Certain things are *basic* . . . The books, for instance. You may not take them down every day, but you *know* them. Sound, fundamental.

You know Aspellin, too. A really effective, economical treatment for rheumatic conditions and muscular trauma—a spirit-based liniment containing Acid Acetylsalicylic to relieve symptomatic pain *rapidly*, and Methyl Salicylate, with Menthol and Camphor, to reduce inflammation and muscle tension.

Rheumatism sufferers can only obtain Aspellin if you prescribe it. Aspellin is *only obtainable* on prescription. Cost: 10½d per oz.

ASPELLIN—indicated in the treatment of acute rheumatic conditions, sciatica, lumbago, fibrositis, muscular trauma.

“Desoxyribonuclease in pure crystalline form has been given by intramuscular injection to 32 patients in order to assess its effect on chronic superficial ulcers and other chronic inflammatory conditions. The results confirm that the enzyme given in this way does reach the lesion in effective concentration and promotes fairly rapid resolution of the exudative reaction. The consequences of this effect in favourable cases may be rapid epithelialization of chronic ulcers; rapid relief of painful cellulitis, and accelerated healing of deeper lesions.”

FROM LIGHT SEDATION
TO DEEP HYPNOSIS

Nembutal^{REGD.} (PENTOBARBITONE SODIUM, ABBOTT)

Short-acting Nembutal produces any desired degree of central depression—from light daytime sedation to deep hypnosis. The dosage required is small, less than that of many other barbiturates. Because there is less drug to be inactivated, the margin of safety is unsurpassed and there is minimal tendency to hangover. In equal oral doses, no other barbiturate offers quicker, more reliable effect. **Supplied:** In $\frac{1}{2}$ gr, $\frac{3}{4}$ gr, and $1\frac{1}{2}$ gr capsules and as Elixir Nembutal ($1\frac{1}{2}$ grs. per fl. oz.) is also available in combination with other drugs. Since its introduction in 1953, *Rauwiloid* has provided highly effective treatment in a wide range of patients with mild to moderate hypertension. Its main characteristics — simplicity of dosage, economy, and freedom from tolerance or serious side-effects — make it an ideal "first-time" product for the early stages of hypertension. Even in the more severe cases, *Rauwiloid* can be of considerable value when combined with more potent agents.

Tablets contain 2 mg. alseroxylon fraction (selected alkaloid hydrochlorides) of *Rauwolfia serpentina* in bottles of 60 and 500. Basic N.H.S. price of 60 tablets 8s. 8d.

Royal Society of Health Congress and

30 YEARS OF SERVICE

1934 was the year in which, for the first time, a number of people with the same disability joined together to help one another.

Since that date THE BRITISH DIABETIC ASSOCIATION has given unstinted and valuable service to the whole diabetic community.

Visitors to the Royal Society of Health Exhibition are cordially invited to Stand No. 16 which will feature a display of the Association's work and achievements during its first 30 years.

The 1964 Health Congress organised by the Royal Society for the promotion of Health is being held from April 27 to May 1 at Torquay. The Congress will be opened by Horace E. Gilby, J.P., F.R.I.C.S., M.I.MUN.E., F.R.S.H., Chairman of the Council of the Society. The Guest Speaker at the Inaugural Meeting will be The Right Hon. the Lord Hill of Luton and his subject is "Can Health be Taught?".

Delegates from all over the world will be attending and a most comprehensive range of Sectional Meetings and Conferences has been arranged.

A Health Exhibition will be held in conjunction with the Congress and over 70 firms and Societies will be represented. In addition an Ambulance Display will be staged on the Promenade from April 28 to 30 at which a number of manufacturers will be showing their latest models.

Aldactone-A

brand of spironolactone

for the water-logged patient

Many patients with oedema and ascites fail to get a complete response to diuretic treatment. An important cause of this resistance is excessive secretion of aldosterone, a sodium-retaining adrenal steroid.

In these water-logged patients the early addition of Aldactone-A (a selective aldosterone antagonist) to the diuretic programme is a compelling therapeutic necessity.

