

a new antacid palatable effective economical

Alcin is a new antacid offering several important advantages. It provides safe and effective treatment of symptoms associated with gastric hyperacidity and peptic ulceration.

Palatability Having an absence of chalkiness and an agreeable flavour, Alcin is non-nauseating.

Buffering Activity Alcin not only rapidly neutralises excess acid, but at the same time its sustained buffering activity maintains the level of acidity of the gastric contents within the desired range.

Safety Alcin is safe for prolonged administra-

tion. There is no risk from overdosage as Alcin cannot cause either alkalosis or acid rebound.

No Digestive tract ill-effects Alcin has no known laxative or constipating effects.

Economy Alcin is economical in use. The basic N.H.S. cost of 50 tablets is 1/9½d.

Composition: Each tablet contains 360 mg. anhydrous co-prepared sodium magnesium aluminium silicate and basic magnesium aluminate.

THIAVER

*provides sound therapy
based on accepted
principles*

The increasing use of thiazide derivatives in combination with other agents is a feature of present-day treatment of hypertension. Unfortunately these combinations do not always provide satisfactory treatment because the agent added to the thiazide is often of insufficient potency. Greater potency can now be achieved with *Thiaver*. Results of treatment in over 1100 patients over many months have amply demonstrated the ability of *Thiaver* to lower blood pres-

sure in a wide range of patients without causing troublesome side-effects, undue diuresis, and without tolerance developing to its action.

Thiaver contains epithiazide and *Veriloid*. Epithiazide is typical of the more recently introduced thiazide derivatives which are

noted for their antihypertensive activity. Its action is complemented and enhanced by *Veriloid* which is recognised as an effective antihypertensive agent which lowers blood pressure through central mechanisms. Patient management with *Thiaver* is simple because tolerance does not develop and the dosage remains constant at two tablets daily. *Thiaver* is ideally suited for long-term treatment when therapy with milder agents is inadequate. It does not cause postural hypotension or impair mental acuity.

Oral Nasal Decongestant **WANDER**

'Triominic' timed-release tablets and orange-flavoured syrup contain antihistamines and a decongestant in balanced proportions to ensure relief from symptoms of nasal allergy for between 6 and 8 hours. The active constituents of 'Triominic'—the original *oral* decongestant—reach the nasal mucosa systemically. This obviates the rebound congestion which may follow the topical use of vasoconstrictors.

This should be in every doctor's car

When resuscitation equipment is needed it is needed at once. It must be light and portable enough to be kept permanently at hand. And it must be utterly reliable and safe and the simpler the better.

