

today

'Aldomet' is an effective antihypertensive agent, generally well-tolerated.
Side effects are seldom a problem; symptomatic postural hypotension is much less frequent than it is with other effective agents.

tonight

'Aldomet' usually reduces lying as well as standing blood pressure; hypertension is controlled throughout sleeping as well as waking hours.

tomorrow

'Aldomet' allows a fuller range of recreational activities; since exertional hypotension is rare, the risk of dizziness is low. Patients on 'Aldomet' generally feel well.

Four tablespoons of corn oil and the reduction of high serum cholesterol levels

A recent article in the medical press[1] published the results of a study in the use of corn oil with a low animal fat diet in the reduction of high serum cholesterol levels.

The article ended: *'It is concluded that corn oil, together with a diet low in animal fat, is feasible as a long-term measure for the lowering of serum cholesterol, being safe, acceptable to the great majority of patients, and having virtually no clinical contraindications.'*

The oil used in the study, corn oil, linoleic acid content 56%—was added to diets of 1,630 and 2,080 calories, and comprised 41·5% of the total fat in the former, 40·0% in the latter. The quantity of oil added to each diet was 57 grams; just four tablespoons of corn oil a day.

Mazola Pure Corn Oil has a fatty-acid composition (56·2% linoleic) identical to that of the oil used in this experiment. In addition, Mazola is palatable; it is widely used as a cooking oil. Thus Mazola, available from grocers throughout the country, is probably the most accessible and appetising source of supplementary dietary oil.

SINGLE-DOSE TREATMENT FOR BOTH THREADWORMS AND ROUNDWORMS

"With its high cure-rate, lack of toxicity, ease of administration, and simplicity of dosage, we regard pripsen as, at present, the remedy of choice for enterobiasis...The doses of piperazine were less than half those hitherto used in seven days' treatment, and there were no toxic effects."
Lancet, 1960, i, 256.

"Pripsen...is a highly effective agent against ascariasis."
"Of the 88 patients completing the trial, 74 (84%) were cured by a single dose and, in the remaining 14, repeated dosage...resulted in a 100% cure-rate...Apart from one patient...there were no undesirable side-effects in this series, which included babies of 4 and 5 months."

FURAMIDE

1 "It appears that diloxanide furoate and paromomycin are at least as effective in the treatment of amoebiasis as is E.B.I. The first has the advantage of being cheaper and much better tolerated."

2 "... an effective amoebicide useful in both acute amoebic dysentery and chronic amoebic colitis".

3 "Tolerance of the drug was good in 100% of the subjects ... No special precautions were taken during treatment, and the patients were all ambulant".

FURAMIDE is the simplest treatment for amoebiasis, requiring no injections, enemas or special diets. Cure rates are high—75% to 80% in the acute stage and up to 100% in the chronic condition. Side effects are unlikely, and hospitalization is not normally required, making treatment cheaper than the older forms of therapy. Extensive clinical trials in many tropical and sub-tropical countries have borne out these claims.

Dosage is simple—1 tablet three times daily for ten days in patients of average weight.

Each Furamide tablet contains 0.5G of Entamide (diloxanide) furoate B.P. Both Entamide and Furamide are products of Boots research.
Packed in bottles of 15 and 250 tablets.

Synadrin

for the patient with angina pectoris

Synadrin is chemically unrelated to any known treatment for coronary disease. Its activity has been demonstrated in animal experiments [11-17] and its effectiveness has been confirmed by both open and double blind trials.[1-10] Synadrin has been described as "an effective drug for treating angina pectoris."[1]

Effective and safe: Synadrin has been shown to reduce the frequency of anginal attacks. It is particularly successful in patients with coronary ischaemia with or without previous infarction. It produces prolonged improvement of the coronary blood supply, and consistent treatment over a period of weeks produces the best results. Synadrin is well tolerated and its safety has been shown by use in a great number of patients since its introduction.

