The importance of simplicity in the treatment of diabetes

The diabetic is condemned to a life-time of medication to control his condition.

In few other conditions is simplicity and ease of administration so important.

The introduction of the sulphonylureas eight years ago relieved one group of diabetics from the burden of daily injections. The extensive use of Rastinon in oral antidiabetic therapy for over two million patients has shown that it is not only one of the safest drugs available, but also one of the

most effective in controlling diabetes when the condition is

first discovered at middle age. Rastinon is the standard oral treatment of diabetes, and it is remarkable for its

safety, simplicity, economy and effectiveness.

DIPLOMA IN PSYCHIATRY

The curriculum of instruction for the Diploma in Psychiatry is divided into two parts: (a) Part I; a part-time Course is given on one and a half days a week throughout the academic year; and (b) Part II; a full-time six months' Course in Psychiatry and Neurology. Fees, Part I £35, Part II £65.

The Courses are integrated with the South-East Regional Hospital Board Training Scheme for Psychiatrists. Honorary appointments can be arranged whereby candidates from other Regions and Overseas may obtain the requisite clinical experience.

DIPLOMA IN PUBLIC HEALTH

The curriculum of instruction for the Diploma in Public Health extends over a period of nine months. Fee, £90.

DIPLOMA IN MEDICAL RADIODIAGNOSIS (D.M.R.D.)

DIPLOMA IN MEDICAL RADIOTHERAPY (D.M.R.T.)

The curriculum of instruction in Medical Radiodagnosis and Medical Radiotherapy extends over a period of two years. In connection with these courses, there is available a limited number of S.H.O. appointments tenable for two years. Fee, £90.

DIPLOMA IN TROPICAL MEDICINE AND HYGIENE

The curriculum of instruction for the Diploma in Tropical Medicine and Hygiene is divided into two parts: (a) Primary Course of three months' duration, and (b) Secondary Course, also of three months' duration. Candidates who have passed the examination at the end of the first period may interrupt their course and take the second part at a later date. Fee, £75.

DIPLOMA IN MEDICAL SERVICES ADMINISTRATION

The curriculum of instruction for the Diploma in Medical Services Administration extends over a period of nine months. The Course is open to medical graduates and to suitably qualified non-medical graduates. Previous experience of health services administration though desirable is not a necessary prerequisite for admission. Fee, £90.

PH.D. AND M.SC. DEGREES

The University provides facilities for suitably qualified graduates from Great Britain and other countries to study for the Ph.D. and M.Sc. Degrees. Fee, £60 per annum without laboratory facilities and £75 per annum with such facilities.

The above courses which are full-time (with the exception of the Diploma in Psychiatry, Part I) commence in October of each year and application for admission should be made on the prescribed form to the Dean of the Faculty of Medicine, University Medical School, Teviot Place, Edinburgh 8, by 30th April. Copy of the Faculty Programme giving full particulars of the Regulations, etc., may be obtained on application to the Dean of the Faculty of Medicine.

The foregoing fees include Matriculation, Tuition and Appearance for one diet of examination. In addition there is a composite fee of £6 in respect of University Unions, Refectories and other Amenities.

GENERAL COURSES :

MEDICINE

Internal Medicine—Courses lasting for twelve weeks, suitable for graduates desiring a refresher course or to specialise in medicine, are held twice a year, commencing late March and late September. These courses consist of 320 hours' instruction, comprising lectures, clinical demonstrations and ward visits, Fee, £38.

Additional subsidiary courses in clinical paediatrics, tropical medicine, clinical chemistry, and radiology are arranged in conjunction with the Internal Medicine Course. There is an additional fee and the numbers are limited.

Clinical Medicine—A nine-weeks' Clinical Course is held once a year, commencing early July. The period of instruction is two hours each morning and the teaching is given in the various medical units in the Edinburgh area. The course is only for those graduates who have already enrolled on the Internal Medicine Course. Fee, £18.

An additional four-weeks' Clinical Course is held February/March at Bangour Hospital, West Lothian, comprising demonstrations, discussion seminars and ward work, and covering the field of general medicine. The number is limited and accommodation is available in the hospital. Fee £16.

