WITH A **PHILIPS 83** PORTABLE DICTATION MACHINE

The new Philips 83 is extremely light and *really* portable for on-the-spot recording anywhere. It is simple to operate. It can be used even in noisy surroundings: the special microphone cancels background noise. When recording observations, the 83 Portable allows full concentration because you need never look away from the patient or X-ray film—and hands can be left free for examination or for adjusting equipment. It runs on ordinary torch batteries. The easy-to-load cassettes eliminate tape threading and record for a full 40 minutes. Completely compatible with Philips 82 mains-operated Dictation Machines.

NEW WIDE SPECTRUM MOOD ENHANCER 'Aventyl'*

brand Nortriptyline

Lends wings to troubled minds

'Aventyl', synthesized in the Lilly Research Laboratories, at one stroke broadens the doctor's power to relieve troubled and disturbed patients. 'Aventyl' is not a combination of an anti-depressant with a tranquillizer. Instead, 'Aventyl' is a *single entity* that has been shown to be clinically effective over a *constellation of symptoms* associated with depression as well as

with anxiety and psychosomatic disturbances. Indeed, 'Aventyl' has an unusually wide spectrum of action in psychiatric disorders.

'Aventyl' is *not* a monoamine oxidase inhibitor.

Presentation: 'Pulvules' of 10 mg. and 25 mg. Liquid containing 10 mg. per 5 ml. teaspoonful, in bottles of 120 and 480 ml.

Where the problem is **wheezing** in chronic bronchitis

Effective routine treatment requires a bronchodilator which is both potent and well-tolerated by the patient

Published evidence has shown that **Alupent** 20 mg. fulfils these requirements

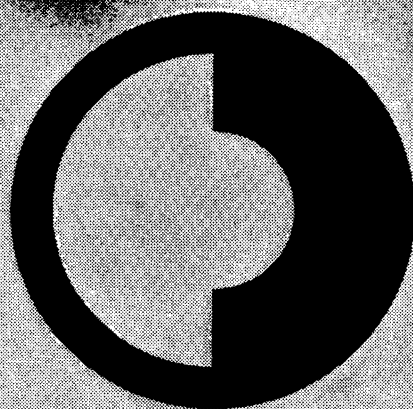

In an objective study comparing **Alupent**, ephedrine, isoprenaline and methoxyphenamine by mouth spirometric measurements showed that **Alupent** 20 mg. produced the largest and most sustained bronchodilator effect over a period of four hours¹

In a series of asthmatic and bronchitic patients treated over a two-year period 20 mg. of **Alupent** orally q.d.s. was shown to be an effective dose for routine use

In this series **Alupent** was given for long periods of time without the need for interruption of treatment because of side-effects

This evidence shows that for effective prophylaxis of wheezing in chronic bronchitis

the Answer is **Alupent** 20 mg. q.d.s.

A modest advance in cancer chemotherapy (CYCLOPHOSPHAMIDE)

A step towards tumour-specificity for a cytotoxic alkylating agent.

A nitrogen mustard derivative which has potent anti-tumour effect with significantly less severe, more predictable and more generally reversible depression of bone marrow.

An agent tolerated by the veins (without intimal irritation or thrombosis), by the subcutaneous tissue (if an injection should go astray), by the serous membranes (pleura and peritoneum), by the gastrointestinal tract (less nausea and vomiting), and by healing wound tissue (when given as an adjunct to surgical removal of cancer).

INDICATIONS

1. Malignant reticulosos, including Hodgkin's disease and multiple myeloma (except where the disease is strictly localised and suitable for radiotherapy).
2. Operable solid cancer, especially of lung, breast or ovary. Here Endoxana is used as an adjunct to surgery.

Wherever the prognosis is poor, both in operable and inoperable malignant disease, continuous maintenance treatment by mouth with Endoxana is recommended.

NOTE: Endoxana causes alopecia of varying degree in a proportion of patients, though this is a temporary effect.

Available in ampoules of 100 mg., 200 mg., 500 mg., and 1,000 mg. for intravenous and intracavitary injection, and in tablets of 50 mg. for oral maintenance treatment.

The convalescent & Mackeson

Dark beers have long been regarded as a valuable aid in building up strength after illness.

Mackeson (or Mackeson Stout, as it was long called) has a high reputation in this tradition. The makers of Mackeson recognise that only the individual practitioner can decide when such a beer can most effectively be used. For the convenience of doctors, therefore, they set out below an analysis of its nutritional properties.

