The consequences of this effect in favourable cases may be rapid epithelialization of chronic ulcers ; rapid relief of painful cellulitis, and accelerated healing of deeper lesions."**

## *New Product*

### For the treatment of asthma

#### *Brand Name*

**'VORTEL'**

#### *Active Ingredients*

Clorprenaline, Ethomoxane and Methapyrilene.

#### *Indications*

All conditions in which bronchospasm is present in adults and children, particularly in relaxing spasm of the bronchioles in bronchial asthma. As a prophylactic in the control of asthma.

#### *Dosage*

##### *Prophylactic*

'Vortel' may be given on a continuous prophylactic basis during the period of incidence in seasonal asthma and throughout the year in perennial asthma.

Children under 5 years:  $\frac{1}{2}$  to 1 teaspoonful of the syrup three times a day.

5-10 years: 1 to 2 teaspoonfuls of the Syrup (or 1 to 2 'Pulvules') three times a day.

Adults and Children over 10 years: 1 to 2 teaspoonfuls of the Syrup or 1 to 2 'Pulvules' three or four times a day.

##### *In acute attacks*

Children under 5 years:  $1\frac{1}{2}$  to 2 teaspoonfuls of the Syrup.

Adults and Children over 5 years: 2 to 3 teaspoonfuls of the Syrup or 2 to 3 'Pulvules.'

This increased dosage may be given, if necessary every three or four hours for the duration of the attack—although the attack will generally be controlled within 20-25 minutes. Prophylactic dosage should be continued after the attack has subsided.

#### *Contraindications*

There are no known contraindications to the administration of 'Vortel' other than sensitivity to antihistamines.

#### *Side-effects*

Like other bronchodilator agents, clorprenaline may produce side-effects through stimulation of the central nervous system. To offset this, a counter-balancing dose of ethomoxane has been added.

#### *Availability*

Syrup 'Vortel.' Bottles of 4 and 16 fl. oz. (No. 123).

'Pulvules,' 'Vortel.' Bottles of 100 and 500 (No. 358).

## Betamethasone in General Practice

Betnelan (betamethasone) is particularly well suited for low or 'physiological' dose therapy of rheumatoid arthritis. It has high anti-rheumatic activity, but shows improved gastro-intestinal tolerance, has virtually no effect on electrolyte balance, and has no depressive action on mental function. A further development with betamethasone has been the introduction of Betnesol Tablets. They dissolve spontaneously in water to form a palatable, tinted, clear solution, offering rapid and consistent absorption. Betnesol is well tolerated because no solid steroid reaches the stomach. It is the most acceptable and advanced form of oral corticosteroid therapy that you can give your patients.

## ANTIBIOTICS AND THE INTESTINAL FLORA

Treatment with broad spectrum antibiotics suppresses the normal flora, which may be replaced by abnormal resistant organisms causing diarrhoea.

This change can be prevented or reversed by the implantation of *Lactobacillus acidophilus* which has been rendered antibiotic-resistant, and is thus able to multiply freely under these abnormal conditions. This organism itself forms an antibiotic which may contribute to its rapid preponderance over other species.<sup>1, 2</sup>

Oral treatment with antibiotic-resistant *L. acidophilus* in the form of ENPAC has been shown to eliminate *Candida* from the faeces of infants with antibiotic-induced diarrhoea, with relief of symptoms succeeded by rapid gain in weight<sup>3, 4</sup> and greatly to reduce the numbers of staphylococci in the faeces of patients treated with tetracyclines.<sup>5</sup>

## SIDROS — a new name in Iron Therapy

In the treatment of iron-deficiency anaemia many iron salts are capable of producing the desired increase in haemoglobin level. Some also have a tendency to produce side-effects, and there can be a high element of non-absorption.