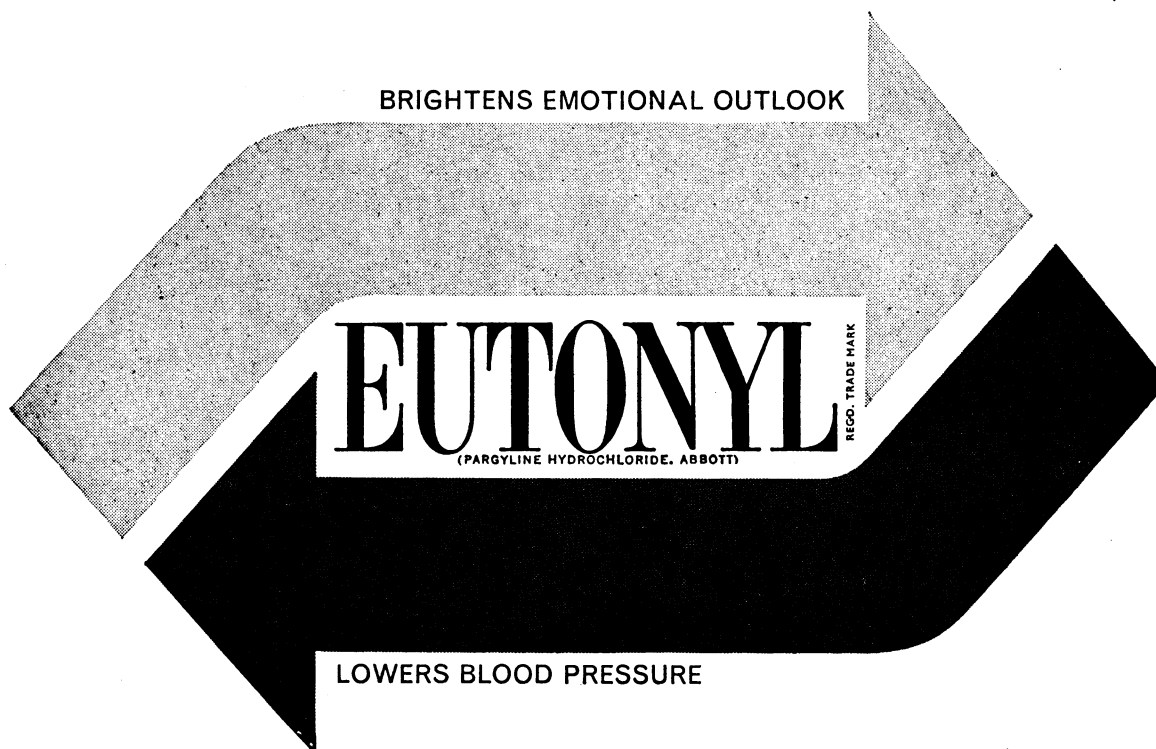

The Ambu resuscitator developed by Dr. Henning Ruben of the Finsen Institute at Copenhagen is all these things. A clear indication of its pre-eminence in the field is that it has been chosen as the standard resuscitator for Nato forces. Yet it is not expensive.

It is light, compact and extremely simple and robust. Supplementary oxygen from a cylinder can be mixed with the air pumped into the lungs—a great advantage when dealing with poisoning from noxious gases. It is inherently safe if, for one reason or another, its operation has to be left to an inexperienced person. The specially designed thin latex bag has a foam rubber lining which provides excellent "feel" and makes it impossible to apply dangerously high pressure to the lungs. This is an inexpensive piece of equipment—but without price in an emergency.

Abbott present a major new antihypertensive

Eutonyl (pargyline hydrochloride, Abbott) is a potent new antihypertensive agent. A large majority of patients with moderate to severe essential hypertension (even those resistant to other drugs) achieve significantly reduced systolic and diastolic pressure in the standing position, and often in the sitting and lying positions as well. The addition of Enduron (methyclothiazide, Abbott) permits a lower dosage, with fewer side effects. Eutonyl has a beneficial side effect in countering the depression which is often associated with hypertension, and in this respect alone offers a useful advance over other antihypertensive drugs, some of which themselves produce depression. Comprehensive literature is available on all aspects of this important new agent: dosage, side effects, precautions and the wide measure of agreement on its clinical efficacy even in the most difficult cases.

Eutonyl and Enduron are Registered Trade Marks.

Eutonyl tablets (25 mg pargyline hydrochloride) and Eutonyl-Ten tablets (10 mg pargyline hydrochloride) are supplied in bottles of 100.

The **Alupent Metered Aerosol** gives **Five Hours'** relief of wheezing **Immediately**. Recent spirometric studies have shown that **Alupent** in aerosol form relieves wheezing at once and that the duration of relief is up to eight times as long as that obtained by inhalation of Isoprenaline¹.

