the extremely versatile VHB mk 8 hospital bed

"Multi-Role" advantages plus *variable* height

The VHB mk 8 in standard form, basically a variable height bedstead, is a "multi-role" all-purpose bed that is quickly adapted to suit individual patients' requirements. The attachment of an accessory, a few quick adjustments and the bed can play important new roles. The standard framework has mountings to accommodate a backrest, cot sides, bed stripper, table, drip-pole, balkan beams and other fittings in part or whole combinations to suit a particular purpose . . . obviously, quite complicated conversions become possible, lending the bed virtually unlimited applications.

The bed is illustrated above in standard form without fittings. Winding handle and height adjusting mechanism are shown. The bed will raise, lower or tilt.

In Asthma

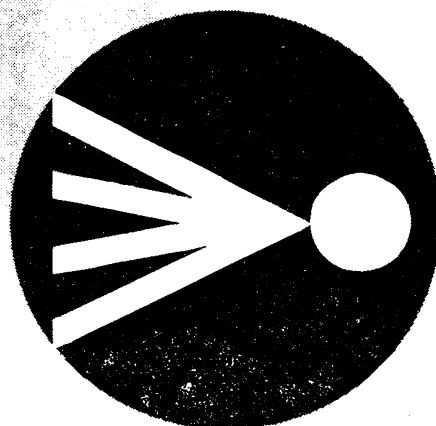

The **Alupent Metered Aerosol** gives immediate, long-lasting relief of an acute attack, and is economical in use.

Spirometric studies¹ have shown that the bronchodilator effect of **Alupent** in aerosol form persists for five to six hours.

The prolonged relief which patients obtain with the **Alupent Metered Aerosol** results in a reduction in prescribing costs, as less frequent dosage is required.

The recommended dose of the **Alupent Metered Aerosol** is two or more inhalations. Asthmatic patients obtain

prompt and long-lasting relief from the **Alupent Metered Aerosol**.

FERRO-GRADUMET
TRADE MARK

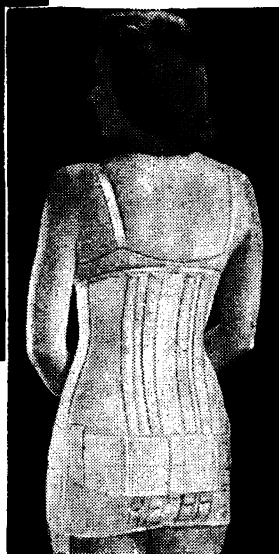

FOR MAXIMUM IRON
WITH MINIMUM
SIDE EFFECTS

Time and again you'll have listened to complaints of discomfort and gastric upset from patients undergoing treatment for iron-deficiency anaemia. The reason — iron intolerance; the cause—the action of the usual ferrous sulphate tablets resulting in unpleasant side effects. But ferrous sulphate is probably the most efficient form of iron; and as you know, it should be taken on an empty stomach for maximum effect. How then to reduce or prevent discomfort in anti-anaemia therapy?

IRON IN TIMED RELEASE

From Abbott comes the answer—the Ferro-Gradumet, the one-a-day oral haematinic in a plastic matrix that slowly leaches out its full day's dose of ferrous sulphate (525 mg, equivalent to 105 mg of elemental iron) in a predetermined pattern over a number of hours; and, thanks to its unique GRADUMET presentation, does not disintegrate in the stomach, where ferrous sulphate is most irritant and least well absorbed. Here at last is an efficient treatment for iron-deficiency anaemia that permits a day's requirements of iron to be taken in a single tablet, pleasantly and with a minimum of side effects.

FERRO-GRADUMETS are supplied in bottles of 30 or 100 tablets each containing 525 mg ferrous sulphate (in exsiccated form), equivalent to 105 mg elemental iron.

A SPENCER SUPPORT for Intervertebral Disc

In both conservative and surgical treatment of intervertebral disc, application of a back support is usually indicated.* We invite the surgeons' investigation of Spencer as an adjunct to treatment. Each Spencer is *individually designed, cut and made* for each patient—after a description of the patient's body and posture has been recorded and detailed measurements taken. Thus, individual support requirements are accurately met. The Spencer Spinal Supports shown incorporating rigid Spinal Brace were individually designed for both man and woman patients. 'Aventyl'*

BRAND NORTRIPTYLINE

*new wide spectrum mood enhancer
lends wings to troubled minds*

When the patient is overwhelmed by normal everyday stresses, 'Aventyl' often brings prompt relief. Even in the more serious behaviour disturbances—whether marked by depression or anxiety, or both—'Aventyl', with its unusually wide spectrum of action, broadens the doctor's power to relieve the troubled mind swiftly.