**SIDROS** is designed to overcome the known disadvantages and to provide a *reliable treatment for iron-deficiency anaemia*. It contains ferrous gluconate which produces a highly satisfactory clinical

response and is very well tolerated. Sidros also contains ascorbic acid, which is known to aid the absorption of iron. Its action in Sidros is to maintain iron in the reduced state for absorption. Sidros is presented as tablets, each containing *ascorbic acid (stabilized) 30 mg and ferrous gluconate 300 mg* at a basic N.H.S. price of 2/8 for 100 tablets as dispensed from 1000 tablet bottle. Greater potency can now be achieved with *Thiaver*. Results of treatment in over 1100 patients over many months have amply demonstrated the ability of *Thiaver* to lower blood pres-

Its action is complemented and enhanced by *Veriloid* which is recognised as an effective antihypertensive agent which lowers blood pressure through central mechanisms. Patient management with *Thiaver* is simple because tolerance does not develop and the dosage remains constant at two tablets daily. *Thiaver* is ideally suited for long-term treatment when therapy with milder agents is inadequate. It does not cause postural hypotension or impair mental acuity.

BRAND NORTRIPTYLINE

*new wide spectrum mood enhancer  
lends wings to troubled minds*

'When the patient is overwhelmed by normal everyday stresses, 'Aventyl' often brings prompt relief. Even in the more serious behaviour disturbances—whether marked by depression or anxiety, or both—'Aventyl', with its unusually wide spectrum of action, broadens the doctor's power to relieve the troubled mind swiftly.

'Aventyl' has an inherent beneficial effect on anxiety and hostility—it is not a combination of an anti-depressant with a tranquillizer, but a *single entity* going beyond mere antidepressant action as such. Four out of five patients with symptoms referable to anxiety and depression (including psychosomatic disturbances) are likely to respond favourably to 'Aventyl', many of them within a week.

'Aventyl' is not a monoamine oxidase inhibitor.

## Clinical tests confirm Alphosyl's effectiveness

Accumulating evidence increasingly underlines Alphosyl's effectiveness in cases of psoriasis, even in those that have proved intractable to other forms of treatment. Its success is attested by the fact that after only 2 years Alphosyl Lotion became the leading branded preparation for psoriasis in this country.

**New Alphosyl Cream** Following the success of Alphosyl Lotion, this coal-tar and allantoin combination is now available in Britain as a lubricating cream. The cream base has proved a particularly effective vehicle for Alphosyl as it incorporates a combination of free fatty acids (saturated and unsaturated) naturally occurring in triglycerides, sterols and esters to give the lipid phase of the base a significant resemblance to the lipid array of normal human skin<sup>1</sup>.

**Clinical Trials** The table below gives the results of four different clinical trials which show the effectiveness of Alphosyl in lotion and in cream form.

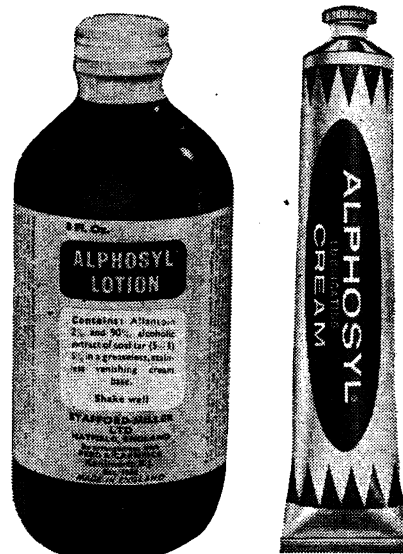

No. of patients	100% cleared	75%-99% improved	50%-74% improved	25%-49% improved	No improvement
62 <sup>3</sup>	29	26	7	0	0
50 <sup>4</sup>	11	16	17	6	0
41 <sup>1</sup>	27	9	5	0	0
96 <sup>2</sup>	44	29	15	0	8

**Why Alphosyl is so effective** In Alphosyl, allantoin and a specially refined coal-tar extract were combined for the first time. Allantoin has been found to be particularly effective in loosening psoriatic scales<sup>5</sup>, while the keratoplastic effect of coal-tar is well known<sup>5</sup>. Alphosyl is non-greasy and non-staining and vanishes on application. It is notably safe,<sup>5-4</sup> being free from the risks which are found in other forms of treatment such as arsenicals, mercury, corticosteroids, x-ray, etc. It certainly deserves a trial in all cases of psoriasis.

Stafford-Miller Limited, Hatfield, Herts. by arrangement with Reed & Carnrick, Kenilworth, New Jersey, USA.