Hill Pattison-Struthers Bursaries—The Royal College of Physicians of Edinburgh awards two Hill Pattison-Struthers Bursaries each year to graduates attending the Internal Medicine Course. Each bursary amounts to £100. Applications must be submitted to the Secretary, Royal College of Physicians of Edinburgh, 9 Queen Street, Edinburgh, 2.

BASIC SCIENCES

A twelve-weeks' course in Applied Anatomy, Physiology, Pathology, Bacteriology and Biochemistry is held twice each year, commencing early January and late September. This course includes practical instruction. Fee, £38.

Under exceptional circumstances, students may be permitted to take this course of study over a period of six months.

Basic Sciences (Dental)—Arrangements are made for dental practitioners proceeding to the Primary Dental Examination to attend the Course in Basic Sciences, with special dental lectures, over the period of six months from September to March.

SURGERY

Surgery—A twelve-weeks' course of post-graduate surgery suitable to surgeons requiring a refresher course in the current outlook on surgery, or for graduates preparing to specialise in surgery, is held twice a year, commencing February and late September. The programme has been arranged to provide co-ordinated clinical and systematic instruction in general surgical wards and specialised surgical units in Edinburgh. Fee, £38.

Surgical Pathology and Operative Surgery—A nine-weeks' course of lectures and demonstrations in Surgical Pathology and Operative Surgery organised by the Royal College of Surgeons of Edinburgh in collaboration with the Board will be held from mid-July each year. This course is suitable for those proceeding to the Final Fellowship Examination. Fee, £31 10/-.

CLINICAL ATTACHMENTS

Arrangements are made for members of the classes in Internal Medicine and General Surgery who desire to continue their studies to be attached to clinical units in the teaching hospitals in the Edinburgh area for a period of three months. Interviews are arranged towards the end of each course.

Members of these classes desiring to have more intensive clinical experience over three-month periods can apply for attachment to clinical units in selected hospitals outside Edinburgh. The applicants must be registered practitioners and members of the Defence Union, and arrangements are made individually on application to the Director. Fee, £8.

GENERAL PRACTICE

Refresher courses for general practitioners are held twice each year, commencing early May and mid-September, and lasting for two weeks. Fee for graduates not claiming expenses from Government source, 10 guineas.

A one-week course in Psychological Medicine for general practitioners will be held during May.

SPECIAL COURSES 1963-64

Short intensive courses for consultants and specialists are arranged and the numbers attending are limited. During the forthcoming session the following courses will be held:

Gastroenterology—Early April. One-week course to be held in the Western General Hospital, Edinburgh, and conducted by the joint medical and surgical staffs of the Gastrointestinal Unit. Designed for both physicians and surgeons, preferably those who already hold a higher diploma. Fee, £15.

Replacement Surgery—April. Advanced course dealing with the principles and problems of replacing tissues and organs by transplanting and other techniques. To be conducted by Professor M. F. A. Woodruff and members of staff. Fee, £15.

Applications for enrolment should be addressed to the Director of Post-Graduate Studies, Surgeons' Hall, Edinburgh, 8.

This course, which is suitable for Consultants in the Health Service, will be held during September, 1963. Duration, 2 weeks. Fee still to be decided.

REFRESHER COURSE FOR GENERAL PRACTITIONERS

Refresher Courses for general practitioners, comprising lectures, clinics and demonstrations, are held in June each year. Fee for graduates not claiming expenses from Government source, 10 guineas. Duration, 2 weeks.

Further particulars of these courses can be obtained from the Convener of Post-graduate Studies, Faculty of Medicine Office, Queen's College, Dundee.

ABERDEEN UNIVERSITY
POST-GRADUATE COURSES

The University is eager to encourage suitably qualified graduates from Britain and other countries to undertake advanced study and research in its various departments, for which purpose endowments may be available.

PH.D. AND M.S.C. DEGREES

Suitably qualified graduates may study for the Degrees of Ph.D. and M.Sc. For each degree there is a supervision fee of £60 per session and a Laboratory fee (where applicable) of £15 per session.

