RECORD THE FACTS AT THE TIME

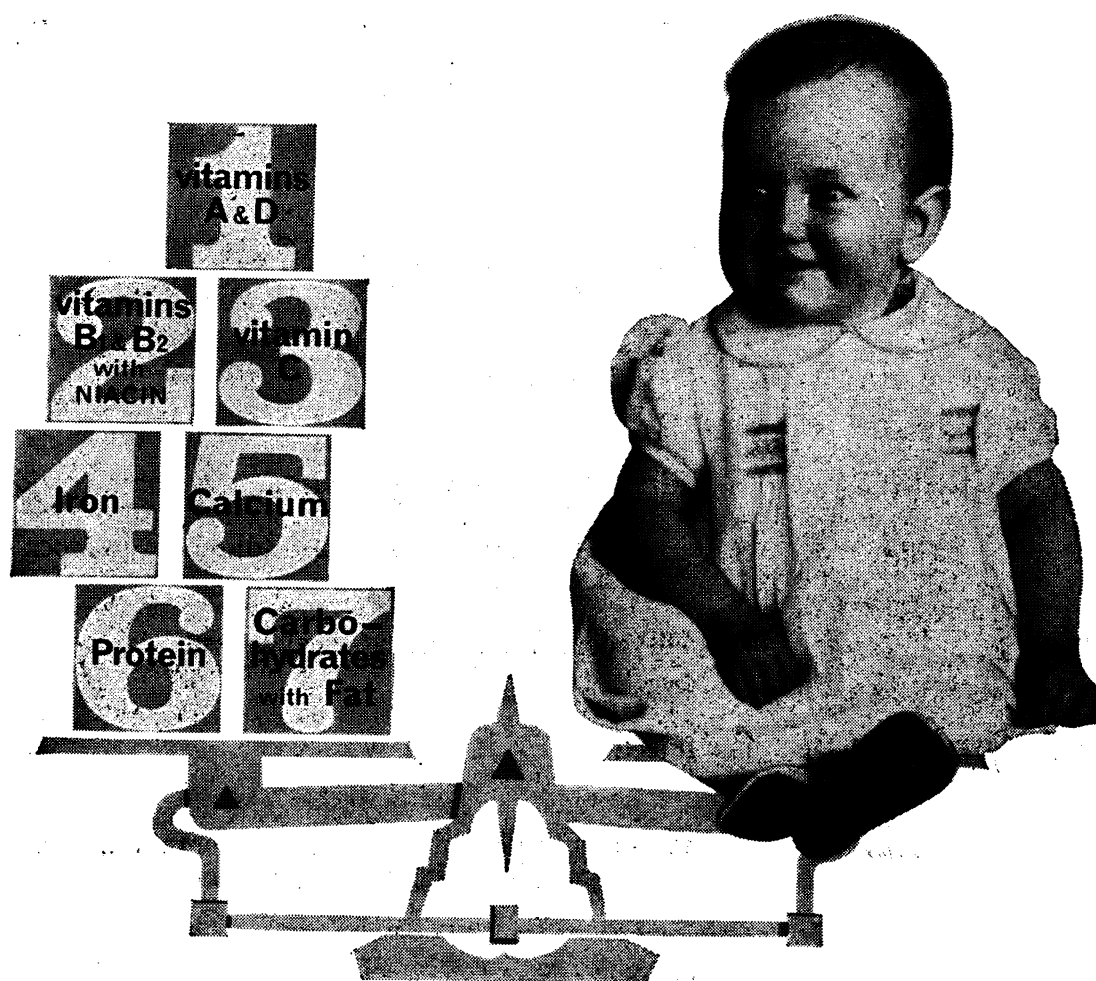

WITH A  **PHILIPS 83** PORTABLE DICTATION MACHINE

The new Philips 83 is extremely light and *really* portable for on-the-spot recording anywhere. It is simple to operate. It can be used even in noisy surroundings: the special microphone cancels background noise. When recording observations, the 83 Portable allows full concentration because you need never look away from the patient or X-ray film—and hands can be left free for examination or for adjusting equipment. It runs on ordinary torch batteries. The easy-to-load cassettes eliminate tape threading and record for a full 40 minutes. Completely compatible with Philips 82 mains-operated Dictation Machines.

for the patient
with angina pectoris

Synadrin is chemically unrelated to any known treatment for coronary disease. Its specific activity has been demonstrated in animal experiments¹¹⁻¹⁷ and it has been tested in over 1,000 patients.¹⁻¹⁰ Results of trials so far reported have been promising and Synadrin has been described as "an effective drug for treating angina pectoris."¹¹

Effective and safe Synadrin has been shown to reduce the frequency of anginal attacks. It is particularly successful in patients with coronary ischaemia with or without previous infarction. It produces prolonged improvement of the coronary blood supply, and consistent treatment over a period of weeks produces the best results. Synadrin is well tolerated and its safety has been shown by use in more than 1,000 patients over the last two years.