Dosage: Treatment may be initiated with 2 tablets, three times daily, reducing to a maintenance dose when beneficial effects are noted.

Presentation: Synadrin is presented as tablets, each containing 15 mg. of prenylamine lactate in bottles of 30 and 150 at basic NHS prices of 8/8d. and 34/8d. (subject to P.T.).

Synadrin is known in some other countries as Segontin.

Persantin has been shown to possess three principal pharmacological actions

* It is a powerful coronary vasodilator and brings about a considerable increase in myocardial blood flow
* It has been shown in animal experiments to stimulate the development of intercoronary collateral circulation in the hypoxic myocardium
* It has been shown experimentally to bring about a direct and beneficial effect on myocardial metabolism, promoting the increase and maintenance of A.T.P. levels

Because of Persantin's range of action it is of unique therapeutic potential in the treatment of coronary or myocardial insufficiency

CICATRIN

accelerates healing rates by 25-50%*

Prolonged and expensive treatment of chronic ulcers may be avoided by the use of Cicatrin, the leading amino-acid/antibiotic preparation for topical application.

Further evidence of the efficacy of Cicatrin is provided by a recent controlled clinical trial to evaluate the influence of various topical applications on the healing rates of stasis ulcers. This trial shows that Cicatrin with its combination of selected amino-acids and antibiotics accelerates the healing rates by 25-50%.

It is also significant that in one group where the main difference between the two preparations was that one contained amino-acids and antibiotics (Cicatrin) and the other antibiotics only, the healing time in the Cicatrin treated group was shortened considerably both in bed rest and ambulatory cases.

Clinical Neurology

LORD BRAIN

This book is intended for those doctors who need to know only the essentials of neurology, but to know them thoroughly. The approach is essentially clinical, the basic anatomy and physiology being presented in concise explanatory sections that precede the clinical descriptions. Full accounts have been given of all the common disorders and most of the rarer ones omitted. This new edition has been brought thoroughly up to date and a large number of new illustrations have been introduced.

SECOND EDITION

Pulmonary Tuberculosis

WALTER PAGEL, F. A. H. SIMMONDS, N. MACDONALD *and* E. NASSAU

The text of this new edition has been reset and very thoroughly revised, many chapters having been entirely rewritten and a number of new ones added. The chapters on the clinical forms of tuberculosis, complications, and differential diagnosis have all been rewritten and new chapters on bacteriological diagnosis and healing added. The section on chemotherapy has been very considerably expanded whereas that on surgical treatment has been drastically pruned.

Community Services for the Mentally Handicapped

J. TIZARD

This book is divided into five parts dealing respectively with the prevalence of mental subnormality; problems of families; the education and care of mentally subnormal children; the Brooklands Residential Unit (an account of an experiment with a method of care based on the concept of small, family-type groups); the organization of services. Among the questions to which the author suggests answers are: How can the community care best for the mentally handicapped? What problems do families with a mentally handicapped child have to face? What kind of training and education is most suitable for mentally handicapped children? Institution or home care—what are the advantages and disadvantages of each?

The Pathology and Treatment of Sexual Deviation

Edited by ISMOND ROSEN

This book gives a comprehensive and up-to-date account of the complex subject of sexual deviation and contains much hitherto unpublished material together with reviews of the literature and full bibliographies. Homosexuality, fetishism, sadomasochism, exhibitionism, scopophilia, voyeurism, transvestitism and sexual murder are all fully discussed with relevant case reports. There are also accounts of cultural differences in sexual deviation, parliamentary and public attitudes and an extremely full and valuable summary on law and the sexual offender.

Cunningham's Textbook of Anatomy

Edited by G. J. ROMANES

This new edition has been planned so as to provide a textbook which, although shorter than the full scale textbooks of the past, is sufficiently comprehensive to cover the requirements of both undergraduate and postgraduate students. The most obvious change from earlier editions is the use of a larger page size with two columns of type; another feature is the extensive revision of both text and illustrations—217 of these latter are new, others have been redrawn, and half-tone illustrations now replace the old wood engravings. The revised Nomina Anatomica has been used throughout, but to assist in the transition from the Birmingham Revision a Glossary has been included showing all the changes.

