**AN ORAL DIURETIC
OF HIGH POTENCY,
LONG DURATION
OF ACTION, AND
LOW TOXICITY**

Enduron is the Abbott trade mark for methyclothiazide, a new oral diuretic agent. Chemically, Enduron is a member of the thiazide family of diuretics.

The predominant effects of Enduron are diuresis, natruresis, and chloruresis. Serum potassium levels are little affected. Although the excretion of sodium is greatly enhanced, the excretion of potassium is not increased proportionally. Consequently, potassium depletion infrequently presents a problem in patients treated with Enduron. Clinically Enduron offers several important advantages when compared with the older thiazides: Enduron is highly potent; 10 mg. produce as great a natruresis as the peak effect of any available thiazide. Enduron has a duration of effect of at least 24 hours—longer than most thiazides—affording satisfactory therapy with one dose daily.

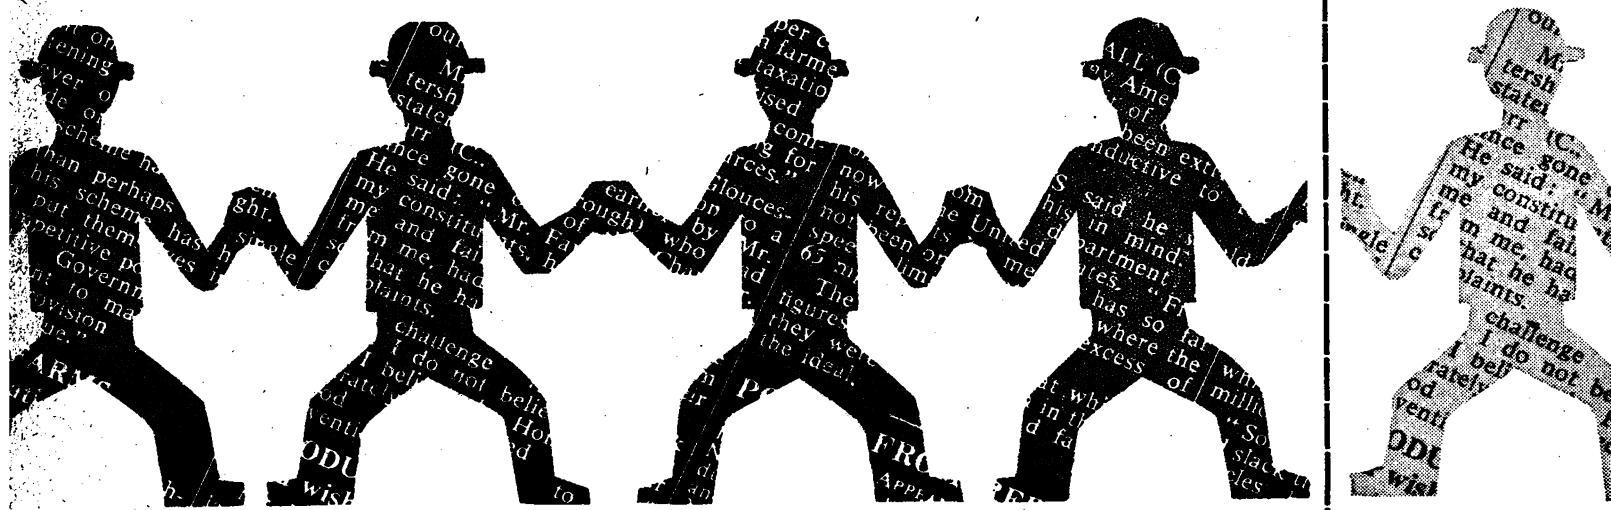

Enduron leads to greater sodium excretion per unit of potassium excreted and to less total potassium loss than many other thiazides.

2.5 mg. Enduron tablets are available in bottles of 25 and 100. 5 mg. Enduron tablets also in bottles of 25 and 100. Basic NHS prices 3/9 and 6/9 per 25.

Psoriasis

All the time fresh evidence is received of Alphosyl's effectiveness in cases of psoriasis, even in those which have defied other treatment for years.