Dosage Treatment may be initiated with 2 tablets, three times daily, reducing after three days to a maintenance dosage of 1 tablet two or three times daily.

Presentation Synadrin is presented as tablets, each containing 15 mg. of prenylamine lactate in bottles of 30 and 150 at basic NHS prices of 8/8d. and 34/8d. (subject to P.T.).

Synadrin is known in some other countries as Segontin.

Report on Surgical Hosiery

There are five types of surgical elastic stockings that can be prescribed by the Medical Profession and are included in the Drug Tariff. The one-way stretch stocking is intended for very severe cases; the remaining four are all intended for mild or medium degrees of varices. Two of these types are knitted, the other two being made from elastic net.

Net stockings—either in medium or lightweight form—possess many advantages that the knitted ones do not. These can be summarised as follows:

1. They are *always* made to measure. Thus if a patient's right leg varies from the left, a pair is supplied made to the individual measurements of each leg.
2. The open mesh allows plenty of ventilation and permits free air circulation. This ensures that the stockings are comfortable, firm and cool to wear and that the patient really will use them.
3. The honeycomb mesh of the net gives excellent circumferential support. The result is that the stocking really grips the leg, and doesn't merely support it by an uncomfortable downward pull on the suspender belt.

In addition, there is the economic factor. The Drug Tariff cost of a pair of standard weight knitted stockings is 35/6, whereas a pair of elastic net stockings costs only 27/-, resulting in a saving of nearly 10/- to the country—a saving made without any sacrifice of benefits. Net stockings are the best from both the medical and surgical point of view, and also from the patient's since they are comfortable, are not unsightly, and are guaranteed for six months.

This report is issued by Lastonet Products Ltd., Dept. BM 1, of Redruth, Cornwall. Lastonet supply all five types of stockings on the Drug Tariff, and after twenty years' experience regard the net stocking—and in particular the new lightweight net stocking—as the best hosiery for mild and medium cases of varices. A comprehensive guide to elastic hosiery, its use, care and prescription, is available on request.

SIDROS — a new name in Iron Therapy

In the treatment of iron-deficiency anaemia many iron salts are capable of producing the desired increase in haemoglobin level. Some also have a tendency to produce side-effects, and there can be a high element of non-absorption.

SIDROS is designed to overcome the known disadvantages and to provide a *reliable treatment for iron-deficiency anaemia*. It contains ferrous gluconate which pro-

duces a highly satisfactory clinical response and is very well tolerated. Sidros also contains ascorbic acid, which is known to aid the absorption of iron. Its action in Sidros is to maintain iron in the reduced state for absorption. Sidros is presented as tablets, each containing *ascorbic acid (stabilized) 30 mg and ferrous gluconate 300 mg* at a basic N.H.S. price of 2/8 for 100 tablets as dispensed from 1000 tablet bottle. Samples of Sidros are available on request.

HAYGEN & BRONCHAGEN

HAYGEN and BRONCHAGEN are the logical outcome of research by the Bencard Allergy Unit in the field of specific desensitising vaccines. This has led to the development of two new standard vaccines, one for the effective treatment of hay fever and the other for allergic asthma and perennial rhinitis. Clinical experience has shown that the allergens incorporated in Haygen and Bronchagen are responsible for symptoms in more than 80% of 'classical' hay fever and at least 70% of allergic asthma patients. With this simplified treatment based on the case history alone, patients may expect substantial relief or even complete freedom from symptoms.

for low-cost
griseofulvin
treatment

GRISOVIN-FP

fine particle
griseofulvin for
greater absorption

DURATION OF TREATMENT

Treatment should be continued for at least four weeks, but it must vary with the site and nature of infection. Thus treatment should be extended for infections involving the nails or where the keratin layer is thickened as in the soles of the feet; in such cases, it is best continued for at least two weeks after clinical symptoms have disappeared. GrisoVin-FP given orally exerts its activity systemically, and endows newly formed keratin with the power to resist fungal attack. The time taken for this resistant barrier to reach the surface completely will vary with the different structures, e.g. thin body skin, thickened palms and soles, hair and nails etc. Cure is demonstrably complete when it is no longer possible to see the fungus microscopically or by culture, but the infected skin in most cases shows a rapid and remarkable improvement in a very short time.

