METHYLDOPA

REGD

'a great advance in the treatment of hypertension'*

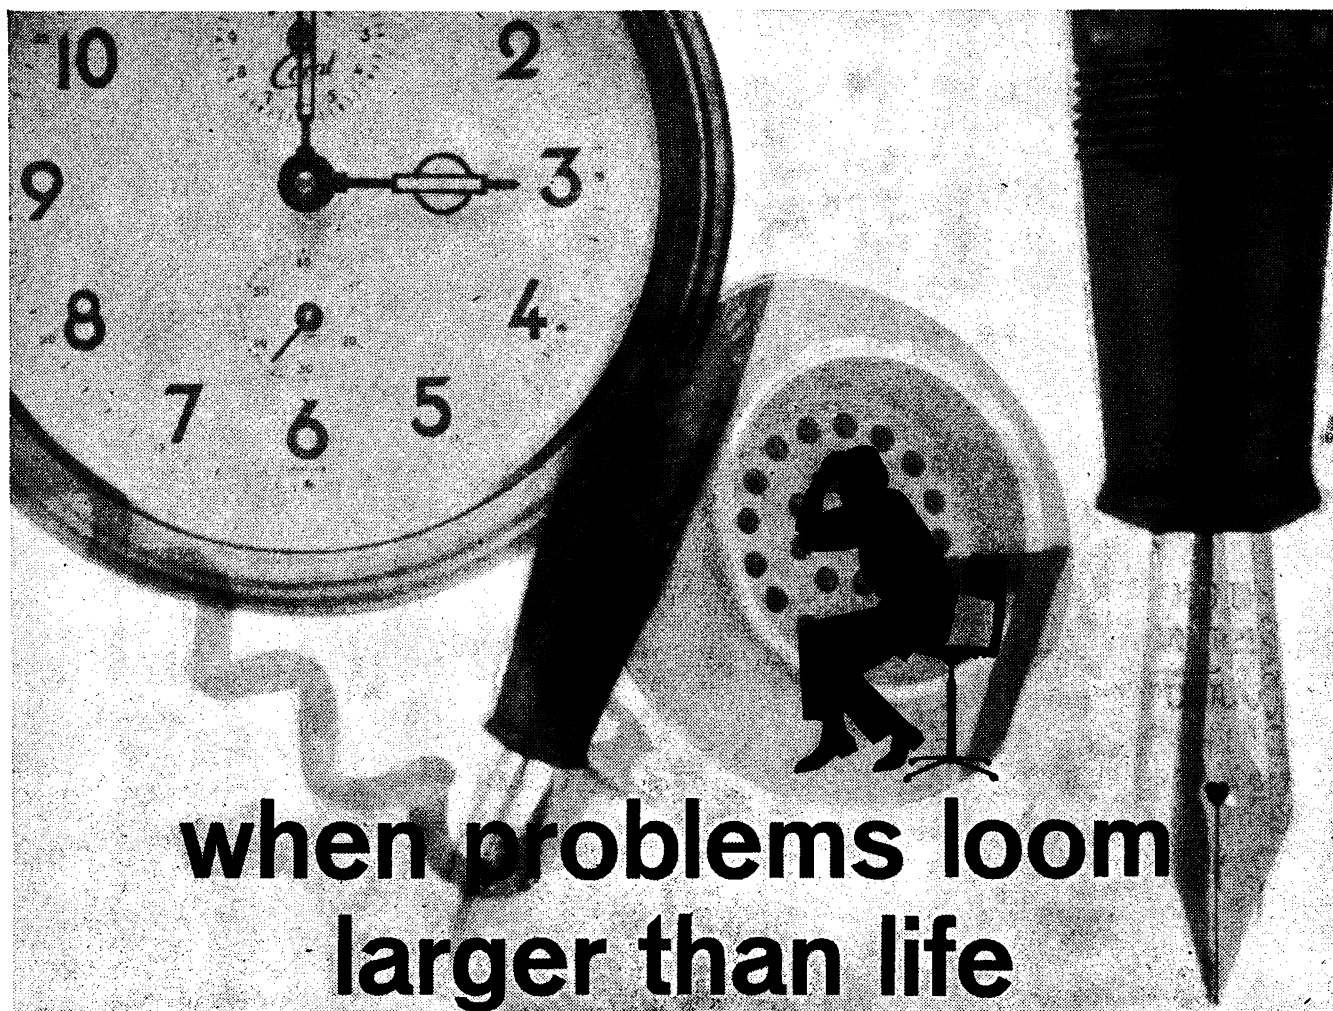

A new comprehensive guide to the use of the antihypertensive agent 'Aldomet' (methyldopa) is now available.

This booklet contains synopses of clinical papers on 'Aldomet' which have appeared in the British Medical Press up to December 1963, and thus gives a representative picture of clinical experience with the agent. Full details of dosage, administration, precautions and side effects are also given in the booklet, which is available to all physicians on request.

'Aventyl'*

BRAND NORTRIPTYLINE

*new wide spectrum mood enhancer
lends wings to troubled minds*

When the patient is overwhelmed by normal everyday stresses, 'Aventyl' often brings prompt relief. Even in the more serious behaviour disturbances—whether marked by depression or anxiety, or both—'Aventyl', with its unusually wide spectrum of action, broadens the doctor's power to relieve the troubled mind swiftly.

'Aventyl' has an inherent beneficial effect on anxiety and hostility—it is not a combination of an antidepressant with a tranquillizer, but a *single entity* going beyond mere antidepressant action as such. Four out of five patients with symptoms referable to anxiety and depression (including psychosomatic disturbances) are likely to respond favourably to 'Aventyl', many of them within a week.

'Aventyl' is not a monoamine oxidase inhibitor.

At last! A really palatable flavoured PAS

Pasinah-D is the first PAS preparation in which the taste of Sodium PAS is successfully disguised when in solution. It dissolves completely in cold milk or water to make a pleasantly-flavoured, easy-to-take drink. Only two doses daily are required, and flavours may be alternated to give variety and lessen the danger of defaulting. Pasinah-D is very well tolerated and is specially acceptable to children.

Synadrin[®] for the patient with angina pectoris

Regd. Trade Mark

Synadrin is chemically unrelated to any known treatment for coronary disease. Its activity has been demonstrated in animal experiments ¹¹⁻¹⁷ and its effectiveness has been confirmed by both open and double blind trials. ¹⁻¹⁰ Synadrin has been described as "an effective drug for treating angina pectoris."¹¹

Effective and safe: Synadrin has been shown to reduce the frequency of anginal attacks. It is particularly successful in patients with coronary ischaemia with or without previous infarction. It produces prolonged improvement of the coronary blood supply, and consistent treatment over a period of weeks produces the best results. Synadrin is well tolerated and its safety has been shown by use in a great number of patients since its introduction.

Dosage: Treatment may be initiated with 2 tablets, three times daily, reducing to a maintenance dose when beneficial effects are noted.

