choice for the treatment of the majority of acute septic infections. It is generally agreed that other substances are used only if bacteriological or other factors indicate specific need or if the administration of penicillin G in full dosage fails to produce response.

The early treatment of boils, carbuncles, abscesses and other soft tissue infections is essential if treatment is to be effective. Crystapen (soluble sodium penicillin G Glaxo) with its rapid bactericidal action, is a logical first choice for the treatment of such conditions. It is also cheap to use and frequently costs only a quarter as much as alternative antibiotics.

Clinical Endocrinology

By T. S. Danowski,
B.A., M.D.

These four volumes discuss in detail the development, diagnosis, pathology and treatment of the endocrine diseases.

"It is gratifying (and remarkable) to find the whole area of endocrinology described by a single author, who manages a uniform pattern of presentation not easily achieved in a book by many authors. The four volumes of Professor Danowski's book certainly do this. . . . The descriptions are succinct, but there is no skimping of important matter. . . . Together they form one of the best available compilations on endocrinology." —THE LANCET.

POLYBACTRIN

ANTIBIOTIC POWDER SPRAY

IN THE MANAGEMENT OF BURNS

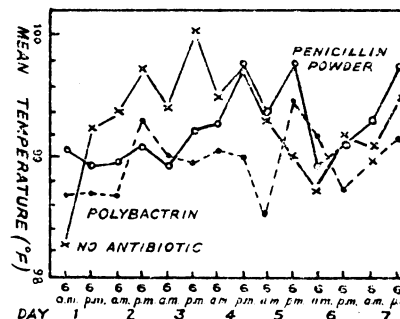

In a recent report on a controlled clinical trial of Polybactrin in the treatment of fresh burns by the exposure method, the results of the Polybactrin technique as a prophylactic measure compared with the controls was statistically significant.

The main effect of prophylaxis by Polybactrin was the control of staphylococcal infection, which was unaffected by penicillin powder. Infection with *Streptococcus pyogenes* was less frequent in burns treated with Polybactrin. *Pseudomonas pyocyanea* was reduced in burns treated with Polybactrin. Coliform bacilli were significantly less in burns treated with Polybactrin.

The mean temperature was significantly lower in patients treated with Polybactrin than those treated with penicillin powder or with no antibiotics.

'LETUSIN'

saves
the situation

When control of non-productive cough is called for, 'Letusin', a new suppressant, will provide the answer. Laevopropoxyphene, the "single-entity" active ingredient, is specific for cough. 'Letusin' is safe and well tolerated. Unlike codeine, it permits normal expectoration and does not give rise to constipation or sedation.

In acute and chronic respiratory conditions remember

'LETUSIN'*

either 'Pulvules' or Suspension.
'Pulvules' 100 mg. Suspension 50 mg.

Solprin·Codis·Cafdis

Contain neutral stable soluble aspirin

SOLPRIN. Dissolves in water to form a true solution of calcium acetylsalicylate (neutral soluble aspirin).

Clinical evidence produced over a long period of years indicates that Solprin is unlikely to irritate the gastric mucosa, even in the massive dosage prescribed in rheumatic conditions.

More rapidly absorbed, giving a quicker effect.

CODIS. Neutral soluble aspirin with phenacetin and codeine phosphate.

CAFDIS. Neutral soluble aspirin with phenacetin and caffeine.

N.H.S. basic prices for 500 tablets in foil, which ensures protection from moisture:

“The most popular antibiotics for topical application . . .

... are bacitracin, polymyxin, and neomycin because of their stability, limited diffusion, low allergenic potential and high clinical efficacy against organisms . . .”

(New England J. Med. (1959) 261, 756.)

‘CORTISPORIN’ OINTMENT

issued in tubes of 4 gm. and 10 gm. has all these merits, for it contains all three antibiotics. In each gramme of petrolatum base is: polymyxin B sulphate 5,000 units · zinc bacitracin 400 units · hydrocortisone 10 mgm. · neomycin sulphate 5 mgm.