CLINICAL USE

Grisovin-FP given by mouth, has remarkable activity against dermatophyte (tinea) infections of the skin, hair and nails. Accurate diagnosis and selection of cases is desirable, and it should be recognised that minor superficial fungal infections can often be successfully treated by topical remedies.

DOSAGE

The significance of griseofulvin blood levels and their duration in relation to therapeutic effectiveness is not yet clearly established. As judged by comparative ability to produce blood levels, the dosage of GrisoVin-FP usually employed for adults is likely to be four tablets (500 mg) daily. Higher dosage may be needed in some cases to produce full therapeutic effect and in such instances up to eight tablets (1.0 gram) or more daily, may be given, at least for a period. Correspondingly, dosage for children usually will be two or three tablets (250 or 375 mg) daily.

In an objective study comparing **Alupent**, ephedrine, isoprenaline and methoxyphenamine by mouth spirometric measurements showed that **Alupent** 20 mg. produced the largest and most sustained bronchodilator effect over a period of four hours¹

In a series of asthmatic and bronchitic patients treated over a two-year period 20 mg. of **Alupent** orally q.d.s. was shown to be an effective dose for routine use

In this series **Alupent** was given for long periods of time without the need for interruption of treatment because of side-effects²

penicillin-sensitive
infections

The problems of the teens are legion and, during the transition from childhood to adulthood, such things as eating fads, the wearing of inadequate clothing etc. may easily leave the teenager open to infection. When infection strikes, palatable, fruit-flavoured oral Penidural* acts fast to bring a quick return to normal activity. Its simple 6-8 hourly dosage scheme allows your patients maximum rest. Supplied in bottles of 60 ml. Each 5 ml. contains 250 mg. Benzathine Penicillin B.P. (equivalent to 300,000 u. Penicillin G.). John Wyeth and Brother Limited, Taplow, Maidenhead, Berkshire.

A major new antihypertensive agent from Abbott

Eutonyl* is an important new drug for the treatment of moderate to severe essential hypertension. Most hypertensive patients respond to Eutonyl therapy with a reduction of both systolic and diastolic blood pressures in the standing position, and many also experience significant reductions in other positions.

Many hypertensive patients have been impressed by an improved sense of well-being; and while the use of Eutonyl in the treatment of depression is still being evaluated, in this respect alone it offers a useful advance over other antihypertensive agents.

Eutonyl is a unique non-hydrazine chemical substance with monoamine oxidase inhibiting properties. Extensive laboratory and clinical studies have so far shown no serious toxicities, though suitable precautions should be

observed as with all new drugs. The side effects of Eutonyl therapy are relatively infrequent and mild if dosage is adjusted to prevent orthostatic hypotension. The combination of a thiazide diuretic such as Enduron* (methyclothiazide, Abbott) with a reduced dosage of Eutonyl further reduces side effects and also enhances the antihypertensive response in the sitting and lying positions.

Eutonyl is supplied in two strengths as Eutonyl (25 mg pargyline hydrochloride) and Eutonyl-Ten (10 mg pargyline hydrochloride) Filmtabs*, in bottles of 100.

Comprehensive literature is available on all aspects of this important new agent: dosage, side effects, precautions and the wide measure of agreement on its clinical efficacy even in the most difficult cases.

'ATROMID' PRESENTATION

250 mg. colourless, soft-gelatin capsules of ethyl chlorophenoxyisobutyrate
244.5 mg. with androsterone 5.5 mg.

DOSAGE

An average eight capsules daily taken divided after meals.
The basic N.H.S. cost of one week's treatment is 16/3d + P.T. (when dispensed from a 1,000's pack).

"In a symposium* held lately at Buxton, earlier suggestions that it ('Atromid') would reduce raised serum-lipid levels without significant side-effects were amply substantiated. Now it is clear that 'Atromid' not only influences several lipid fractions but also affects platelet stickiness and fibrinolysis."

Lancet, 1963, i. 1363

It has been shown that:

- 'ATROMID' LOWERS ELEVATED SERUM LIPIDS
- 'ATROMID' CORRECTS EXCESSIVE PLATELET STICKINESS AND REDUCES PLATELET TURNOVER
- 'ATROMID' INCREASES FIBRINOLYTIC ACTIVITY AND REDUCES PLASMA FIBRINOGEN

Ethyl Chlorophenoxyisobutyrate (I.C.I. 28,257)

Because of the evidence that ethyl chlorophenoxyisobutyrate exerts a profound lipid lowering effect 'Atromid'-S is now available for physicians wishing to use it for the treatment of lipid disorders. Further studies are in progress to determine whether this compound alone exerts the full beneficial effects of 'Atromid'.