Mackeson differs from other dark beers in one important respect: it is more acceptable to invalids and convalescents because of its taste. Instead of having the bitter taste usually associated with this type of beer, it is smooth, and mild in flavour.

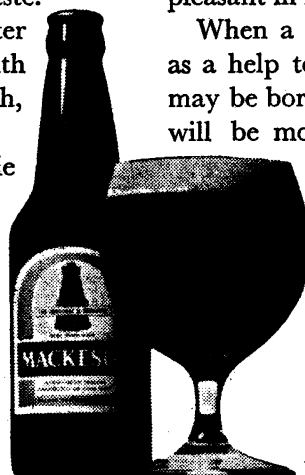

It provides an invaluable source of energy through

its calorific value (276 calories per pint, essentially that of three-quarters of a pint of milk). Because its most important ingredient in this respect is Lactose Sugar, Mackeson is easily digested, quickly assimilated—by even a weakened digestive system.

Nitrogenous matter is also present, mainly as protein break-down products, e.g. peptides and amino acids. It also contains valuable water-soluble members of the B groups of vitamins.

In short, Mackeson is a drink rich in energising properties, and at the same time bland, non-bitter and pleasant in flavour.

When a dark beer is contemplated as a help to speedy convalescence, it may be borne in mind that Mackeson will be more acceptable to patients who find a slightly bitter drink not to their taste.

STREPSILS RESTORE COMFORT IN SWALLOWING

The inability to swallow in comfort is one of the most common and distressing symptoms in these conditions. Strepsils provide safe, effective local relief in infections of the mouth and throat. Strepsils contain neither antibiotic nor local anaesthetic; the sensitising potential is thus very low and bacterial resistance does not develop. The two powerful antiseptics in Strepsils act quickly against a wide range of organisms. The sugar base dissolves slowly, enabling the antiseptics to exert a prolonged effect.

When you see
an infection
consider
ERYTHROCIN[®]
first

Erythrocin (erythromycin, Abbott) merits the physician's first consideration for the treatment of infections of the upper respiratory tract—and of other infections, for 80 per cent of cases of infection seen in the surgery can be expected to respond to adequate dosage of Erythrocin.

ERYTHROCIN IS EFFECTIVE

All the bacterial species that are at all commonly met in upper respiratory infections—staphylococci, streptococci, pneumococci and haemophilus—are sensitive to this important general-purpose antibiotic. Resistant strains, even amongst the staphylococci, are exceptional. The bacterial spectrum of Erythrocin includes most of the common pathogens, excludes most of the normal commensals.

ERYTHROCIN IS SAFE

Erythrocin is the least toxic of all the commonly used antibiotics. All other antibiotics have occasional serious toxicities; but more than ten years' clinical use has gone to show that such possibilities are negligible with Erythrocin.

ERYTHROCIN IS ECONOMICAL

If economy is regarded as a function of cost and performance, Erythrocin stands out as one of the most economical of antibiotics.

Erythrocin is available as Filmtab[®] tablets and granules for suspension; and it is also available in forms for intramuscular and intravenous injection.

The importance of simplicity in the treatment of diabetes

The diabetic is condemned to a life-time of medication to control his condition. In few other conditions is simplicity and ease of administration so important.

The introduction of the sulphonylureas eight years ago relieved one group of diabetics from the burden of daily injections. The extensive use of Rastinon in oral antidiabetic therapy for over two million patients has shown that it is not only one of the safest drugs available, but also one of the

most effective in controlling diabetes when the condition is

Conquered: a common fear in early marriage

All too frequently the underlying cause of numerous anxiety symptoms in married patients is the fear of an unwanted pregnancy. This is often brought about by the use of unreliable contraceptive methods. Even today, for example, eleven and a half million people still practice coitus interruptus.

Fortunately, today, married people are less inhibited in their attitudes towards family planning. More and more they turn to you for advice.

To assist you with enquiries of this sort, there are a number of specially edited publications available. Among them are "Modern Family Planning", an informative reference book for patients, which is available in quantity, and a series of leaflets for professional reading. ...do you recommend an external wedge on the shoes?