Betamethasone in General Practice

Betnelan (betamethasone) is particularly well suited for low or 'physiological' dose therapy of rheumatoid arthritis. It has high anti-rheumatic activity, but shows improved gastro-intestinal tolerance, has virtually no effect on electrolyte balance, and has no depressive action on mental function. A further development with betamethasone has been the introduction of Betnesol Tablets. They dissolve spontaneously in water to form a palatable, tinted, clear solution, offering rapid and consistent absorption. Betnesol is well tolerated because no solid steroid reaches the stomach. It is the most acceptable and advanced form of oral corticosteroid therapy that you can give your patients.

'PRO-ACTIDIL'

a very versatile antihistamine

'Pro-Actidil' contains triprolidine hydrochloride, the most potent of the antihistamines. It is specially formulated to give continuous action for 19 to 24 hours in the allergic patient.

If given in the evening four to five hours before retiring, 'Pro-Actidil' will ensure a good night's sleep for the patient, free from sneezing, nasal congestion, irritation and restlessness. If drowsiness is induced, it will occur at bedtime.

A most interesting clinical observation has recently been reported indicating that 'Pro-Actidil' also provides excellent protection in various forms of solar dermatosis (*Brit. J. Derm.* (1963) 75, 254; *Med. Proc.* (1963), 9, 461). Wider clinical application is needed to confirm this specific action.

"Doctor, I feel awful"

Once she might have been diagnosed as "anxiety state". Today, you know she might be a depressive, but it doesn't seem as simple as all that. The truth of the matter is that patients don't always fit neatly into diagnostic categories. They may suffer from such diverse symptoms as depression, agitation, loss of appetite and tension-fatigue at the same time.

The great strength of 'Aventyl' is that its beneficial actions range widely over the symptoms which plague these problem patients. 'Aventyl' is not merely an anti-depressant, nor is it a combination of drugs. It is a *single substance* which relieves a constellation of mental and emotional symptoms embracing depression, anxiety and their effects on awareness and mood.