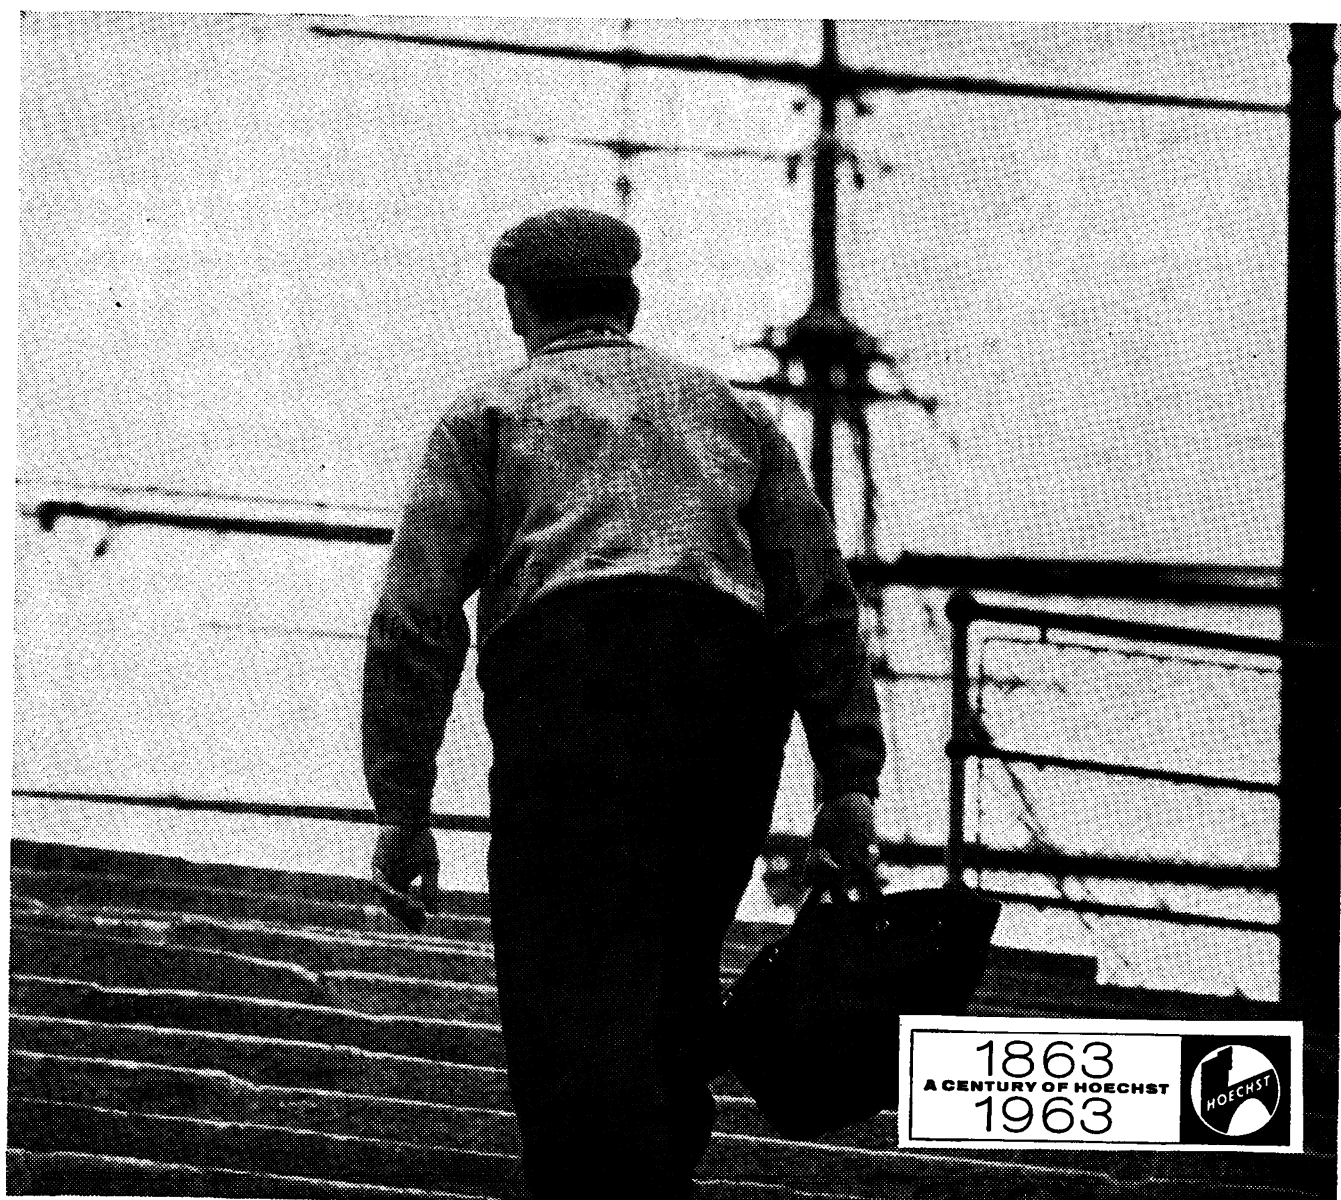

Presentation: Synadrin is presented as tablets, each containing 15 mg. of prenylamine lactate in bottles of 30 and 150 at basic NHS prices of 8/8d. and 34/8d. (subject to P.T.). *Synadrin is known in some other countries as Segontin.*

