# **Which analgesic do you prescribe routinely for your elderly, dyspeptic or anaemic patients?**

Many doctors are justifiably loath to prescribe any form of aspirin, phenacetin or codeine for large numbers of their patients because of the risk of gastric and other side-effects. Now with Zactipar\*—Wyeth's new analgesic preparation—you can provide not just simple but potent, reliably effective, trouble-free analgesia for *all* your patients in pain. Because of the remarkably low incidence of side-effects of its two active constituents—ethoheptazine and paracetamol—Zactipar can be used with confidence as a routine analgesic, even for chronic administration, in a wide range of conditions.

# **ZACTIPAR**

Bottles of 100 tablets. Basic N.H.S. Cost—16s. 8d. (+P.T.). Zactipar tablets contain 75 mg. ethoheptazine citrate plus 400 mg. paracetamol. Dosage: 1 or 2 tablets three or four times daily. Detailed information on request.

**CONDITION:** Medium varices

**\* PRESCRIPTION:** *Scholl standard elastic yarn stockings.*

Available in thigh length stockings or below-knee stockings.

They have four prime features:-

- 1** *Correct compression* throughout the entire length and girth, including the important area of the malleoli.
  - 2** *Avoidance of constriction* by means of the Soft-Grip ribbed nylon extremities of the stockings.
  - 3** *Comfort for the patient:* cool, light and well ventilated.
  - 4** *Cosmetic acceptance:* seamless, they pass unnoticed under dress hose.
- 

**CONDITION:** Early or mild varices

**\* PRESCRIPTION:** *Nylastik lightweight elastic yarn stockings.*

Full-footed, thigh length: Nylastik are indiscernible in wear and they provide a degree of support quite remarkable for such light stockings. They are widely applicable for prophylaxis during pregnancy.

## THE SIMPLEST TREATMENT FOR AMOEBIASIS

**FURAMIDE**

Simple, practical and economical, Furamide changes the conventional approach to amoebiasis. **These are FURAMIDE'S outstanding advantages.**

**EFFECTIVE** Cure rates of 75% to 80% in the acute stage and 90% to 100% in the chronic condition may be expected.

**CONVENIENT** No injections, no enemas, no special diet. Furamide is very suitable for ambulant patients.

**SIMPLE** Dosage is simple—1 tablet three times daily for ten days in patients of average weight.

**SAFE** Side-effects are unlikely. The toxicity of Furamide is very low.

**ECONOMICAL** Hospitalization is not normally necessary so that treatment with Furamide is cheaper than the older forms of therapy.

Extensive clinical trials in many tropical and sub-tropical countries have borne out these claims. A list of references and detailed literature will gladly be sent on request.

**FURAMIDE** Each tablet contains 0.5 G of Entamide (diloxanide) furoate, a product of Boots research. Packed in bottles of 15 and 250 tablets.

When treatment demands  
bland fluid—

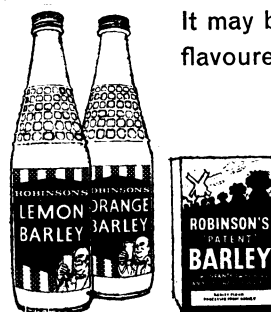

**ROBINSON'S**  
makes it easy

Barley water has long been recognised as the ideal treatment in cases where a large amount of liquid is prescribed. With its high solids content, smooth demulcent barley water—hot or cold—is especially suitable where the internal membranes are inflamed and tender.

Robinson's Lemon Barley and Orange Barley provide a convenient form of natural, wholesome barley water freshened with lemon and orange and perfectly balanced for rapid absorption. Home brewed barley water is quickly made with Robinson's 'Patent' Barley.

It may be mixed with milk or flavoured with fruit juice.

A half pound pack  
makes 96 glassfuls.

Where **BLOOD PRESSURE** climbs, keep it under control with **ENDURONYL**

With Enduronyl, once daily is the dose for hypertension. Blood pressure starts down steadily: improvement usually is substantial within 10 days. Further reduction may continue over following weeks. At the same time, excess sodium and water are consistently eliminated. Giving Enduronyl just once a day means fewer forgotten doses. A smoothly sustained therapeutic response, too. Enduronyl combines two well-established anti-hypertensive agents: (1) Enduron, Abbott's long-acting thiazide diuretic, and (2) Harmony, a rauwolfia derivative of low side effects. Together they provide greater anti-hypertensive action than with either alone.