STREPSILS RESTORE COMFORT IN SWALLOWING

The inability to swallow in comfort is one of the most common and distressing symptoms in these conditions. Strepsils provide safe, effective local relief in infections of the mouth and throat. Strepsils contain neither antibiotic nor local anaesthetic; the sensitising potential is thus very low and bacterial resistance does not develop. The two powerful antiseptics in Strepsils act quickly against a wide range of organisms. The sugar base dissolves slowly, enabling the antiseptics to exert a prolonged effect.

Formula: Each lozenge contains 1.2 mg of Dybenal, (2,4-dichlorobenzyl alcohol) and 0.6 mg of amyl-meta-cresol, in a special base.

Psoriasis

Clinical tests confirm Alphosyl's effectiveness

Accumulating evidence increasingly underlines Alphosyl's effectiveness in cases of psoriasis, even in those that have proved intractable to other forms of treatment. Its success is attested by the fact that after only 2 years Alphosyl Lotion became the leading branded preparation for psoriasis in this country.

New Alphosyl Cream Following the success of Alphosyl Lotion, this coal-tar and allantoin combination is now available in Britain as a lubricating cream. The cream base has proved a particularly effective vehicle for Alphosyl as it incorporates a combination of free fatty acids (saturated and unsaturated) naturally occurring in triglycerides, sterols and esters to give the lipid phase of the base a significant resemblance to the lipid array of normal human skin¹.

Clinical Trials The table below gives the results of four different clinical trials which show the effectiveness of Alphosyl in lotion and in cream form.

No. of patients	100% cleared	75%–99% improved	50%–74% improved	25%–49% improved	No improvement
62 ³	29	26	7	0	0
50 ⁴	11	16	17	6	0
41 ¹	27	9	5	0	0
96 ²	44	29	15	0	8

Why Alphosyl is so effective In Alphosyl, allantoin and a specially refined coal-tar extract were combined for the first time. Allantoin has been found to be particularly effective in loosening psoriatic scales⁵, while the keratoplastic effect of coal-tar is well known⁵. Alphosyl is non-greasy and non-staining and vanishes on application. It is notably safe,^{5,4} being free from the risks which are found in other forms of treatment such as arsenicals, mercury, corticosteroids, x-ray, etc. It certainly deserves a trial in all cases of psoriasis.

Stafford-Miller Limited, Hatfield, Herts. by arrangement with Reed & Carnrick, Kenilworth, New Jersey, USA.

Alphosyl Lotion formula – special coal-tar extract 5% + allantoin 2% in a smooth, non-greasy lotion base.