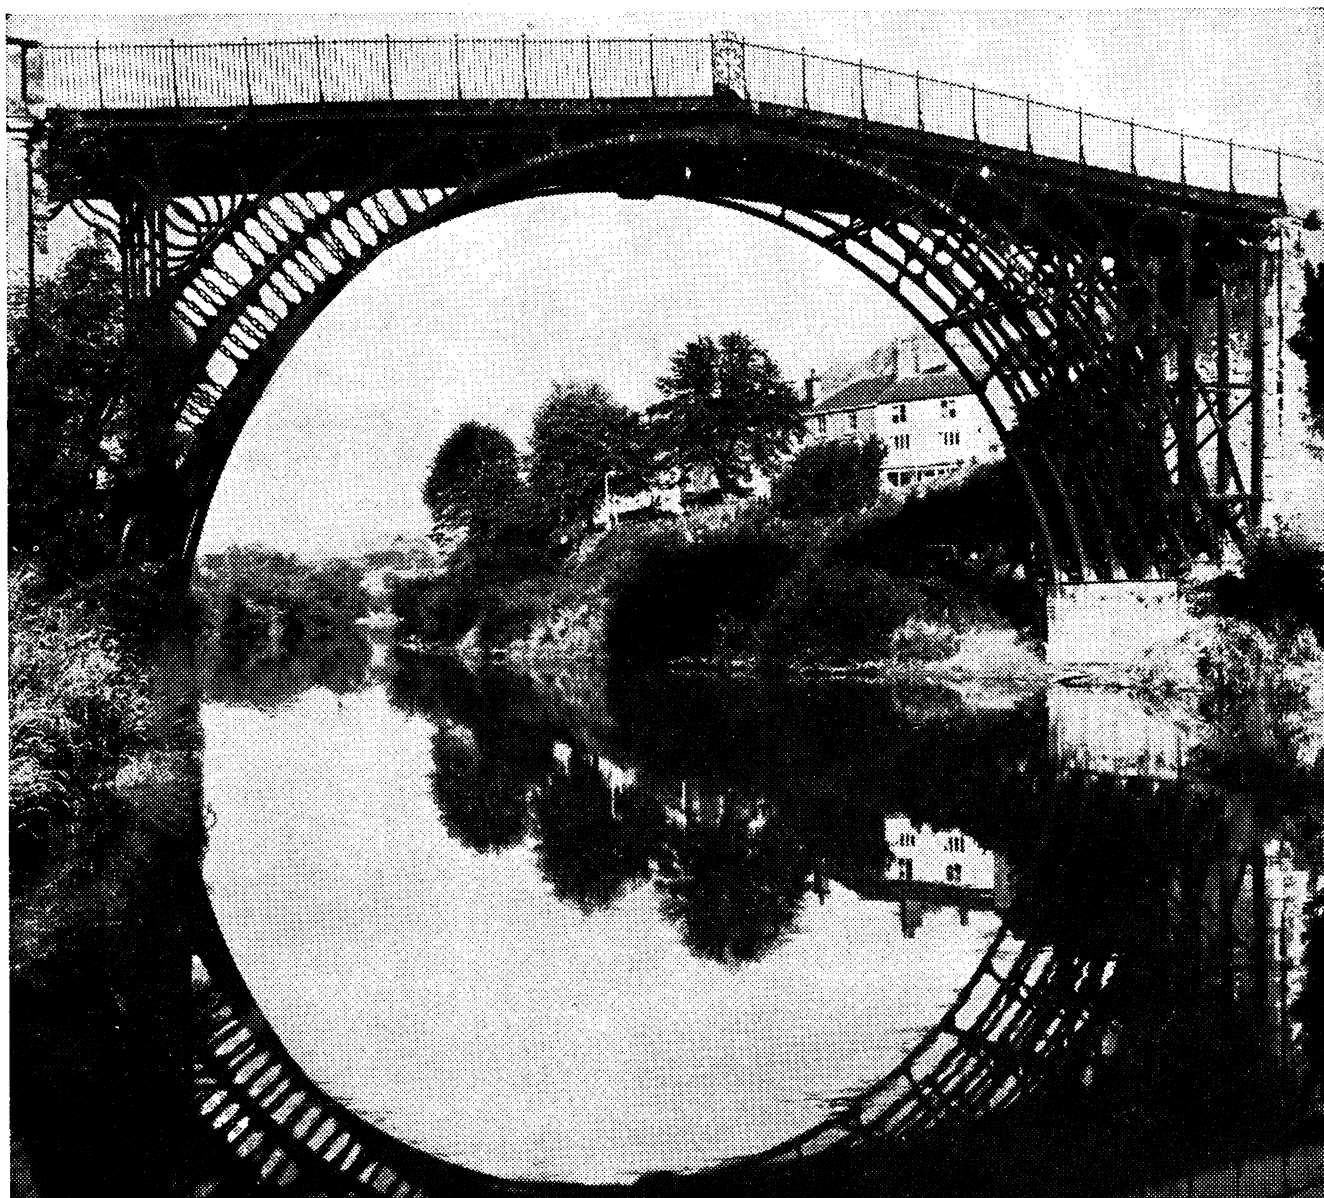

In this series the peak response following inhalation of **Alupent** 5% Solution was 33% greater than that produced by Isoprenaline 1% Solution by inhalation. The prompt and prolonged relief which patients obtain with the newer **Alupent Metered Aerosol** means effective, economical treatment of wheezing in asthma.

SIDROS—FOR THE PATIENT DEFICIENT IN IRON well tolerated iron compound plus reducing agent to aid absorption

In the treatment of iron-deficiency anaemia many iron salts can produce the desired increase in haemoglobin level. Some also have a tendency to produce side-effects, and there can be a great deal of wastage through non-absorption.

SIDROS is designed to overcome these disadvantages, and provides a reliable treatment for iron-deficiency anaemia.

Ferrous gluconate Each Sidros tablet contains 300 mg of ferrous gluconate which produces a highly satisfactory clinical response and is very well tolerated.

Ascorbic acid Sidros also contains ascorbic acid (30 mg per tablet) which is known to aid absorption by maintaining iron in the reduced state.

The basic NHS price of 100 Sidros tablets is 2/8 as dispensed from 1000 tablet bottle. Samples of Sidros are available on request.

What else to hasten recovery?

Air pollution, smoking and overcrowding in cities all contribute to the incidence of respiratory disorders. Patients may be given expectorants, suppressants, inhalants or sprays for symptomatic relief. In appropriate cases antibiotics may be prescribed. What else to hasten recovery?