Excellent clinical trials. In a recent controlled study¹ of 62 cases of psoriatic lesions, 29 were completely cleared after use of Alphosyl and altogether 55 cases obtained between 75 per cent and 100 per cent clearance. In no case was the condition less than 50 per cent cleared.

Patients observed included those with total scalp-to-toe psoriasis, psoriasis of many years' duration, psoriasis involving tender areas and psoriasis refractory to all previous treatment.

These results confirm others obtained under comparable conditions.

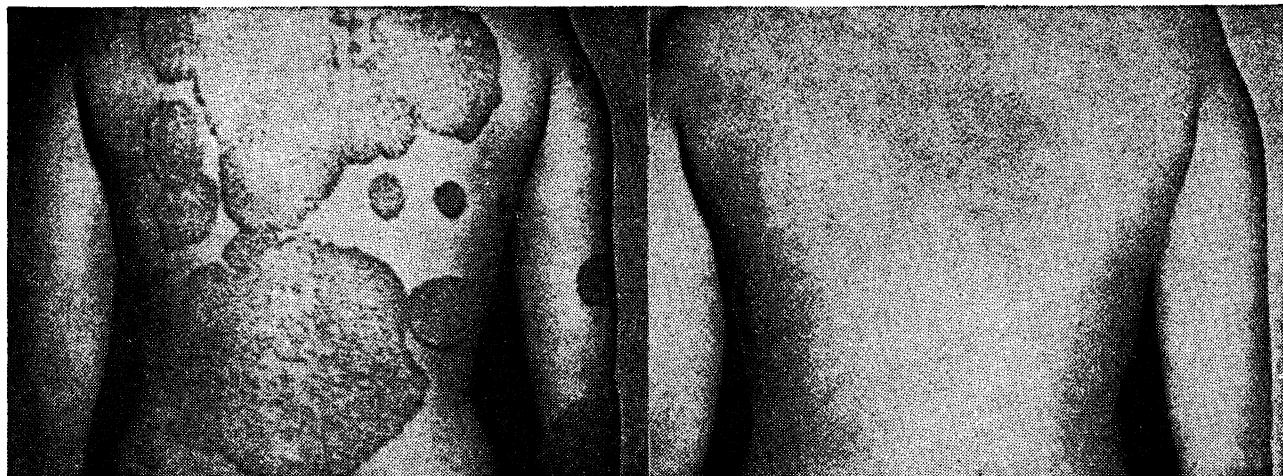

Why Alphosyl is so successful. In Alphosyl allantoin and a special refined coal tar extract are presented together for the first time. Allantoin has been found to be particularly effective in loosening psoriatic scales,² while the keratoplastic effect of coal tar is well known.² Alphosyl is non-greasy and non-staining and vanishes on application.

Freedom from side effects. Alphosyl is notably safe,²⁻³ being free from the risks which are found in other forms of treatment such as arsenicals, mercury, corticosteroids, X-ray, etc. It certainly deserves a trial in all cases of psoriasis, for which it is so widely prescribed.

The anti-inflammatory steroid which has proved so successful in the treatment of asthma is also highly effective in cases of severe hay fever. Betamethasone, with its high potency, is well suited where systemic treatment is indicated in severe attacks. A few days' treatment will usually control the condition rapidly but the continued local application of a spray may also be indicated.

Betamethasone is available in two forms—the alcohol (Betnelan tablets) and the phosphate (Betnesol tablets). Betnesol tablets are effervescent and dissolve completely in water providing a palatable solution. Administration of the steroid in solution has been shown to reduce the risk of steroid-induced dyspepsia and at the same time provide maximum efficiency and consistency of absorption.

Mild attacks of hay fever can often be controlled by Betnesol-N Nasal Spray. This product also contains the soluble form of betamethasone and can therefore reach inflamed tissues more readily. Neomycin, with its wide range of activity and low risk of sensitisation, is included to control any infection

which may be associated with the primary condition. Naphazoline is included for its decongestive action; a lower than usual concentration minimising any risk of the 'rebound phenomenon' which may sometimes follow too intensive a use of vasoconstrictors.