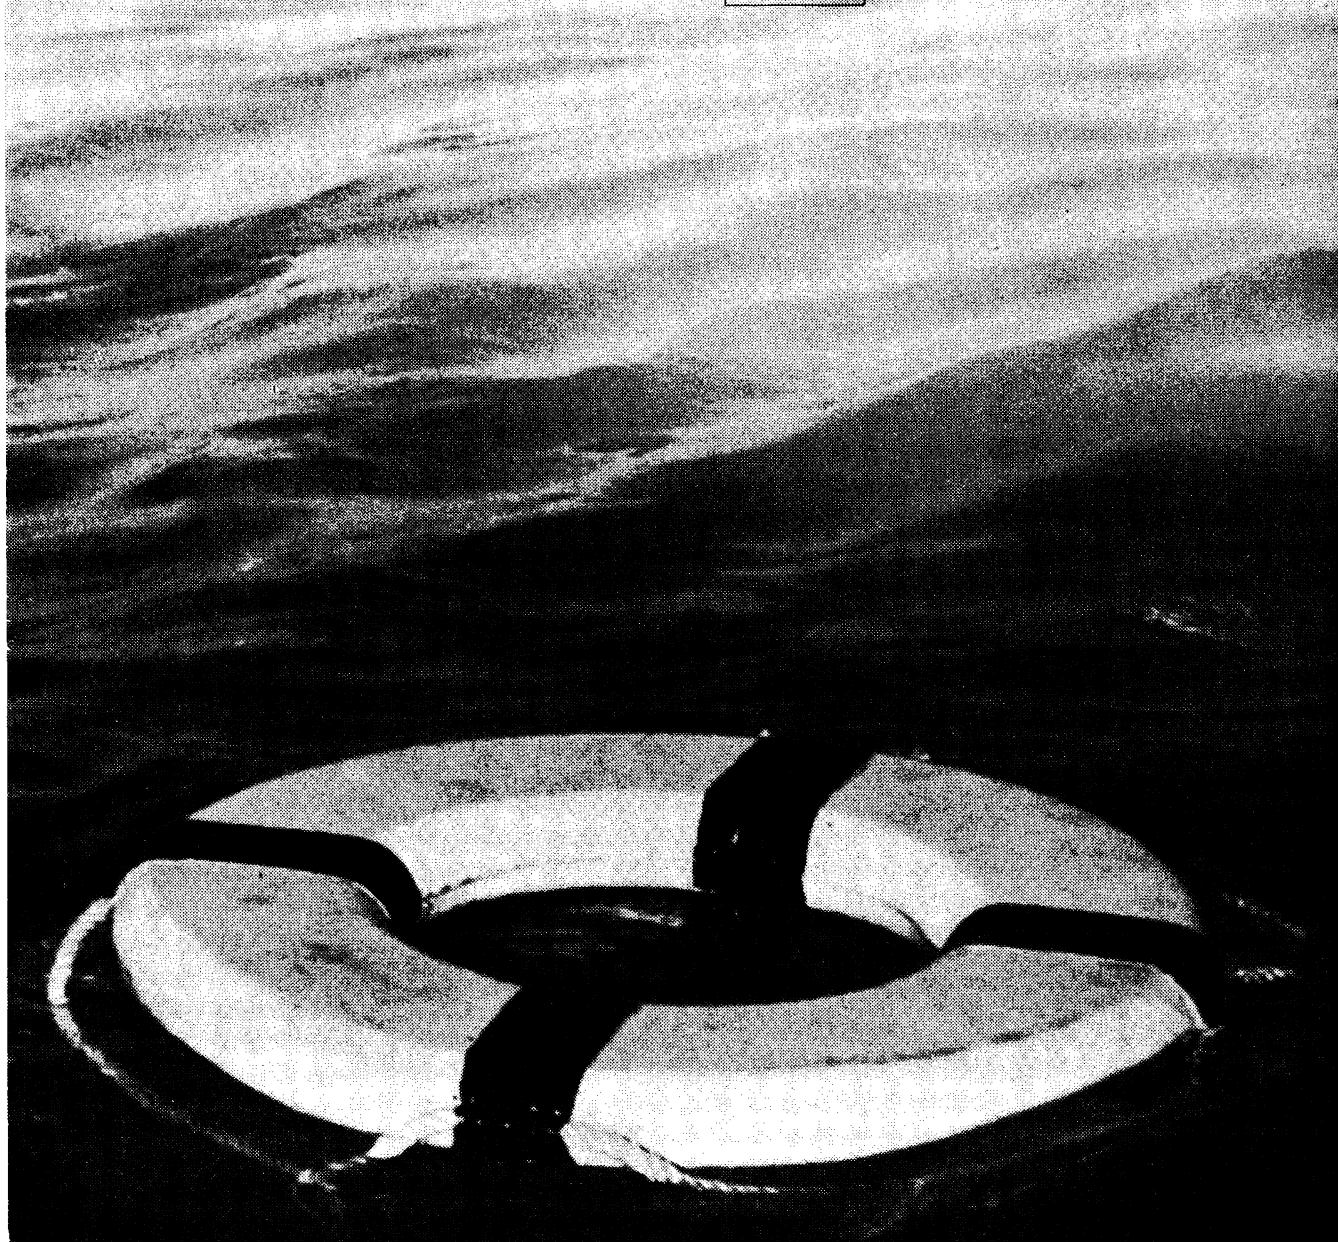

Aldactone-A acts as a booster to conventional diuretics, maintaining and enhancing their effect and enabling more complete diuresis to be achieved, until 'dry weight' is regained. Aldactone-A also increases the safety of long-term diuretic therapy by minimizing potassium depletion. Finally, patients on Aldactone-A often feel better, function better, and may be permitted a more liberal diet.

Available as 25 mg. tablets in bottles of 30, 100 and 500.

A NEW JOURNAL

Though there are two journals published in English that are devoted to heredity in man, there is no journal confined to medical genetics, and papers on the subject have been scattered over a wide number of specialized medical journals. With the increasing interest in medical genetics it is felt that the time has come for a journal devoted to this new and growing specialty.

The Journal of **MEDICAL GENETICS**

It is intended that this journal should be broadly based and that papers should appear not only on clinical studies but also on the statistical, pathological, cytological, and biochemical and other aspects. Although the journal will be mainly concerned with human genetics, occasional animal studies will be published where they are relevant. In addition, authoritative review articles will appear at fairly regular intervals.

The first quarterly number of this Journal will be published September, 1964. In the first volume there will be two numbers (September and December). In subsequent volumes, starting in 1965, there will be four numbers published in March, June, September and December. Each issue will contain some 70 pages of text.

Annual Subscription, Inland £3 3s.; Abroad £3 10s. (U.S.A. \$10.00)

and take advantage of this

SPECIAL INTRODUCTORY OFFER

