

a new antacid palatable effective economical

Alcin is a new antacid offering several important advantages. It provides safe and effective treatment of symptoms associated with gastric hyperacidity and peptic ulceration.

Palatability Having an absence of chalkiness and an agreeable flavour, Alcin is non-nauseating.

Buffering Activity Alcin not only rapidly neutralises excess acid, but at the same time its sustained buffering activity maintains the level of acidity of the gastric contents within the desired range.

Safety Alcin is safe for prolonged administra-

tion. There is no risk from overdosage as Alcin cannot cause either alkalosis or acid rebound.

No Digestive tract ill-effects Alcin has no known laxative or constipating effects.

Economy Alcin is economical in use. The basic N.H.S. cost of 50 tablets is 1/9½d.

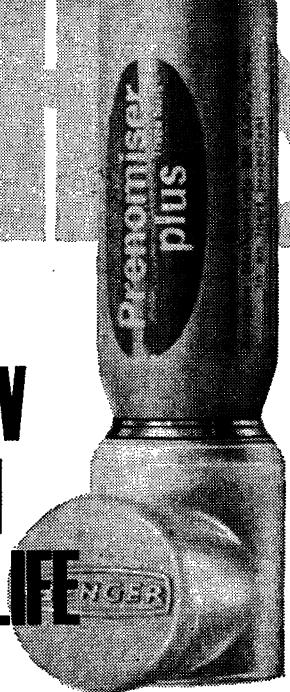

Composition: Each tablet contains 360 mg. anhydrous co-prepared sodium magnesium aluminium silicate and basic magnesium aluminate.

CICATRIN

**accelerates healing
rates by 25-50%***

Prolonged and expensive treatment of chronic ulcers may be avoided by the use of Cicatrin, the leading amino-acid/antibiotic preparation for topical application.

Further evidence of the efficacy of Cicatrin is provided by a recent controlled clinical trial to evaluate the influence of various topical applications on the healing rates of stasis ulcers. This trial shows that Cicatrin with its combination of selected amino-acids and antibiotics accelerates the healing rates by 25-50%.

It is also significant that in one group where the main difference between the two preparations was that one contained amino-acids and antibiotics (Cicatrin) and the other antibiotics only, the healing time in the Cicatrin treated group was shortened considerably both in bed rest and ambulatory cases.

Aldactone-A

brand of spironolactone

for the water-logged patient

Many patients with oedema and ascites fail to get a complete response to diuretic treatment. An important cause of this resistance is excessive secretion of aldosterone, a sodium-retaining adrenal steroid.

In these water-logged patients the early addition of Aldactone-A (a selective aldosterone antagonist) to the diuretic programme is a compelling therapeutic necessity.

