Routine examination of young children's feet reveals many foot-ailments in the making. Doctors with children under their care may wish to take preventive action by instructing mothers on correct shoe-fitting for growing feet.

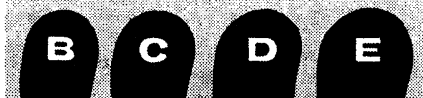

In Clarks experience, the vital factors are:

- 1. AMPLE TOE-ROOM** held in place by close fit at heel and instep.
- 2. CONTOUR-MEASUREMENT**—for girth as well as width and length.
- 3. FULL CHOICE OF SIZES**—with up to four width fittings in each length-size and half-size.

4. TRAINED FITTERS, with a sound instruction course on fitting children's feet.

On these factors, Clarks have built their own reputation and can give this real promise; **Freedom from all foot troubles caused by footwear, if from baby-hood none but Clarks Shoes are worn correctly fitted.**

A MAJOR DEVELOPMENT IN THE TREATMENT OF BRONCHOSPASM

Most known treatments for bronchospasm suffer from at least one of three disadvantages: slow onset of action, short-lived relief, or high dosage.

The Prenomiser Plus, a new micro-aerosol introduced by Benger Laboratories Ltd., eliminates all these drawbacks - thus taking a major step forward in the treatment of bronchospasm.

The Prenomiser Plus employs a long-acting drug combination - isoprenaline sulphate and atropine methonitrate - which gives *immediate and prolonged relief* from bronchospasm. This prolongation of effect helps prevent patients from becoming over-dependent on inhalation therapy - as is possible when short-acting bronchodilators are too frequently used.¹

Another advantage of the Prenomiser Plus is that this prolongation of effect is afforded by a dosage that is minute; in fact, the dosage of isoprenaline in this form is 200 times less than that of isoprenaline administered sublingually. Side-effects, such as tachycardia, are therefore eliminated.

To summarise: rapid action, prolongation of bronchodilatory effect and minute dosage, together with simplicity of use, combine to make the Prenomiser Plus the most advanced bronchodilator available today.

PRESENTATION

The Prenomiser Plus is a micro-aerosol presentation of isoprenaline sulphate B.P. 0.1% w/w plus atropine methonitrate B.P. 0.04% w/w in an inert propellant. Each aerosol container provides 200 doses. When empty, the complete unit, including mouthpiece, is disposable. Basic N.H.S. price-14/2d. Average cost per treatment day-2d.

The importance of safety in the control of diabetes

Nowhere is safety more important than in drugs intended for long-term—even life-long—use. One reason for the extensive use of Rastinon in oral anti-diabetic therapy is that no serious side-effects are associated with the product even after its use in some two million patients. The few side-effects reported have been transient and have rarely necessitated cessation of treatment.

Rastinon is the standard oral treatment of diabetes and is especially indicated for patients in whom the condition is first diagnosed at middle age.

Rastinon tablets are remarkable for their safety, simplicity, effectiveness and economy.

WILL SHE TAKE IRON?

Most oral iron preparations are well absorbed *if* the patient takes them.

So important is patient co-operation that the success of iron therapy often depends on its acceptability. Ferrodic tablets, with their exceptionally low toxicity*, rarely cause gastric irritation and are so palatable that they can be sucked or chewed. Consequently, the safest oral iron also tends to give more reliable results in practice.

In the control of blood abnormalities in Coronary Artery Disease

'Atromid' is an original product of I.C.I. research. Evidence suggests it controls lipid metabolism through normal body mechanisms. It returns raised plasma levels of triglycerides, uric acid and cholesterol towards normality. 'Atromid' also acts favourably on certain abnormal thrombotic mechanisms.

'Atromid' is the first product to influence abnormal lipid levels and mechanisms of thrombosis at one and the same time. 'Atromid' could make a significant contribution to resolving the problem of cardiovascular disease.

CLINICAL EXPERIENCE

Over 1,500 patients have now been treated for periods from a few weeks to two years. In the great majority of cases, serum triglycerides, serum cholesterol and serum uric acid levels return to normal or near normal.

INDICATIONS AND DOSAGE

'Atromid' is indicated in those patients who are considered to carry an enhanced risk of developing coronary artery disease, namely those patients who exhibit raised serum lipid levels as in Atherosclerosis and its sequelae, cerebral vascular disease, and familial hypercholesterolaemia.

The average daily dosage is 8 capsules. 'Atromid' is given in divided doses administered after meals, e.g. 3 capsules after breakfast, with 2 capsules after the midday meal and 3 capsules after the evening meal.

'Diconal' Tablets for relief of intractable pain

'Diconal' Tablets provide analgesia comparable with that produced by morphine. They are therefore of great value in carcinoma. Because the tablets are given by mouth and not by injection, the patient can be kept oblivious of the fact that his condition calls for so potent an analgesic.