Candidates for the Ph.D. must normally pursue a course of study and research for at least 9 academic terms and for the M.Sc. a minimum period of study for 12 months is required.

SOCIAL MEDICINE (PUBLIC HEALTH) FOR THE DIPLOMA IN PUBLIC HEALTH (D.P.H.)

The curriculum for the Diploma in Public Health of the University of Aberdeen commences in October of each year and extends over one of the following periods either—

- (a) an academic year of whole-time study covering a period of not less than three academic terms or
- (b) not less than eighteen months of part-time study equivalent to the above or
- (c) a combination of a period of whole-time study and a period of part-time study covering not less than fifteen calendar months equivalent to (a) above.

All candidates must be whole-time students unless in part-time employment which is approved by the University. Fee, £75.

BIOLOGICAL EFFECTS OF RADIATION, RADIATION HAZARDS, AND THE USE OF RADIO-ACTIVE MATERIAL

This course of some 20 lectures with laboratory work is conducted between October and December. Fee, 20 guineas.

POST-GRADUATE REFRESHER COURSES

These are held in the second and third weeks in May and in the second and third weeks in September each year. They consist of some 42 meetings (from 9.0 to 5.0 p.m. each day) comprising clinical lectures, demonstrations and the examination of patients. Fee, 10 guineas.

SUNDAY MORNING COURSES

These are held in November and December and again in April and May, every two weeks, from 10.30-12.30 p.m. and comprise clinical lectures, demonstrations and the examination of patients. Fee, 8 guineas.

POST-GRADUATE COURSES IN STATISTICAL THEORY and in the application of statistical methods of particular interest in medicine may be arranged according to the needs of applicants: about 4 hours of lectures per week for one or two or three terms.

POST-GRADUATE COURSE IN PSYCHIATRY, 3 hours weekly during 3 terms.

POST-GRADUATE COURSE IN PSYCHOLOGY, 2 hours weekly during 3 terms.

Further particulars of these courses can be obtained from the Dean of the Faculty of Medicine, The University, Aberdeen.

Psoriasis

All the time fresh evidence is received of Alphosyl's effectiveness in cases of psoriasis, even in those which have defied other treatment for years.

Excellent clinical trials. In a recent controlled study¹ of 62 cases of psoriatic lesions, 29 were completely cleared after use of Alphosyl and altogether 55 cases obtained between 75 per cent and 100 per cent clearance. In no case was the condition less than 50 per cent cleared.

Patients observed included those with total scalp-to-toe psoriasis, psoriasis of many years' duration, psoriasis involving tender areas and psoriasis refractory to all previous treatment.

These results confirm others obtained under comparable conditions.