All subscribers to this new Journal who order their subscription before 31 August 1964 will receive a bonus issue (i.e. subscriptions will be entered to expire in September instead of June, 1965).

SINGLE-DOSE TREATMENT FOR BOTH THREADWORMS AND ROUNDWORMS

"With its high cure-rate, lack of toxicity, ease of administration, and simplicity of dosage, we regard pripsen as, at present, the remedy of choice for enterobiasis...The doses of piperazine were less than half those hitherto used in seven days' treatment, and there were no toxic effects."

Lancet, 1960, *i*, 256.

"Pripsen...is a highly effective agent against ascariasis."

"Of the 88 patients completing the trial, 74 (84%) were cured by a single dose and, in the remaining 14, repeated dosage...resulted in a 100% cure-rate...Apart from one patient...there were no undesirable side-effects in this series, which included babies of 4 and 5 months."

SIDROS—FOR THE PATIENT DEFICIENT IN IRON

well tolerated iron compound plus reducing agent to aid absorption

In the treatment of iron-deficiency anaemia many iron salts can produce the desired increase in haemoglobin level. Some also have a tendency to produce side-effects, and there can be a great deal of wastage through non-absorption.

SIDROS is designed to overcome these disadvantages, and provides a reliable treatment for iron-deficiency anaemia.

Ferrous gluconate Each Sidros tablet contains 300 mg of ferrous gluconate which produces a highly satisfactory clinical response and is very well tolerated.

Ascorbic acid Sidros also contains ascorbic acid (30 mg per tablet) which is known to aid absorption by maintaining iron in the reduced state.

The basic NHS price of 100 Sidros tablets is 2/8 as dispensed from 1000 tablet bottle. Samples of Sidros are available on request.

SIDROS is effective, well absorbed, well tolerated and economical

What has Equanil to do with a cabbage?