A valuable new treatment

'Tremonil' represents a considerable advance in the control of tremor. This new drug greatly reduces, and in some cases abolishes, Parkinsonian and Senile Tremor. At the same time, 'Tremonil' also decreases rigidity and diminishes the psychic and autonomic disturbances which often accompany Parkinsonism. 'Tremonil' is generally well tolerated, and may when necessary be given concurrently with other drugs which are mainly effective against rigidity.

WILL SHE TAKE IRON?

Most oral iron preparations are well absorbed if the patient takes them.

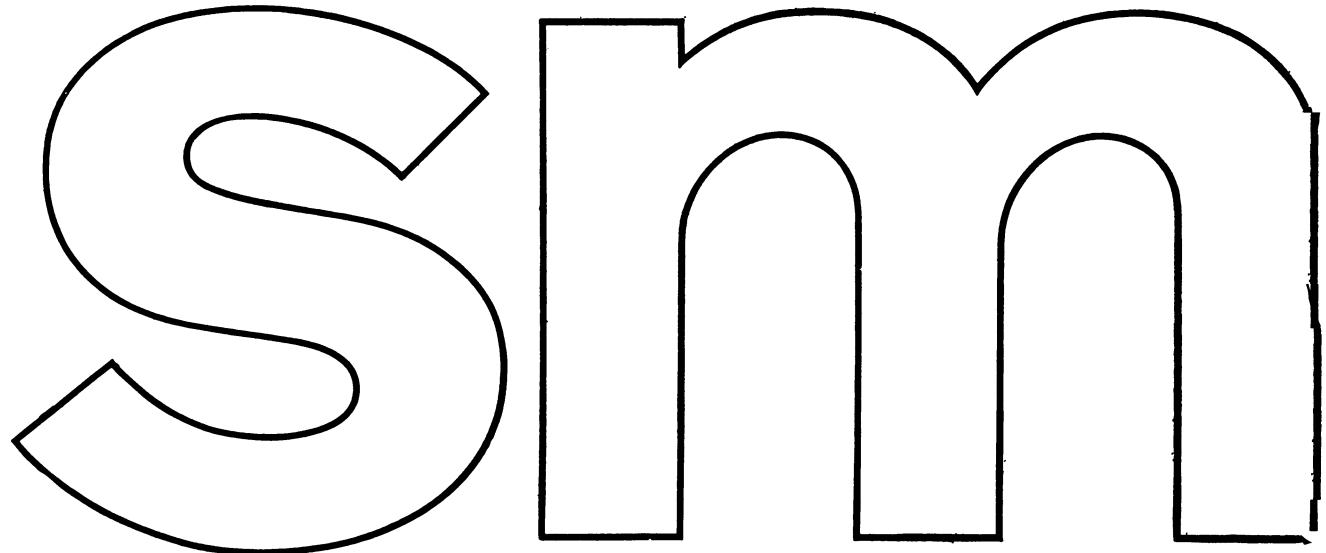

So important is patient co-operation that the success of iron therapy often depends on its acceptability. Ferrodic tablets, with their exceptionally low toxicity*, rarely cause gastric irritation and are so palatable that they can be sucked or chewed. Consequently, the safest oral iron also tends to give more reliable results in practice.

one certain fact in hypertension

It is suitable for all grades of hypertension

Satisfactory response in most patients

More than 250 papers provide a positive clinical background

Easy to administer—one dose daily

Long-term control readily maintained

In wide clinical use for over three years

Named the drug of choice by many authorities

Ismelin has been successfully used for over three years in the treatment of all grades of hypertension. It remains the drug of choice, where positive control of blood pressure is desirable on a long term basis. Ismelin offers a unique combination of properties in providing satisfactory treatment for hypertension in nearly 90% of patients, with a single daily dose and with relative freedom from side-effects. Because of its superior control and ease of use it is now widely prescribed in general practice.

There is an increasing body of opinion in favour of the adequate treatment of hypertension at a sufficiently early stage to prevent or minimise serious secondary degenerative changes in the cardiovascular system. Such far-sighted therapy demands a drug that will ~~be~~ maintain effective control in a majority of cases without undue inconvenience to the patient and with reasonable economy. Ismelin, alone or in combination with a thiazide diuretic such as Navidrex, is the nearest approach to this ideal.