‘CORTISPORIN’ LOTION

issued in bottles of 10 c.c. is indicated for larger, moist or abraded lesions. It contains, in each c.c. of aqueous vehicle: polymyxin B sulphate 10,000 units · hydrocortisone 10 mgm. neomycin sulphate 5 mgm.

The hydrocortisone in ‘CORTISPORIN’ products reduces inflammation and therefore enables the potent antibiotics to reach bacteria more easily.

Skin sensitisation has not been reported with ‘Cortisporin’ products. Cross-resistance or cross-sensitisation to other antibiotics does not occur.

Atarax helps take anxiety out of general practice

Hair-trigger balance between general irritation and explosive anger sends patients to you. Atarax and your reassurance will help them regain composure and unload stresses. And reassurance persists with Atarax. Side-effects? 'The drug was found safe, easily administered, and non-toxic in all [50] cases. No untoward effects occurred in any patient...'¹

Atarax is indicated in emotional and behaviour disturbances in childhood, anxiety symptoms in adults, agitation and excitement in the elderly patient. It is particularly beneficial in the management of emotional problems associated with the menopause.

**AN ORAL DIURETIC
OF HIGH POTENCY,
LONG DURATION
OF ACTION, AND
LOW TOXICITY**

Enduron is the Abbott trade mark for methyclothiazide, a new oral diuretic agent. Chemically, Enduron is a member of the thiazide family of diuretics.