The answer is nothing. And neither has your patient if you prescribe Equanil*. The plain fact is, however, that when potent depressant drugs are prescribed for patients with relatively mild anxiety and tension, there is a tendency for them to be over-sedated and become mere 'cabbages'. The drug of choice in chronic anxiety and tension is Equanil, which relaxes mind and muscle without interfering with the patient's day to day activities. Well-tolerated Equanil (Meprobamate B.P.) is available as 200 mg. and 400 mg. tablets in bottles of 20 and 250.  John Wyeth & Brother Limited, Taplow, Maidenhead, Berkshire. *trade mark

Synadrin[®] for the patient with angina pectoris

Regd. Trade Mark

Synadrin is chemically unrelated to any known treatment for coronary disease. Its activity has been demonstrated in animal experiments¹¹⁻¹⁷ and its effectiveness has been confirmed by both open and double blind trials.¹⁻¹⁰ Synadrin has been described as "an effective drug for treating angina pectoris."¹¹

Effective and safe: Synadrin has been shown to reduce the frequency of anginal attacks. It is particularly successful in patients with coronary ischaemia with or without previous infarction. It produces prolonged improvement of the coronary blood supply, and consistent treatment over a period of weeks produces the best results. Synadrin is well tolerated and its safety has been shown by use in a great number of patients since its introduction.

Dosage: Treatment may be initiated with 2 tablets, three times daily, reducing to a maintenance dose when beneficial effects are noted.

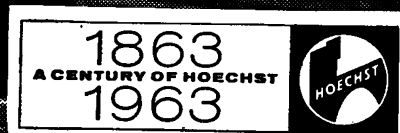

Presentation: Synadrin is presented as tablets, each containing 15 mg. of prenylamine lactate in bottles of 30 and 150 at basic NHS prices of 8/8d. and 34/8d. (subject to P.T.). Synadrin is known in some other countries as Segontin.

Enzymes

provide safe anti-inflammatory and anti-oedematous therapy

Opinions differ regarding the exact mode of action of systemically administered proteolytic enzymes. However, a wealth of clinical evidence is accumulating — each new paper reinforcing the last — which confirms that enzymes provide effective and safe anti-inflammatory therapy.

The presence of enzyme activity in the blood, after oral administration of proteolytic enzymes, has been established¹, and their power as anti-inflammatory agents is well known². Numerous clinical trials have been reported³ in which the effectiveness of enzymes is consistently confirmed in a wide variety of conditions such as accidental trauma · post-operative trauma rhinitis and sinusitis · thrombophlebitis

Proteolytic enzymes are available as:

Chymoral

Each enteric coated tablet contains the proteolytic enzymes trypsin and chymotrypsin in a ratio of approximately six to one and provides an enzyme activity equivalent to 50,000 Armour units.

Dosage: 2 tablets q.i.d. until clinical improvement. 1 tablet q.i.d. for maintenance and prophylaxis.

Children under twelve 1 tablet q.i.d.

Best results are obtained if Chymoral is administered half-an-hour before meals.

Chymar contains in each vial of Chymar Lyophilised and each 1 ml Chymar Aqueous, 5,000 Armour units of chymotrypsin for intramuscular injection.

Dosage: 5,000 units of Chymar 1 to 3 times daily until clinical improvement. The number of injections may be reduced as the patient's response permits.

**first choice
antibiotic**

Penicillin G "is the least toxic, and against most species of pathogenic gram-positive and gram-negative cocci, including strains of *Staphylococcus aureus* which do not produce penicillinase, it is still the most effective antibiotic available, new penicillins notwithstanding. This is not only because it is active in high dilutions (0.03 µg/ml or less), but because it is one of the most actively bactericidal antibiotics."

Brit. med. J., 1963, 1, 1137

**make a swift,
sure start with
Crystapen
Injection**

Because early treatment will avoid possible pain, ear damage and deafness, there is a good case for at least starting therapy of otitis media with an injection of Crystapen, say one mega unit.

**press home
the attack
with Crystapen G
tablets or syrup**

Either of these preparations is an ideal follow-up treatment to Crystapen Injection. No oral penicillin has been shown superior to oral penicillin G in adequate dosage—and penicillin G is a third cheaper than 'V'.