# for control of SEVERE ASTHMA

**Betnelan** (betamethasone) is the recent anti-inflammatory steroid developed by Glaxo. It has proved remarkably effective in the treatment of severe asthma when other measures have proved inadequate.

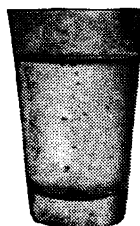

*Although dosage should be varied to suit the individual, in general practice a short-term course of 21 Betnelan tablets given over 6 days, is usually sufficient to achieve control.* Side effects are no problem in short-term use and treatment is inexpensive.

# Betnelan

GLAXO LABORATORIES LIMITED.

When conventional treatment of less severe asthma is interrupted by an acute attack, short-term Betnelan therapy can restore control. When the attack is extremely severe (status asthmaticus) all recognised measures which may include injectable corticosteroids (Betnesol Injection is recommended) should be taken, at least initially. At the same time oral treatment with Betnelan can be started to maintain control. Betnelan is presented as scored tablets of 0.5 milligrams betamethasone in bottles of 30, 100 and 500. Half-strength tablets of 0.25 mg are also available in similar quantities.

## MEDICAL EQUIPMENT FROM BRITISH OXYGEN

 The Lucy Baldwin apparatus represents a significant advance in obstetric analgesia. It is designed for the administration of nitrous oxide and oxygen mixtures, the composition of which may be varied between 70% N<sub>2</sub>O / 30% O<sub>2</sub> and 100% O<sub>2</sub>. The mixture inhaled by the patient corresponds closely to the control setting, regardless of changes in draw-off conditions and will flow only in response to the patient's inspirations. Safety features include an emergency oxygen control and an automatic cut-off valve to prevent inhalation of nitrous oxide in the event of undetected failure of the oxygen supply. Stainless-steel storage vessels for Minadex

Microscopical examination of Minadex emulsion

The growing demand for Minadex has had a tonic effect on its production. An ultra modern stainless steel plant, remote-controlled, now produces a record quantity of this most widely used vitamin-mineral syrup. Much of the popularity of Minadex is due to the quality of its emulsion of vitamins A and D. To maintain the standard, every batch is examined for globule size which, for acceptance, must not exceed 3 microns in diameter. Streamlined methods of manufacture and some thirty years experience of vitamin production are reasons why Minadex can still be sold at its pre-war price. The same experience, care and control which goes into the production of Minadex is behind every one of the vitamin preparations made by Glaxo.

# For obstetrics and prevention of cross infection

Dettol Antiseptic Cream is a new and highly germicidal preparation for routine use in obstetrics, including disinfection of the hands and gloved hands, preparation of patients, and as an antiseptic lubricant for instruments and in examinations. It is well tolerated by the skin and tissues and may be applied repeatedly. It is bland and pleasant to use.

Dettol Antiseptic Cream is particularly suitable for general use in the prevention of cross infection. It has rapid bactericidal effect against a wide range of micro-organisms. For instance, the following are destroyed in vitro in less than one minute at skin temperature:

**Staph. aureus; Staph. aureus phage type 80; Ps. pyocyanea; Strept. pyogenes; Strept. anaerobicus; Sh. sonnei; E. coli.**

## HAND DISINFECTION

Should be applied after washing. Quickly absorbed by light friction, it leaves the skin non-oily, non-tacky, and replaces fats removed by constant washing.

The Cream also helps to prevent bedsores.

## Winter weather and vitamin needs

In very cold weather we tend to eat more carbohydrate. The favourite suet puddings are welcomed at the table and breakfast and tea are occasions for more solid meals than usual.

The utilisation of carbohydrates involves the vitamin B complex, and the higher the carbohydrate content of the diet the greater the need for these essential nutrients. The recommended allowance for vitamin B<sub>1</sub> is, in fact, linked to the number of calories supplied by carbohydrates.

Marmite yeast extract provides all known factors of the vitamin B complex in a pleasant and appetising form. It is easily added to soups and stews, and it is popular as a spread on bread and butter or hot toast.