Lowered resistance to infection may result from degenerative changes in the lining membranes of the respiratory tract associated with inadequate supplies of vitamin A. Acute and chronic disease of this kind

depletes body stores of vitamin C and sickness at any age may cause anorexia and malaise which often respond to treatment with vitamin B₁ (thiamine).

A preparation of these vitamins in an orange juice base with glucose is VITAVEL SYRUP. In the treatment of respiratory infections, especially in children, VITAVEL SYRUP is a useful adjunct to specific or symptomatic treatment. For the adult, where in many cases a higher dosage may be desirable, JUVEL is also available. This contains, in addition, other factors of the vitamin B complex.

Psoriasis

Clinical tests confirm Alphosyl's effectiveness

Accumulating evidence increasingly underlines Alphosyl's effectiveness in cases of psoriasis, even in those that have proved intractable to other forms of treatment. Its success is attested by the fact that after only 2 years Alphosyl Lotion became the leading branded preparation for psoriasis in this country.

New Alphosyl Cream Following the success of Alphosyl Lotion, this coal-tar and allantoin combination is now available in Britain as a lubricating cream. The cream base has proved a particularly effective vehicle for Alphosyl as it incorporates a combination of free fatty acids (saturated and unsaturated) naturally occurring in triglycerides, sterols and esters to give the lipid phase of the base a significant resemblance to the lipid array of normal human skin¹.

Clinical Trials The table below gives the results of four different clinical trials which show the effectiveness of Alphosyl in lotion and in cream form.