Alupent[®] metered aerosol

Regd. trade mark

In Asthma

The **Alupent Metered Aerosol** gives **Five Hours'** relief of wheezing **Immediately**. Recent spirometric studies have shown that **Alupent** in aerosol form relieves wheezing at once and that the duration of relief is up to eight times as long as that obtained by inhalation of Isoprenaline¹.

In this series the peak response following inhalation of **Alupent** 5% Solution was 33% greater than that produced by Isoprenaline 1% Solution by inhalation. The prompt and prolonged relief which patients obtain with the newer **Alupent Metered Aerosol** means effective, economical treatment of wheezing in asthma.

Imferon the only intramuscular iron preparation that is

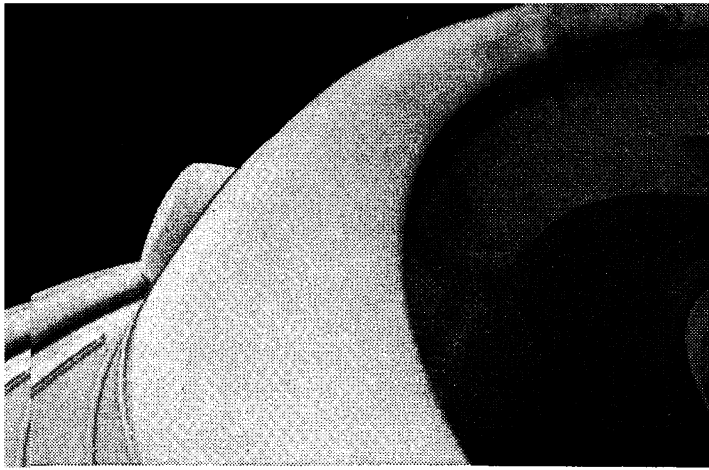

100% utilised

After the intramuscular administration of Imferon, none of the complex is excreted by any route, and utilization is complete. The preparation is particularly well tolerated and is suitable for patients of all ages. The only restriction on individual doses is the capacity of the muscle to accommodate the volume injected. Most adult patients can accept individual 5 ml. doses (\equiv 250 mg. Fe) without difficulty.

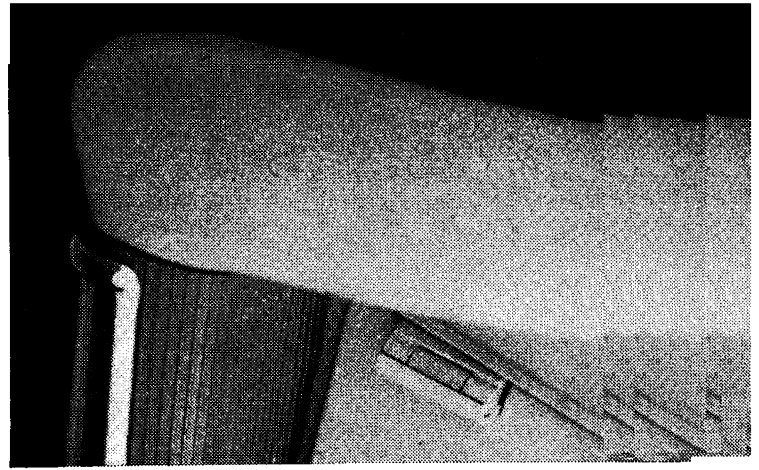

All of the iron in Imferon is readily available for rapid restoration of the haemoglobin level and replenishment of the body iron reserves. Dosage is based on the patient's specific needs and ensures rapid and complete correction of the total iron deficit.

Four tablespoons of corn oil and the reduction of high serum cholesterol levels

A recent article in the medical press¹ published the results of a study in the use of corn oil with a low animal fat diet in the reduction of high serum cholesterol levels.

The article ended: *'It is concluded that corn oil, together with a diet low in animal fat, is feasible as a long-term measure for the lowering of serum cholesterol, being safe, acceptable to the great majority of patients, and having virtually no clinical contraindications.'*

The oil used in the study, corn oil, linoleic acid content 56%—was added to diets of 1,630 and 2,080 calories, and comprised 41·5% of the total in the former, 40·0% in the latter. The quantity

of oil added to each diet was 57 ml; just four tablespoons of corn oil a day.

Mazola Pure Corn Oil has a fatty-acid composition (56·2% linoleic) identical to that of the oil used in this experiment. In addition, Mazola is palatable; it is widely used as a cooking oil. Thus Mazola, available from grocers throughout the country, is probably the most accessible and appetising source of supplementary dietary oil.