'Aventyl' has an inherent beneficial effect on anxiety and hostility—it is not a combination of an antidepressant with a tranquillizer, but a *single entity* going beyond mere antidepressant action as such. Four out of five patients with symptoms referable to anxiety and depression (including psychosomatic disturbances) are likely to respond favourably to 'Aventyl', many of them within a week.

Betamethasone in General Practice

Betnelan (betamethasone) is particularly well suited for low or 'physiological' dose therapy of rheumatoid arthritis. It has high anti-rheumatic activity, but shows improved gastro-intestinal tolerance, has virtually no effect on electrolyte balance, and has no depressive action on mental function. A further development with betamethasone has been the introduction of Betnesol Tablets. They dissolve spontaneously in water to form a palatable, tinted, clear solution, offering rapid and consistent absorption. Betnesol is well tolerated because no solid steroid reaches the stomach. It is the most acceptable and advanced form of oral corticosteroid therapy that you can give your patients.

ANP 235

(WHO Non-proprietary name—Meclofenoxane)

SOME FACTS ABOUT ANP 235

1. ANP 235 (Meclofenoxane) was originally developed in the French National Research Laboratories. It belongs to a new class of substances best described as neuro-regulators.
2. The pharmacological properties of ANP 235 are to regulate the metabolism of the nerve cell, to facilitate the utilization of glucose and to combat anoxia in the cell.
3. ANP 235 does not belong to any known group of psychotropic drugs such as amphetamines or monoamine oxidase inhibitors.
4. The toxicity of ANP 235 is extremely low. Side effects so far observed are minimal.
5. The pharmacological properties of the drug suggest many uses. The main indications are confusional states in the elderly (senile, post-apoplectic, cerebral ischaemic); psychomotor retardation in children; neonatal anoxia; intoxication by alcohol or carbon monoxide; post anaesthetic confusion.
6. Clinical trials on an extensive scale, including double blind trials, have taken place in many countries. The reference list now exceeds 150 publications.
7. ANP 235, marketed abroad under other names, is now available, for clinical use in this country.
8. Literature giving full details on ANP 235 will be sent on request.

'Actomol', a new and powerful inhibitor of monoamine oxidase, has been on extensive clinical trial since 1960.

Experience has shown that it is:

- A highly effective drug in the treatment of depressive episodes.
- Quick-acting, providing relief in 7-14 days.

'Actomol' is indicated, either alone or as an adjuvant to E.C.T., in the treatment of all forms of depressive illness.

