tion. There is no risk from overdosage as Alcin cannot cause either alkalosis or acid rebound.

**No Digestive tract ill-effects** Alcin has no known laxative or constipating effects.

Children under 5 years:  $\frac{1}{2}$  to 1 teaspoonful of the syrup three times a day.

5-10 years: 1 to 2 teaspoonfuls of the Syrup (or 1 to 2 'Pulvules') three times a day.

# Psoriasis

## Clinical tests confirm Alphosyl's effectiveness

Accumulating evidence increasingly underlines Alphosyl's effectiveness in cases of psoriasis, even in those that have proved intractable to other forms of treatment. Its success is attested by the fact that after only 2 years Alphosyl Lotion became the leading branded preparation for psoriasis in this country.

**New Alphosyl Cream** Following the success of Alphosyl Lotion, this coal-tar and allantoin combination is now available in Britain as a lubricating cream. The cream base has proved a particularly effective vehicle for Alphosyl as it incorporates a combination of free fatty acids (saturated and unsaturated) naturally occurring in triglycerides, sterols and esters to give the lipid phase of the base a significant resemblance to the lipid array of normal human skin<sup>1</sup>.

**Clinical Trials** The table below gives the results of four different clinical trials which show the effectiveness of Alphosyl in lotion and in cream form.

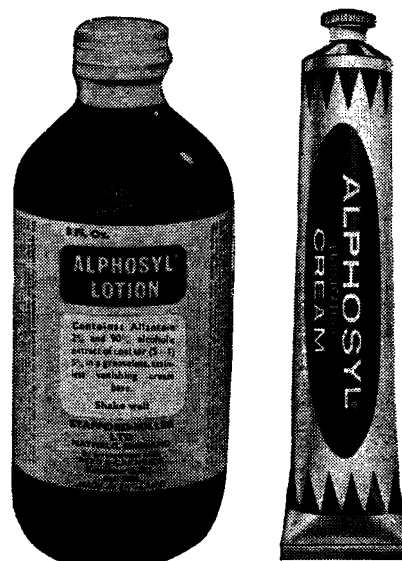

No. of patients	100% cleared	75%-99% improved	50%-74% improved	25%-49% improved	No improvement
62 <sup>3</sup>	29	26	7	0	0
50 <sup>4</sup>	11	16	17	6	0
41 <sup>1</sup>	27	9	5	0	0
96 <sup>2</sup>	44	29	15	0	8

**Why Alphosyl is so effective** In Alphosyl, allantoin and a specially refined coal-tar extract were combined for the first time. Allantoin has been found to be particularly effective in loosening psoriatic scales<sup>5</sup>, while the keratoplastic effect of coal-tar is well known<sup>5</sup>. Alphosyl is non-greasy and non-staining and vanishes on application. It is notably safe,<sup>5-4</sup> being free from the risks which are found in other forms of treatment such as arsenicals, mercury, corticosteroids, x-ray, etc. It certainly deserves a trial in all cases of psoriasis.

Stafford-Miller Limited, Hatfield, Herts. by arrangement with Reed & Carnrick, Kenilworth, New Jersey, USA.

**Alphosyl Lotion** formula - special coal-tar extract 5% + allantoin 2% in a smooth, non-greasy lotion base.

**Alphosyl Cream** formula - allantoin 2% + 90% alcoholic extract of coal-tar (5=1) 5% in a vanishing cream type base.

SEPTEMBER 1962

**AN IMPORTANT REFERENCE BOOK** for police surgeons, lawyers, forensic scientists, police officers, criminologists, doctors, sociologists, psychologists, insurance offices, analytical chemists and others whose work brings them into contact with the problem of alcohol and road traffic.

In September 1962, the world's leading authorities met together in London to discuss problems of alcohol and road traffic. The 56 papers which were presented at this conference, the subsequent discussions, and the reports of nine special working parties set up to discuss particular issues, have been collected together in these proceedings to form the most comprehensive and authoritative statement available on this important and topical subject.

