

Pes sanus in calceo sano

Routine examination of young children's feet reveals many foot-ailments in the making. Doctors with children under their care may wish to take preventive action by instructing mothers on correct shoe-fitting for growing feet.

In Clarks experience, the vital factors are:

1. AMPLE TOE-ROOM held in place by close fit at heel and instep.

2. CONTOUR-MEASUREMENT—for girth as well as width and length.

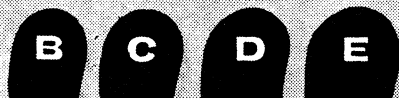

3. FULL CHOICE OF SIZES—with up to four width fittings in each length-size and half-size.

4. TRAINED FITTERS, with a sound instruction course on fitting children's feet.

On these factors, Clarks have built their own reputation and can give this real promise;

Freedom from all foot troubles caused by footwear, if from baby-hood none but Clarks Shoes are worn correctly fitted.

a new antacid palatable effective economical

Alcin is a new antacid offering several important advantages. It provides safe and effective treatment of symptoms associated with gastric hyperacidity and peptic ulceration.

Palatability Having an absence of chalkiness and an agreeable flavour, Alcin is non-nauseating.

Buffering Activity Alcin not only rapidly neutralises excess acid, but at the same time its sustained buffering activity maintains the level of acidity of the gastric contents within the desired range.

Safety Alcin is safe for prolonged administra-

tion. There is no risk from overdosage as Alcin cannot cause either alkalosis or acid rebound.

No Digestive tract ill-effects Alcin has no known laxative or constipating effects.

Economy Alcin is economical in use. The basic N.H.S. cost of 50 tablets is 1/9½d.

Composition: Each tablet contains 360 mg. anhydrous co-prepared sodium magnesium aluminium silicate and basic magnesium aluminate.

NEW ORAL

'Daptazole 100'

**improves
breathing**

FOR YOUR CHRONIC BRONCHITICS

New 'Daptazole 100' The burden of shallow breathing need no longer handicap and distress your chronic bronchitics. With new 'Daptazole 100' tablets they can lead more active lives, because 'Daptazole 100' *deepens* breathing.

New concept 'Daptazole' has proved safe and reliable over several years of use in its injectable form. The action of 'Daptazole' improves breathing to such an extent that 'Daptazole 100' tablets—a new concept in the treatment of shallow breathing—have already become an integral part of hospital treatment of respiratory depression and failure.

New hope Now 'Daptazole 100' is made available for the treatment of chronic bronchitis, emphysema and the other chronic chest conditions encountered in general practice—bringing new hope to many respiratory invalids.

Indications: Insufficient ventilation due to shallow breathing which occurs in such conditions as emphysema, bronchitis and bronchiectasis; especially patients with cor pulmonale and severe respiratory insufficiency.

Composition: Each tablet contains 100 mg. amiphenazole.

Dosage: 1-2 tablets 3-4 times daily. Usual dosage is 4 tablets daily.

Packs and basic N.H.S. cost: Container of 20 tablets: 9'9d. Container of 100 tablets: 46/-

IMPORTANT

The 20 mg. tablets of 'Daptazole' which are used concurrently with morphine in the management of terminal disease have been withdrawn and in their place it is suggested that 50 mg.—half a scored 'Daptazole 100' tablet—be used, adjusting the frequency of administration as necessary.

It is suggested that to avoid confusion prescriptions for the new form of 'Daptazole' clearly specify 'Daptazole 100', though chemists have been advised that, where 'Daptazole' tablets (dose unspecified) are prescribed, 'Daptazole 100' should be dispensed.

NORGESIC

Many patients visit their doctors each year for treatment of a painful condition of the limbs or trunk. This is often caused by an accident at home or at work and the condition can be acute and incapacitating.

Norgesic can dramatically shorten the period of incapacity in painful muscular conditions.

Norgesic combines in a single tablet the properties of an orally effective skeletal muscle relaxant, orphenadrine

citrate, and a well-tolerated analgesic, paracetamol. It reduces local pain and the pain of muscle spasm, relieves stiffness, restores mobility and speeds recovery.

Each tablet contains:

orphenadrine citrate 35 mg.

An Open Letter to the Medical Profession

We would hazard the opinion that a surgeon or doctor (not knowing about the Porsche) might have some difficulty in finding a car possessing exceptional all-round performance with superb controllability, and yet entirely suitable at the same time for his professional needs. We are thinking particularly, of course, of the doctor who wants a car that is fun to drive, when he has the time or inclination to "go places".