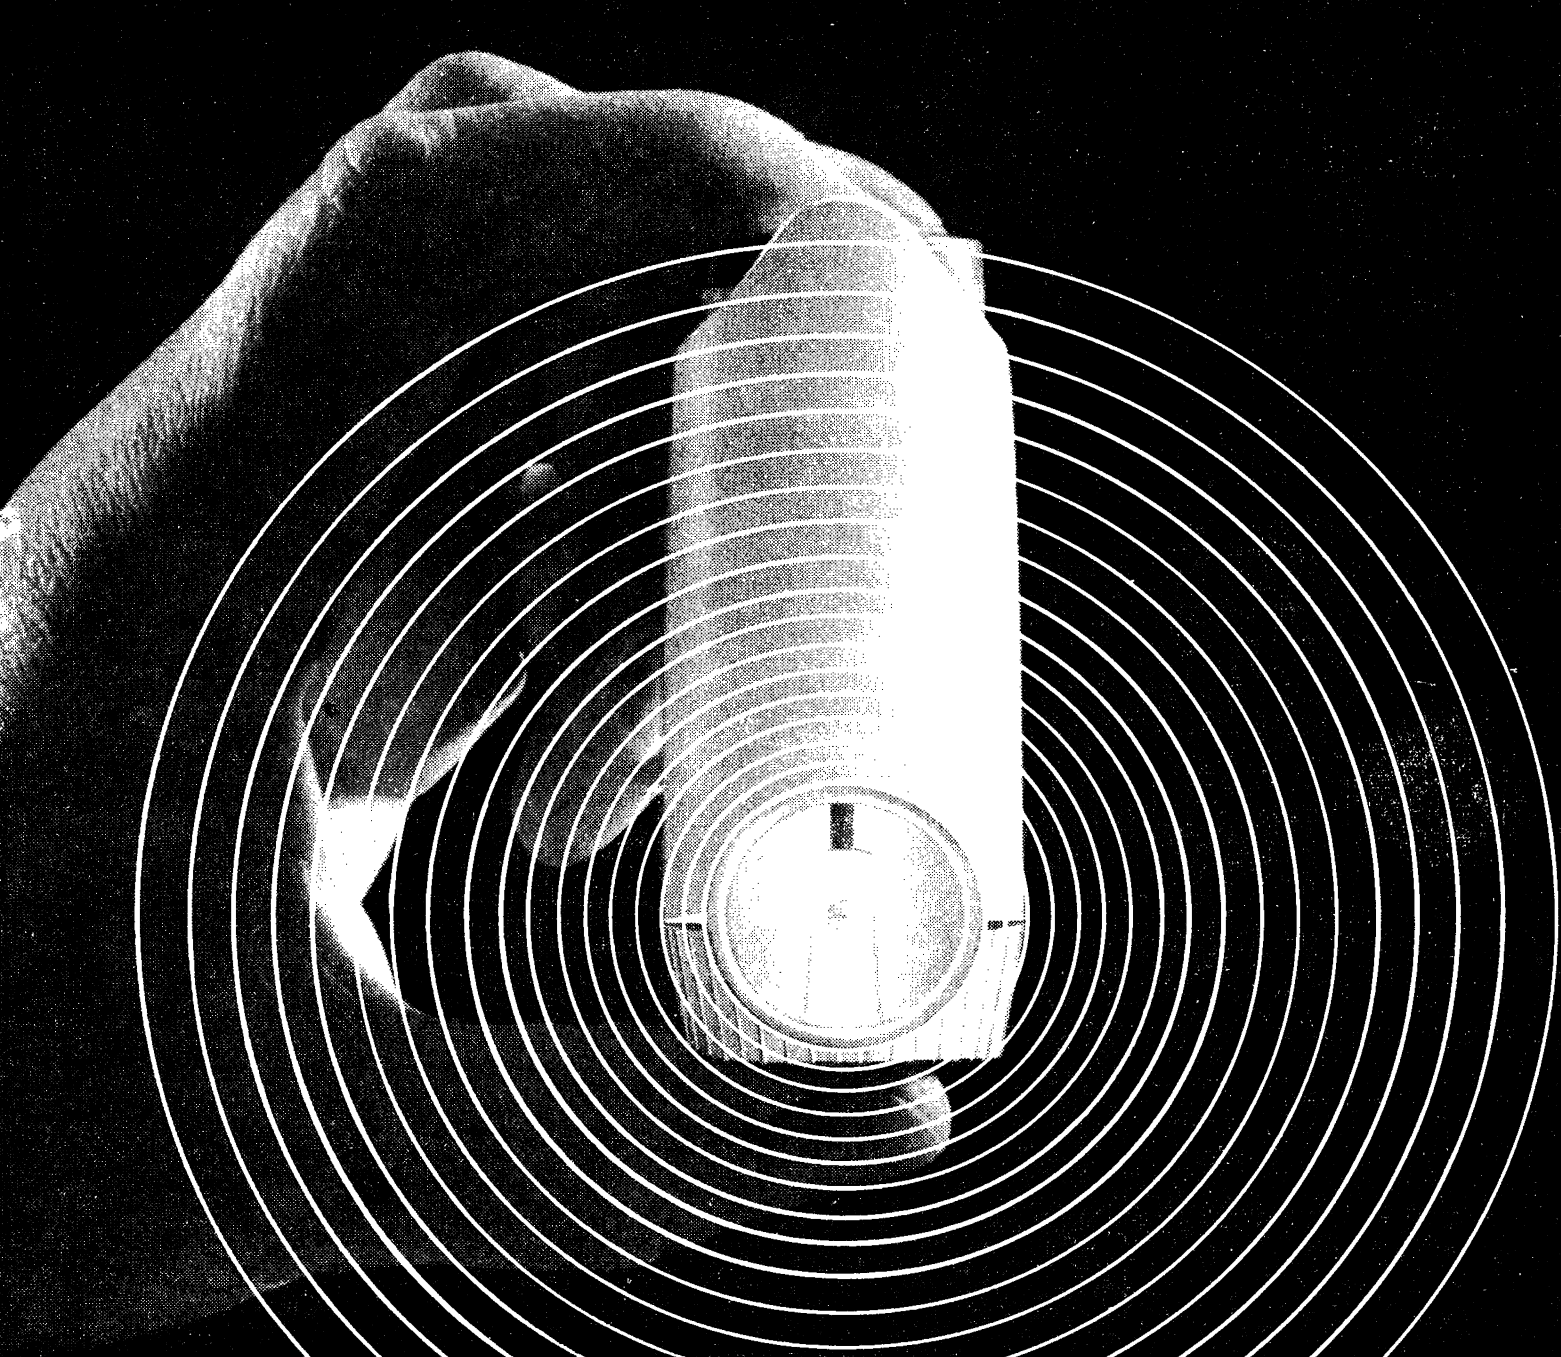

NOTE: Monoamine oxidase inhibitors in general have been shown to potentiate the actions of many drugs. The risk of combining 'Actomol' with other drugs should, therefore, be borne in mind.

FOR COMPLETE AVAILABILITY OF THE B VITAMINS

Deficiencies of single factors of the Vitamin B Complex do not occur. Thus, even when a deficiency condition seems to result from the lack of a single factor of the Complex, and it is considered necessary to give intensive treatment with this factor, the other members of the Complex should be administered concurrently. It is therefore essential that the source of the Vitamin B Complex selected for this purpose should release its full vitamin content to the body. Human experiments show that the rich, natural vitamin potency of Aluzyme is completely available to the human system. Basic N.H.S. Cost: Tablets 500 4/-, 1000 7/2d. Literature and samples available on request.

“Micropore”

SURGICAL TAPE

Unprecedented ventilation with
ultimate painless removal

* INERT CO-POLYMER ADHESIVE * EASY TO USE * ADHERES FOR EXTENDED PERIODS VIRTUALLY WITHOUT IRRITATION OR MACERATION

“Micropore” Surgical Tape has an exclusive structure. The synthetic, non-creeping co-polymer adhesive is physiologically inert. It virtually eliminates irritation and maceration. It can be removed painlessly even on hair-areas. The thin rayon backing is revolutionary and because the fibres are placed at random—NOT woven—they provide unprecedented ventilation. Skin functions normally beneath dressing. *Time Saving Plus's*. “Micropore” Surgical Tape is easy to handle—even with rubber gloves. During baths it remains in place—translucency cuts down dressing changes. It leaves no adhesive residue to clean off after removal. It is radio-

translucent. Light and thin, “Micropore” Surgical Tape reduces patients' discomfort to a minimum.

ALONE OR IN SINISTER ALLIANCE

Insidious in undermining health, the blood-sucking hookworm waxes in numbers with the explosive growth of world population. The patient who harbours hookworm often harbours roundworm, and sometimes trichostrongylus too.

There is one complete answer—single-dose 'Alcopar'. Whether the infection be single or multiple, whether the patient be an infant in arms or a person advanced in years, 'Alcopar' will safely expel these burdensome parasites.

Neither hospitalisation nor purging is needed.