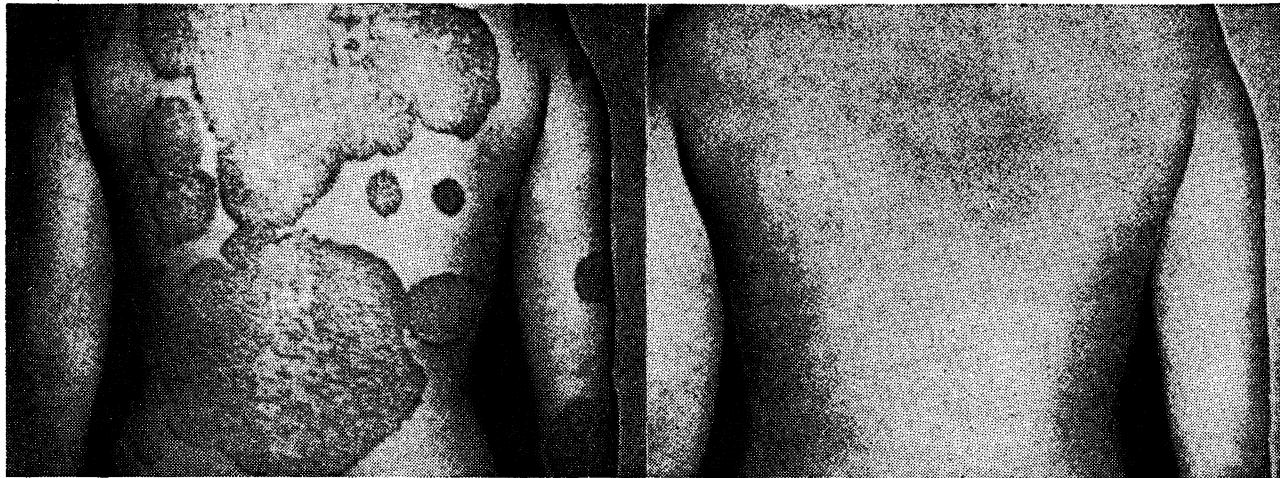

Why Alphosyl is so successful. In Alphosyl allantoin and a special refined coal tar extract are presented together for the first time. Allantoin has been found to be particularly effective in loosening psoriatic scales,² while the keratoplastic effect of coal tar is well known.² Alphosyl is non-greasy and non-staining and vanishes on application.

Freedom from side effects. Alphosyl is notably safe,^{2,3} being free from the risks which are found in other forms of treatment such as arsenicals, mercury, corticosteroids, X-ray, etc. It certainly deserves a trial in all cases of psoriasis, for which it is so widely prescribed.

In practice,
patients do
seem to get
better quicker
with **BROXIL**

and there are facts which could explain this. For one thing, Broxil, compared with oral penicillin V, has a very high absorption rate² and gives very high tissue levels. It is therefore quickly and effectively bactericidal at the site of infection.

Broxil is also bactericidal to some penicillin G and V resistant taphylococci³, which of course means greater certainty in therapy.

it is not surprising that these advantages produce measurable advances in clinical efficiency. For example, it has been possible to count in days the saving of recovery time achieved by using Broxil in upper respiratory tract infections¹, while many physicians have recorded its effectiveness in other indications.^{4,5,6,7,8}

METHRAL*

brand of fluperolone acetate

*Trade Mark

CONVENIENT

The quality that singles out Methral from other topical steroids is not so much its anti-inflammatory activity; this is indeed impressive, but what really distinguishes Methral is its speed of onset of action in pruritus. In this respect, it is superior to hydrocortisone. Moreover, in terms of reducing erythema, size of lesion and exudate formation, Methral achieves an outstanding security of response. It is this speed of action, this security of response, that thrusts Methral to the very forefront of today's topical steroids.

'... clinical evidence demonstrates that the fluperolone [Methral] relieves pruritus more rapidly than hydrocortisone, and has a quicker onset of action.'¹

THIAVER

a new Riker antihypertensive

THIAVER

with great potential
in general practice

Thiaver is particularly valuable in general practice for that large group of hypertensive patients who are not adequately controlled by milder agents and their combinations. *Thiaver* provides an alternative to adrenergic or ganglion-blocking agents whose use is often limited by the side-effects they produce.

Potent yet suitable for prolonged use *Thiaver* combines the hypotensive properties of *Veriloid*, one of the few effective centrally-acting antihypertensives, with those of epithiazide, a new potent diuretic/hypotensive, to provide smooth but positive control of blood pressure with gradual onset of effect. Outstanding advantages of *Thiaver* are that it does not cause postural hypotension nor does tolerance develop.

Very simple dosage Treatment with *Thiaver* is free from the need for frequent and critical dosage adjustment. Satisfactory control of blood pressure is obtained in most patients with two or three tablets daily.

Each tablet contains *Veriloid* (standardised alkaloids of *Veratrum viride*) 4 mg. and epithiazide 4 mg.

AN ATLAS OF ELECTROCARDIOGRAPHY

H. ROESLER and E. FLETCHER

708 pages. 400 illustrations. Price £7 7s., post 2s. 9d.

The authors believe that a useful knowledge of clinical electrocardiography can only be acquired by the critical analysis of a large number of tracings correlated with clinical and pathological data. Therefore they have written this book for those physicians who wish to acquire such a knowledge. The reader who is already familiar with the elementary basis of electrocardiography is likely to benefit most.