The proceedings contain the most up-to-date information on the relation of alcohol, tranquillizers and other drugs to road accidents, the role of alcoholism, the most recent chemical methods of detection including breath analysis, A.D.H. and gas chromatography, police procedure with drinking drivers, and presentation of evidence in courts of law.

## **"Blenderm"**

### **SURGICAL TAPE**

### **for controlled pressure dressings**

*(Which are almost invisible)*

**\* SUPERIOR COSMETIC VALUE \* INERT COPOLYMER ADHESIVE \* OCCLUSIVE \* EXTREMELY STRETCHABLE**

"Blenderm" Surgical Tape has cosmetic value (particularly useful for eye patches and facial dressings) and offers excellent transparency for skin-viewing. What's more, it's waterproof—actually sheds water! It doesn't absorb moisture or dirt. The elasticity of "Blenderm" Surgical Tape was designed for comfortable controlled pressure dressings. For areas of extreme flex, such as finger or elbow, its elastic properties are invaluable.

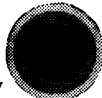

The inert copolymer adhesive reduces skin irritation—and removes easily without leaving residue. Being occlusive, when it is essential to exclude moisture, or retain body moisture, "Blenderm" Surgical Tape is invaluable especially in the treatment of skin lesions. The backing—made from polyethelene with a frosty, non-glazed finish on the surface, is a distinct improvement on many other forms of plastic.

# Efficient antiseptics with Dettol

REGD.

"If the antiseptic is to be of any value at all in most of these situations it must not only kill organisms that are dry and probably embedded in films of some kind but it must act rapidly before it is removed by evaporation, gravity or washing."

*"Efficiency of Antiseptics When Acting on Dried Organisms" Brit. Med. J. 1963 1, 499.*

According to the evidence Dettol meets these two important provisions of Rapidity of Action and Compatibility with Soap.

**Rapidity of Action**

Dettol kills *Staph. aureus*, including phage type 80/81 and *Ps. pyocyanea* in less than 2½ minutes (*vide Brit. Med. J. 1963 1, 498*).

**Compatibility with Soap**

"Unlike the other antiseptics, Dettol appeared to have its efficiency increased by the presence of soap, and against *Staph. pyogenes* the effect was one of true synergism."

*"Antiseptics in Midwifery" Brit. Med. J. 1956 2, 200.*

Dettol is non-poisonous and is well-tolerated. Its efficiency is well maintained in the presence of organic materials and it is stable in solution.

**Surgical Dettol**

A tincture for pre-operative skin disinfection available in orange, blue and colourless varieties.