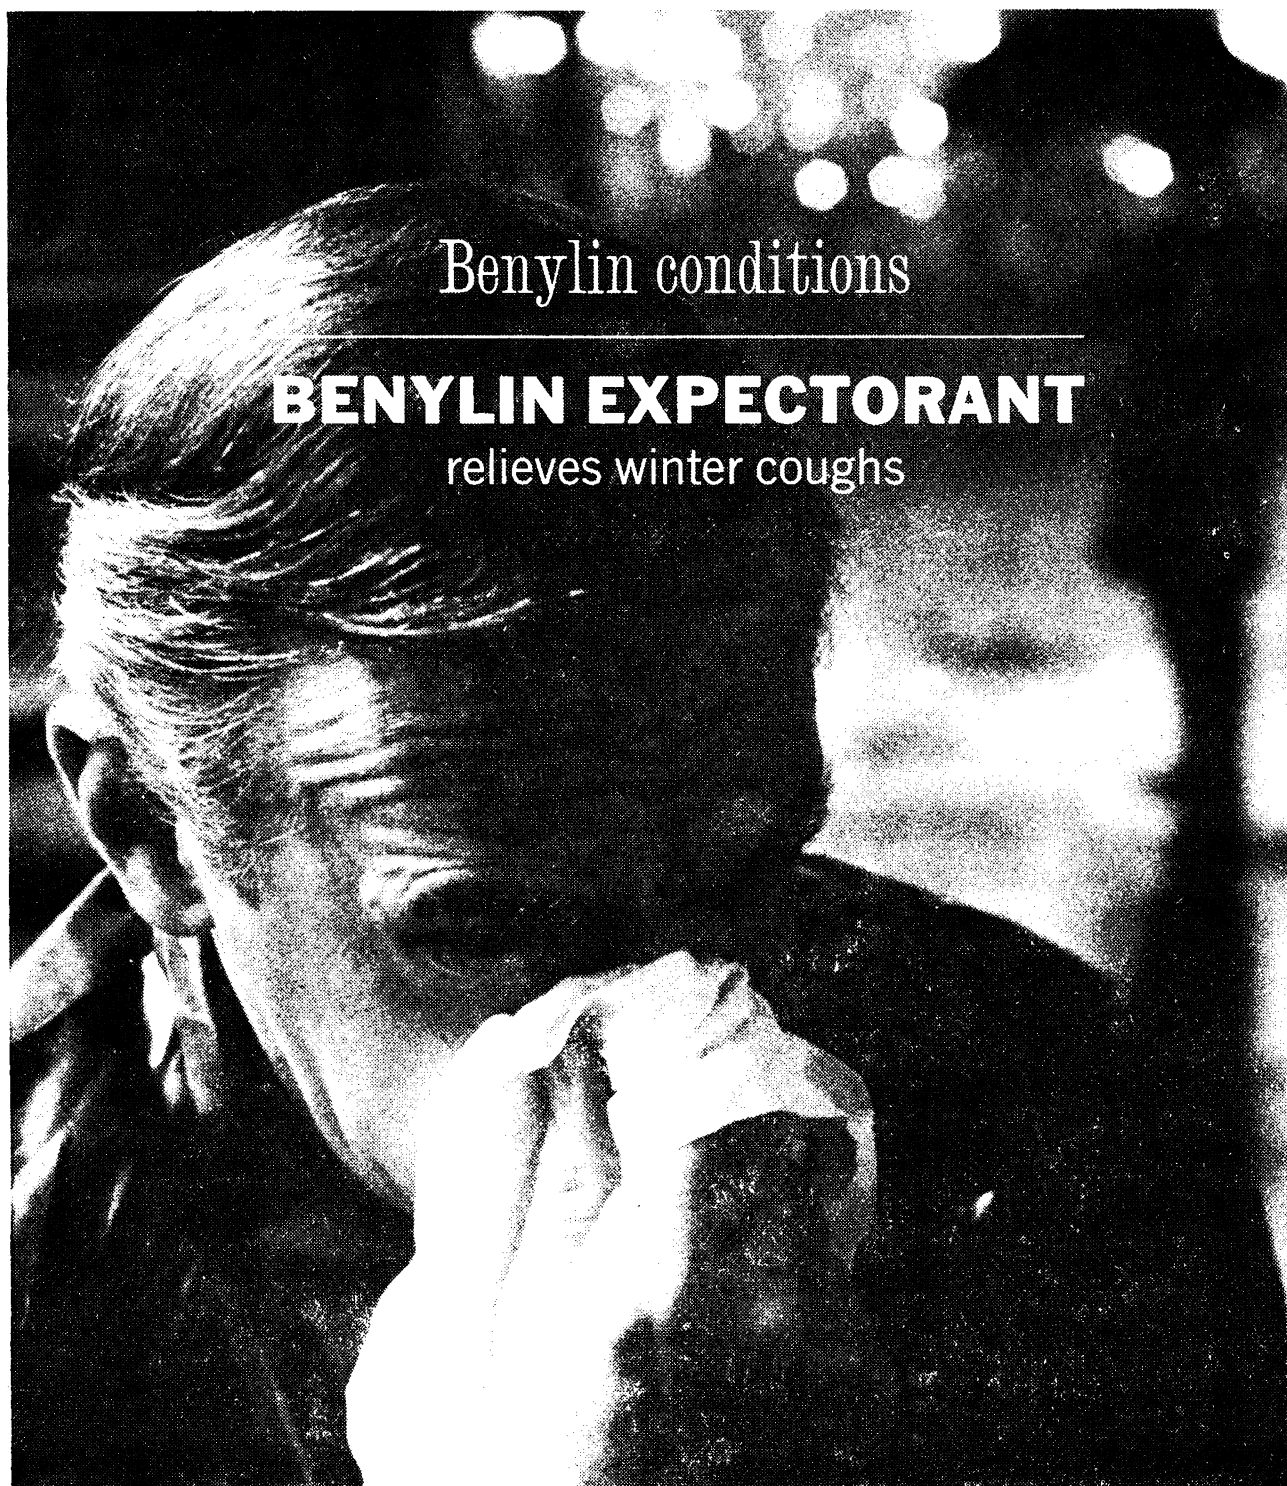

Alphosyl Cream formula – allantoin 2% + 90% alcoholic extract of coal-tar (5:1) 5% in a vanishing cream type base.

the antidepressant with intrinsic tranquillising properties

TRYPTIZOL is an outstanding antidepressant, particularly valuable for its tranquillising effect on the anxiety and insomnia—characteristically early morning awakening—which so often accompany depression.