The sections dealing with angina pectoris and myocardial infarction are the most important part of the book, and anyone who employs the electrocardiogram for the clinical assessment of his patient will find much of interest in the sections dealing with internal disease when the heart may not be primarily involved.

Brain Function and Metabolic DisordersBy **Barry Wyke, M.B., B.S.**

242 pages Illus. 1963 50s.

This is the first systematic study of the effects upon brain function of changes in hydrogen ion concentration. The neurological effects of these alterations have assumed a considerable practical importance in contemporary clinical medicine, surgery and anaesthesia, and this book does much to determine the validity of the traditional assumptions concerning this relationship, and at the same time provides more precise information for application to the problems presented by the metabolic disorders now encountered so frequently in medical and surgical practice.

Compendium of EmergenciesEdited by **H. Gardiner-Hill, M.B.E., M.D., F.R.C.P.**

336 pages Coming Shortly 55s.

The moral support and advice of a specialist have been missed by many general physicians and surgeons as well as by doctors with practices far afield. *Compendium of Emergencies* is written by a team of specialists providing authoritative opinions on how to handle emergencies in their respective fields. This concise and ready reference will enable them to cover the dangerous gap between emergency and orthodox treatment.

174 pages Illus. 1962 30s.

"... an admirable aid for the innocent practitioner caught up in the toils of litigation."—*Medical News*.

"... should be of real help... in a most difficult by-road of the medical profession."—*Law Journal*.

Fat EmbolismBy **Simon Sevitt, M.D., M.Sc., M.A., F.R.C.P.I., D.P.H.**

233 pages Illus. 1962 60s.

To mark the centenary of the original papers on Fat Embolism by Zenker and Wagner, Simon Sevitt has written the first book in the English language to give a comprehensive account of the subject. Dr. Sevitt's easy writing style combines with his exceptional knowledge to make this a book which will appeal to all pathologists, general and orthopaedic surgeons, and post-graduate students in pathology and surgery, while neurologists, neurosurgeons and neuropathologists will find much of interest in the sections on cerebral fat embolism.

Handbook of Medical Laboratory FormulaeBy **R. E. Silvertown, A.I.M.L.T., F.R.M.S., and M. J. Anderson, F.I.M.L.T.**

676 pages 1961 90s.

A complete handbook of medical laboratory formulae designed to give full details of the preparation and control of reagents and solutions, many of which are merely alluded to in textbooks devoted to technique. Used as a reference book, it will help medical laboratory personnel to find required formulae without having to consult numerous textbooks and journals.

The Incubation Period of Coronary ThrombosisBy **G. R. Osborn, M.B., B.S.(Melbourne), M.R.C.P.**

190 pages Illus. 1963 55s.

Dr. Osborn has examined many thousands of histological sections in an effort to trace the development of changes in the coronary arteries from birth to the grave. From these he has assembled evidence that signs indicating the possibility of coronary pathology later in life are present as early as infancy and childhood. Seldom does a single book lead to a complete reorientation of thought on a problem, but this work is certain to arouse controversy, and may well motivate considerable progress in the mystery of coronary disease.

Pathology of Tumours—Third EditionBy **R. A. Willis, D.Sc., M.D., F.R.C.P.**

1,002 pages Illus. 1960 105s.

Professor Willis has revised his famous book throughout, presenting in this third edition a complete and lucid picture of tumour pathology. The book will be of great value to surgeons and pathologists and will serve as a guide and work of reference to all members of the medical profession.

A Primer of Medicine—Second EditionBy **M. H. Pappworth, M.D., M.R.C.P.**

292 pages Illus. 1963 32s. 6d.

The great success of its predecessor has called for the appearance of this second edition after only three years, and the author, who has an international reputation as a teacher of clinical medicine, has brought it completely up to date and rewritten much of the text.

Progress in Medical Laboratory Technique—2Edited by **F. J. Baker, F.I.M.L.T., F.I.S.T., F.R.M.S.**

191 pages Illus. 1963 35s.