But the wedges soon wear away; and very often the child is made to feel self-conscious because his shoes look different from other children's. As the diagram on the left clearly shows, any external wedge to heel disturbs the plane of forepart and heel. Surely it's more logical to have a wedge built-in between the inner and the outer sole—where it can correctly corset the foot, remain invisible, and completely unaffected by wear or repair of the shoe. That is how Start-rite INNERAZE shoes are made—on remedial lasts specially adapted to accommodate the internal wedge. That is why they are the only practical and thoroughly effective solution to this problem.

Medihaler-bron

Medihaler-bron adds a new dimension to the treatment of bronchospasm—prolongation of relief. *Medihaler-bron* contains isoprenaline sulphate and atropine methonitrate. Each measured dose of micronised particles gives immediate relief—onset within seconds—and relief is prolonged for hours.

Isoprenaline sulphate produces the full primary bronchodilation which is the patient's first need. Atropine methonitrate prolongs and sustains the all-important initial relief given by isoprenaline.

The widely recognised advantages of *Medihaler* treatment, now with the added benefit of prolonged effect, make *Medihaler-bron* a product with particular clinical advantages for the patient with persistent bronchospasm.

Medihaler-bron is supplied with a new-style plastic oral adapter, which will also shortly be available with *Medihaler-epi*, *Medihaler-iso*, and *Medihaler-iso Forte*.

Medihaler-bron, available in vials of 300 doses, contains a suspension of isoprenaline sulphate 5mg./ml. and atropine methonitrate, 2mg./ml., each dose contained in 0.05 ml. of suspension.

UNCOMMON RELIEF for the common cold with 'EMPRAZIL'

'Emprazil' does more than merely clear stuffy noses — it relieves aches and pains, reduces depression; in fact it alleviates ALL the symptoms of the common cold and 'flu. Dosage for adults is two tablets three times a day; for children over six years, half this amount.

Each 'Emprazil' tablet contains pseudoephedrine, chlorcyclizine, acetylsalicylic acid phenacetin and caffeine.

Slight drowsiness and dry mouth may occur in a few patients. Although pseudoephedrine has negligible pressor effect, caution should be observed in patients with raised blood pressure.

ANXIETY IMPAIRS PERFORMANCE—'MILTOWN' DOESN'T!

Working efficiency, both mental and physical is normally unimpaired on the usual dose of 'Miltown'. On the contrary, with the reduction of tension, anxiety and insomnia, an improved efficiency can be expected. Lack of significant effect on the faculties required for efficient performance, plus unusually low toxicity and relative freedom from side effects, combine to make 'Miltown' perhaps the most useful agent for treating anxiety and tension in the ambulatory patient, both at home

and at work. **INDICATIONS:** 'Miltown' (meprobamate*, Wallace) is indicated in anxiety and tension states, and all conditions in which anxiety and tension are symptoms. **DOSAGE:** The usual dosage of 'Miltown' is one or two 400 mg. tablets three times daily. The recommended starting dose with children is 100 or 200 mg. two or three times daily. **AVAILABILITY:** 400 mg. scored tablets, 200 mg. sugar-coated tablets, bottles of 50 and 250. Detailed information on request.

nortriptyline hydrochloride

***an important new tool in the hands of the doctor
effective in a wide variety of behaviour disorders***

ALLEGRON may be described as a truly *multi-phasic psychotrope*, embodying anti-depressant, anti-anxiety and anti-hostility* activity in a single substance, to a degree of effectiveness comparing favourably with other drugs. Of some 2,000 patients reported on by 150 clinical investigators, almost four out of five showed satisfactory response, and of these, almost four out of five by the end of the second week. ALLEGRON is suitable for patients in and out of hospital. It has also shown particular power to relieve anxiety and depressive symptoms associated with many medical disorders and in childhood and old age. It is a valuable adjunct in psychotherapy.

*In common with drugs to which it is related, ALLEGRON does not counteract hostility in the same way as it controls such symptoms as depression and anxiety. While it may, in some cases, increase hostility, it usually mobilizes or re-directs the hostility in a manner that is therapeutically desirable.

Allegron is a trade mark

Side effects with ALLEGRON are relatively infrequent and usually mild. As with all potent psychotropic drugs, however, certain precautions should be observed. Full information has been or is being made available to all members of the medical profession. Please inquire if you have not yet received it.