'ALCOPAR' brand Dispersible Granules

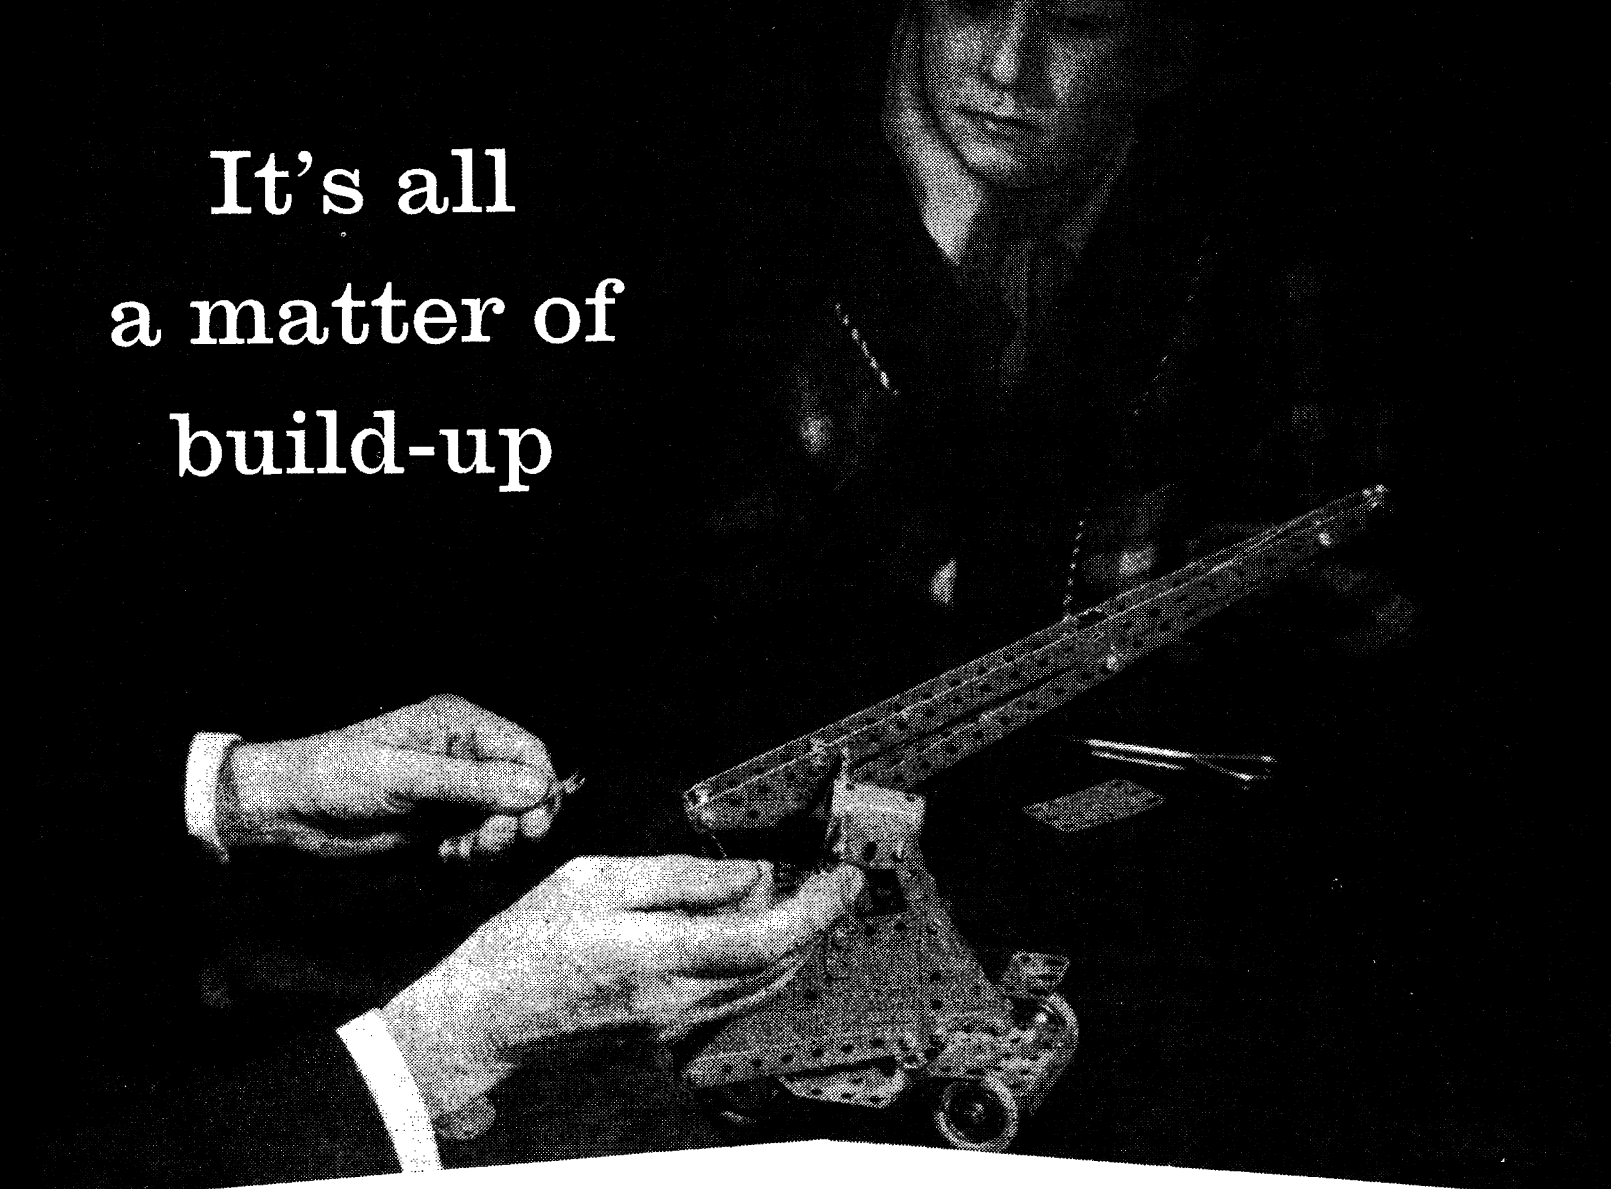

The proven multi-purpose worm expellent

Issued in single-dose sachets of 5 G. containing Bephenium Hydroxynaphthoate, B.P.C. equivalent to 2.5 G. bephenium base. Packs of 25 sachets.

BOARD

**APPOINTMENT OF CONSULTANT
NEUROSURGEON, PLYMOUTH**
Applications are invited for the appointment of a Consultant Neurosurgeon in the Plymouth Clinical Area. The appointment may be held on a whole-time or maximum part-time basis.

The appointment will be based on the Plymouth General Hospital at Freedom Fields. This is a new appointment which is being made as the initial stage of the development of a neurosurgical department in Plymouth which will eventually serve the whole of Devon and Cornwall. The consultant appointed will at first work with a supporting registrar appointment, confining his work to Plymouth. The Board is preparing to extend the operating facilities for Neurosurgery in Plymouth and in the next year or two will seek Ministry of Health approval to the appointment of a second consultant neurosurgeon. The Plymouth neurosurgical team will then be expected to provide a service to the southern part of the region and to undertake out-patient sessions in Exeter and in West Cornwall. The Board is planning a combined neurological and neurosurgical centre in the first phase of the new hospital at Plymouth within the 10-year Hospital Development Plan.

Applications, stating date of birth, qualifications, and experience, together with the names and addresses of two referees, should be sent to the Secretary of the Regional Hospital Board, 27 Tyndal Park Road, Bristol 8, not later than May 11, 1964. (9843)

for the patient
with angina pectoris

Synadrin is chemically unrelated to any known treatment for coronary disease. Its activity has been demonstrated in animal experiments¹¹⁻¹⁷ and its effectiveness has been confirmed by both open and double blind trials.¹⁻¹⁰ Synadrin has been described as "an effective drug for treating angina pectoris."¹