ALDOMET

REGD METHYLDOPA

DAY AND NIGHT CONTROL OF HYPERTENSION

ALDOMET (methyldopa) usually reduces blood pressure whether the patient is standing, sitting or lying. Symptoms of postural hypotension are fewer and less severe than is the case with other effective antihypertensive agents. Diurnal blood pressure fluctuations and exertional hypotension rarely occur.

ALDOMET is simple to use, and the incidence of side effects has been relatively low.

These attributes have been repeatedly confirmed in published clinical work throughout the world. Already seven major papers have appeared in British journals, together with leading articles, annotations and other editorial comment, all endorsing the value of ALDOMET.

ALDOMET is supplied as yellow, film-coated tablets containing 250 mg. methyldopa. Detailed information on indications, dosage, administration, precautions and the extensive bibliography is available on request.

The importance of simplicity in the treatment of diabetes

The diabetic is condemned to a life-time of medication to control his condition. In few other conditions is simplicity and ease of administration so important. The introduction of the sulphonylureas eight years ago relieved one group of diabetics from the burden of daily injections. The extensive use of Rastinon in oral antidiabetic therapy for over two million patients has shown that it is not only one of the safest drugs available, but also one of the

most effective in controlling diabetes when the condition is first discovered at middle age. Rastinon is the standard oral treatment of diabetes, and it is remarkable for its

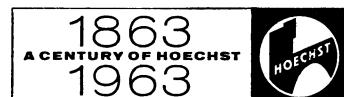

safety, simplicity, economy and effectiveness.

patients do

better quicker
with **BROXIL**

and there are facts which could explain this. For one thing, Broxil, compared with oral penicillin V, has a very high absorption rate² and gives very high tissue levels. It is therefore quickly and effectively bactericidal at the site of infection.

Broxil is also bactericidal to some penicillin G and V resistant staphylococci³, which of course means greater certainty in therapy.

It is not surprising that these advantages produce measurable advances in clinical efficiency. For example, it has been possible to count in days the saving of recovery time achieved by using Broxil in upper respiratory tract infections¹, while many physicians have recorded its effectiveness in other indications.^{4,5,6,7,8}

TB patients feel at home with INAPASADE

British Patent No. 885,455

INAPASADE—easily swallowed, palatable granules of PAS-INH—has taken the drudgery out of tuberculosis therapy and is rapidly being accepted as standard combined treatment. In hospital, supervision is simplified. At home, doses fit unobtrusively into the daily routine. As there is no mid-day dose, there is no need to carry drugs to work or swallow them in public. These easy-to-swallow granules gain the patient's confidence and co-operation and help solve the problem of skipped or forgotten doses.

Two doses a day provide sodium aminosalicylate B.P. 12 G. and isoniazid B.P. 300 mg.

Another SNP first! ONCE-DAILY PAS-INH

Smith & Nephew Pharmaceuticals are again first in the field with a new form of TB therapy. Inapasade granules are now available in packets each containing a single daily dose. This new presentation is called INAPASADE S.Q. (*semel quotidie*) 'S.Q.' meets the emerging need for high peak dosage once a day.

... it might be worth considering whether the daily dose of each of these drugs, now given in two doses, could be better given in one. In fact, some patients prefer to take one massive dose of cachets or granules after breakfast rather than to have to repeat the effort of memory and deglutition in the evening.' BURROUGHS WELLCOME & CO. (THE WELLCOME FOUNDATION LTD.) LONDON