"Desoxyribonuclease in pure crystalline form has been given by intramuscular injection to 32 patients in order to assess its effect on chronic superficial ulcers and other chronic inflammatory conditions. The results confirm that the enzyme given in this way does reach the lesion in effective concentration and promotes fairly rapid resolution of the exudative reaction. The consequences of this effect in favourable cases may be rapid epithelialization of chronic ulcers; rapid relief of painful cellulitis, and accelerated healing of deeper lesions."

of what value are microdoses of
folic acid in anaemia of pregnancy?

folaeamin provides sounder protection against anaemia of pregnancy than oral iron alone

Recent investigations* indicate that folic acid added to iron provides a sounder prophylactic approach to anaemia of pregnancy than oral iron alone. *Folaeamin* has been formulated with this in mind and is significantly different from other haematinic preparations in one major respect. In addition to iron, *Folaeamin* contains a *microdose* of folic acid (50 micrograms). Microgram doses of folic acid routinely administered from the early months of pregnancy not only ensure increased response to oral iron but can prevent folic acid deficiency and the emergence of a frank megaloblastic anaemia, without masking a true pernicious anaemia.

Scientific Activities

- The Foundation has now made awards totalling £276,000 for some 56 research projects.
- Work supported by funds from the British Heart Foundation is now in progress in London, Birmingham, Bristol, Cambridge, Cardiff, Derby, Dundee, Edinburgh, Glasgow, Leeds, Oxford, Portsmouth, Sheffield, Stoke-on-Trent, and Stratford-on-Avon.
- The Foundation is also prepared to support worth-while research projects in the Commonwealth, and has made awards to research workers in Lagos and Ibadan, Nigeria.
- Investigations now in progress include work on the function of the circulation, congenital heart disease, hypertension, pulmonary heart disease, arteriosclerosis, coronary thrombosis, new techniques for treatment, and fundamental problems of biochemistry.
- The names of those receiving awards from the Foundation were announced in the *British Medical Journal* of November 16th, 1963 and March 6th, 1964.
- The above research activities depend entirely upon the success of the Heart Appeal for which an initial target of three and a half million pounds has been set. The eventual aim is to provide for expenditure of half a million pounds per annum—the minimum required to finance an adequate research programme.

Life Membership of the Foundation is open for a single payment of 100 gns. (or more), (or £10 per annum on a seven-year Covenant). Ordinary Members are welcome at 5 gns. per year (£3.5.0d on a seven-year Covenant).

Information and forms of application for research grants may be obtained from The Appeal Office (BM2), British Heart Foundation, Tavistock House, Tavistock Square, London WC99.

The problem of the dirty mouth

Even in 1964 the dangers, and the unpleasantness, of the dirty mouth are still present in the post-operative period, as well as in many fevers; the geriatric patient being especially prone to them. Careful attention to oral hygiene will usually, of course, keep the patient comfortable and prevent complications. Such attention, however, is very time-consuming to the nurse; and it is not often realised that for most patients it can be replaced or supplemented by the use of chewing gum.

The regular use of chewing gum, by stimulating salivary flow, keeps the mouth clean in the most natural way possible. The patient is in a sense providing his own nursing care with the minimum of energy expenditure by himself.

Child patients, of course, need no encouragement to chew gum. The older patient may need encouraging—but not once he has appreciated the very obvious cleansing and refreshing effect that chewing gum has upon the mouth. Chewing gum is also of value to patients who are forbidden to smoke.