'Diconal' Tablets contain dipipanone and cyclizine. Dipipanone relieves severe pain, while cyclizine appreciably reduces the incidence of nausea and vomiting, even in patients new to this type of therapy.

'Diconal' Tablets are:

-  **Of high value in relief of pain due to neoplastic disease, and other conditions where narcotic drugs would be employed.**
-  **A balanced formulation which permits flexibility in dosage, according to the needs of each patient.**
-  **Often effective in morphine- and pethidine-resistant cases.**

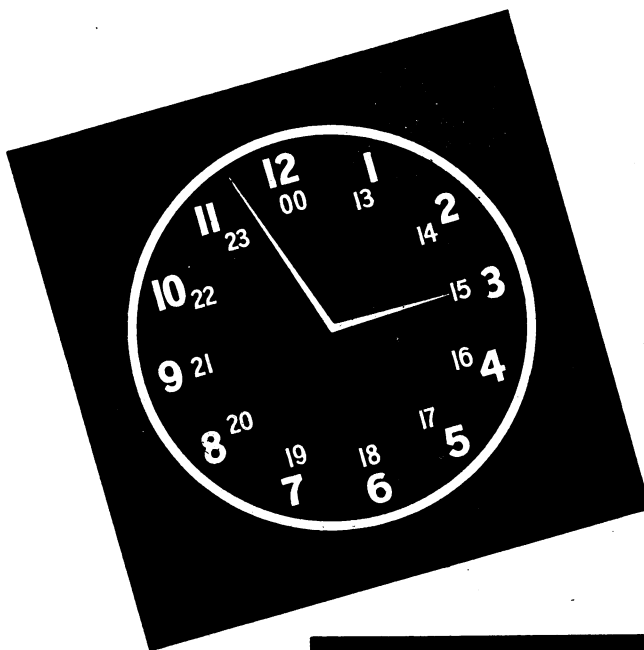

'Diconal' Tablets are subject to the D.D.A.

Each tablet contains dipipanone hydrochloride, B.P.C. 10 mgm., and cyclizine hydrochloride, B.P.C. 30 mgm. Coloured red and scored for easy division.

ALDOMET

METHYLDOPA

DAY AND NIGHT CONTROL OF HYPERTENSION

ALDOMET (methyldopa) usually reduces blood pressure whether the patient is standing, sitting or lying. Symptoms of postural hypotension are fewer and less severe than is the case with other effective antihypertensive agents. Diurnal blood pressure fluctuations and exertional hypotension rarely occur.

ALDOMET is simple to use, and the incidence of side effects has been relatively low.

These attributes have been repeatedly confirmed in published clinical work throughout the world. Already seven major papers have appeared in British journals, together with leading articles, annotations and other editorial comment, all endorsing the value of ALDOMET.

ALDOMET is supplied as yellow, film-coated tablets containing 250 mg. methyldopa. Detailed information on indications, dosage, administration, precautions and the extensive bibliography is available on request.

ARE YOUR HYPERTENSIVES PLAGUED BY **DEPRESSION ?**

Presented are notes from three clinical studies. Harmonyyl was used as sole agent of therapy by 343 mixed hypertensives, and patients with mild functional/psychiatric disorders. Only eight reported mild depression concurrent with therapy—an incidence of 2.33%.

Study No. 1. Two hundred and eighty-three patients treated in private practice, at hospital outpatient clinics, and in office psychiatric practice. Average initial dosage of Harmonyyl was 0.1 mg. to 0.25 mg. three or four times daily. No patient received more than 6 mg. daily. Eight reports of mild depression.

Study No. 2. Eighty patients with benign essential hypertension were studied via 'double-blind' method. Mean daily dosage of Harmonyyl was 0.25 mg., with a minimum dosage of 0.1 mg. and a maximum of 0.5 mg. daily. No reports of depression in the group of 20 on Harmonyyl therapy.

Study No. 3. Forty patients with hypertension and anxiety neurosis . . . from mild to moderately severe. Half of the group had received other anti-hypertensive agents at one time or another; these were discontinued before and throughout the study. Usual dosage of Harmonyyl was 0.1 mg. three times daily after meals. Sometimes an additional dose was taken at bedtime. No reports of depression associated with this therapy. Other investigators have found so little indication of depression with Harmonyyl therapy that they do not record it as a significant side-effect.

CRYSTAPEN G

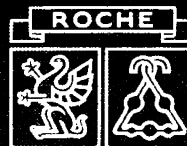

INJECTION · TABLETS · SYRUP

Despite the very many antibiotics now available penicillin G remains the first choice for the treatment of the majority of acute septic infections. It is generally agreed that other substances are used only if bacteriological or other factors indicate specific need or if the administration of penicillin G in full dosage fails to produce response. The early treatment of boils, carbuncles, abscesses and other soft tissue infections is essential if treatment is to be effective. Crystapen (soluble sodium penicillin G Glaxo) with its rapid bactericidal action, is a logical first choice for the treatment of such conditions. It is also cheap to use and frequently costs only a quarter as much as alternative antibiotics.