The problem of the dirty mouth

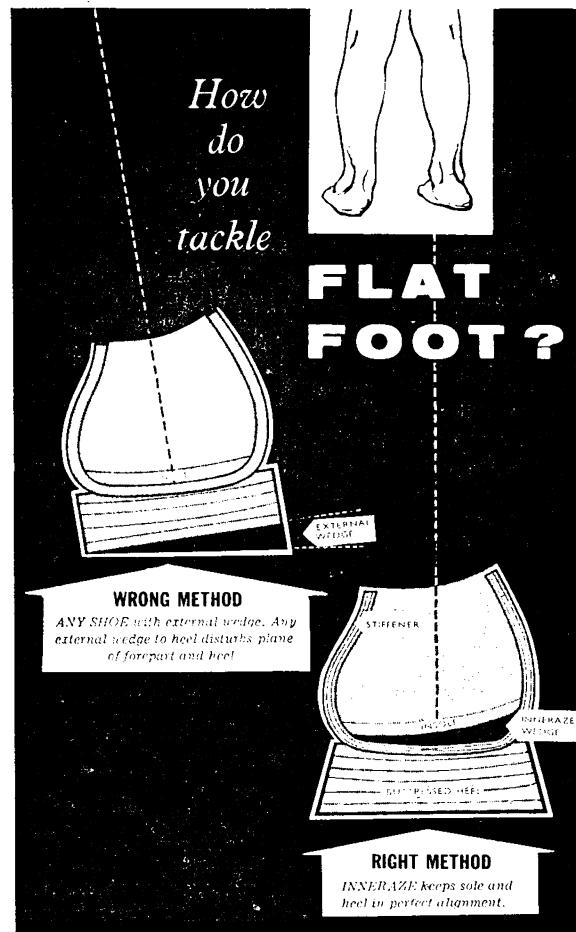

Even in 1963 the dangers, and the unpleasantness, of the dirty mouth are still present in the post-operative period, as well as in many fevers; the geriatric patient being especially prone to them. Careful attention to oral hygiene will usually, of course, keep the patient comfortable and prevent complications. Such attention, however, is very time-consuming to the nurse; and it is not often realised that for most patients it can be replaced or supplemented by the use of chewing gum.

The regular use of chewing gum, by stimulating salivary flow, keeps the mouth clean in the most natural way possible. The patient is in a sense providing his own nursing care with the minimum of energy expenditure by himself.

Child patients, of course, need no encouragement to chew gum. The older patient may need encouraging—but not once he has appreciated the very obvious cleansing and refreshing effect that chewing gum has upon the mouth. Chewing gum is also of value to patients who are forbidden to smoke.

...do you recommend an external wedge on the shoes?

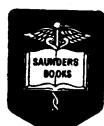

But the wedges soon wear away; and very often the child is made to feel self-conscious because his shoes look different from other children's. As the diagram on the left clearly shows, any external wedge to heel disturbs the plane of forepart and heel. Surely it's more logical to have a wedge built-in between the inner and the outer sole—where it can correctly corset the foot, remain invisible, and completely unaffected by wear or repair of the shoe. That is how Start-rite INNERAZE shoes are made—on remedial lasts specially adapted to accommodate the internal wedge. That is why they are the only practical and thoroughly effective solution to this problem.

SUSTAC

*SUSTAINED ACTION
GLYCERYL TRINITRATE

GIVES YOUR PATIENTS LASTING CONFIDENCE

Continuous and controlled therapy

One SUSTAC tablet gives continuous and controlled release of glyceryl trinitrate independent of pH for 12 hours after ingestion. Uniform release of the drug is ensured by a superior 'membrane' construction giving your patients protection approximately 20 times longer than with sublingually administered nitroglycerin.

Fewer attacks; increased confidence

SUSTAC can markedly reduce the number of anginal attacks. The freedom from attacks thus secured by SUSTAC eliminates much of the fear associated with the condition and helps the patient to regain confidence and live a more normal life.

Simple regimen

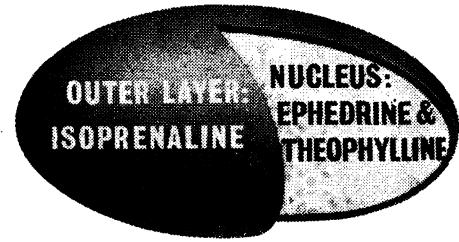

One SUSTAC tablet in the morning and one at bedtime is usually all the dosage necessary. This simple regimen is convenient for the patient and lessens the risk of 'missed doses' as well as avoiding the psychological disadvantages often associated with frequent medication.

GOOD GENERAL PRACTICE

In the Royal Army Medical Corps you can practise medicine in very good conditions. Well-equipped surgeries with medical assistants are provided, allowing you to do your best work and devote more time to the care of your patients. There is great scope for the family doctor, particularly overseas, as the Royal Army Medical Corps looks after a very large number of women and children.

Great importance is attached to post-graduate study, and, during their service, permanent officers are given the opportunity of sitting for diplomas, such as D.C.H., D.Obst.R.C.O.G.