Betamethasone in General Practice

Betnelan (betamethasone) is particularly well suited for low or 'physiological' dose therapy of rheumatoid arthritis. It has high anti-rheumatic activity, but shows improved gastro-intestinal tolerance, has virtually no effect on electrolyte balance, and has no depressive action on mental function. A further development with betamethasone has been the introduction of Betnesol Tablets. They dissolve spontaneously in water to form a palatable, tinted, clear solution, offering rapid and consistent absorption. Betnesol is well tolerated because no solid steroid reaches the stomach. It is the most acceptable and advanced form of oral corticosteroid therapy that you can give your patients.

IRON DEFICIENCY

Imferon replaces iron tablets...by quickly replacing the body's iron reserves as well

IMFERON, intramuscular iron-dextran complex, goes straight to the root of iron deficiency—and does much more than just raise the haemoglobin level. The body iron stores cannot be replaced by oral iron unless therapy is maintained continuously for many months. IMFERON simultaneously replenishes essential iron stores and the haemoglobin level, with rapidity and efficiency thus preventing early relapse into an anaemic state. Complete treatment of iron deficiency is vital in pregnancy for the safety of mother and child. In all other cases of established iron deficiency, IMFERON provides a calculated and complete treatment. Remember IMFERON corrects *total* iron deficiency, not just iron deficiency anaemia alone.

FLAT FOOT?

TRADITIONAL METHOD

ANY SHOE with external wedge. Any external wedge to heel disturbs plane of forepart and heel.

OUR METHOD

INNERAZE keeps sole and heel in perfect alignment.

... do you recommend an external wedge on the shoes?

But the wedges soon wear away; and very often the child is made to feel self-conscious because his shoes look different from other children's. As the diagram on the left clearly shows, any external wedge to heel disturbs the plane of forepart and heel. Surely it's more logical to have a wedge built-in between the inner and the outer sole—where it can correctly corset the foot, remain invisible, and completely unaffected by wear or repair of the shoe. That is how Start-rite INNERAZE shoes are made—on remedial lasts specially adapted to accommodate the internal wedge. That is why they are the only practical and thoroughly effective solution to this problem.

REMIDERM

new for the
most effective
management
of inflammatory
dermatoses

In the treatment of inflammatory dermatoses, *Remiderm*, which combines a highly effective antiseptic, halquinol, with the well-established topical corticosteroid, triamcinolone acetonide, rapidly relieves the inflammatory, pruritic or allergic symptoms, and at the same time, protects the lesion from secondary infection. Where infection is already present *Remiderm* hastens recovery by controlling the causative organisms, but, unlike the antibiotic-corticosteroid combinations, *Remiderm* has not been found to cause skin sensitization and cannot induce the development of antibiotic-resistant bacteria.

Remiderm is available in two forms: cream and ointment. Each contains triamcinolone acetonide 0.025% and halquinol (Squibb chlorhydroxyquinoline) 0.75%. Packs: 15 gm. tubes, 7/9 basic NHS price.

5 drops for the removal of **EAR WAX**

Results confirm that Cerumol is the most efficient agent yet introduced for the purpose and that it is exceptionally reliable and safe. In 10-30 minutes the softened or disimpacted wax can usually be wiped out with a probe tipped with

cotton wool, or by gentle syringing. Patients can readily be instructed to instil the drops themselves and, in many cases, the loosened wax will run out of its own accord, rendering further attendance at the surgery unnecessary.

CERUMOL®

Active ingredients per 100 ml.
P-dichlorobenzene B.P.C. 2 G., Benzocaine
B.P. 2.7 G., Chlorbutol B.P. 5 G., Ol.
Terebinth 10 ml.

The go-ahead
OPPORTUNITY
that is ROYAL NAVY

you find it as a
MEDICAL OFFICER

As a Medical Officer, you have complete clinical freedom and a widely varied medical experience. Your practice is among 100,000 Naval men and women. Ashore or afloat, it can take you anywhere in the world from Malta to Singapore: and, when you have a shore appointment abroad, your family can be with you. Go-ahead, too, is your opportunity to specialize: not only in traditional categories, but in the modern sciences of aviation and nuclear medicine.

As a Medical Officer, your pay, allowances, and gratuity—or permanent commission pension—are very good: for example, your

initial pay is considerably higher than that of a civilian hospital registrar.