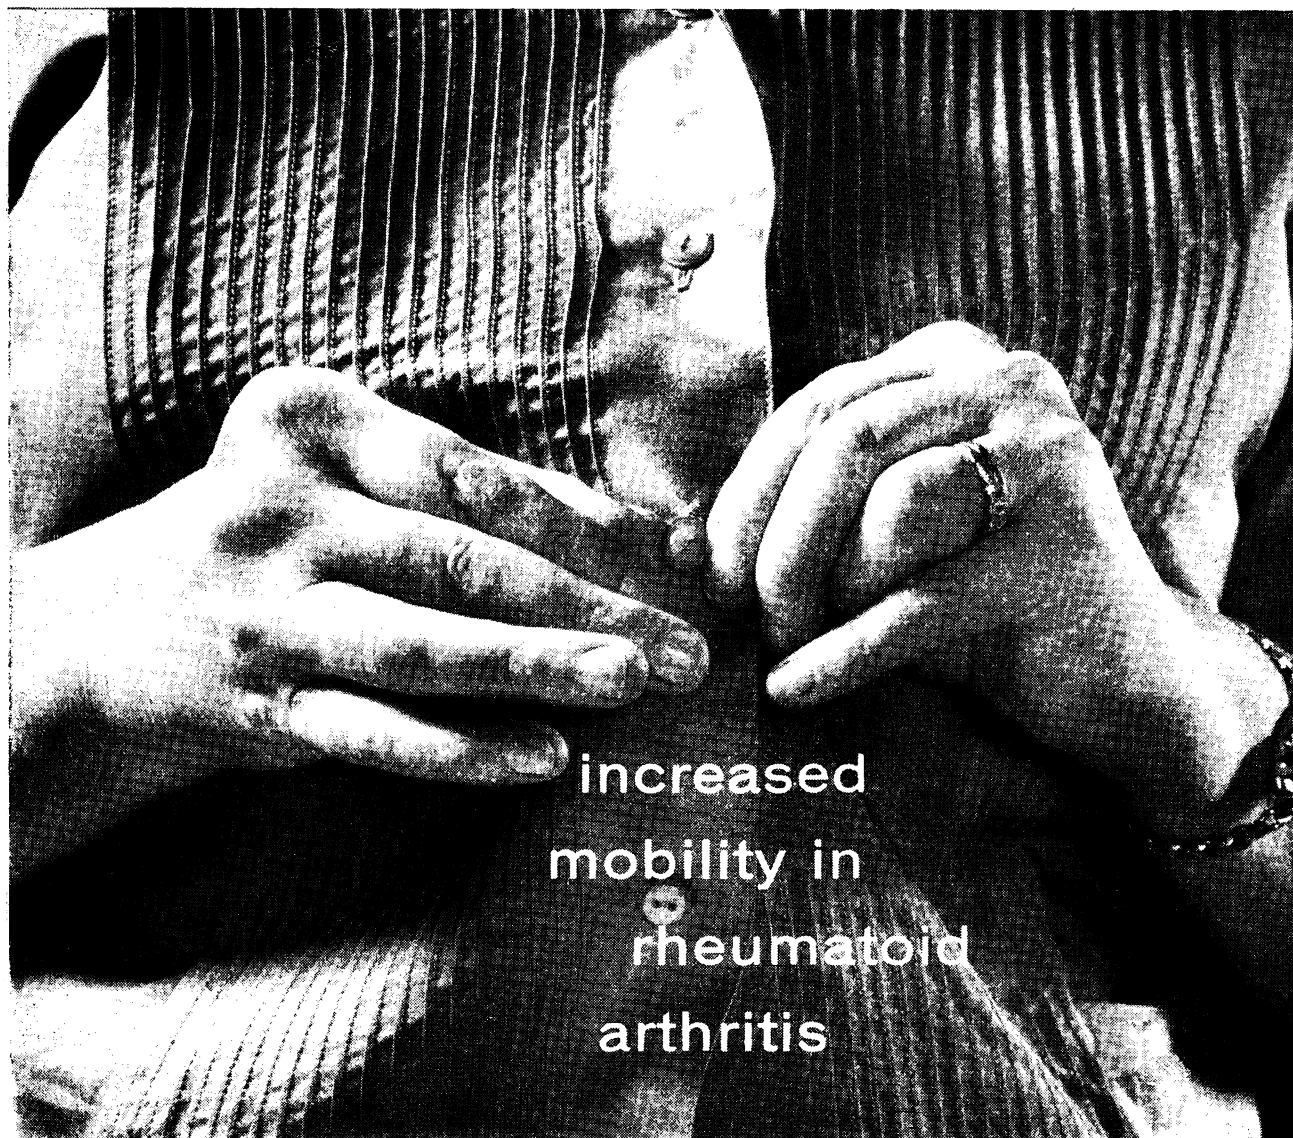

The predominant effects of Enduron are diuresis, natruresis, and chloruresis. Serum potassium levels are little affected. Although the excretion of sodium is greatly enhanced, the excretion of potassium is not increased proportionally. Consequently, potassium depletion infrequently presents a problem in patients treated with Enduron. Clinically Enduron offers several important advantages when compared with the older thiazides: Enduron is highly potent; 10 mg. produce as great a natruresis as the peak effect of any available thiazide. Enduron has a duration of effect of at least 24 hours—longer than most thiazides—affording satisfactory therapy with one dose daily.

Enduron leads to greater sodium excretion per unit of potassium excreted and to less total potassium loss than many other thiazides.

2.5 mg. Enduron tablets are available in bottles of 25 and 100. 5 mg. Enduron tablets also in bottles of 25 and 100. Basic NHS prices 3/9 and 6/9 per 25.

ALDOMET
METHYLDOPA Regd

ALDOMET reduces standing *and lying* blood pressure.

Symptoms of orthostatic hypotension are fewer and less severe than is the case with other effective antihypertensive agents.

Exertional hypotension and diurnal blood pressure fluctuations rarely occur.

Dosage is simple, flexible and easily established.

There is a general lack of severe side effects.

Independent clinical confirmation of these advantages continues to appear in the world medical press. Recent U.K. references include:

TRANSVASIN RELIEVES MUSCLE SPASM

Muscle spasm caused by physical injury or rheumatic lesions is rapidly relieved by the application of Transvasin. The esters of nicotinic, salicylic and p-amino benzoic acids penetrate the skin and are concentrated at the point of injury. Transvasin is an effective and economical therapy.

Transvasin contains ethyl and n-hexyl nicotinate, ethyl p-aminobenzoate, 2% each and tetrahydrofurfuryl salicylate 14%. The N.H.S. price of the 30g. tube is 2/6d and the cost of an average application of the cream is under 1d.