The Porsche is available as a Fixed-head Coupé—the classic Porsche model; as a Cabriolet—the head being detachable and with a zipped removable rear panel; or with a detachable hard-top—interchangeable with the cabriolet head. An owner who likes a cabriolet for the summer, convertible immediately into an open car (abroad, if not in Gt. Britain!) but prefers to put the cabriolet head away for the winter, can then fit the hard-top. All Porsche bodies are good-looking and superbly built.

There are three alternative engine specifications available with each type of body—the standard 1,600, 100 m.p.h. model, the 1,600-S, 110 m.p.h., and the still faster 1,600-S.90 model.

There is probably no other car, irrespective of horse-power, which one can drive so fast, safely and effortlessly if in a hurry in heavy traffic conditions as even the standard Porsche, and this is equally true on the open road. Smooth and quiet at all speeds, it is astonishingly comfortable for driver and passenger with seats designed in consultation with the medical profession, and which, quite frankly, are the envy of owners of most other cars, irrespective of cost. Its all-synchromesh gear-change is amazingly light and effortless in use, and unanimously accepted as the fastest manual change on any car in the world. Another feature (particularly remembering its vivid acceleration, high cruising and maximum speeds) is its remarkable economy in fuel.

The quality of construction and finish throughout is always enthusiastically acclaimed, while many items of equipment normally charged as extras are provided as standard, including an efficient heating and air-conditioning system.

The Porsche with its instantaneous response to all controls, and delightfully light and positive steering, is essentially effortless to drive, and extremely easy to manoeuvre in restricted spaces. It is completely reliable, with top quality components—in particular (and very important for a doctor), the electrical system. Left out all night in the most severe winter conditions, it will immediately respond to the starter, while with its air-cooled engine, no problems can arise in respect of leaking radiator or checking water level, or in the winter any worries about freezing-up, topping-up with correct anti-freeze mixture, warming-up, etc.

A doctor probably likes to know his car is pretty-well thief-proof—the engine cover and "bonnet" can only be opened from inside the Porsche.

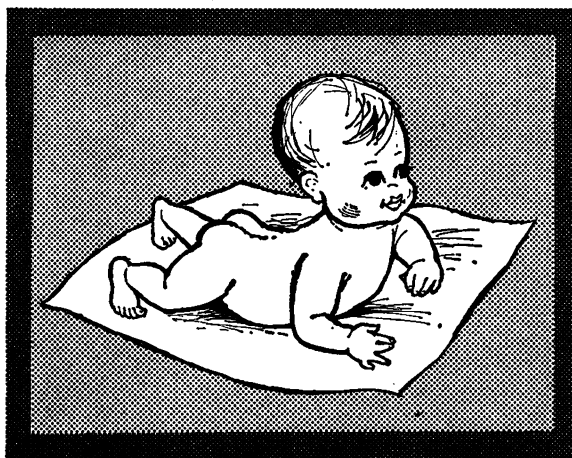

We are convinced all these things make the Porsche the perfect car for the doctor, whom we imagine would be thoroughly satisfied with a car he can drive really fast, if necessary, yet without strain or effort, arriving at journey's end completely relaxed. Even in the congested driving conditions in this country, it will still provide a maximum of pleasure with a minimum of fatigue on the longest runs—abroad it will be that much more fun.

There is only one snag—if its passenger-carrying capacity meets your requirements. The Porsche is not a four-seater—if it was we do not think the factory could ever meet the world demand. It is a most comfortable, even luxurious, two-seater, providing ample leg-room and driving comfort for over-6-footers, with rear seats perfect for two children, or which convert to a flat floor for luggage.

We shall be delighted to send to you illustrated literature together with road-test reports.

Lomotil

BRAND OF DIPHENOXYLATE HYDROCHLORIDE with atropine sulphate

prompt and safe symptomatic relief from diarrhoea

LOMOTIL is a non-specific remedy for the treatment of diarrhoea which acts rapidly, effectively and safely.

It is recommended as a first line of treatment in diarrhoea, enabling the physician to reserve antibacterial agents for the treatment of diarrhoea due to pathogenic organisms. Thus immediate recourse to sulphonamides and antibiotics in diarrhoea can frequently be avoided.

LOMOTIL acts by reducing excessive gastro-intestinal motility.

LOMOTIL has been subjected to widespread clinical trials and is already firmly established in the United States and Europe as a major therapeutic measure in the treatment of diarrhoea.

Although LOMOTIL is distantly related to pethidine it has no analgesic action at therapeutic dose levels. Its addiction potential is comparable with that of codeine.

A sub-therapeutic amount of atropine sulphate is, however, included to discourage over-dosage.