Microscopical examination of Minadex emulsion

The growing demand for Minadex has had a tonic effect on its production. An ultra modern stainless steel plant, remote-controlled, now produces a record quantity of this most widely used vitamin-mineral syrup. Much of the popularity of Minadex is due to the quality of its emulsion of vitamins A and D. To maintain the standard, every batch is examined for globule size which, for acceptance, must not exceed 3 microns in diameter. Streamlined methods of manufacture and some thirty years experience of vitamin production are reasons why Minadex can still be sold at its pre-war price. The same experience, care and control which goes into the production of Minadex is behind every one of the vitamin preparations made by Glaxo.

Come, fill the case...

Breadless, wineless, sadly songless in an unpoetic wilderness known as "the dog house". Such poetic justice may well descend upon that dream-filled head of yours. For if you scatter your quatrains to the four corners of the living-room, don't feign surprise when you're hauled onto the carpet—Persian or otherwise—and faced with a wife waxing anything but lyrical. The gist of her few-thousand-word sermon being: "The proper place for books is a bookcase". Who can deny it?

Minty have specialised for years in making superb bookcases that house your many-splendoured books in dust-free distinction behind very elegant sliding glass doors. Easy on the eye—and the pocket—they allow you to go your merry way reading books, buying books—for Minty bookcases are *sectional* and may be started for as little as £12.19.0—on deferred terms if you prefer.

Only at the Minty Centres shown below can you see and buy Minty bookcases (and furniture). The Centres are so placed that Minty furniture is within reasonably easy reach of most people. If, however, for any reason you can't call, Minty will be glad to send you a catalogue and particulars of post ordering. Write to Dept. B.27, Minty Ltd., 44-45 High Street, Oxford.

THE FAMILY CAR THAT WINS RALLIES!

"Basically, these snub-nosed, three cylinder two-stroke machines are extremely strong, aerodynamically correct fuselages, rather than products of the stylist. The engine, even smaller than that of the Mini-Minor, produces 42 b.h.p., but drives conventional-sized wheels from the front of the car, which is a roomy four-seater. First impressions are of solid construction, doors that close precisely, smoothly finished paintwork, and a saloon properly equipped for all-the-year-round motoring."

The Times, Feb. 5, 1963.

SOME OF SAAB'S SPECIAL FEATURES

MEDICAL OFFICER

Applications are invited for a full-time appointment in the medical services of a Unilever Company operating in Commonwealth West Africa. Candidates should preferably be not more than 35 years of age, and should have had good experience since qualifying.

The scope of the work done by the Company's medical services varies from place to place in West Africa, but in general may be said to cover the health supervision of working communities and their dependants. In many cases this involves taking charge of a small hospital. There is also considerable opportunity for the practice of preventive medicine, public health, and industrial medicine in the widest sense.

While each doctor is administratively responsible to his local manager, his professional links are with the Assistant Principal Medical Adviser, Unilever Limited, to whom applications should be made at Unilever House, Blackfriars, London E.C.4, where the appointment will be made following a personal interview.

The starting salary, with allowances for overseas service, will not be less than £3,000 per annum, and in accordance with age, qualifications, and experience. The length of tour in West Africa is approximately 18 months, followed by generous leave on full pay. There is a contributory pension fund, mid-tour passages are arranged, and education allowances paid for children under education in the United Kingdom.

Those preferring a short-term appointment for 18 months with similar terms of service will also be considered. (5006)

NUFFIELD FOUNDATION DOMINION TRAVELLING FELLOWSHIPS

The Nuffield Foundation offers a Travelling Fellowship in Medicine to nationals of New Zealand, preferably between the ages of 25 and 35 years. The purpose is to enable medically qualified persons to obtain in the United Kingdom such postgraduate training and experience as may be necessary to prepare them to undertake medical teaching and research work in New Zealand. Applicants should possess high intellectual and personal qualities. A Fellow will be required to carry out at an approved institution a programme of work and training approved by the Nuffield Foundation. A Fellow will not be permitted to prepare for or to take examinations for higher degrees or diplomas awarded by bodies in the United Kingdom.

The Fellowships are normally tenable for one year and provide for return travelling for the Fellow and, if he is married, for his wife. The total value of an award, including travelling expenses, varies with the needs and family responsibility of the holder, but will in no case be less than £1,670.

Applications for Fellowships, to begin in 1963, should be submitted not later than April 30, 1963, to the undersigned. Copies of the conditions and forms of application are also available at the Nuffield Foundation, Nuffield Lodge, Regent's Park, London, N.W.1.—R. J. Corbett, Department of Chemistry, University of Otago, Dunedin, New Zealand.