Busy G.P.s economise with GMP sterile Disposable Syringes

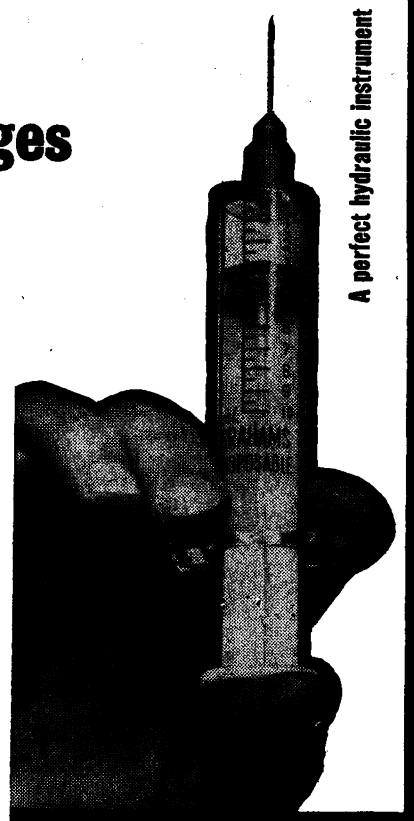

For speed and convenience, and to prevent cross-infection, just unwrap a new and sterile syringe complete with needle each time you need a hypodermic. The smallest GMP sterile Disposable Syringes—2 ml size, calibrated in 1/10 ml—can cost as little as 4d. each in packs of 100 (tax allowed). The 5 ml and 10 ml sizes obviously cost a little more. But the sharpness of needles, the convenience and greater safety of using each instrument only once, make it not worth the bother, time, effort, cost or care necessary to sterilise the traditional instrument and needle.

Choice of four popular needle gauges and lengths. Syringes and needles available separately (Luer mounting). Available in packs of 100 or less through the practitioner distribution organisation set up in response to demand. Samples and details on request.

ROTER

has particular
advantages

ROTER achieves a high cure rate and often gives effective control of even refractory chronic cases which have resisted other treatments.

ROTER in many cases obviates the need for hospitalization or surgical intervention.

ROTER helps patients to keep ambulant and symptom-free with a minimum of medication and with few, if any, dietary restrictions.

ROTER in general practice enables the physician to take adequate care of his gastric cases without frequent or prolonged supervision.

ROTER has no known side effects.

ROTER requires no supplementary medication such as sedatives or anti-spasmodics.

ROTER shows a saving in cost when compared with conventional methods of treatment.

HYDRATENE

To ease pain and induce sleep Hydratene combines the well-known hypnotic Chloral Hydrate, with the modern analgesic Paracetamol, and has the fundamental merit of being both effective and mild. In this compound form Chloral Hydrate has little odour or taste and shares with the analgesic, Paracetamol, the advantage of being singularly free from side effects and habituation. Hydratene, in the appropriate dosage, is therefore safe for adults and children.

Each Hydratene tablet contains the equivalent of
Chloral Hydrate 4 grains
Paracetamol 6 grains

Dosage: 1-3 tablets as may be directed by the physician.

SERVICES

You can earn £2000 a year on entry in the Royal Air Force

New Conditions for Registered Practitioners

Under a new scheme announced by the Air Ministry, if you are a qualified doctor you can enter the Royal Air Force immediately after full registration and be commissioned as a Flight Lieutenant, earning, with full allowances, £2,000 a year. If you have post-graduate experience you can be granted up to seven years back-dated seniority; a doctor with six years civilian experience will be appointed Squadron Leader on entry, earning, with full allowances, £2,300 a year.

Tax free gratuities are payable on completion of short service commissions. These are £1,500 after three years or £3,000 after five years.

You can be offered a permanent commission and guaranteed pensionable employment to the age of 65 with excellent prospects of promotion to Group Captain rank and a salary of well over £3,000 a year. If you are married and serving at a Station you may be allocated an official married quarter. This will be a comfortably furnished house near your surgery.

You will have full clinical freedom and your practice will normally include the families of serving members of the Royal Air Force. You will have opportunities for specialising, and study leave is granted on full pay and allowances to permanent officers who wish to read for further qualifications.

