## **SIDROS**—FOR THE PATIENT DEFICIENT IN IRON

**well tolerated iron compound plus reducing agent to aid absorption**

In the treatment of iron-deficiency anaemia many iron salts can produce the desired increase in haemoglobin level. Some also have a tendency to produce side-effects, and there can be a great deal of wastage through non-absorption.

**SIDROS** is designed to overcome these disadvantages, and provides a reliable treatment for iron-deficiency anaemia.

**Ferrous gluconate** Each Sidros tablet contains 300 mg of ferrous gluconate which produces a highly satisfactory clinical response and is very well tolerated.

**Ascorbic acid** Sidros also contains ascorbic acid (30 mg per tablet) which is known to aid absorption by maintaining iron in the reduced state.

*The basic NHS price of 100 Sidros tablets is 2/8 as dispensed from 1000 tablet bottle. Samples of Sidros are available on request.*

**SIDROS** is effective, well absorbed, well tolerated and economical

## *A NEW JOURNAL*

Though there are two journals published in English that are devoted to heredity in man, there is no journal confined to medical genetics, and papers on the subject have been scattered over a wide number of specialized medical journals. With the increasing interest in medical genetics it is felt that the time has come for a journal devoted to this new and growing specialty.

# JOURNAL OF MEDICAL GENETICS

It is intended that this journal should be broadly based and that papers should appear not only on clinical studies but also on the statistical, pathological, cytological, and biochemical and other aspects. Although the journal will be mainly concerned with human genetics, occasional animal studies will be published where they are relevant. In addition, authoritative review articles will appear at fairly regular intervals.

The first quarterly number of this Journal will be published September, 1964. In the first volume there will be two numbers (September and December). In subsequent volumes, starting in 1965, there will be four numbers published in March, June, September and December. Each issue will contain some 70 pages of text.

*Annual Subscription, Inland £3 3s.; Abroad £3 10s. (U.S.A. \$10.00)*

# Psoriasis

## Clinical tests confirm Alphosyl's effectiveness

Accumulating evidence increasingly underlines Alphosyl's effectiveness in cases of psoriasis, even in those that have proved intractable to other forms of treatment. Its success is attested by the fact that after only 2 years Alphosyl Lotion became the leading branded preparation for psoriasis in this country.

**New Alphosyl Cream** Following the success of Alphosyl Lotion, this coal-tar and allantoin combination is now available in Britain as a lubricating cream. The cream base has proved a particularly effective vehicle for Alphosyl as it incorporates a combination of free fatty acids (saturated and unsaturated) naturally occurring in triglycerides, sterols and esters to give the lipid phase of the base a significant resemblance to the lipid array of normal human skin<sup>1</sup>.

**Clinical Trials** The table below gives the results of four different clinical trials which show the effectiveness of Alphosyl in lotion and in cream form.

No. of patients	100% cleared	75%–99% improved	50%–74% improved	25%–49% improved	No improvement
62 <sup>3</sup>	29	26	7	0	0
50 <sup>4</sup>	11	16	17	6	0
41 <sup>1</sup>	27	9	5	0	0
96 <sup>2</sup>	44	29	15	0	8

**Why Alphosyl is so effective** In Alphosyl, allantoin and a specially refined coal-tar extract were combined for the first time. Allantoin has been found to be particularly effective in loosening psoriatic scales<sup>5</sup>, while the keratoplastic effect of coal-tar is well known<sup>5</sup>. Alphosyl is non-greasy and non-staining and vanishes on application. It is notably safe,<sup>5-4</sup> being free from the risks which are found in other forms of treatment such as arsenicals, mercury, corticosteroids, x-ray, etc. It certainly deserves a trial in all cases of psoriasis.

Stafford-Miller Limited, Hatfield, Herts. by arrangement with Reed & Carnrick, Kenilworth, New Jersey, USA.