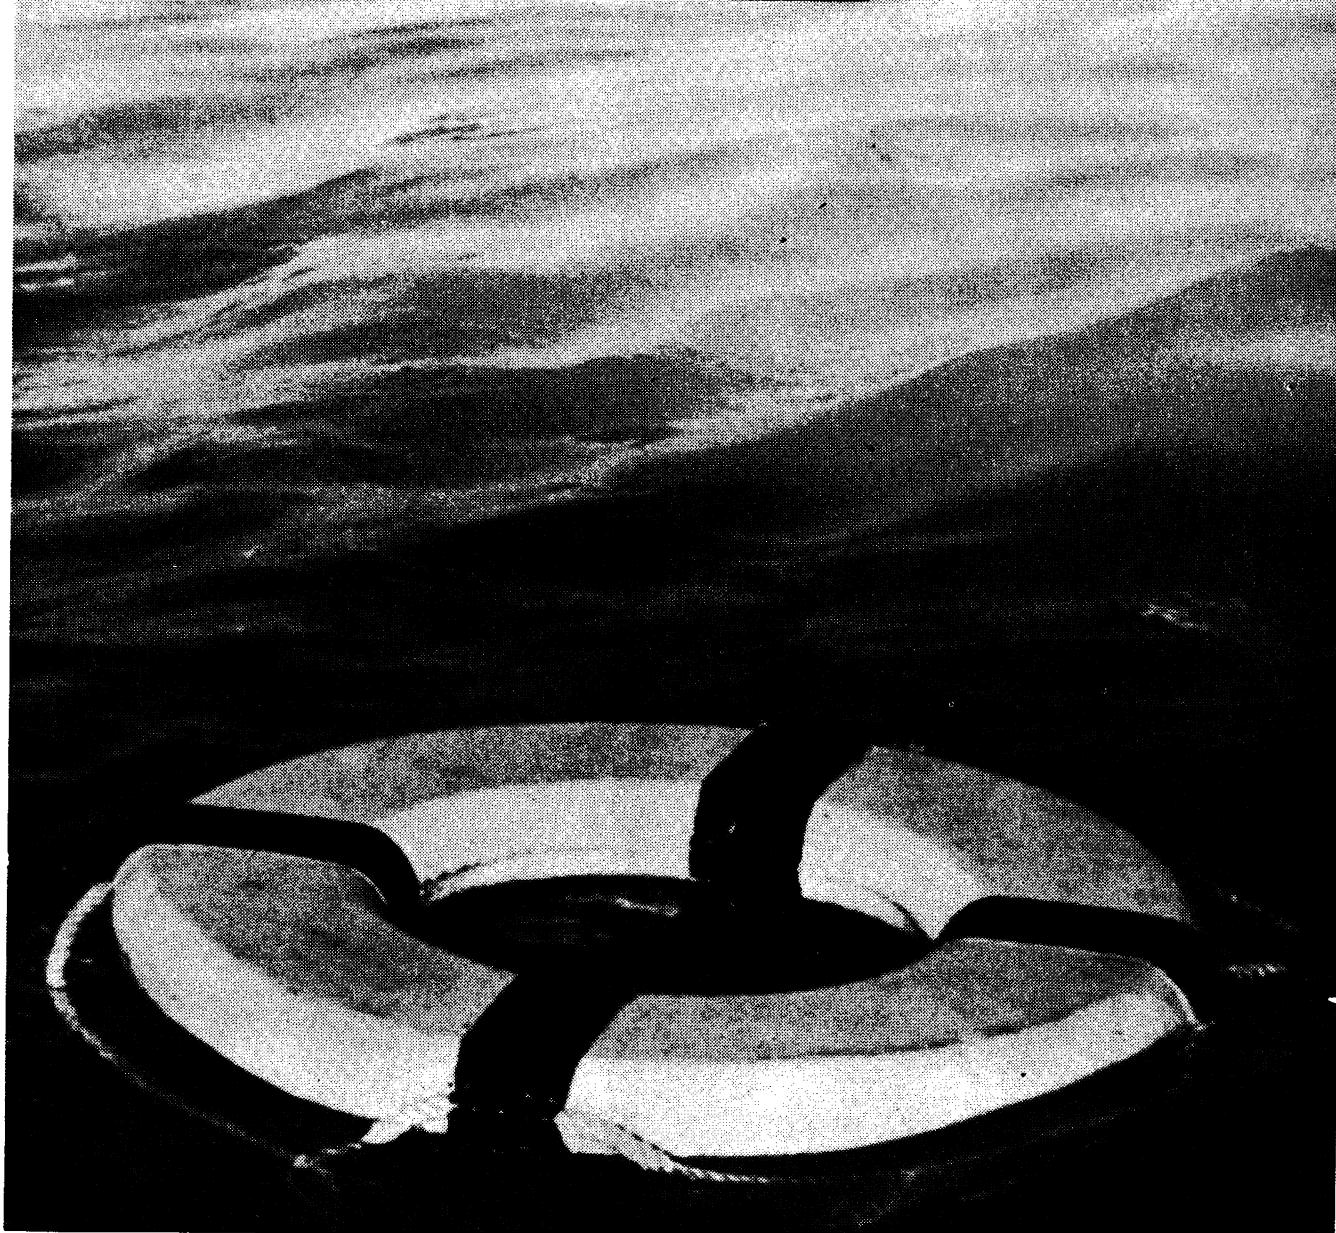

Aldactone-A acts as a booster to conventional diuretics, maintaining and enhancing their effect and enabling more complete diuresis to be achieved until 'dry weight' is regained. Aldactone-A also increases the safety of long-term diuretic therapy by minimizing potassium depletion. Finally, patients on Aldactone-A often feel better, function better, and may be permitted a more liberal diet.

Available as 25 mg. tablets in bottles of 30, 100 and 500.

MEDICAL EQUIPMENT FROM BRITISH OXYGEN

Acknowledgments to Farley's Infant Food Ltd.