There is a large and comprehensive hospital service, consisting of thirty military hospitals at home and overseas, with consultant opinion readily available to you. As a general practitioner, you are welcomed in the hospital to consult with your brother officers and follow up your cases.

Married quarters are provided, and you can count on regular off-duty periods with opportunities for games and social activities; there is generous annual leave on full pay without the trouble or expense of finding a locum.

FULLY REGISTERED PRACTITIONERS may apply for permanent or short service commissions. Minimum entry salary £2,000 p.a. Credit is given for previous experience and there are good opportunities for specialist training and rising to consultant rank. Consultants may earn from £4,000 to £5,000 p.a. depending on seniority. Suitable officers may be given employment to the age of 65. For all officers holding permanent commissions there is a non-contributory pension scheme. **DOCTORS IN PRE-REGISTRATION YEAR** are also eligible for commissions. Board and lodging is free; salary £875 p.a. or £1,050 p.a. if over age 25.

THE ABOVE SALARY SCALES
INCLUDE MARRIAGE ALLOWANCE

MEDICAL STUDENTS are eligible for cadetships. Salary £950 p.a. for single men, and for married men under 25.

The Booklet, 'A Career for Doctors in the R.A.M.C.', may be obtained from The Director General, Army Medical Services, The War Office (HNR/6/E), London S.W.1. Tel: GRO 8040. Ext. 740.

eating is a serious business . . .

Heinz take it as seriously as any mother

Heinz Baby Foods give any mother a feeling of security and serenity. Because these specially prepared nursery meals not only give her far more free time to be with her baby: they also provide so many of the important essentials her baby needs. The well-balanced variety. (There are now over 57 different Baby Foods to choose from!). The vital proteins. The fresh, delicious tastes . . .

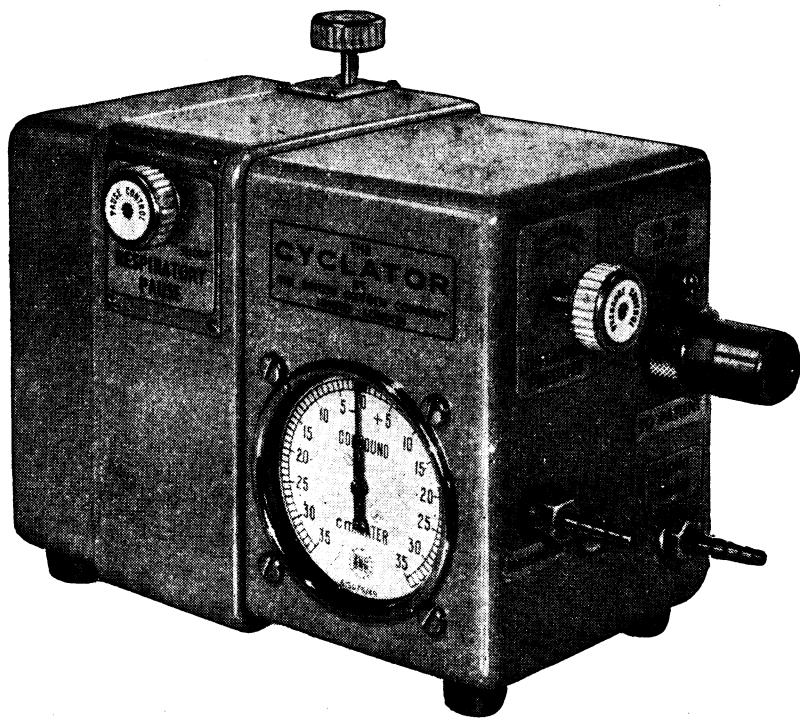

These little nursery meals are, in fact, infinitely

better for a child than any laboriously home-prepared dishes. And so they should be! After all, what mother has the best equipped kitchens in the country? The best cooks? Acres of garden land growing sunripe fruit and vegetables? Only a Heinz mother! Because only Heinz have so much laid on for each little meal a baby eats.

If you would like further information about Heinz Strained and Junior Foods, please write to:—Dr. G. Tattersall, Food Science Advisory Service, H. J. Heinz Co. Ltd., Harlesden, London, N.W.10.