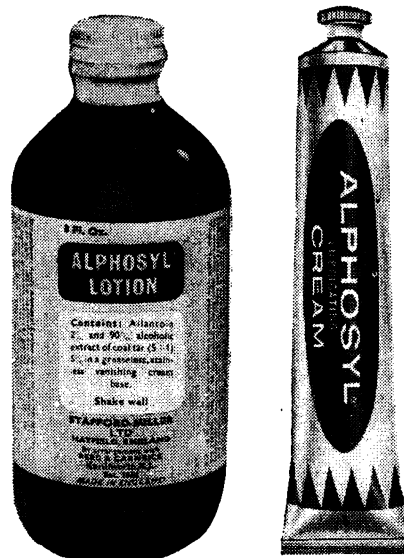

No. of patients	100% cleared	75%-99% improved	50%-74% improved	25%-49% improved	No improvement

96 ²	44	29	15	0	8

Why Alphosyl is so effective In Alphosyl, allantoin and a specially refined coal-tar extract were combined for the first time. Allantoin has been found to be particularly effective in loosening psoriatic scales⁵, while the keratoplastic effect of coal-tar is well known⁵. Alphosyl is non-greasy and non-staining and vanishes on application. It is notably safe,⁵⁻⁴ being free from the risks which are found in other forms of treatment such as arsenicals, mercury, corticosteroids, x-ray, etc. It certainly deserves a trial in all cases of psoriasis.

Enzymes

provide safe anti-inflammatory
and anti-oedematous therapy

Opinions differ regarding the exact mode of action of systemically administered proteolytic enzymes. However, a wealth of clinical evidence is accumulating — each new paper reinforcing the last — which confirms that enzymes provide effective and safe anti-inflammatory therapy. The presence of enzyme activity in the blood, after oral administration of proteolytic enzymes, has been established¹, and their power as anti-inflammatory agents is well known². Numerous clinical trials have been reported³ in which the effectiveness of enzymes is consistently confirmed in a wide variety of conditions such as accidental trauma • post-operative trauma rhinitis and sinusitis • thrombophlebitis

Proteolytic enzymes are available as:

Chymoral

Each enteric coated tablet contains the proteolytic enzymes trypsin and chymotrypsin in a ratio of approximately six to one and provides an enzyme activity equivalent to 50,000 Armour units.

Dosage: 2 tablets q.i.d. until clinical improvement. 1 tablet q.i.d. for maintenance and prophylaxis.

Children under twelve 1 tablet q.i.d.

Best results are obtained if Chymoral is administered half-an-hour before meals.

Chymar contains in each vial of Chymar Lyophilised and each 1 ml Chymar Aqueous, 5,000 Armour units of chymotrypsin for intramuscular injection.

Dosage: 5,000 units of Chymar 1 to 3 times daily until clinical improvement. The number of injections may be reduced as the patient's response permits.