BEOGEX

CO₂—an entirely new concept
in the treatment
of constipation

BEOGEX is a suppository which liberates a pre-determined amount of carbon dioxide, causing distension of the lower bowel. This induces evacuation by causing inhibition of the external sphincter and promoting peristalsis in smooth, co-ordinated waves.

INDICATIONS

For chronic simple constipation; constipation due to prolonged bed rest and treatment by drugs. May also be used pre- and post-operatively, the

discomfort associated with straining being avoided. Safe for use during any stage of pregnancy and in cases of threatened abortion or placenta praevia. BEOGEX Paediatric suppositories are produced at half adult size.

Psoriderm[□] SCALP LOTION

releases psoriatic scale debris
by foam flotation

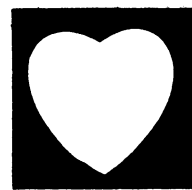

Psoriderm Scalp Lotion has been introduced specifically for psoriasis of the scalp where the scales are often thick and very adherent. By releasing the fatty scalar debris it conditions the scalp for maximum response to Psoriderm Cream. It is important to inform patients that the lather should be scraped off with their hands *before rinsing* to prevent redeposition (following the method known as "foam flotation" which is used in industry for separation processes, e.g. mineral ores). When the hair and scalp have been cleaned, PSORIDERM CREAM should be rubbed well into all lesions.

Formula :

Lecithin, 0.3%
Purified Distilled
Coal Tar, 2.5%
in a detergent
base.

BRITISH HEART FOUNDATION

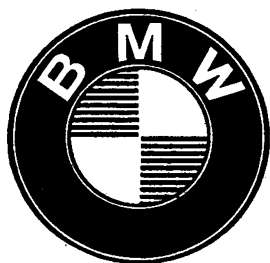

Scientific Activities

- The Foundation has now made awards totalling £276,000 for some 56 research projects.
- Work supported by funds from the British Heart Foundation is now in progress in London, Birmingham, Bristol, Cambridge, Cardiff, Derby, Dundee, Edinburgh, Glasgow, Leeds, Oxford, Portsmouth, Sheffield, Stoke-on-Trent, and Stratford-on-Avon.
- The Foundation is also prepared to support worth-while research projects in the Commonwealth, and has made awards to research workers in Lagos and Ibadan, Nigeria.
- Investigations now in progress include work on the function of the circulation, congenital heart disease, hypertension, pulmonary heart disease, arteriosclerosis, coronary thrombosis, new techniques for treatment, and fundamental problems of biochemistry.
- The names of those receiving awards from the Foundation were announced in the *British Medical Journal* of November 16th, 1963 and March 6th, 1964.
- The above research activities depend entirely upon the success of the Heart Appeal for which an initial target of three and a half million pounds has been set. The eventual aim is to provide for expenditure of half a million pounds per annum—the minimum required to finance an adequate research programme.

Life Membership of the Foundation is open for a single payment of 100 gns. (or more), (or £10 per annum on a seven-year Covenant). Ordinary Members are welcome at 5 gns. per year (£3.5.0d on a seven-year Covenant).