## FOR GERIATRIC PATIENTS safe, comfortable, effective HERNIAL SUPPORT

Because each Spencer Support is designed in order to meet the patient's individual needs, results are demonstrably superior.

The patient shown on left, at the age of 74, developed a left ventral hernia following surgery fourteen years previously. A left inguinal hernia resulted from the long wearing of a cast following a hip injury 3 years later. "Stock" supports proved ineffective. A Spencer Support as shown was prescribed with excellent results. Her Spencer gives safe, comfortable and effective control of the hernias—improves and maintains posture—protects and supports the weak muscles of old age. With the aid of her Spencer, the patient runs her household, does all her own work, and—as she says—still has time "to enjoy life."

Prescribe Spencer with confidence for men, women, children—for abdomen, back, breasts. No case is too difficult for Spencer Designers!

# why **CRYSTAMYCIN**

TRADE MARK

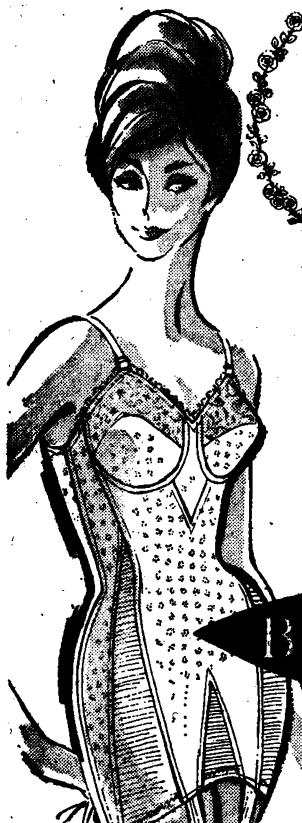

Because its two antibiotic components frequently have a synergistic effect, providing an intensive bactericidal attack beyond the scope of either substance used alone. The penicillin in Crystamycin is in the soluble sodium form to exert a swift bactericidal effect. Streptomycin has been selected for its decisive effect on gram-negative organisms. And finally Crystamycin is surprisingly low in cost. Effectiveness plus economy — reasons why Crystamycin...

is so often chosen to put  
a swift end to bacteria

## one certain fact in hypertension

It is suitable for all grades of hypertension

Satisfactory response in most patients

More than 280 papers provide a positive clinical background

Easy to administer—one dose daily

Long-term control readily maintained

**In wide clinical use for over three years**

Named the drug of choice by many authorities

Over three years' successful use and more than 280 published reports together form the positive clinical background on which the treatment of hypertension with Ismelin is based. More than 100,000 patients are estimated to be under treatment with Ismelin in the UK alone and it has been found to be an outstanding improvement over previous therapy in more than 23 countries.

Ismelin offers a unique combination of properties in providing satisfactory control of blood pressure in nearly 90% of patients, with a single daily dose and with relative freedom from side-effects. Tolerance and drug resistance rarely prove a problem, so that long-term control can be readily maintained.

### UNIVERSITY OF GLASGOW

#### DIPLOMA IN CLINICAL PSYCHOLOGY

A Course of instruction over two years leading to the Diploma in Clinical Psychology will commence in July, 1963. An initial hospital attachment will be followed by a course of formal instruction covering three academic terms. The final twelve months of the course will be devoted to practical training in a Mental Hospital. A limited number of paid appointments under the Regional Hospital Board is available, permitting attendance on the course. The fee for the full course, including examination fee, is £90. This is payable in two instalments; £80 for the first year and £10 for the second.

Applicants must be first- or second-class honours graduates in psychology of a British or other recognized university. Further details, application forms, and regulations may be obtained from the Professor of Psychological Medicine, Southern General Hospital, Glasgow S.W.1. The closing date for the submission of applications is July 15, 1963. (4379)

### TWO-WEEK-END COURSE IN CLINICAL ORTHOPAEDICS

**"Now is the winter of her discontent**

**made glorious summer..."**

*—King Richard III (adapted)*

"The ability of Melleril to relieve  
or attenuate the causal anxiety  
was reflected in the control of agitation  
and a marked alteration from  
confusion to a sense of well-being  
and in many instances, alertness."

*Amer. J. Psychiat. (1961) 118, 543.*