**Alphosyl Lotion** formula—special coal-tar extract 5% + allantoin 2% in a smooth, non-greasy lotion base.

**Alphosyl Cream** formula—allantoin 2% + 90% alcoholic extract of coal-tar (5=1) 5% in a vanishing cream type base.

## what size car man are you?

Do you go for a racy 2-seater? Or a roomy 8-seater? Or perhaps something in between?

Then make it a Volkswagen, and drive on the most reliable chassis of all. 25 years of improvement, with over 2,700 modifications, make today's Volkswagen the most experienced and tested vehicle in the world.

And whichever you select, a "1200" or a more powerful "1500", you can be sure that the same tried principles apply.

*Take engines.* They are all placed in the rear, where they transmit their power directly to the driving wheels. They are all air-cooled; and so can't freeze or boil.

*Take suspension.* Volkswagen has always had independent suspension on all four wheels. A shock to one wheel cannot be transmitted to another.

*Take reliability.* The Volkswagen reputation for reliability has sold 7 million vehicles, and is currently selling over a million each year. Such a reputation has to be guarded. Perhaps your practical self has always advised you to own a Volkswagen? Well, there are six from which to choose.

## This should be in every doctor's car

When resuscitation equipment is needed it is needed at once. It must be light and portable enough to be kept permanently at hand. And it must be utterly reliable and safe and the simpler the better.

The Ambu resuscitator developed by Dr. Henning Ruben of the Finsen Institute at Copenhagen is all these things. A clear indication of its pre-eminence in the field is that it has been chosen as the standard resuscitator for Nato forces. Yet it is not expensive.

It is light, compact and extremely simple and robust. Supplementary oxygen from a cylinder can be mixed with the air pumped into the lungs—a great advantage when dealing with poisoning from noxious gases. It is inherently safe if, for one reason or another, its operation has to be left to an inexperienced person. The specially designed thin latex bag has a foam rubber lining which provides excellent "feel" and makes it impossible to apply dangerously high pressure to the lungs. This is an inexpensive piece of equipment—but without price in an emergency.

# A career for doctors in the R.A.M.C.

## GOOD GENERAL PRACTICE

Professional standards in the Royal Army Medical Corps are high. The R.A.M.C. is responsible for the welfare not only of serving officers and men but also for many of their dependants; there is thus great scope for good general practice. An illustration of this is the fact that over 12,000 babies were born in military hospitals during, for example, 1961. There are thirty well-equipped hospitals at home and overseas, as well as field medical units to provide medical care for the Army in its active role.

Except in unusual circumstances, accommodation is provided. Well-equipped surgeries with medical assistants are provided, allowing you to do your best work, and devote more time to the care of your patients. Consultant opinion is available to you, and, as a general practitioner, you are welcome in the hospital to follow up your cases.

## PAY, ALLOWANCES AND LEAVE

The range of pay varies from not less than £2,000 for the young married medical officer up to £5,000 for the senior consultant; and you will be offered employment up to the age of 65. Annual allowances of up to £185 for the first, up to £225 for the second, and up to £260 for the third and all subsequent children, may be granted to assist in the education of children who are sent to boarding schools in the United Kingdom. These allowances are untaxed when serving outside the United Kingdom.

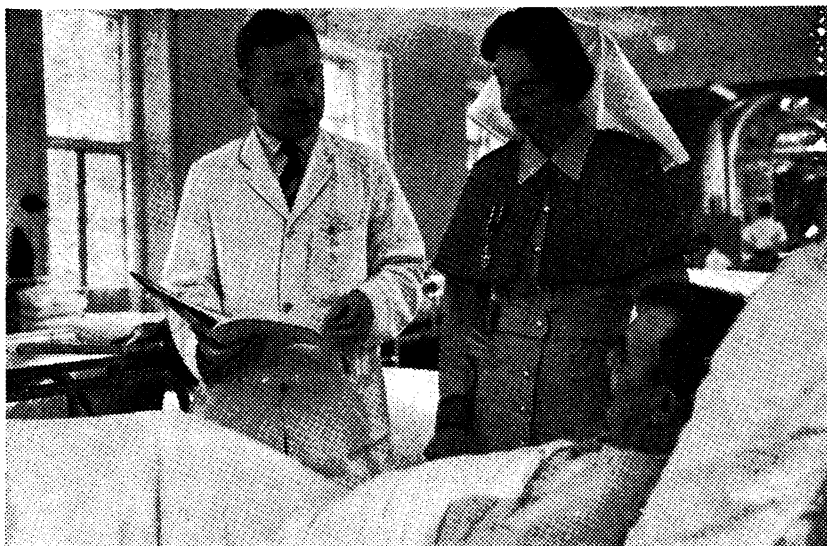

Six weeks' leave is given each year, and you are not responsible for finding or paying your relief.