The Lucy Baldwin apparatus represents a significant advance in obstetric analgesia. It is designed for the administration of nitrous oxide and oxygen mixtures, the composition of which may be varied between 70% N₂O/30% O₂ and 100% O₂. The mixture exhaled by the patient corresponds closely to the control setting, regardless of changes in draw-off conditions and will flow only in response to the patient's inspirations. Safety features include an emergency oxygen control and an automatic cut-off valve to prevent inhalation of nitrous oxide in the event of undetected failure of the oxygen supply. OF DRUG LITERATURE**

As from July 1st, 1964, Derwent Publications Ltd. will be operating a new pooled pharmaceutical literature documentation service known as RINGDOC, to which most of the largest drug manufacturers throughout the world have agreed to subscribe. The RINGDOC service will employ a large staff of full- and part-time workers having specialized knowledge of chemistry, biochemistry, pharmacology and/or medicine. Applications are invited from suitably qualified people for the following vacancies.

PART-TIME ABSTRACTORS to work at home on the preparation of informative summaries in good English of journal articles relating to drugs, at an average rate of £1 per 1-1½ hr. abstract. There are approximately 70 vacancies. Applications, which may be from abroad, should be upon our form RPTA, obtainable from Technical Director.

FULL-TIME EDITORS to work at Rochdale House, for editing summaries of journal articles relating to drugs received from part-time abstractors, coding these abstracts using key-words and auxiliary terms according to established procedure to be taught to them perhaps initially in Switzerland, and also checking the typed abstracts. There are vacancies for one or two Senior Editors at a commencing salary of around £2,000 per annum, and six or seven Editors at a commencing salary of around £1,500 per annum. Applications should be upon our form RFTE, obtainable from Technical Director.

FULL-TIME CODERS to work at Rochdale House, for punched card coding from originals and abstracts of journal articles relating to drugs, according to an established code to be taught to them, perhaps initially in Switzerland or Germany. There are vacancies for one Senior Chemical Coder and one Senior Biological Coder, each at a commencing salary of around £2,000 per annum; and for six Coders at a commencing salary of around £1,500 per annum. Applicants need not have had previous coding experience, but must have a really sound knowledge of chemistry and/or pharmacology or medicine. Applications should be upon our form RCOD, obtainable from Technical Director.

All applications in confidence to **Technical Director, Derwent Publications Ltd.**, Rochdale House, Theobalds Road, London, W.C.1. Application forms may be requested by telephone CHAncery 5851, attention Mrs. B. I. Brooks.

highly effective, well tolerated — not a monoamine oxidase inhibitor

In a recent controlled trial,* amitriptyline proved to be effective in 56 (81%) of 69 severely depressed female patients in hospital; it is considered by the investigators to be the drug of choice in depressive states, and the most satisfactory treatment for all depressed patients save those whose unequivocal depressive delusions call for ECT.

'Tryptizol' is an antidepressant which has intrinsic tranquillising properties, giving it a prompt effect on the anxiety, tension and insomnia (early morning awakening) associated with depression.

Abbott present a major new antihypertensive

Eutonyl (pargyline hydrochloride, Abbott) is a potent new antihypertensive agent. A large majority of patients with moderate to severe essential hypertension (even those resistant to other drugs) achieve significantly reduced systolic and diastolic pressure in the standing position, and often in the sitting and lying positions as well. The addition of Enduron (methyclothiazide, Abbott) permits a lower dosage, with fewer side effects. Eutonyl has a beneficial side effect in countering the depression which is often associated with hypertension, and in this respect alone offers a useful advance over other antihypertensive drugs, some of which themselves produce depression. Comprehensive literature is available on all aspects of this important new agent: dosage, side effects, precautions and the wide measure of agreement on its clinical efficacy even in the most difficult cases.

Eutonyl and Enduron are Registered Trade Marks.

Eutonyl tablets (25 mg pargyline hydrochloride) and Eutonyl-Ten tablets (10 mg pargyline hydrochloride) are supplied in bottles of 100.

THIAVER

*provides sound therapy
based on accepted
principles*

The increasing use of thiazide derivatives in combination with other agents is a feature of present-day treatment of hypertension. Unfortunately these combinations do not always provide satisfactory treatment because the agent added to the thiazide is often of insufficient potency. Greater potency can now be achieved with *Thiaver*. Results of treatment in over 1100 patients over many months have amply demonstrated the ability of *Thiaver* to lower blood pres-

sure in a wide range of patients without causing troublesome side-effects, undue diuresis, and without tolerance developing to its action.

Thiaver contains epithiazide and *Veriloid*. Epithiazide is typical of the more recently introduced thiazide derivatives which are

noted for their antihypertensive activity. Its action is complemented and enhanced by *Veriloid* which is recognised as an effective antihypertensive agent which lowers blood pressure through central mechanisms.