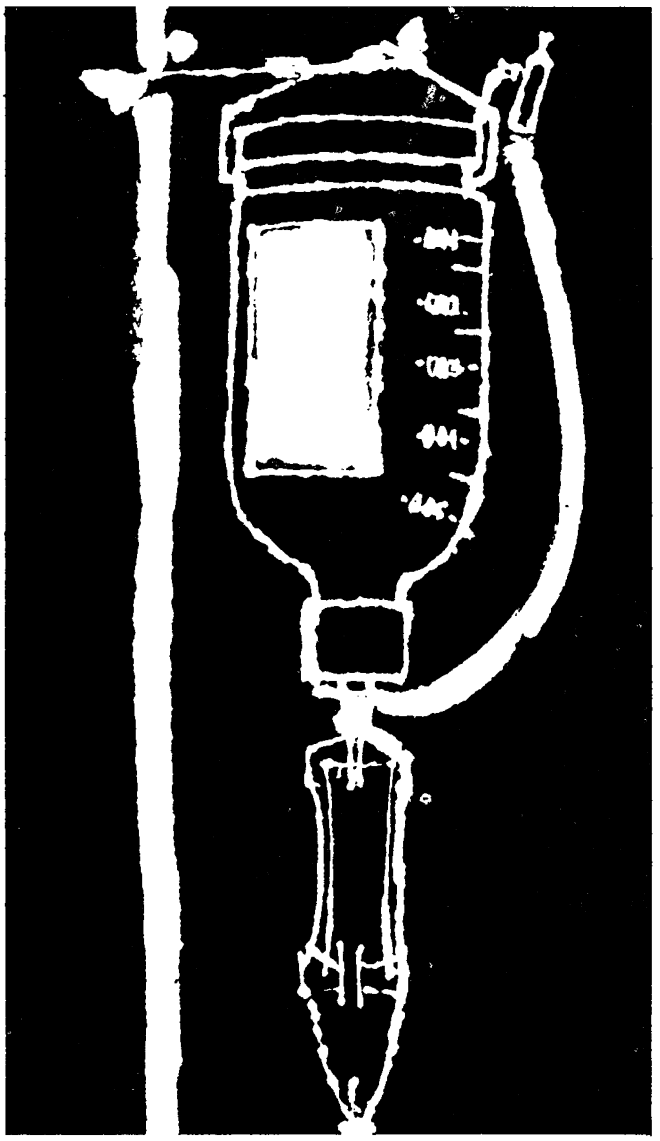

'Aventyl' is not a monoamine oxidase inhibitor, and no serious side-effects have been reported at the recommended dosage.

IMFERON BY TDI

TRADE MARK

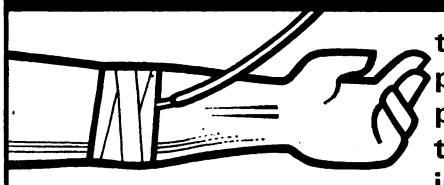

For all the oral iron normally administered to correct confirmed iron deficiency it is now possible to substitute a single total dose infusion of Imferon, iron-dextran complex. The technique is particularly suitable for the rapid restoration of depleted iron stores before surgery, in late pregnancy, in post surgical convalescence, and after persistent and regular loss of blood from any cause. Imferon is totally absorbed and utilised, and this technique is only possible because of the remarkably low toxicity of the preparation. Imferon T.D.I. may well become the iron therapy of the future —in most cases far superior to whole blood transfusion, oral iron or injection.

DURABOLIN

for flexible initial treatment

Durabolin is injected at weekly intervals. It is therefore preferentially indicated in conditions where protein synthesis and tissue-building need stimulating and the patient is being examined at frequent intervals.

FORM AND PACK: Each ml. contains 25 mg. of Nandrolone Phenylpropionate B.P. for intramuscular injection in 1 ml. ampoules and 4 ml. vials.

DECA-DURABOLIN

for convenient longer-term maintenance

Deca-Durabolin only needs injecting every three weeks and is therefore more suitable in conditions where treatment is stabilised and the patient is being examined less frequently.

FORM AND PACK: Each ml. contains either 25 mg. or 50 mg. of Nandrolone Decanoate for intramuscular injection in 1 ml. ampoules.

CARISOMA

(CARISOPRODOL, WALLACE)

FOR LOW-BACK SYNDROME

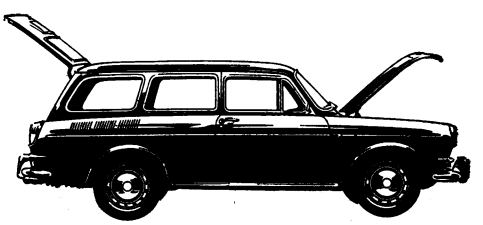

CARISOMA *An effective muscle relaxant* . . . reduces spasm, gets your patients up and moving about much sooner. CARISOMA *An effective analgesic* . . . begins within 30 minutes to relieve low-back pain. In many cases muscle relaxation alone is not enough to relieve pain and restore normal movement in the low-back syndrome. CARISOMA, a single drug with double action, attacks both pain and spasm. It has a separate and distinct analgesic action in addition to its muscle relaxant properties. Thus it is able to break in on either phase of the pain-spasm cycle, giving prompt relief from both pain and stiffness. **DOSAGE:** Recommended adult dosage is one 350 mg. tablet 3 times daily. The last dose is taken at bedtime. **AVAILABILITY:** 350 mg. tablets. Bottles 50 and 250.

volkswagen open up a second boot

Take an estate-size boot in the back. Then add a spare boot in front, under the bonnet, where others keep their engine. ☐ Result? The most spacious 5-seater sports car of its size. Yes, sports car! With a powerful twin-carburettor engine, soaring acceleration, and a cruising speed of 85 m.p.h. ☐ And if you think that a sports car that looks like an estate car is all pure gimmick, then study the design. It's solid Volkswagen. Sturdy, lasting, with all the well-tried Volkswagen features. ☐ At first we didn't know what to call it. Then someone said: "It's so versatile, call it the Variant". And this we did.