TRYPTIZOL is indicated in all forms and presentations of depression. Other symptoms which may be expected to respond well include functional somatic complaints, loss of

interest, loss of appetite, feelings of guilt, slowing of emotional and physical reactions.

TRYPTIZOL is well-tolerated and serious toxic side reactions are extremely rare. It is *not* a monoamine oxidase inhibitor.

TRYPTIZOL is supplied as tablets of 25 mg and 10 mg, as a syrup and as an injection. Detailed information on indications, dosage, administration, precautions and bibliography is available on request.

Holidays are periods of gay, carefree, relaxing, invigorating, lazy or energetic days and nights but, should you be thinking of going abroad this summer, bear in mind that, apart from yourself so, according to an estimate, will over 3,999,999 other people, therefore plan carefully.

You know already, of course, it is wise to avoid late July, August and early September if family circumstances permit. Remember, though, that many hotels and motels in this country and overseas are quite happy to accept mid-week bookings, particularly if they are dependent upon visitors arriving by water or air, as services at the week-end are already stretched nearly to breaking point.

In a short article like this it is not possible to cover the wide range of tours and cruises that are increasing each year—cruises to Greece and the Greek Islands, the Dalmatian coast, Africa and the Mediterranean ; holidays in Spain, Italy, Yugoslavia, the spas of Germany and the beautiful country districts of France. The only practical suggestion that can be made is, read the advertisements, ask your wife or secretary to write for brochures, and go and have a chat with a Travel Agent.

By the way, most people have an odd sense of fatalism in their make-up—it is always the "other man's" car that breaks down, the

To enjoy health and that good humour others envy! How many boast these blessings as a birthright—and to how many are they but a vain dream? For the latter, a fortnight's cure in Germany may spell salvation; there, every spa and health resort—of which there are over two hundred—offers every means for the restoration of health. The healing resources of nature added to modern bathing installations and therapeutic treatments carried out under the guidance of experienced physicians ensure a solid and lasting recovery.

A cure in a spa will revitalize you

'other man's' wife or children who become ill or have an accident on holiday or, even worse still, just before the holiday starts. In case it is the "other man's" sense of fatalism that is more realistic than your own it is very wise to take out an insurance for medical expenses if you are travelling abroad as not many countries are as friendly to their visitors as we are. For a mere pound or so for each person you can be reimbursed up to £250 for medical care and treatment or as a refund on any bookings that have to be cancelled at the last moment.

A final thought—if you want to be a little different from your friends and neighbours, why not discover or rediscover the charm of this country? The standards of comfort and cuisine in most hotels are equal to those on the Continent and in any case you will be able to enjoy the notoriety of not having "G.B." on your car!

UNUSUAL HOLIDAYS FOR SPECIAL PEOPLE

with special interests, and foibles, are just one of our specialities. If you are a gardener or a batanist (or just love spring flowers); find ancient sites enthralling (or just want to potter with your camera); like lazing on island beaches in the sun; prefer climbing mountains or swimming in the Dead Sea; simply loathe being organized but do enjoy distinguished guidance and agreeable company; don't care for luxury but do insist on comfort—then our

PLANNED HOLIDAYS WITH A DIFFERENCE are for you. (We can even probably find you a single room provided you do not leave your booking too late.) We offer SITES and FLOWERS IN GREECE (or in THE LEBANON, SYRIA and JORDAN) in spring, as well as A HELLENIC CRUISE to SARDINIA, GREECE, TURKEY, ITALY and SICILY; a fascinating expedition into the remoter parts of Turkey (but including West Coast sites and Istanbul as well); plant-hunting in the Swiss Alps; an exciting tour of KASHMIR, PAKISTAN and PERSIA and a lovely LATE SUMMER HELLENIC CRUISE as well. You are always accompanied by an expert in the field and always cared-for by experienced people everywhere. But DO PLEASE BOOK EARLY: our tours are always limited to about 30 participants.