Following the enthusiastic reception accorded the first volume in this series, *Progress in Medical Laboratory Technique—2* contains ten papers reviewing those recent advances which will be of particular use in routine hospital laboratories. Laboratory technicians, pathologists and all interested in the laboratory diagnosis of disease will derive great benefit from studying the methods used by experienced senior technicians.

Radiation and Radiomimetic ChemicalsBy **L. A. Elson, D.Sc., Ph.D., D.L.C., F.R.I.C., M.I.Biol.**

124 pages Coming Shortly 25s.

This work defines radiomimetic substances, the types of chemical available and the way in which they act, and then compares in detail their physiological effects with those of radiation. Radiobiologists, radiotherapists and all interested in cancer research will find this a topical and instructive study.

**AN ORAL DIURETIC
OF HIGH POTENCY,
LONG DURATION
OF ACTION, AND
LOW TOXICITY**

Enduron is the Abbott trade mark for methyclothiazide, a new oral diuretic agent. Chemically, Enduron is a member of the thiazide family of diuretics.

The predominant effects of Enduron are diuresis, natruresis, and chloruresis. Serum potassium levels are little affected. Although the excretion of sodium is greatly enhanced, the excretion of potassium is not increased proportionally. Consequently, potassium depletion infrequently presents a problem in patients treated with Enduron. Clinically Enduron offers several important advantages when compared with the older thiazides: Enduron is highly potent; 10 mg. produce as great a natruresis as the peak effect of any available thiazide. Enduron has a duration of effect of at least 24 hours—longer than most thiazides—affording satisfactory therapy with one dose daily.

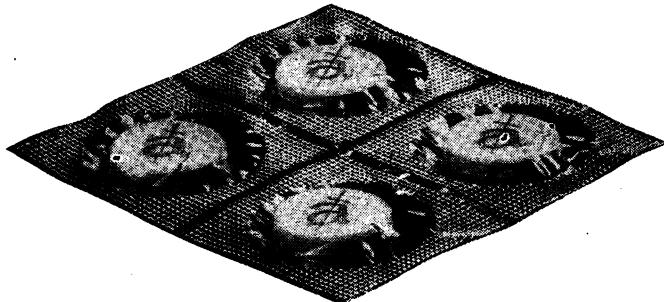

Enduron leads to greater sodium excretion per unit of potassium excreted and to less total potassium loss than many other thiazides.

2.5 mg. Enduron tablets are available in bottles of 25 and 100. 5 mg. Enduron tablets also in bottles of 25 and 100. Basic NHS prices 3/9 and 6/9 per 25.

Despite the very many antibiotics now available penicillin G remains the first choice for the treatment of the majority of acute septic infections. It is generally agreed that other substances are used only if bacteriological or other factors indicate specific need or if the administration of penicillin G in full dosage fails to produce response.

The early treatment of boils, carbuncles, abscesses and other soft tissue infections is essential if treatment is to be effective. Crystapen (soluble sodium penicillin G Glaxo) with its rapid bactericidal action, is a logical first choice for the treatment of such conditions. It is also cheap to use and frequently costs only a quarter as much as alternative antibiotics.

The name Crystapen is a Glaxo trade mark

NATURAL ACTION BULK LAXATIVE

DEFICIENT intestinal bulk is one of the main causes of constipation. In such cases Andrews is particularly useful. It swells the bowel content by osmosis and stimulates peristalsis. In this perfectly natural way, Andrews induces a mild aperient action that does not irritate the intestine.

Andrews relieves constipation arising from decreased food intake during illness or restricted diet. It is also mildly antacid and relieves gastric discomfort; it helps to check biliousness and sick headaches. Andrews is readily acceptable because of its pleasant taste and refreshing effervescence.

GOOD GENERAL PRACTICE

The Booklet, 'A Career for Doctors in the R.A.M.C.', may be obtained from The Director General, Army Medical Services, The War Office (HNR/6/C), London S.W.1. Tel: GRO 8040. Ext. 740.