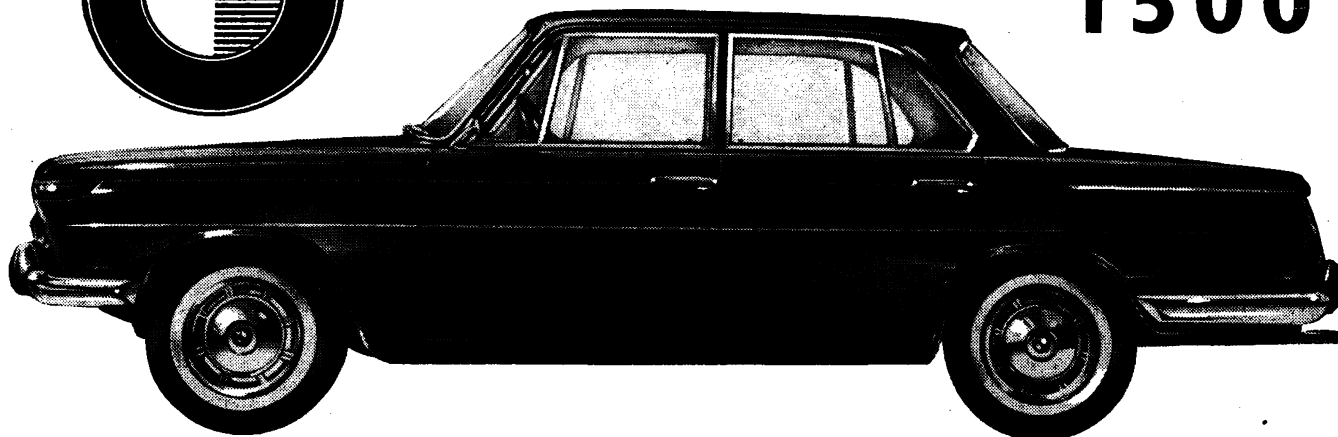

Information and forms of application for research grants may be obtained from The Appeal Office (BM1), British Heart Foundation, Tavistock House, Tavistock Square, London WC99.

ALLEN & UNWIN

The go-ahead OPPORTUNITY that is ROYAL NAVY

you find it as a MEDICAL OFFICER

As a Medical Officer, you have complete clinical freedom and a widely varied medical experience. Your practice is among 100,000 Naval men and women. Ashore or afloat, it can take you anywhere in the world from Malta to Singapore: and, when you have a shore appointment abroad, your family can be with you. Go-ahead, too, is your opportunity to specialize: not only in traditional categories, but in the modern sciences of aviation and nuclear medicine.

As a Medical Officer, your pay, allowances, and gratuity—or permanent commission pension—are very good: for example, your initial pay is considerably higher than that of a civilian hospital registrar.

You can enter by one of three ways: as a Registered Medical Practitioner—your civilian experience back-dating seniority—or as a qualified doctor doing your pre-registration year, or as a student with a 2nd M.B. For qualified women doctors, there is a special short service commission.

For fullest details of your Royal Navy life as a Medical Officer, write, mentioning your own qualifications and age to:

The Medical Director-General of the Navy, Medical Department (HN12/J), Empress State Building, London, S.W.6.

SCOTTISH POSTGRADUATE MEDICAL ASSOCIATION

Chairman:
PROFESSOR SIR DERRICK DUNLOP

The Scottish Postgraduate Medical Association is constituted by the Universities of St. Andrews, Glasgow, Aberdeen and Edinburgh and by the Royal College of Physicians of Edinburgh, the Royal College of Surgeons of Edinburgh, and the Royal College of Physicians and Surgeons of Glasgow.

The object of the Association is to develop postgraduate medical education in Scotland by means of co-operative endeavour and co-ordinated planning.

All the requirements of postgraduate medical education are available in Scotland and the Postgraduate Deans and Directors in Edinburgh, Glasgow, Dundee and Aberdeen are prepared to organise integrated courses of training for postgraduate students.

General enquiries should be directed to Professor R. B. Hunter, Secretary of the Scottish Postgraduate Medical Association, Department of Pharmacology and Therapeutics, Queen's College, Dundee, from whom further information can be obtained.

eating is a serious business...

so Heinz put everything they know into every little meal

No-one knows more about preparing baby food than Heinz. And Heinz put everything they know into it. They've got the best equipped kitchens in the country; the best cooks—trained in the delicate art of cooking pure food to keep in the natural goodness and taste; the best and freshest ingredients. Above all, Heinz offer such a wide and well-planned mixed diet, with enough variety (over 57 Baby Foods today!) to keep

the most temperamental feeder happy. In fact, these specially prepared little Baby Foods are superior to anything a mother could manage at home. And anyway, while Heinz take care of the catering so well, and so easily, mother has more time to give to her child. (Better all round for everyone!) NATIONAL HEART FOUNDATION OF AUSTRALIA**FELLOWSHIPS AND GRANTS FOR RESEARCH**

Applications, closing June 30, 1964, are invited for financial assistance for research in cardiovascular and related fields. The work may be pursued in any of the basic medical sciences or as a clinical investigation. Awards will be made in the form of Research Fellowships, Grants-in-Aid, Research Studentships and Overseas Travel Grants.