A SPENCER support for the Paraplegic Patient

This paraplegic patient at the age of 25 developed symptoms in 1943 of stiffness in the neck and pain in the right hip. Condition was diagnosed as a tumour inside the spinal cord (glioblastoma multiforme). The site of the tumour: C4, 5, and 6.

Two operations were performed and X-ray therapy given.

A Spencer Dorso-Lumbar Support with rigid bracing at back and front was applied which enabled the patient to use his special walker for exercise.

Abdominal muscles are paralysed and a special Spencer Abdominal Spring Pad incorporated in his support has been helpful in assisting respiration and relieving symptoms of constipation and indigestion.

Prognosis is poor but patient is comfortable

so long as he wears the support and does not attempt to be too active. Because he is unable to sit erect without high support to his back and uplift for his diaphragm and chest, Spencer Designers created the support (as shown) to come up well over the chest to enable the patient to sit up with more comfort. Elastic gores at top sides assist in respiration. Special hip pads protect the prominent hip bones.

THE JAMES SMELLIE BURSARIES

The James Smellie Bursaries were founded in 1962 by Mrs. H. K. Smellie in memory of her husband, the late Professor J. M. Smellie, Professor of Paediatrics and Child Health in the University of Birmingham from 1946 to 1958. Throughout his life Professor Smellie taught and practised the human approach to clinical paediatrics and the purpose of the Bursaries encourage this attitude in doctors in training by giving them the opportunity of increased experience in the art of personal doctoring and a more intimate acquaintance with the patient's environment, and child health.

Applications are invited for two Bursaries to the value of 75 guineas each, to be awarded to Senior Registrars or Registrars in Paediatrics. The holders will be required to work for one month in one or more of the following ways:

(a) In the practice of an approved general practitioner.

(b) In a Health Centre working in close collaboration with a Local Authority.

(c) In the Almoner's Department of an approved hospital.

(d) In any other way approved by the Advisory Committee for the Trust for the study of human problems in relation to paediatrics and child health.

The work of the Bursar should ordinarily be undertaken in a centre other than the one in which he is training. The Bursar may hold his Bursary in any place which, in the opinion of the Trustees, fulfils the conditions of the Trust but the heads of the University Departments of Paediatrics in Birmingham, Bristol, Cardiff, Guy's, Newcastle and St. Mary's have agreed to plan and supervise a suitable programme for a Bursar. Each holder of a Bursary will be expected to submit a short account of his or her experience.

Applications for the award of the James Smellie Bursaries should be sent before February 8, 1964, to Professor D. V. Hubble, Department of Paediatrics and Child Health, The Children's Hospital, Ladywood Road, Birmingham 16. Applications should be supported by two referees and should include a scheme of studies for approval by the Advisory Committee. (5090)

SERVICES

A PRACTICE AS WIDE AS THE WORLD

In the Medical Branch of the Royal Air Force you gain wide clinical experience. You travel the world and among the subjects with which you will become familiar are tropical medicine, rescue operations, the care of airborne patients and medicine in relation to flying. You will also be expected to contribute to research.

As Medical Officer on a Royal Air Force Station you have a vigorous general practice among the officers, men and their families. You enjoy complete clinical freedom in charge of sick quarters with your own beds, and you will be assisted by a well-trained nursing and clerical staff. You and your family can live comfortably and near your surgery.

Your salary and career prospects are good: as a married man drawing full allowances you could receive £2000 per year on entry. If you have post-graduate civilian experience you could be granted up to seven years back-dated seniority. Pensionable career commissions or short service engagements entitling you to a generous tax-free gratuity on completion are still available to the right applicants.

GRADUATES AND MEDICAL STUDENTS

If you are a pre-registration year graduate or a senior medical student you may apply for a commissioned cadetship. This will enable you to finish your pre-registration house jobs or medical training as an officer in the R.A.F. drawing full pay and certain allowances. On completion you will serve on a long or short service engagement in the Medical Branch of the Service.

For details of entry to the Royal Air Force as a registered doctor, a graduate or a medical student, write to the Director-General of Medical Services, Air Ministry (M.A.I.), (HN 53W), 1 Tavistock Square, London, W.C1.

PSYCHIATRIC TRAINING IN THE
UNITED STATES

A full three years training programme in comprehensive psychiatry is available in a University Department of Psychiatry to qualified British graduates. Applicants must have finished their pre-registration year by the time they begin training, and be medical graduates of at least one of our standing. They must hold the E.C.F.M.G. certificate.