The CYCLATOR TYPE P.T. MARK 1

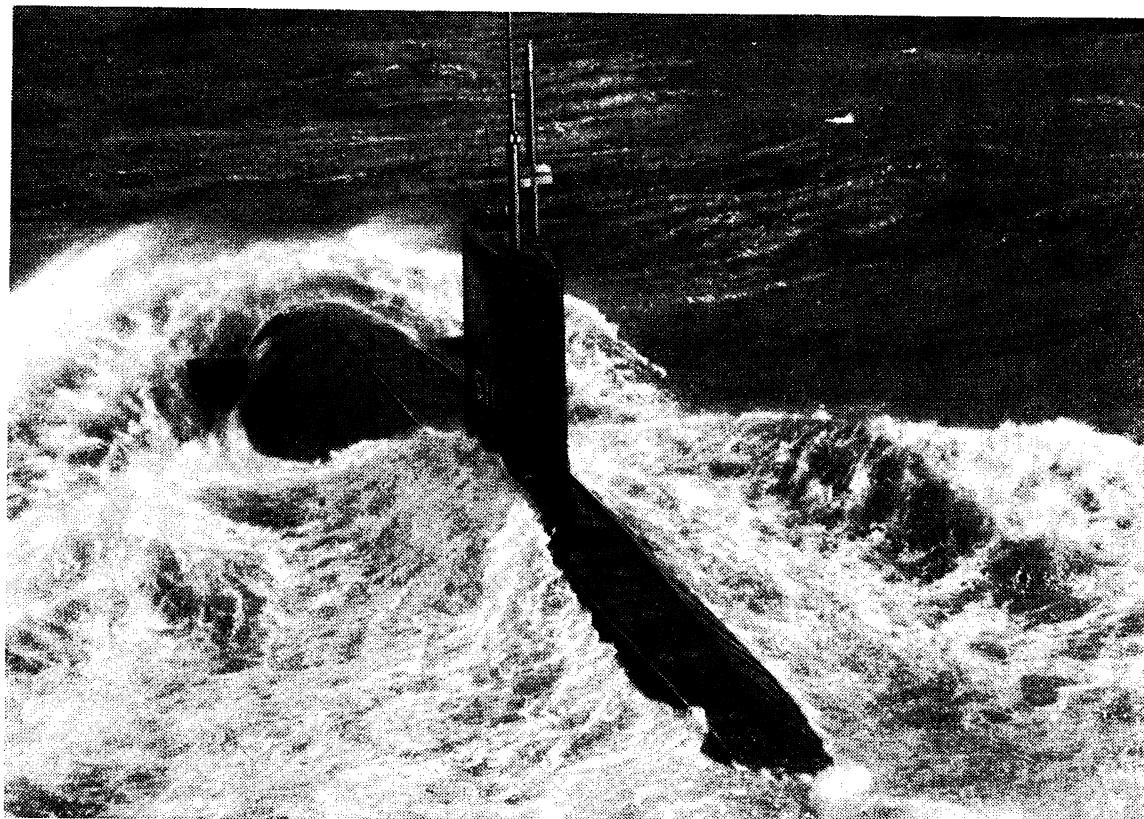

The Cyclator has already won wide acclaim for its complete reliability and robust simplicity. This i.p.p. ventilator is of the pressure cycling, controller assister type. Normally used for controlled respiration in open circuit anaesthesia, it is also eminently suitable for ward use in the long term treatment of respiratory paralysis. It may be operated economically from either cylinders or pipelines and the respiratory pattern may be varied between wide limits by means of two simple controls. Write for illustrated leaflet.

The go-ahead OPPORTUNITY that is ROYAL NAVY

you find it as a MEDICAL OFFICER

As a Medical Officer, you have complete clinical freedom and a widely varied medical experience. Your practice is among 100,000 Naval men and women. Ashore or afloat, it can take you anywhere in the world from Malta to Singapore: and, when you have a shore appointment abroad, your family can be with you. Go-ahead, too, is your opportunity to specialize: not only in traditional categories, but in the modern sciences of aviation and nuclear medicine.

As a Medical Officer, your pay, allowances, and gratuity—or permanent commission pension—are very good: for example, your

initial pay is considerably higher than that of a civilian hospital registrar.