Getting through to your patient

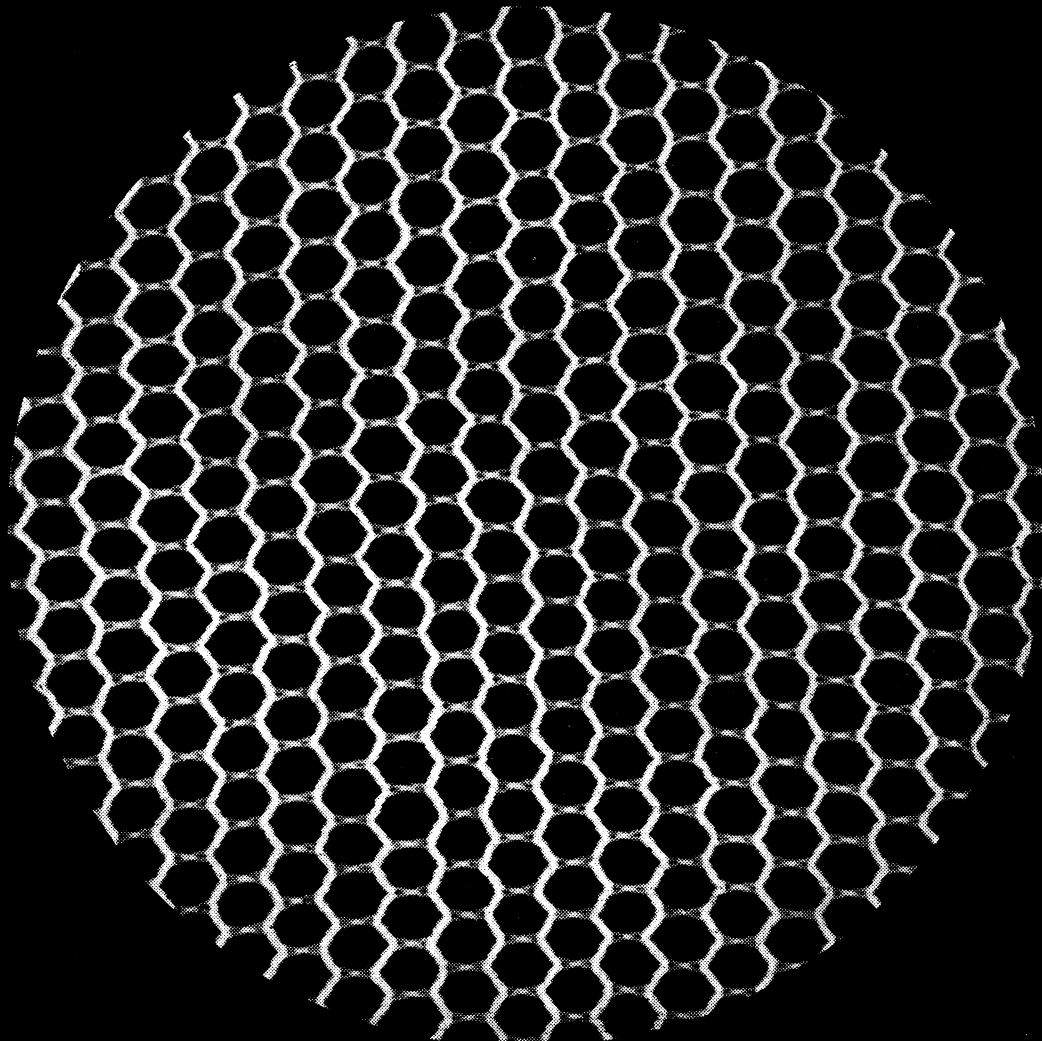

This is a double problem where varicose veins are concerned. First there is the problem of persuading the patient that she should wear surgical hosiery regularly—and Lastonet Foundation Stockings do to some extent help solve this. Secondly, there is the problem of prescribing a stocking that not only gives firm, overall support but also permits the air to get through to the leg. The special mesh of Lastonet Foundation Stockings allows free ventilation—and in addition, since it expands and contracts readily, follows the natural elasticity of the skin.

Lastonet Foundation Stockings are supplied under the N.H.S. and are always made to the individual measurements of the wearer.

Lastonet supply all five types of stockings on the Drug Tariff, and after twenty years' experience regard the net stocking—and in particular the new lightweight net stocking—as the best hosiery for mild and medium cases of varices. A comprehensive guide to elastic hosiery, its use, care and prescription, is available. May we send you one?

ANTIBIOTICS AND THE INTESTINAL FLORA

Treatment with broad spectrum antibiotics suppresses the normal flora, which may be replaced by abnormal resistant organisms causing diarrhoea.

This change can be prevented or reversed by the implantation of *Lactobacillus acidophilus* which has been rendered antibiotic-resistant, and is thus able to multiply freely under these abnormal conditions. This organism itself forms an antibiotic which may contribute to its rapid preponderance over other species.^{1, 2}

Oral treatment with antibiotic-resistant *L. acidophilus* in the form of ENPAC has been shown to eliminate *Candida* from the faeces of infants with antibiotic-induced diarrhoea, with relief of symptoms succeeded by rapid gain in weight^{3, 4} and greatly to reduce the numbers of staphylococci in the faeces of patients treated with tetracyclines.⁵

SYDNEY HOSPITAL KANEMATSU MEMORIAL INSTITUTE Sydney, Australia

DIRECTOR OF BACTERIOLOGY Applications closing July 3, 1964, are invited from suitably qualified medical or science graduates for the above post.