Dosage:

Usual recommended dosages (in divided doses) are
20-100 mg. daily for adults,
10-75 mg. daily for children (1-2 mg. per kg. of body weight)

Presentation:

ALLEGRON is available as
tablets 10 mg. (yellow) Basic N.H.S. Cost of 25 tablets

MEDICAL RESEARCH COUNCIL
JUNIOR RESEARCH FELLOWSHIPS
1964-5

The Medical Research Council invite applications for Junior Research Fellowships, tenable at centres in the United Kingdom during the academic year 1964-5.
The Fellowships will ordinarily be restricted to British subjects resident in the United Kingdom who intend to make their careers in medical or dental research in the United Kingdom. The awards are intended primarily for medical graduates who have completed their pre-registration hospital appointments, or for young dental graduates of similar standing. They will also be open to science graduates with postgraduate degrees who wish to have a further period of specialized research experience.

The awards will be made for a period of one year in the first instance and will be renewable annually up to a maximum of three years in all, subject to satisfactory progress. The initial stipend will be between £1,085 per annum and £1,310 per annum, according to the successful candidate's age, qualifications and experience, with superannuation provision in addition. The stipend will be reduced if the Fellow holds at the same time an award from another body to enable him to carry on the same work.
Further particulars, and an application for these Fellowships may be obtained from the Secretary, Medical Research Council, 20 Park Crescent, London W.1, to whom the completed form should be returned not later than March 1, 1964. (9510)

MEDICAL RESEARCH COUNCIL
FELLOWSHIPS IN CLINICAL RESEARCH
1964-5

The Medical Research Council invite applications for a further series of Fellowships in Clinical Research, tenable at centres in the United Kingdom during the academic year 1964-5.

These Fellowships, which are ordinarily restricted to British subjects resident in the United Kingdom, are open to suitably qualified medical or dental graduates who desire to prepare themselves for a career in clinical research. In general, it is intended that each Fellow appointed under the scheme should give an opportunity, as part of his training for clinical research, to study a subject of research in the basic subject most relevant to his particular clinical interest, and to broaden his experience by working in other departments in the United Kingdom. In appropriate cases, arrangements can be made for Fellows to work in the Council's own research establishments, including the National Institute for Medical Research.

The awards will be made for a period of one year in the first instance and will be renewable annually up to a maximum of three years in all, subject to satisfactory progress. Stipend will be within the range £1,370 to £1,940 per annum, the point of entry being determined according to age, qualifications and experience, with superannuation provision in addition.

Further particulars and forms of application for these Fellowships may be obtained from the Secretary, Medical Research Council, 20 Park Crescent, London W.1, to whom the completed form should be returned not later than March 1, 1964. (9511)

THE FAMILY PLANNING ASSOCIATION
The Family Planning Association is looking for a Director (at a salary of about £5,000). This is a new appointment; there are no precedents. But we are looking for a man of high standing with the medical profession who would regard the task of administering the Association and directing its wide and rapidly developing medical and scientific activities as an exciting and thoroughly worthwhile challenge.

Our man will need to be good at administration, to like all types of people and to be interested in the medical side of fertility control. Big developments in the F.P.A. structure and function are likely within the next few years. The new Director will be much concerned with these.

Applications or enquiries to Brigadier R. C. Elstone, C.B.E., M.C., General Secretary, Family Planning Association, 231 Tottenham Court Road, London W.1. (9763)

SCHOLARSHIPS**THE NUFFIELD FOUNDATION POSTGRADUATE SCHOLARSHIPS IN FOOD SCIENCE**

The Nuffield Foundation is prepared to offer annually up to five scholarships for science graduates and three scholarships for medical or veterinary graduates, to help advance fundamental research in food science. The Foundation hopes these awards will attract more people to make a career in the field of food science research. The awards, tenable for periods of up to four years, are intended to provide research experience to Ph.D. level together with some formal training in selected subjects. The choice of subjects for study and research will be related to a candidate's background and interests, with special reference to toxicology, pharmacology or pathology. The value of the awards will be fixed according to age, qualifications and experience, and can be supplemented by the amount of fees, marriage and child allowances, and in appropriate cases, research expenses. The scholarships are open to men and women holders of a science, medical or veterinary degree of a U.K. or other Commonwealth university.

Applications should be submitted by March 1, 1964. Further particulars and forms of application are available from the Director, Nuffield Foundation, Nuffield Lodge, Regent's Park, London N.W.1. (9319)