## SPECIALISATION

Doctors granted permanent commissions may apply for training in any of fourteen specialities, and those selected are given ample time and opportunity for obtaining their higher qualifications. Senior specialists may be awarded consultant grading directly comparable with civilian standards. Extra pay for specialists ranges between £109 and £584 a year.

## POST-GRADUATE STUDY AND RESEARCH

Great importance is attached to post-graduate study for permanent officers engaged in general practice, as well as specialists. General practitioners are expected to take diplomas, such as D.C.H., D.Obst.R.C.O.G.,

*An officer in the R.A.M.C. visits a patient, accompanied by a member of Queen Alexandra's Royal Army Nursing Corps.*

and refresher courses are arranged for both specialists and general practitioners at the Royal Army Medical College and other post-graduate centres.

Research is an increasingly important aspect of the work of the R.A.M.C. Several officers are engaged either wholly or in part in clinical and physiological research, their work covering a wide range of subjects.

## GENERAL CONDITIONS

Previous service in the Armed Forces counts for pay and promotion, and an antedate of up to seven years may be granted for civilian experience.

Short service commissions are for 3 to 5 years with terminal tax-free gratuities of £1,500 and £3,000 respectively. A short service commission can lead to a permanent commission. For permanent officers, there is an initial taxable grant of £1,500 and a terminal tax-free grant of three times the annual pension. The pension scheme is non-contributory. The upper age limit for permanent commissions is forty, and for short service commissions, fifty.

## PRE-REGISTRATION COMMISSIONS

Medical graduates may be accepted for short service commissions of 3 or 5 years at any time before full registration.

Age limit is 32 years. Pre-registration appointments may be done in N.H.S. hospitals of choice, or in selected military hospitals. Board and accommodation are free, and salary is £876 for a married man; £1,065, if over 25 years. The short service commissions carry a terminal gratuity. In addition, a gratuity of £200 is payable in respect of the pre-registration year's service.

## MEDICAL CADETSHIPS

A limited number of cadetships is open to male medical students who have passed their 2nd M.B. or equivalent examination. Tuition fees are paid from Army funds, and books and instruments are issued on loan. The age limit is 28 years: the salary for a single man is £930.

Service with the R.A.M.C. is for a minimum period of five years after full registration; this service carries a terminal gratuity. A booklet, 'A Career for Doctors in the Royal Army Medical Corps,' containing details of pay, gratuities, pensions and conditions of service, may be obtained from: The Director-General, Army Medical Services, The War Office, (HNR/36/I) (AMD 2B), London S.W.1, Tel: GRO 8040, Ext. 602, or you may care to come and discuss your application personally.

## The problem of the dirty mouth

Even in 1964 the dangers, and the unpleasantness, of the dirty mouth are still present in the post-operative period, as well as in many fevers; the geriatric patient being especially prone to them. Careful attention to oral hygiene will usually, of course, keep the patient comfortable and prevent complications. Such attention, however, is very time-consuming to the nurse; and it is not often realised that for most patients it can be replaced or supplemented by the use of chewing gum.

The regular use of chewing gum, by stimulating salivary flow, keeps the mouth clean in the most natural way possible. The patient is in a sense providing his own nursing care with the minimum of energy expenditure by himself.

Child patients, of course, need no encouragement to chew gum. The older patient may need encouraging—but not once he has appreciated the very obvious cleansing and refreshing effect that chewing gum has upon the mouth. Chewing gum is also of value to patients who are forbidden to smoke.

## THAT OLD FAMILY TRUST

It is always a responsibility. But with the coming of the Trustee Investments Act the position becomes more onerous.