Sydney Hospital (438 beds) is a teaching hospital of Sydney University Medical School, and an active postgraduate centre. The Institute comprises a Research Department (clinical and fundamental) and four Clinical Pathology Departments. A full-time specialist, who has an assistant in his specialty, is in charge of each Department.

The Bacteriology Department provides routine bacteriology and serology services for the hospital. The present staff establishment provides for a Director, Assistant Bacteriologist (science graduate), Pathology Registrar, Chief Medical Technologist, five senior trained and two trainee medical technologists and a secretary.

The Director has taken part in postgraduate activities and has pursued investigational work of his choice. The appointee will be expected to contribute to the advancement of medical knowledge; to attend at least one appropriate scientific conference, or similar function, within Australia each year, the Board making some contribution towards expenses.

Qualifications: This is a Senior Specialist appointment and higher qualifications and specialized experience in bacteriology are essential. Science graduates must possess a Ph.D. or equivalent and have had considerable experience in bacteriology.

Salary: This will be according to qualifications, but will be between the range of £A.3,356 to £A.4,056. Under the Medical Officers' Determination, there may be progression to £A.4,306 in the fifth year and £A.4,556 in the tenth year.

Conditions of Employment: Four weeks' annual leave; supernumerary (after a qualifying period of 12 months); long service leave; sick leave fourteen days per annum (cumulative).

Further particulars may be obtained from Dr. N. H. Rose, Medical Superintendent. Fees and Renewal Expenses: Consideration will be given, in appropriate cases (for example—in the case of an interstate and overseas appointment) to meeting the reasonable fares and expenses involved. Applicants should indicate how much financial assistance they seek.

Applications, giving full personal and professional particulars, the date on which duties could be taken, the names of three referees, and including a recent photograph of the applicant, should be addressed to the undersigned.—H. R. Beer, Chief Executive Officer. (7088)

The Institute comprises a Research Department (clinical and fundamental) and four Clinical Pathology Departments. A full-time specialist, who has an assistant in his specialty, is in charge of each Department. The Haematology Department provides the routine haematology services for the hospital. The present establishment comprises Director, Assistant Haematologist (medical specialist), two Pathology Registrars, one science graduate, eight technologists and three nursing sisters.

The Director will be encouraged to take part in the work of the Haematology Clinic and in postgraduate activities and to pursue investigational work of his choice. He will be expected to contribute to the advancement of medical knowledge and attend at least one appropriate scientific conference, or similar function, within Australia each year, the Board making some contribution towards expenses.

Qualifications: Possession of a higher qualification and of specialized experience in haematology, adequate for a senior post.

Salary: This will be according to qualifications, but will be between the range of £A.3,356 and £A.4,306 rising to £A.4,556 in the tenth year of service, under the Medical Officers' Determination.

Conditions of Employment: Four weeks' annual leave; supernumerary (after a qualifying period of twelve months); long service leave; sick leave fourteen days per annum (cumulative).

Further particulars may be obtained from Dr. N. H. Rose, Medical Superintendent. Fees and Removal Expenses: Consideration will be given in appropriate cases (for example—in the case of an interstate and overseas appointment) to meeting the reasonable fares and expenses involved. Keep your
peptic ulcer
patient at
work with
NACTON
REGD.

Nacton halves gastric acid secretion:
lessens gastric spasm without
side-effects in therapeutic doses

During a 3-year follow-up trial* with Nacton when the
patients' food was entirely of their own choosing:

- Antacids were found unnecessary
- Duodenal deformity was reduced in 42% of the patients
- Average loss of time from work was reduced from 4 weeks
to only half a day per year.

**Brit. med. J., (1961), i, 1575*

NACTON (poldine methylnethosulphate) is a product of British research at
BEECHAM RESEARCH LABORATORIES