Patient management with *Thiaver* is simple because tolerance does not develop and the dosage remains constant at two tablets daily. *Thiaver* is ideally suited for long-term treatment when therapy with milder agents is inadequate. It does not cause postural hypotension or impair mental acuity.

What else to hasten recovery?

This patient may come to your surgery for advice because she is gaining weight or her hair is thinning. She may complain that she is 'always tired'. The initial impression that the patient is hypothyroid may subsequently be confirmed by the clinical pathologist. Replacement therapy is obviously indicated but it is

often difficult to think what else would help her. While basal metabolism is being restored, vitamins of the B complex acting as co-enzymes in glucose oxidation systems can influence energy release in the tissues and thus help in speeding recovery. Psoriasis

Clinical tests confirm Alphosyl's effectiveness

Accumulating evidence increasingly underlines Alphosyl's effectiveness in cases of psoriasis, even in those that have proved intractable to other forms of treatment. Its success is attested by the fact that after only 2 years Alphosyl Lotion became the leading branded preparation for psoriasis in this country.

New Alphosyl Cream Following the success of Alphosyl Lotion, this coal-tar and allantoin combination is now available in Britain as a lubricating cream. The cream base has proved a particularly effective vehicle for Alphosyl as it incorporates a combination of free fatty acids (saturated and unsaturated) naturally occurring in triglycerides, sterols and esters to give the lipid phase of the base a significant resemblance to the lipid array of normal human skin¹.

Clinical Trials The table below gives the results of four different clinical trials which show the effectiveness of Alphosyl in lotion and in cream form.

No. of patients	100% cleared	75%-99% improved	50%-74% improved	25%-49% improved	No improvement
62 ³	29	26	7	0	0
50 ⁴	11	16	17	6	0
41 ¹	27	9	5	0	0
96 ²	44	29	15	0	8

Why Alphosyl is so effective In Alphosyl, allantoin and a specially refined coal-tar extract were combined for the first time. Allantoin has been found to be particularly effective in loosening psoriatic scales⁵, while the keratoplastic effect of coal-tar is well known⁵. Alphosyl is non-greasy and non-staining and vanishes on application. It is notably safe, ^{5,4} being free from the risks which are found in other forms of treatment such as arsenicals, mercury, corticosteroids, x-ray, etc. It certainly deserves a trial in all cases of psoriasis.

Alphosyl Lotion formula - special coal-tar extract 5% + allantoin 2% in a smooth, non-greasy lotion base.

Alphosyl Cream formula - allantoin 2% + 90% alcoholic extract of coal-tar (5:1) 5% in a vanishing cream type base.

ANP 235

(WHO Non-proprietary name—Meclofenoxane)

SOME FACTS ABOUT ANP 235

1. ANP 235 (Meclofenoxane) was originally developed in the French National Research Laboratories. It belongs to a new class of substances best described as neuro-regulators.
2. The pharmacological properties of ANP 235 are to regulate the metabolism of the nerve cell, to facilitate the utilization of glucose and to combat anoxia in the cell.
3. ANP 235 does not belong to any known group of psychotropic drugs such as amphetamines or monoamine oxidase inhibitors.
4. The toxicity of ANP 235 is extremely low. Side effects so far observed are minimal.
5. The pharmacological properties of the drug suggest many uses. The main indications are confusional states in the elderly (senile, post-apoplectic, cerebral ischaemic); psychomotor retardation in children; neonatal anoxia; intoxication by alcohol or carbon monoxide; post anaesthetic confusion.
6. Clinical trials on an extensive scale, including double blind trials, have taken place in many countries. The reference list now exceeds 150 publications.
7. ANP 235, marketed abroad under other names, is now available, for clinical use in this country.
8. Literature giving full details on ANP 235 will be sent on request.

Psoriderm. SCALP LOTION

releases psoriatic scale debris
by foam flotation

Psoriderm Scalp Lotion has been introduced specifically for psoriasis of the scalp where the scales are often thick and very adherent. By releasing the fatty scalar debris it conditions the scalp for maximum response to Psoriderm Cream. It is important to inform patients that the lather should be scraped off with their hands before rinsing to prevent redeposition (following the method known as "foam flotation" which is used in industry for separation processes, e.g. mineral ores). When the hair and scalp have been cleaned, PSORIDERM CREAM should be rubbed well into all lesions.

Formula :
Lecithin, 0.3%.
Purified Distilled
Coal Tar, 2.5%
in a detergent
base.