Named the drug of choice by many authorities

Ismelin has been found to provide satisfactory long term treatment of hypertension in a high proportion of patients. Tolerance and drug resistance are rarely a problem with Ismelin. A single dose daily controls blood pressure adequately and once dosage has been stabilised there is little risk of the pressure rising between visits.

Ismelin is well-tolerated by the majority of patients ; side effects rarely interrupt treatment. The high proportion of patients responding satisfactorily to Ismelin fully justifies its rapidly extending use in general practice.

METHRAL* OINTMENT

brand of fluperolone acetate

*Trade Mark

The quality that singles out Methral from other topical steroids is not so much its anti-inflammatory activity; this is indeed impressive, but what really distinguishes Methral is its speed of onset of action in pruritus. In this respect, it is superior to hydrocortisone. Moreover, in terms of reducing erythema, size of lesion and exudate formation, Methral achieves an outstanding security of response. It is this speed of action, this security of response, that thrusts Methral to the very forefront of today's topical steroids.

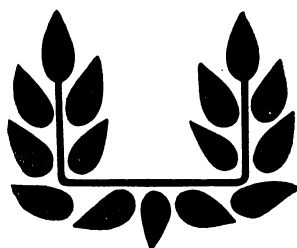

'... clinical evidence demonstrates that the fluperolone [Methral] relieves pruritus more rapidly than hydrocortisone, and has a quicker onset of action.'

Cow & Gate Ltd., Guildford, Surrey.

The problem of weaning, so often a source of worry to the young mother, can be solved by the introduction of Cow & Gate Cereal Food and of Cow & Gate Dairy Weaning Foods. Cow & Gate Cereal Food is made from specially selected oat flour and, in consequence, is particularly suited to cases where there is evidence of gluten idiosyncrasy. The protein content has been reinforced by the addition of milk solids.

Cow & Gate Dairy Weaning Foods combine the nutritive qualities of rich whole English milk with specially selected and finely ground cereals, in the case of the milk puddings, and with nourishing egg yolk in the case of the Egg Custard.

Carnation Milk

IS BEST FOR BOTTLE-FED BABIES

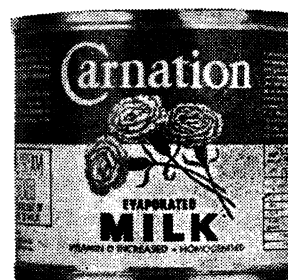

Because Carnation Milk is nutritionally adequate for all baby's needs with the advantages of homogenised butterfat and flocculent curd.

Because Carnation babies are contented. They sleep well at night and therefore so do the parents.

Because Carnation Milk is liquid, feed preparation is both simple and quick. Carnation is widely distributed throughout Great Britain.

Because Carnation Milk combines flexibility with safety. Feeds may be prepared to any strength by the simple addition of water. The milk has been sterilised in the sealed can.

Carnation Milk is processed from Scottish milk in our Condensery at Dumfries. Literature including reprints of clinical studies will be sent on request.

ARE YOUR HYPERTENSIVES PLAGUED BY **DEPRESSION ?**

Presented are notes from three clinical studies. HarmonyI was used as sole agent of therapy by 343 mixed hypertensives, and patients with mild functional/psychiatric disorders. Only eight reported mild depression concurrent with therapy—an incidence of 2.33%.

Study No. 1. Two hundred and eighty-three patients treated in private practice, at hospital outpatient clinics, and in office psychiatric practice. Average initial dosage of HarmonyI was 0.1 mg. to 0.25 mg. three or four times daily. No patient received more than 6 mg. daily. Eight reports of mild depression.

Study No. 2. Eighty patients with benign essential hypertension were studied via 'double-blind' method. Mean daily dosage of HarmonyI was 0.25 mg., with a minimum dosage of 0.1 mg. and a maximum of 0.5 mg. daily. No reports of depression in the group of 20 on HarmonyI therapy.

Study No. 3. Forty patients with hypertension and anxiety neurosis . . . from mild to moderately severe. Half of the group had received other anti-hypertensive agents at one time or another; these were discontinued before and throughout the study. Usual dosage of HarmonyI was 0.1 mg. three times daily after meals. Sometimes an additional dose was taken at bedtime. No reports of depression associated with this therapy. Other investigators have found so little indication of depression with HarmonyI therapy that they do not record it as a significant side-effect.

ROTER

has particular
advantages

ROTER achieves a high cure rate and often gives effective control of even refractory chronic cases which have resisted other treatments.

ROTER in many cases obviates the need for hospitalization or surgical intervention.

ROTER helps patients to keep ambulant and symptom-free with a minimum of medication and with few, if any, dietary restrictions.