Training is fully approved by the American Board of Psychiatry and Neurology and prepares physicians for the D.P.M. examinations, and for the British Graduate's examination. A student status of with a permanent immigrant's visa. Opportunities for trained psychiatrists are many and varied in this region, and British graduates find themselves very well accepted.

The training programme begins with a one-year assignment in an acute treatment centre, and some experience with chronic psychiatric patients. The second year of training includes neurology, working with clinic outpatients, experience in child psychiatry, and with consultation on other hospital services. Such training is continued during the third year, which also includes an elective period of time which may be spent in one of several areas, including research. The department is also involved in a wide range of social and community psychiatry and is also expanding in the areas of child psychiatry and psychiatric research. Fourth and fifth years of training are available for those who wish to go on to psychiatric sub-specialties or research. The three-year programme prepares the physician to enter one or more types of psychiatric work such as private practice, hospital psychiatry, clinic psychiatry, teaching, community psychiatry, research, etc.

Training takes place in the stimulating environment of a large department of psychiatry with over twenty full-time psychiatrists and over ten full-time psychologists. Many of the psychiatrists are psychoanalytically trained, but the programme is comprehensive and includes: somatic therapies, psychopharmacology, sociology, psychology, genetics, neuroanatomy, neurophysiology, neurology, etc.

The salary (now under revision) in the first year will be a minimum of \$3,670, with increases for the second and third years. Vacancies exist for July 1, 1964, also at other times in the future. Although applicants for the full three-year programme are preferred, consideration will be given to physicians with one or two years' training in psychiatry elsewhere. Assistance with a loan for transportation expenses can be negotiated where required.

Write for further details and at the same time contact your nearest American Embassy if you are seriously interested in applying for 1964, as obtaining a visa takes some time. Feel free to send a résumé of professional experience at the time of first writing. Address inquiries to Professor John A. Ewing, M.D.(F.R.C.), D.P.M.(Lond.), Department of Psychiatry, School of Medicine, University of North Carolina, Chapel Hill, N.C., U.S.A. (5213)

TARANAKI HOSPITAL BOARD

New Plymouth, New Zealand

WHOLE-TIME OR PART-TIME SURGICAL SPECIALIST IN ORTHOPAEDICS

Applications, closing on February 7, 1964, are invited for the post of Orthopaedic Specialist at the New Plymouth Hospital, New Zealand.

For a whole-time appointment the salary will be within scale £1,980 to £2,340, the actual commencing rate to be determined by the Medical Officers' Salaries Grading Committee. An unfurnished three-bedroom house or a partly furnished flat could be made available at a rental in accordance with the Hospital Employment Regulations.

For applicants at present overseas, travelling expenses to New Zealand would be provided on arrival in accordance with the currently approved policy.

Although a full-time appointment is being advertised in the first instance, consideration will be given to applicants who prefer a part-time appointment, and an appointment on a 10/10ths visiting specialist basis can be made available if preferred. There is at present no orthopaedic Surgeon in the Taranaki province so that an excellent opportunity exists in this specialty.

Full conditions of appointment available from the New Zealand High Commission, London.

Applications, stating age, marital status, qualifications, details of previous posts and past positions, and naming two medical referees, should be addressed to the Secretary, P.O. Box 95, New Plymouth, New Zealand. (5128)

President: The Earl Spencer.

Medical Superintendent: Dr. J. O'Connell, M.D., D.P.M.

This private hospital receives patients, both male and female, suffering from nervous and mental disorders, including alcoholism and senile illnesses. The fees range from fifteen guineas per week. Private rooms with special nurses can be provided, either in the hospital or in one of the villas in the grounds. The hospital is situated in 130 acres of pleasant grounds which provide all recreational facilities. These include a nine-hole golf course, sports ground, tennis courts, etc. A Recreation and Occupation Centre, known as Gloucester House, has been opened recently which includes an occupational therapy department, a swimming pool, a squash court, and a library with an adjoining reading room.

WANTAGE HOUSE

This is a separate reception unit to which patients may be admitted. It is equipped for the complete investigation of nervous and mental disorders by the most modern methods. All forms of treatment are available. It contains laboratories for biochemical, bacteriological and pathological research.

MOULTON PARK

Some two miles from the main hospital is the farm of approximately 600 acres. Occupational therapy is a feature of this branch and patients are given every facility for occupying themselves in farming, gardening, fruit growing, etc.

For terms and further particulars apply to the Medical Superintendent (Telephone No.: 34354 Northampton), who can be seen in London by appointment.