'Pre-Registration Year' Scheme

If you are a medical graduate you may be commissioned in the Royal Air Force immediately in the rank of Flying Officer. You may then spend your pre-registration year seconded to a civilian hospital. This means that during your year as house physician or surgeon you may earn, with full

pay and allowances, up to £1,339 a year. On registration, you will become a Flight Lieutenant with possible earnings of £2,000 a year. To qualify for this scheme you must undertake to serve for at least three years after full registration. Your pre-registration year counts towards your gratuity following a short service commission and towards retired pay on a permanent commission. The gratuity on completion of a three year commission is £1,500 plus £200 for the full pre-registration year; on completing a five year commission the gratuity is £3,000 plus £200 for the full pre-registration year. These gratuities are tax free.

'Medical Cadetship' Scheme

If you are a medical student and have passed your second M.B. examination or the equivalent you may be commissioned *now* in the Royal Air Force. During the remainder of your medical training your fees will be paid and you will receive the full pay and allowances of a Pilot Officer which can amount to £1,090 a year.

To qualify for this scheme, you must undertake to serve for at least five years in the Medical Branch of the Royal Air Force after full registration.

At the end of the five years you may enter civilian practice with a tax free gratuity of between £1,400 and £2,600, or you may be selected for a permanent commission which guarantees pensionable employment to the age of 65 and which may take you to the most senior ranks in the Service.

For full information on the new conditions for doctors, specialists, graduates and cadets in the Royal Air Force, write to the Director-General of Medical Services, Air Ministry (M.A.1), (HN 893W), 1 Tavistock Square, London, W.C.1.

ST. ANDREW'S HOSPITAL

FOR NERVOUS AND MENTAL
DISORDERS

NORTHAMPTON

President: The Earl Spencer.

Medical Superintendent:

D. J. O'Connell, M.D., D.P.M.
This private hospital receives patients
both male and female, suffering from
nervous and mental disorders, includ-
ing alcoholism and senile illnesses. The fee
range from fourteen guineas per week.
Private rooms with special nurses care.
Provided either in the hospital or in
one of the villas in the grounds. The hospital
is situated in 130 acres of pleasant ground
which provide all recreational facilities.
These include a nine-hole golf course,
gardening, fruit growing, etc.

WANTAGE HOUSE

This is a separate reception unit to whi-
patients may be admitted. It is equipped
for the complete investigation of nerv-
ous and mental disorders by the most modern
methods. All forms of treatment are avail-
able. It contains laboratories for bio-
chemical, bacteriological and pathological
research.

MOULTON PARK

Some two miles from the main hospital
is the farm of approximately 600 acre.
Occupational therapy is a feature of this
branch, and patients are given every facility
for occupying themselves in farm
gardening, fruit growing, etc.

BRYN-Y-NEUADD HALL

The seaside home of the hospital is
beautifully situated in a park of 830 acre
at Llanfairfechan, amidst the finest scenery
in North Wales. On the north-west cor-
ner of the estate a mile of sea coast forms its
boundary. Patients may visit this home
for a short seaside change or for long
periods. The hospital has its own private
bathing house on the seashore.

For terms and further particulars apply
to the Medical Superintendent (Telephone
No. 34354, Northampton), who can be
in London by appointment.

Feet of Balance

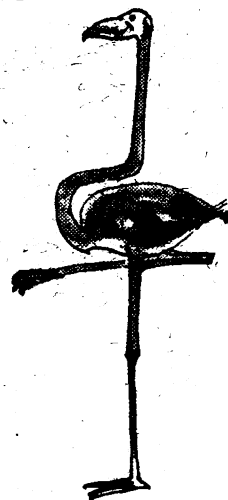

*To stand upon one foot all day
Requires (the bird confided)
A quite remarkable display
Of reflex righting, so to say,
To counter the resultant sway
That makes one feel lopsided.*

*I could not stand this standstill pose;
I simply wasn't able
To keep my balance. Goodness knows
What labyrinthine turns arose!
But see how Torecan bestows
A stance completely stable.*