You can enter by one of three ways: as a Registered Medical Practitioner—your civilian experience back-dating seniority—or as a qualified doctor doing your pre-registration year or as a student with a 2nd M.B. For qualified women doctors, there is a special short service commission.

For fullest details, write, mentioning your own qualifications and age to: The Medical Director General of the Navy, Medical Dept. (HN.5), The Admiralty, Empress State Building, London, S.W.6.

HOMES

BARNWOOD HOUSE

BARNWOOD, GLOUCESTER (66207)

Established 1860. A private hospital (outside the National Health Service) for the care and treatment of nervous and mental disorders and geriatric cases. Wide range of fees. Apply Medical Superintendent.

BOWDEN HOUSE CLINIC

Harrow-on-the-Hill, Middlesex

Established in 1911. Tel.: BYRON 1011 and 4772. Incorporated Association not carried on for profit.

A private clinic outside the National Health Service for the treatment of patients suffering from the neuroses, psychosomatic and nervous disorders, also the specialized treatment of alcoholism and drug addiction. All modern forms of physical psychiatric treatment and intensive psychotherapy are employed. A full physical examination and pathological investigations are made in the first week. Treatment by members of the staff is inclusive. The clinic is a 30 minutes' journey by train or road from Marble Arch, and is surrounded by six acres of grounds, so that there are quiet and tranquil surroundings within easy reach of London. Consulting Psychiatrist:

E. A. Bennett, M.D., D.P.M.
Medical Director.

Glyn Davies, B.A., M.R.C.S., D.P.M.

ST. ANDREW'S HOSPITAL FOR NERVOUS AND MENTAL DISORDERS

NORTHAMPTON

President: The Earl Spencer. Medical Superintendent: D. J. O'Connell, M.D., D.P.M. This private hospital receives patients, both male and female, suffering from nervous and mental disorders, including alcoholism and senile illnesses. The fees range from fourteen guineas per week. Private rooms with special nurses can be provided either in the hospital or in one of the villas in the grounds. The hospital is situated in 130 acres of pleasant grounds. These include a nine-hole golf course, gardening, fruit growing, etc.

WANTAGE HOUSE

This is a self-contained reception unit to which patients may be admitted. It is equipped for the complete investigation of nervous and mental disorders by the most modern methods. All forms of treatment are available. It contains laboratories for biochemical, bacteriological and pathological research.

MOULTON PARK

Some two miles from the main hospital is the farm of approximately 600 acres. Occupational therapy is a feature of the branch and patients are given every facility for occupying themselves in farming, gardening, fruit growing, etc.

BRYN-Y-NEUADD HALL

The seaside home of the hospital is beautifully situated in a park of 330 acres in North Wales. On the north-west side of the estate a mile of sea coast forms the boundary. Patients may visit this home for a short seaside change or for longer periods. The hospital has its own private bathing house on the sea-shore.

For terms and further particulars apply to the Medical Superintendent (Telephone No. 34354, Northampton), who can be seen in London by appointment.

THIAVER

a new Riker antihypertensive

THIAVER

**with great potential
in general practice**

Thiaver is particularly valuable in general practice for that large group of hypertensive patients who are not adequately controlled by milder agents and their combinations. *Thiaver* provides an alternative to adrenergic or ganglion-blocking agents whose use is often limited by the side-effects they produce.

Potent yet suitable for prolonged use *Thiaver* combines the hypotensive properties of *Veriloid*, one of the few effective centrally-acting antihypertensives, with those of *epithiazide*, a new potent diuretic/hypotensive, to provide smooth but positive control of blood pressure with gradual onset of effect. Outstanding advantages of *Thiaver* are that it does not cause postural hypotension nor does tolerance develop.

Very simple dosage Treatment with *Thiaver* is free from the need for frequent and critical dosage adjustment. Satisfactory control of blood pressure is obtained in most patients with two or three tablets daily. Each tablet contains *Veriloid* (standardised alkaloids of *Veratrum viride*) 4 mg. and *epithiazide* 4 mg.

Packs: Bottles of 100 tablets 48/- basic NHS price
500 tablets 234/- basic NHS price