ROTER in general practice enables the physician to take adequate care of his gastric cases without frequent or prolonged supervision.

ROTER has no known side effects.

ROTER requires no supplementary medication such as sedatives or anti-spasmodics.

ROTER shows a saving in cost when compared with conventional methods of treatment.

QUESTIONS, PLEASE?

Tampons as menstrual absorbents

Q *Intravaginal tampons for menstrual hygiene are surprisingly small compared to perineal pads. How can such devices effectively absorb the menstrual flow? On the other hand, might they block the flow?*

A Menstrual tampons are made from a variety of materials. Tampax, the most widely used, is made of a soft, bleached, highly absorbent cotton. For easy insertion it is compressed and encased in a hygienic, disposable container-applicator. Tampax is effective in caring for the menstrual flow because its entire capacity can be used. A perineal pad, however, is so designed that only a small central portion is actually used for protective purposes.

Within the vagina Tampax absorbs the menstrual fluid by strong capillary action and gentle expansion. When Tampax has reached its absorptive limit, it will leak—it will not block the flow. It is as rational to expect Tampax to block the flow as to believe absorbent cotton would make an effective closure for liquid-filled bottles.

That Tampax does not block the menstrual flow, has been demonstrated by many leading research workers as shown in the references below, 1-6.

Tampax is available in Regular and Super absorbencies.

TAMPAX MENSTRUAL TAMPONS Preferred because they—

1. Eliminate vulval chafing and irritation.
2. Permit freedom from menstrual odour.
3. Eliminate danger of infection from the anal region.
4. Permit normal flow with no possibility of occlusion.
5. Promote mental and physical well-being.
6. Ensure hygienic, medically correct insertion via their unique container-applicator.
7. Provide protection in a convenient, comfortable, efficient and disposable form.

HYDRATENE

To ease pain and induce sleep Hydratene combines the well-known hypnotic Chloral Hydrate, with the modern analgesic Paracetamol, and has the fundamental merit of being both effective and mild. In this compound form Chloral Hydrate has little odour or taste and shares with the analgesic, Paracetamol, the advantage of being singularly free from side effects and habituation. Hydratene, in the appropriate dosage, is therefore safe for adults and children.

Each Hydratene tablet contains the equivalent of
Chloral Hydrate 4 grains
Paracetamol 6 grains

Dosage: 1-3 tablets as may be directed by the physician.

Available in packings of 25 and 250.
Basic N.H.S. prices: 2/6 and 13/4.

DRUGS in the TREATMENT of DISEASE

An authoritative guide to the use and comparative efficacy of many drugs developed in recent years. It assists the practising doctor to compare the newer drugs with each other and with those older remedies that are still the best of their kind. Information is also given regarding toxic and side effects.

Compiled from the series of articles published in the *British Medical Journal*, the book presents an up-to-date, indexed authority on medicinal treatment—of considerable help to the doctor in choosing the best drug for his patient.

GOOD GENERAL PRACTICE

In the Royal Army Medical Corps you can practise medicine in very good conditions. Well-equipped surgeries with medical assistants are provided, allowing you to do your best work and devote more time to the care of your patients. There is great scope for the family doctor, particularly overseas, as the Royal Army Medical Corps looks after a very large number of women and children.

Great importance is attached to post-graduate study, and, during their service, permanent officers are given the opportunity of sitting for diplomas, such as D.C.H., D.Obst.R.C.O.G.

There is a large and comprehensive hospital service, consisting of thirty military hospitals at home and overseas, with consultant opinion readily available to you. As a general practitioner, you are welcomed in the hospital to consult with your brother officers and follow up your cases.

Married quarters are provided, and you can count on regular off-duty periods with opportunities for games and social activities; there is generous annual leave on full pay without the trouble or expense of finding a locum.

FULLY REGISTERED PRACTITIONERS may apply for permanent or short service commissions. Minimum entry salary £2,000 p.a. Credit is given for previous experience and there are good opportunities for specialist training and rising to consultant rank. Consultants may earn from £4,000 to £5,000 p.a. depending on seniority. Suitable officers may be given employment to the age of 65. For all officers holding permanent commissions there is a non-contributory pension scheme. **DOCTORS IN PRE-REGISTRATION YEAR** are also eligible for commissions. Board and lodging is free; salary £875 p.a. or £1,050 p.a. if over age 25.

**THE ABOVE SALARY SCALES
INCLUDE MARRIAGE ALLOWANCE**

MEDICAL STUDENTS are eligible for cadetships. Salary £950 p.a. for single men, and for married men under 25.