In the Royal Army Medical Corps you can practise medicine in very good conditions. Well-equipped surgeries with medical assistants are provided, allowing you to do your best work and devote more time to the care of your patients. There is great scope for the family doctor, particularly overseas, as the Royal Army Medical Corps looks after a very large number of women and children.

Great importance is attached to post-graduate study, and, during their service, permanent officers are given the opportunity of sitting for diplomas, such as D.C.H., D.Obst.R.C.O.G.

There is a large and comprehensive hospital service, consisting of thirty military hospitals at home and overseas, with consultant opinion readily available to you. As a general practitioner, you are welcomed in the hospital to consult with your brother officers and follow up your cases.

Married quarters are provided, and you can count on regular off-duty periods with opportunities for games and social activities; there is generous annual leave on full pay without the trouble or expense of finding a locum.

FULLY REGISTERED PRACTITIONERS may apply for permanent or short service commissions. Minimum entry salary £2,000 p.a. Credit is given for previous experience and there are good opportunities for specialist training and rising to consultant rank. Consultants may earn from £4,000 to £5,000 p.a. depending on seniority. Suitable officers may be given employment to the age of 65. For all officers holding permanent commissions there is a non-contributory pension scheme. **DOCTORS IN PRE-REGISTRATION YEAR** are also eligible for commissions. Board and lodging is free; salary £875 p.a. or £1,050 p.a. if over age 25.

THE ABOVE SALARY SCALES INCLUDE MARRIAGE ALLOWANCE

MEDICAL STUDENTS are eligible for cadetships. Salary £950 p.a. for single men, and for married men under 25.

SERVICES**A PRACTICE AS WIDE AS THE WORLD**

In the Medical Branch of the Royal Air Force you gain wide clinical experience. You travel the world and among the subjects with which you will become familiar are tropical medicine, rescue operations, the care of airborne patients and medicine in relation to flying. You will also be expected to contribute to research.

As Medical Officer on a Royal Air Force Station you have a vigorous general practice among the officers, men and their families. You enjoy complete clinical freedom in charge of sick quarters with your own beds, and you will be assisted by a well-trained nursing and clerical staff. You and your family can live comfortably and near your surgery.

Your salary and career prospects are good: as a married man drawing full allowances you could receive £2,000 per year on entry. If you have post-graduate civilian experience you could be granted up to seven years back-dated seniority. Pensionable career commissions or short service engagements entitling you to a generous tax-free gratuity on completion are still available to the right applicants.

GRADUATES AND MEDICAL STUDENTS

If you are a pre-registration year graduate or a senior medical student you may apply for a commissioned cadetship. This will enable you to finish your pre-registration house jobs or medical training as an officer in the R.A.F. drawing full pay and allowances. On completion you will serve on a long or short service engagement in the Medical Branch of the Service.

For details of entry to the Royal Air Force as a registered doctor, a graduate or a medical student, write to the Director-General of Medical Services, Air Ministry (M.A.1.) HN53B), 1 Tavistock Square, London, WC1.

SCHOLARSHIPS

THE NUFFIELD FOUNDATION

SCHOLARSHIPS IN FOOD SCIENCE

The Nuffield Foundation, with the aim of helping to advance fundamental research in food science, is prepared to offer annually up to five research scholarships for science graduates and up to three research scholarships for medical or veterinary graduates. The Foundation hopes these awards will be helpful in attracting more people to make a career in the field of food science research. The awards, tenable for periods of up to four years, are intended to provide suitable graduates with research experience to Ph.D. level, together with some formal training in selected subjects. The choice of subjects for study and research will be related to a candidate's background and interests, with special reference to toxicology, pharmacology or pathology. The value of the awards, which will be fixed according to age, qualifications and experience, should make them of considerable interest. The awards can be supplemented by the amount of fees, marriage and child allowances, and, in appropriate cases, research expenses. The scholarships are open to men and women holding a science, medical or veterinary degree of a U.K. or other Commonwealth university.

Applications may be submitted by July 1, 1963. Further particulars and forms of application are available from the Director, The Nuffield Foundation, Nuffield Lodge, Regent's Park, N.W.1. (6485)