ANTIBIOTICS AND THE INTESTINAL FLORA

Treatment with broad spectrum antibiotics suppresses the normal flora, which may be replaced by abnormal resistant organisms causing diarrhoea.

This change can be prevented or reversed by the implantation of *Lactobacillus acidophilus* which has been rendered antibiotic-resistant, and is thus able to multiply freely under these abnormal conditions. This organism itself forms an antibiotic which may contribute to its rapid preponderance over other species.^{1, 2}

Oral treatment with antibiotic-resistant *L. acidophilus* in the form of ENPAC has been shown to eliminate *Candida* from the faeces of infants with antibiotic-induced diarrhoea, with relief of symptoms succeeded by rapid gain in weight^{3, 4} and greatly to reduce the numbers of staphylococci in the faeces of patients treated with tetracyclines.⁵

PANCREATIN GRANULES

**Triple Strength Enteric-coated
(CLAY AND ABRAHAM)**

There are several substances which are used alone or in combination for the enteric coating of pharmaceutical preparations. In 1948, when these granules were originally prepared, a formula was chosen which clinical results have proved to be eminently successful. (Recent Advances in Paediatrics, Churchill, 1954, page 256.) Furthermore, a process was evolved by which not merely each granule but each particle of triple strength pancreatin receives its coating to prevent the destructive action of the gastric acid secretion while allowing the enzymes to become active in the duodenum.

