tion. There is no risk from overdosage as Alcin cannot cause either alkalosis or acid rebound.

No Digestive tract ill-effects Alcin has no known laxative or constipating effects.

IMFERON BY TDI

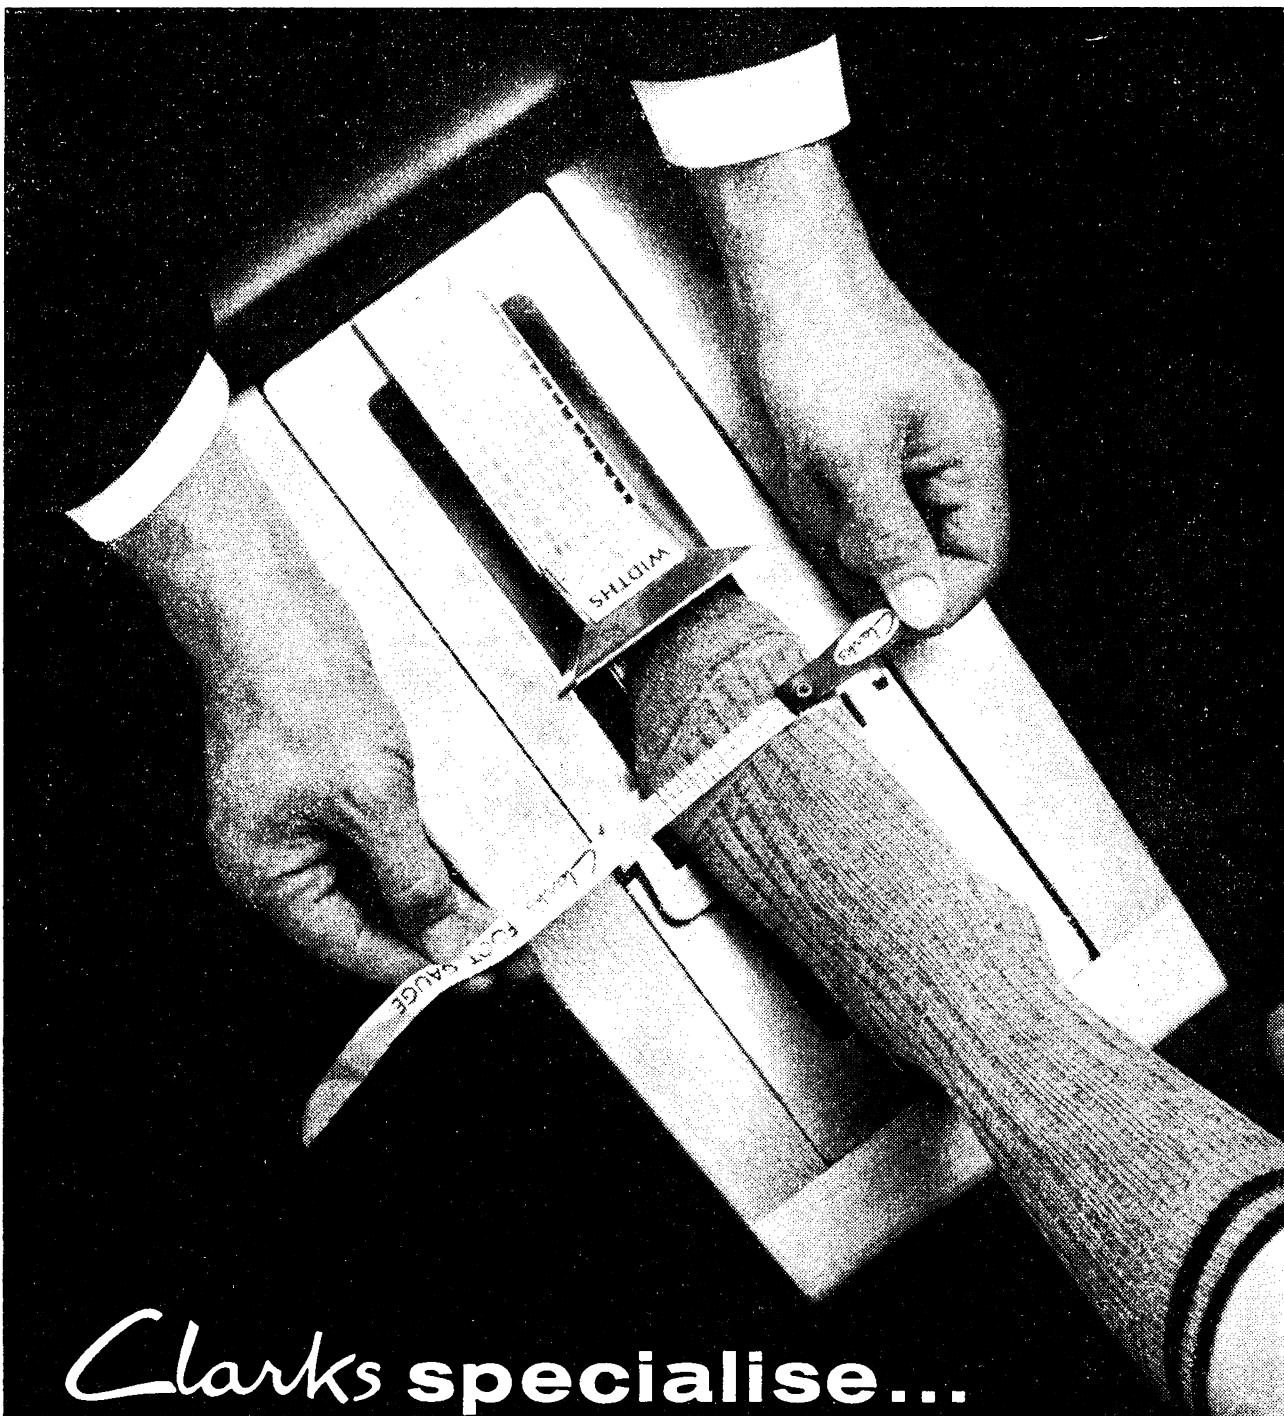

TRADE MARK

For all the injections of intramuscular iron necessary to correct iron deficiency it is now possible to substitute a single total dose infusion of Imferon, iron-dextran complex.

No matter how severe the deficiency may be, complete correction with a single infusion is still a safe procedure, because of the remarkably low toxicity of Imferon. In fact as much as 3 G. of iron has been given by this means, without untoward effect.

The simple technique is completed in a few hours, and it ensures that the patient has received precisely the amount of iron required for complete restoration of haemoglobin and the iron reserves which are so important in preventing recurrent anaemia. Response is rapid and predictable. Side effects are minimal.

(CARISOPRODOL WALLACE)
FOR LOW-BACK SYNDROME

CARISOMA *An effective muscle relaxant...* reduces spasm, gets your patients up and moving about much sooner. CARISOMA *An effective analgesic...* begins within 30 minutes to relieve low-back pain. In many cases muscle relaxation alone is not enough to relieve pain and restore normal movement in the low-back syndrome. CARISOMA, a single drug with double action,

attacks both pain and spasm. It has a separate and distinct analgesic action in addition to its muscle relaxant properties. Thus it is able to break in on either phase of the pain-spasm cycle, giving prompt relief from both pain and stiffness. **DOSAGE:** Recommended adult dosage is one 350 mg. tablet 3 times daily. The last dose is taken at bedtime. **AVAILABILITY:** 350 mg. tablets. Bottles 50 and 250.

... do you recommend an external wedge on the shoes?

But the wedges soon wear away; and very often the child is made to feel self-conscious because his shoes look different from other children's. As the diagram on the left clearly shows, any external wedge to heel disturbs the plane of forepart and heel. Surely it's more logical to have a wedge built-in between the inner and the outer sole—where it can correctly corset the foot, remain invisible, and completely unaffected by wear or repair of the shoe. That is how Start-rite INNERAZE shoes are made—on remedial lasts specially adapted to accommodate the internal wedge. That is why they are the only practical and thoroughly effective solution to this problem.

Take a man from a crowd and he's still several men. He may be a family man as well as a professional man; a motorist, a householder too. Each role has its own risks, its own special responsibilities. But sound insurance can take care of many of the worries they bring. It means peace of mind in the present and in the future.

My car's Firestone Safe

Is yours?

Typical doctor's car, isn't it? Conservative, comfortable, reliable—just what one's patients expect their doctor to be. Quite right, too. They like to feel that I'll be there when I'm wanted. It's not always so easy, though—that's why I take the trouble to fit Firestone. Wonderful tyres, especially now they're made with the new Diene Rubber-X*. I'd always prescribe them for a car you have to rely on.