Effective and safe Synadrin has been shown to reduce the frequency of anginal attacks. It is particularly successful in patients with coronary ischaemia with or without previous infarction. It produces prolonged improvement of the coronary blood supply, and consistent treatment over a period of weeks produces the best results. Synadrin is well tolerated and its safety has been shown by use in more than 1,000 patients over the last two years.

Dosage Treatment may be initiated with 2 tablets, three times daily, reducing to a maintenance dose when beneficial effects are noted.

Presentation Synadrin is presented as tablets, each containing 15 mg. of prenylamine lactate in bottles of 30 and 150 at basic NHS prices of 8/8d. and 34/8d. (subject to P.T.).
Synadrin is known in some other countries as Segontin.

THE UNIVERSITY OF WESTERN
AUSTRALIA

RESEARCH PHYSICIAN

Applications are invited from medically qualified persons for an appointment as Research Physician with a group working on a research project in Human Genetics under the direction of Dr. R. L. Kirk, of the Department of Zoology in the University of Western Australia.

The research group will be engaged in study of the health and genetic structure of populations in Australia, South and South-East Asia. It will be based in the Department of Zoology at the University where suitable laboratory facilities will be provided, but the successful applicant will be expected to take part in field investigations, to assist with group studies, and to develop his own research interests. Further information is available from Dr. Kirk.

The appointment will be for a period of up to three years from May 1, 1964, and the appointee will be expected to take up duty as soon as practicable after that date. The commencing salary of the appointee will be within the range £A.3,000 to £A.3,500 per annum, depending on qualifications and experience. Minimum first-class rail and/or steamer fares from place of engagement to Perth will be provided for the appointee and his dependent family. A subsistence allowance will be paid during field investigations.

Applications, stating qualifications, present appointment, previous medical experience, research and publications, marital state, age, and the names and addresses of not more than three persons nominated as referees, close with the undersigned on April 24, 1964.