The Booklet, 'A Career for Doctors in the R.A.M.C.,' may be obtained from The Director General, Army Medical Services, The War Office (HNR/6 F), London S.W.1. Tel: GRO 8040. Ext. 740.

SERVICES**A PRACTICE AS WIDE AS THE WORLD**

In the Medical Branch of the Royal Air Force you gain wide clinical experience. You travel the world and among the subjects with which you will become familiar are tropical medicine, rescue operations, the care of airborne patients and medicine in relation to flying. You will also be expected to contribute to research.

As Medical Officer on a Royal Air Force Station you have a vigorous general practice among the officers, men and their families. You enjoy complete clinical freedom in charge of sick quarters with your own beds, and you will be assisted by a well-trained nursing and clerical staff. You and your family can live comfortably and near your surgery.

Your salary and career prospects are good: as a married man drawing full allowances you could receive £2000 per year on entry. If you have post-graduate civilian experience you could be granted up to seven years back-dated seniority. Pensionable career commissions or short service engagements entitling you to a generous tax-free gratuity on completion are still available to the right applicants.

GRADUATES AND MEDICAL STUDENTS

If you are a pre-registration year graduate or a senior medical student you may apply for a commissioned cadetship. This will enable you to finish your pre-registration house jobs or medical training as an officer in the R.A.F. drawing full pay and allowances. On completion you will serve on a long or short service engagement in the Medical Branch of the Service.

For details of entry to the Royal Air Force as a registered doctor, a graduate or a medical student, write to the Director-General of Medical Services, Air Ministry (M.A.R.), (HN53D), 1 Tavistock Square, London, WC1.

RESEARCH PHYSIOLOGIST

Applications are invited for the following position:
SENIOR MEDICAL OFFICER, GRADE 2

SALARY: £3,271 to £3,661 (Australian Currency).

DUTIES: To undertake physiological research and direct the activities of a small unit. This unit works in collaboration with other groups having wide interests and therefore the successful applicant will be permitted a choice in selecting the programme.

QUALIFICATIONS: University degree in Medicine, with postgraduate qualifications and/or research experience.

CONDITIONS: The successful applicant for the above position will be seconded to the Department of Supply and located at Defence Standards Laboratories, Melbourne, Victoria. After approximately 12 to 18 months' service he may be required to spend 6 months in an Establishment either in Britain or U.S.A.

NOTE: Publication of results of researches is encouraged.

TRAVEL: Under certain conditions, first-class air/sea transport for the successful applicant and dependants (wife and dependent children) will be provided by the Commonwealth.

CONTRACT: Alternatively, consideration may be given to a three (3) or five (5) year contract of employment in Australia.

In this case the Commonwealth will bear the cost of return fares, together with the cost of removing the successful applicant's furniture and effects up to a maximum cost of £500 (Australian); £250 each way.

APPLICATIONS: Forms obtainable from the Senior Representative (A.V.181/7), Department of Supply, Australia House, Strand, London W.C.2, with whom completed applications should be lodged as soon as possible. (7872)

PRACTISE WHERE THE WEATHER'S PERFECT

As a medical officer in the R.N.Z.A.F.

If you are a G.P. with at least two years' postgraduate experience you may be eligible for a commission in the Medical Branch of the Royal New Zealand Air Force.

As medical officer on a flying station you will have a small emergency hospital of 8 to 20 beds and an interesting general practice among the officers, airmen, and civilians on the station and their families. You will live comfortably, the pay is good, and New Zealand's climate is among the finest in the world.

In the first instance you will be given a short service commission of four years with a chance of transferring to a permanent commission. Extra seniority is given for all postgraduate experience over two years. If you choose to leave the Service after four years you will receive a gratuity; and you will find that there are good opportunities for civilian practice in New Zealand.

The successful applicants will be given free passages to New Zealand. Single applicants are preferred, but married men with not more than two children will also be considered.

For full information write, giving your date of birth and details of education and experience, to Wing Commander T. A. McL. Morgan, A.F.C., Senior Air Staff Officer, New Zealand House, Haymarket, London S.W.1.

In practice,
patients do seem
to get better quicker
with **BROXIL**

and there are facts which could explain this. For one thing, Broxil compared with oral penicillin V has a very high absorption rate² and gives very high tissue levels. It is therefore quickly and effectively bactericidal at the site of infection.

Broxil is also bactericidal to some penicillin G and V resistant staphylococci³, which of course means greater certainty in therapy.

It is not surprising that these advantages produce measurable advances in clinical efficiency. For example, it has been possible to count in days the saving of recovery time achieved by using Broxil in upper respiratory tract infections¹, while many physicians have recorded its effectiveness in other indications.^{4,5,6,7,8}