**Alphosyl Lotion** formula—special coal-tar extract 5% + allantoin 2% in a smooth, non-greasy lotion base.

**Alphosyl Cream** formula—allantoin 2% + 90% alcoholic extract of coal-tar (5=1) 5% in a vanishing cream type base.

## Conquered: a common fear in early marriage

All too frequently the underlying cause of numerous anxiety symptoms in married patients is the fear of an unwanted pregnancy. This is often brought about by the use of unreliable contraceptive methods. Even today, for example, eleven and a half million people still practice coitus interruptus.

Fortunately, today, married people are less inhibited in their attitudes towards family planning. More and more they turn to you for advice.

To assist you with enquiries of this sort, there are a number of specially edited publications available. Among them are "Modern Family Planning", an informative reference book for patients, which is available in quantity, and a series of leaflets for professional reading. Professional discounts are available on London Rubber Industries products. For booklets (please state quantity required), leaflets and special price list, write to:—

## **“Steri-Drape”**

### **SURGICAL DRAPES**

**the first practical replacement for cloth**

“Steri-Drape” Surgical Drapes are completely impermeable transparent plastic surgical drapes. Backed with an exclusive pressure-sensitive co-polymer adhesive which is chemically inert, they stick instantly and evenly, and they are specially treated to prevent electrostatic build-up. Unlike cloth, these drapes positively wall off the operative site—right to the incision. The incision is made directly through the drape and extended if necessary without further ‘prepping’. Or a second incision can be made.

Bacteria-laden moisture from the skin cannot seep through to contaminate gloves or instruments. Aseptic conditions

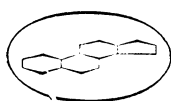

are maintained throughout the operation—and towel clips are not essential—eliminating another possible source of infection. The transparency of “Steri-Drape” Surgical Drapes enables the surgeon to see clearly the operative area and landmarks. X-ray pictures are quite clear. Afterwards, “Steri-Drape” Surgical Drapes peel off easily and leave no residue.

Ready-to-use “Steri-Drape” Surgical Drapes are pre-packed in individual, sterile packs. A complete range of incise, aperture and towel drapes is available in various sizes.

## QUESTIONS, PLEASE?

### *Internal tampons and the patient's well-being*

**Q** *Many girls, annoyed by having to curb their participation in active sports during menstruation, often ask about using Tampax. Is the use of internal tampons by this group a good idea?*

**A** Tampax offers many benefits to any menstruating female, but especially to the young girl, who is usually active. It permits swimming<sup>1</sup> and for this reason alone has been found to improve girls' attitudes toward menstruation.<sup>2</sup>

In the past some schools have restricted pool swimming during the menstrual period, but with the advent of tampons girls are permitted to swim during menstruation.<sup>3</sup> Any sport is easier and more enjoyable when the chafing and bulk of the perineal pad are no longer a problem.

Tampax "has a caliber that does not impair standard anatomic virginity",<sup>4</sup> and promotes a girl's mental and physical well-being by obviating erotic stimulation. A leading doctor points out that the perineal pad is constantly rubbing to and fro against the area of the clitoris, thus focusing the wearer's attention on the genitals for the full duration of the period.<sup>4</sup> Tampax, on the other hand, lies in what has been called "the great silent area of the pelvis."<sup>5</sup> Properly placed, it will not be felt at all.

Tampax is available in Regular and Super absorbencies.

## KOBE, JAPAN

Pending negotiations are expected at an early date to permit the introduction of a British physician to render medical services to the British and other foreign communities in Kobe, Japan, where one of the two practising foreign physicians wishes to retire in the relatively near future.

The Kobe International Hospital and Medical Services Associations and other interested parties are anxious to contact physicians, preferably in their early thirties, who in addition to hospital experience have been engaged in general practice for some time and are prepared to contemplate service in the major seaport of Japan.

In the first instance, the employer will be the Association but, within the framework imposed by the Japanese government, actual conditions will approximate in many respects to private practice. The prospects for a busy, remunerative practice in a healthy, pleasant environment are good.

Further general information can be obtained by personal application to Euston 4499, Ext. 208.

Those interested should write, giving fullest particulars, in duplicate to Box 2686 B.M.J.