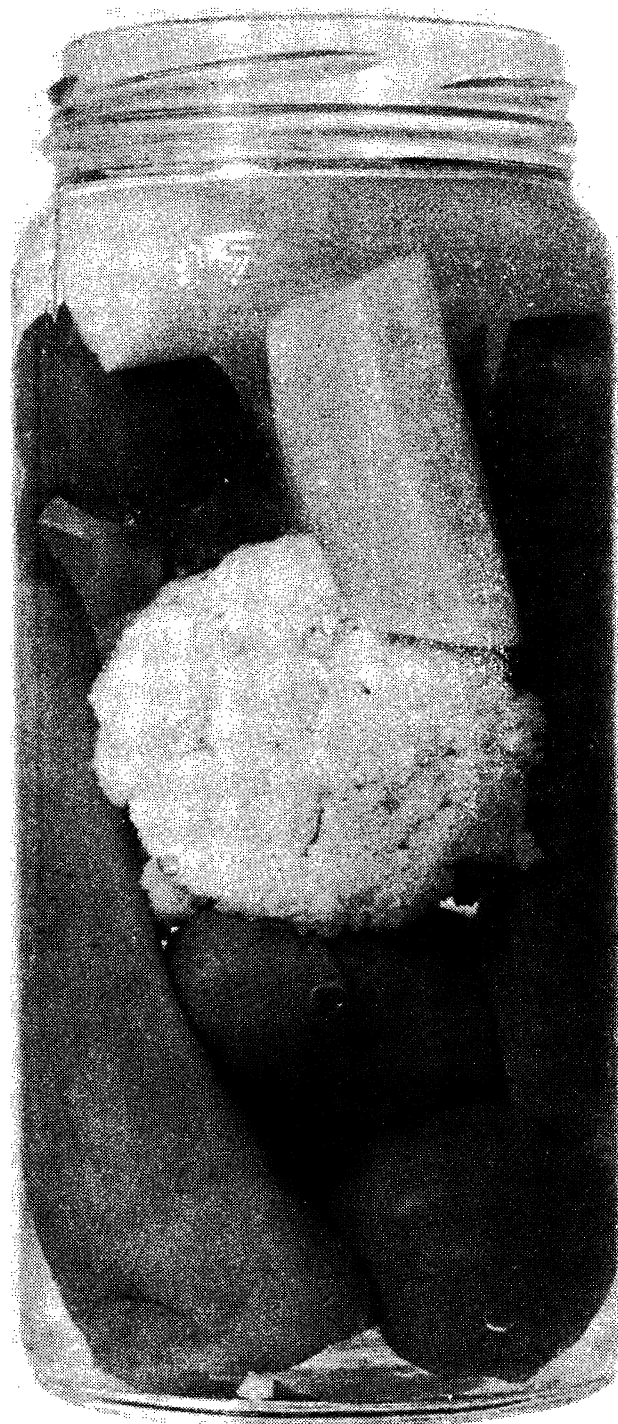

**Dettol Cream**

An antiseptic cream for surgical, medical and obstetric uses.

**Instrument Dettol**

For the disinfection and storage of surgical instruments and appliances.

*I love them

**MUCAINE**  
*quickly relieves heartburn*

Mucaine\* provides the unique mucosal anaesthetic oxethazaine in an antacid mixture to relieve the burning pain and discomfort of heartburn and control hyperacidity. ### MONASH UNIVERSITY Melbourne, Australia Faculty of Medicine

#### PAEDIATRICS—FOUNDATION CHAIR

Applications are invited from medical graduates for the Foundation Chair of Paediatrics. The department will be located at the Queen Victoria Hospital which occupies a central position within the city of Melbourne. The hospital has 389 public and 142 private and intermediate beds. There are 40 general paediatric, 61 premature and neonatal beds and approximately 4,000 out-patient attendances per annum; 5,846 babies were born in the hospital in 1963.

The Department of Paediatrics is being constructed alongside the Department of Obstetrics and Gynaecology to which Professor E. C. Wood has been appointed as Foundation Professor. Both departments will be contained within the new Robert Menzies block which will be completed by October, 1964. The successful applicant will be expected to develop his teaching and research, particularly in neonatal disorders, within his department where there would be good opportunities for such research.

It is hoped that by the early 1970's Monash University Hospital will be built on the campus at Clayton in contiguity with the medical school, the first stage of which has already been built. The Department of Paediatrics will then be redeployed to the Monash Hospital and the Professor of Paediatrics will have an important role in the planning of this new department. Because of the excellent opportunity for integrated teaching and research, it is expected at this stage that the department within Queen Victoria Hospital will continue to operate as a subdepartment of paediatrics.

The first group of fourth year medical students started clinical work in February, 1964. Paediatrics will be given in the fifth year and it is likely that there will be the opportunity for students to be in residence for their training. The Royal Children's Hospital (affiliated with the University of Melbourne) has generously offered to help with clinical facilities and teaching in the formative years of the department.

The successful applicant will be responsible for establishing courses of instruction and for research in the Department of Paediatrics.

Salary: £A.5,550 per annum with superannuation on the F.S.S.U. basis.