Trustees will be able, and may be expected, to invest the funds to the extent permitted by the Act, in Ordinary Shares. To the Trustee's present armoury of talents, must now be added an expert knowledge of equity investment and the ability to manage a complicated system of book-keeping. Help, however, is no further away than the nearest branch of the Westminster Bank, where the Manager will give you full information about services of the Trustee Department.

**THE MANCHESTER COLLEGE OF SCIENCE AND TECHNOLOGY**

(Faculty of Technology in the University of Manchester)

A short course in Applied Mechanics has been arranged by the staff of the Department of Mechanical Engineering (Professor W. Johnson), in consultation with Mr. John Charnley, F.R.C.S., to suit the requirements of those wishing to improve their appreciation of biomechanical problems in literature. The course is oriented primarily towards orthopaedic problems but it should also be of interest as a much wider field of medical postgraduate study.

The course will be held on Monday, July 6, to Friday, July 10, 1964, and will consist of lectures in:

- (1) Mechanics (Statics and Dynamics)
  - (2) Stress Analysis
  - (3) Experimental Techniques
- together with demonstrations and tutorials. Some time will be allocated for the analysis of set problems; these to be in the medical field wherever possible. A few important published papers on biomechanical problems will be chosen from the literature and will be "worked through" to discuss the mechanics involved.

A half-day visit to the Biomechanical Laboratory at the centre for Hip Surgery, Wrightington Hospital, will be arranged.

The fee for the course will be £18 inclusive of lunches and light refreshments, on each day. Accommodation in Chandos Hall, the College's study-bedroom block, will be available, if required, at an additional charge of 26s. 6d. per evening (bed and breakfast). Full particulars can be obtained from the Registrar of the College, Sackville Street, Manchester 1. (6893)

**UNIVERSITY OF ST. ANDREWS**

Faculty of Medicine

The University offers courses leading to:

- (a) **DIPLOMA IN INDUSTRIAL HEALTH**  
Instruction will be given in Queen's College, Dundee, and extends over one academic year. The first two terms of the course are in content to the course leading to the Diploma in Public Health. Applicants who already possess the Diploma in Public Health may be exempted from the first two terms. Fee for the D.I.H. Course will be £75.

(b) **CERTIFICATE IN INDUSTRIAL HEALTH**

The University will grant a Certificate in Industrial Health (C.I.H.), the period of study for which will be one term, commencing April, 1965. The course offered will consist of systematic clinical and practical instruction in occupational health.

Fee for the C.I.H. Course will be £25.

**LEVERHULME FELLOWSHIPS**

Applications can now be considered for the award of a number of Leverhulme Fellowships to enable candidates to take the above courses. Fellowships of £300 are available for the C.I.H. Course, and of £600 for the whole year D.I.H. (not the shortened D.I.H. available to candidates with a D.C.H.).

Full information and forms of application may be had from the Dean of the Faculty of Medicine, Queen's College, Dundee. (8747)

## A PRACTICE AS WIDE AS THE WORLD

In the Medical Branch of the Royal Air Force you gain wide clinical experience. You travel the world and among the subjects with which you will become familiar are tropical medicine, rescue operations, the care of airborne patients and medicine in relation to flying. You will also be expected to contribute to research.

As Medical Officer on a Royal Air Force Station you have a vigorous general practice among the officers, men and their families. You enjoy complete clinical freedom in charge of sick quarters with your own beds, and you will be assisted by a well-trained nursing and clerical staff. You and your family can live comfortably and near your surgery.

Your salary and career prospects are good: as a married man drawing full allowances you could receive over £2000 per year on entry. If you have post-graduate civilian experience you could be granted up to seven years back-dated seniority. Pensionable career commissions or short service engagements entitling you to a generous tax-free gratuity on completion are still available to the right applicants.

### GRADUATES AND MEDICAL STUDENTS

If you are a pre-registration year graduate or a senior medical student you may apply for a commissioned cadetship. This will enable you to finish your pre-registration house jobs or medical training as an officer in the R.A.F. drawing full pay and certain allowances. On completion you will serve on a long or short service engagement in the Medical Branch of the Service.

For details of entry to the Royal Air Force as a registered doctor, a graduate or a medical student, write to the Director-General of Medical Services, Air Ministry (M.A.I.), (HN 53), 1 Tavistock Square, London, WC1.