You can enter by one of three ways: as a Registered Medical Practitioner—your civilian experience back-dating seniority—or as a qualified doctor doing your pre-registration year, or as a student with a 2nd M.B. For qualified women doctors, there is a special short service commission.

For fullest details, write, mentioning your own qualifications and age to: The Medical Director General of the Navy, Medical Dept. (HN12/K). Empress State Building, London, S.W.6.

**APPOINTMENT OF SENIOR MEDICAL
OFFICER OR PRINCIPAL ASSISTANT
MEDICAL OFFICER**

Applications are invited from registered
medical practitioners holding the Diploma in
Public Health for two posts of either Senior
Medical Officer or Principal Assistant Medi-
cal Officer at a salary rising to not less than
£2,450 per annum. The final gradings of
these posts will be determined upon the as-
sessed decisions of the Whitley Council. Both
posts will include general public health
duties, but one will be particularly con-
cerned with maternity and child welfare
duties, and the other with the school health
service and some civil defence duties.

Car allowance payable: assistance given
in obtaining accommodation.

Further particulars and application forms
may be obtained from the Medical Officer
of Health, 1 Western Parade, Portsmouth.

Southsea, and has a population of 225,000.

COUNTY BOROUGH OF SMETHWICK

**ASSISTANT MEDICAL OFFICER OF
HEALTH AND SCHOOL MEDICAL
OFFICER**

Duties will consist of work in connexion with
the School Health Service—including the
examination and ascertainment of handi-
capped pupils—and Child Welfare Clinics,
and opportunities will be given for the suc-
cessful applicant to gain experience in special
fields of public or school health work. The
possession of the Diploma in Public Health
or the Diploma in Child Health is desirable
but not essential. Salary in accordance
with the Whitley Council scale for Assis-
tant Medical Officers of Health. The appoint-
ment will be subject to two months' notice
on either side.

Applications, stating age, qualifications
and experience, and the names of two re-
ferees, should reach the Medical Officer of
Health, Council House, Smetwick, as soon
as possible. (7751)

COUNTY BOROUGH OF SOLIHULL

**APPOINTMENT OF ASSISTANT
MEDICAL OFFICER OF HEALTH AND
SCHOOL MEDICAL OFFICER
(Male)**

Applications are invited from registered
medical practitioners for an additional ap-
pointment as Assistant Medical Officer of
Health and School Medical Officer. The
duties of the post will be mainly in connec-
tion with the School Health and Child Wel-
fare Service but the office appointed will
also have the opportunity of gaining general
experience in all sections of the Health and
Welfare Department of this new County
Borough. The possession of a D.P.H. or a
D.C.H. will be an advantage.

The salary offered for the appointment is
in accordance with appropriate medical
Whitley Council scale, namely £1,340 to
£1,910 per annum (at present under review),
commensurate according to experience and
qualifications of the successful applicant.

The appointment will be subject to the
usual Local Government Conditions of Ser-
vice and to a satisfactory medical report. A
car allowance payable and assisted
car purchase facilities are available. The
Council will be prepared to provide suitable
housing accommodation in appropriate cases
and the whole of the successful applicant's
removal expenses to Solihull will be paid,
subject to conditions.

Further particulars relating to the appoint-
ment, together with application forms can
be obtained from the Medical Officer of
Health, 59 New Road, Solihull, to whom
completed applications should be submitted
not later than Monday, June 1, 1964.—

More
than a
curb on
appetite

DUROPHET-M

one capsule at breakfast
curbs the day's appetite
while relieving the stresses
which often underlie overeating

As overeating is often rooted in emotional stress, the weight reducing programme must do more than depress the appetite. *Durophet-M* contains laevo- and dextro-amphetamine (ratio 1 : 3), the most effective appetite depressant available today, and methaqualone, a calmative which helps alleviate the patient's underlying tensions and frustrations.

Capsules are available in two strengths stated in terms of the laevo- and dextro-amphetamine content. Both contain 40 mg. methaqualone.
Durophet: registered trade mark.

Basic NHS prices	12½ mg.	20 mg.