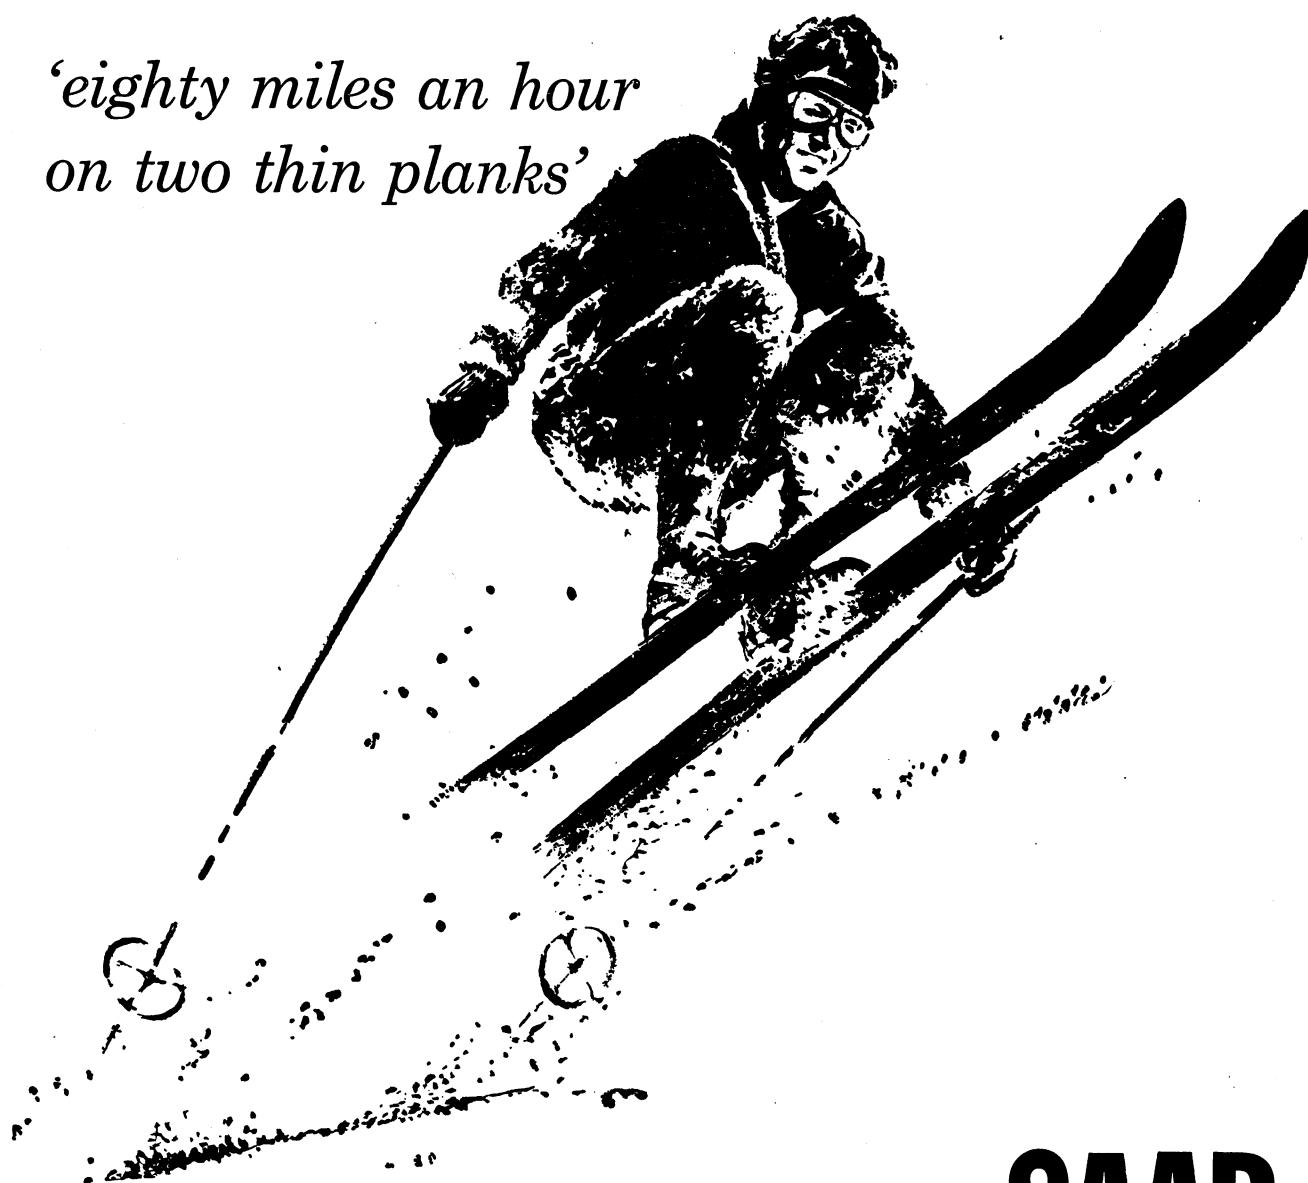

Bottles containing eight ounces.

Men who balance on the knife-edge of a down hill run, put safety first when they choose a car. Skiers don't take *unnecessary* risks, neither does anyone else who thinks for himself, that's why Saab is automatic choice for people who make the right decisions at critical moments.

This outstandingly successful car has been developed with the safety of the occupants in mind. The Saab offers self-adjusting front brakes, two separate hydraulic braking systems operated by a divided master cylinder, front wheel drive, reinforced windscreen pillars and protective side members to the body/chassis shell, among its many safety features.

Price: £725 (Incl. tax).

QUENCH BURNING PAIN of duodenal ulcer

PROMOTE HEALING!

Not only does Robinul promptly subdue the ulcer patient's pain, but perhaps even more important is the fact (confirmed by clinical studies¹⁻³) that it helps reestablish and maintain healing conditions at the ulcer site. Robinul's potent antisecretory influence, combined with its beneficial antihypermotility activity and fewer, milder side reactions, now enables you to predict complete recovery for more peptic ulcer patients sooner with greater safety, convenience and certainty.

In each Robinul tablet: glycopyrronium bromide*, 1 mg. Each Robinul-PH tablet contains: glycopyrronium bromide, 1 mg., and phenobarbitone (1/4 gr.) 16.2 mg. Dosage: 1 or 2 tablets three times a day (in the morning, early afternoon, and at bedtime).

MEDICAL OFFICER

Applications are invited for a full-time appointment in the medical services of a Unilever Company operating in Commonwealth West Africa. Candidates should preferably be not more than thirty-five years of age and should have had good experience since qualifying.

The scope of the work done by the Company's medical services varies from place to place in West Africa, but in general may be said to cover the health supervision of working communities and their dependants. In many cases this involves taking charge of a small hospital. There is also considerable opportunity for the practice of preventive medicine, public health and industrial medicine in the widest sense.

While each Doctor is administratively responsible to his local manager, his professional links are with the Assistant Principal Medical Adviser, Unilever Limited, to whom applications should be made at Unilever House, Blackfriars, London E.C.4, where the appointment will be made following a personal interview.

The starting salary with allowances for overseas service will not be less than £3,000 per annum and in accordance with age, qualifications and experience. The length of tour in West Africa is approximately fifteen months, followed by generous leave on full pay. There is a contributory pension fund, mid-tour passages are arranged, and education allowances paid for children under education in the United Kingdom.

Those preferring a short-term appointment with similar terms of service will also be considered, and in such cases an end of tour gratuity would be payable. (5193)