RESEARCH FELLOWSHIPS

These Fellowships will be open to University graduates who will engage in full-time research in approved laboratories and/or clinics. Research Fellowships: for graduates up to 35 years of age who have shown promise of ability in research; tenable in the first instance for one or two years; salary will be within the range £1,750 to £2,650 per annum. Senior Research Fellowships: for graduates with substantial experience and proven ability in research; tenable for three to five years; commencing salary not less than £2,750 per annum. Overseas Research Fellowships: for graduates with at least two years' experience, and significant achievement, in research; normally tenable for three years of which the first two will be spent overseas and the third in Australia; commencing salary within an adjusted range for Graduate and Senior Research Fellows. A travelling allowance equivalent to the first class air fare for the Fellow and his family will be paid. Overseas Supplementary Grants: may be made to research workers who already have appointments to approved overseas institutions, but whose salaries and travel allowances are insufficient for reasonable requirements.

GRANTS-IN-AID

These will be awarded only to non-profit institutions in which the holder possesses the requisite basic research facilities. Grants will be made for one to three calendar years to support a particular research programme, normally under the supervision of a full-time responsible investigator and with the approval of the Head of the relevant department. A grant may cover salaries for full-time or part-time research assistants and for technical and other assistants, equipment and supplies.

RESEARCH STUDENTSHIPS

Provision may be made under Grants-in-Aid for approved projects for the appointment of research students proceeding to the degree of Doctor of Philosophy. The allowance payable to research students shall be £900 per annum with annual increments of £50.

OVERSEAS TRAVEL GRANTS

These will be awarded to experienced research workers and clinicians to enable them to gain experience of overseas developments in cardiovascular research and techniques. They cover the cost of overseas class air fares only and additional stipends or allowances will not normally be paid.

YORK "A" HOSPITAL MANAGEMENT COMMITTEE

Applications are invited for the post of J.H.M.O. IN PSYCHIATRY.

Naburn and Bootham Park Hospital, York.

The hospital has two branches—Naburn (461 beds) on the outskirts of the City, and Bootham Park (214 beds) in the centre of the City.

Both hospitals have small wards: there is a high admission rate and particular emphasis is laid on the relationship of psychiatric patients in the community. The hospital is an integral part of the York Mental Health Service and has a Day Hospital, Industrial Therapy Unit and psychiatric hostels in the City.

Excellent experience is available in all branches of psychiatry and candidates who wish to take the course for the Leeds D.P.M. would be encouraged to do so; study in the past, been granted for this purpose.

Candidates may be resident or non-resident; single accommodation already exists and married accommodation may become available in the near future.

Applications, with the names and addresses of two referees, should be sent to the Physician Superintendent, Bootham Park, York, by May 11, 1964, when arrangements may also be made for intending candidates to see both the hospital and the Mental Health Service. (5827)

HOMES

ST. ANDREW'S HOSPITAL,
NORTHAMPTON
FOR NERVOUS AND MENTAL DISORDERS

President: The Earl Spencer
Medical Superintendent:
D. J. O'Connell, M.D., D.P.M.
This private hospital receives patients, both male and female, suffering from nervous and mental disorders, including alcoholism and senile illnesses. The fees range from fifteen guineas per week. Private rooms with special nurses can be provided, either in the hospital or in one of the villas in the grounds. The hospital is situated in 130 acres of pleasant grounds which provide all recreational facilities. These include a nine-hole golf course, sports ground, tennis courts, etc. A Recreation and Occupation Centre, known as Gloucester House, has been opened recently which includes an occupational therapy department, a swimming pool, a squash court, and a library with an adjoining reading room.

WANTAGE HOUSE
This is a separate reception unit to which patients may be admitted. It is equipped for the complete investigation of nervous and mental disorders by the most modern methods. All forms of treatment are available. It contains laboratories for biochemical, bacteriological and pathological research.

MOULTON PARK
Some two miles from the main hospital is the farm of approximately 600 acres. Occupational therapy is a feature of this branch and patients are given every facility for occupying themselves in farming, gardening, fruit growing, etc.
For terms and further particulars apply to the Medical Superintendent (Telephone No.: 34354 Northampton), who can be seen in London by appointment.

WYKE HOUSE, ISLEWORTH
A private hospital, established in 1826, for the individual treatment and care of a limited number of psychiatric patients. Apply Resident Physician. Tel.: ISL 7000.