Also available as a saloon (1500 S), or with Karmann Ghia coupé body.

vaccinating with multiple antigens

The use of separate antigens for immunisation procedures has largely been superseded by that of combined vaccines. A widely used way of conferring immunity against diphtheria, pertussis, tetanus and poliomyelitis, is to give Triple Antigen (a combined vaccine containing diphtheria, pertussis and tetanus antigens) and an oral poliomyelitis vaccine. Initially the Triple Antigen is administered in a course of three injections, and the poliomyelitis vaccine is recommended to be given separately on three different occasions, either before the Triple Antigen (using schedule Q) or afterwards (using schedule P). Recently another, more simplified, way of giving four-way protection has been made available by Glaxo, in the form of Quadrilin—Britain's first quadruple vaccine—which contains diphtheria, pertussis and tetanus antigens together with a killed and standardised poliomyelitis component. Five years of research by Glaxo workers preceded the introduction of Quadrilin. The result is a vaccine exceptionally stable in all its components and which can produce high levels of immunity against all four diseases. Quadrilin may be given as early as three months of age, thus fitting in with the Ministry of Health's immunisation schedules, and it is given by either intramuscular or subcutaneous injection; a course of three injections provides effective primary immunisation. Either of these immunisation procedures, whether employing Triple Antigen (Glaxo) together with an oral attenuated poliomyelitis vaccine, or Quadrilin, with its killed poliomyelitis component, is able to provide effective protection. Glaxo is the only British Company which is able to offer all these products for four-way immunisation.

A NEW JOURNAL

Though there are two journals published in English that are devoted to heredity in man, there is no journal confined to medical genetics, and papers on the subject have been scattered over a wide number of specialized medical journals. With the increasing interest in medical genetics it is felt that the time has come for a journal devoted to this new and growing specialty.

JOURNAL OF

MEDICAL GENETICS

It is intended that this journal should be broadly based and that papers should appear not only on clinical studies but also on the statistical, pathological, cytological, and biochemical and other aspects. Although the journal will be mainly concerned with human genetics, occasional animal studies will be published where they are relevant. In addition, authoritative review articles will appear at fairly regular intervals.

The first quarterly number of this Journal will be published September, 1964. In the first volume there will be two numbers (September and December). In subsequent volumes, starting in 1965, there will be four numbers published in March, June, September and December. Each issue will contain some 70 pages of text.

Annual Subscription, Inland £3 3*s*.; *Abroad* £3 10*s*. (*U.S.A.* $10.00)

SPECIAL INTRODUCTORY OFFER

All subscribers to this new Journal who order their subscription before 31 August 1964 will receive a bonus issue (i.e. subscriptions will be entered to expire in September instead of June, 1965).

BRITISH HEART FOUNDATION

Scientific Activities

● The Foundation has now made awards totalling £276,000 for some 56 research projects.

● Work supported by funds from the British Heart Foundation is now in progress in London, Birmingham, Bristol, Cambridge, Cardiff, Derby, Dundee, Edinburgh, Glasgow, Leeds, Oxford, Portsmouth, Sheffield, Stoke-on-Trent, and Stratford-on-Avon.

● The Foundation is also prepared to support worth-while research projects in the Commonwealth, and has made awards to research workers in Lagos and Ibadan, Nigeria.

● Investigations now in progress include work on the function of the circulation, congenital heart disease, hypertension, pulmonary heart disease, arteriosclerosis, coronary thrombosis, new techniques for treatment, and fundamental problems of biochemistry.

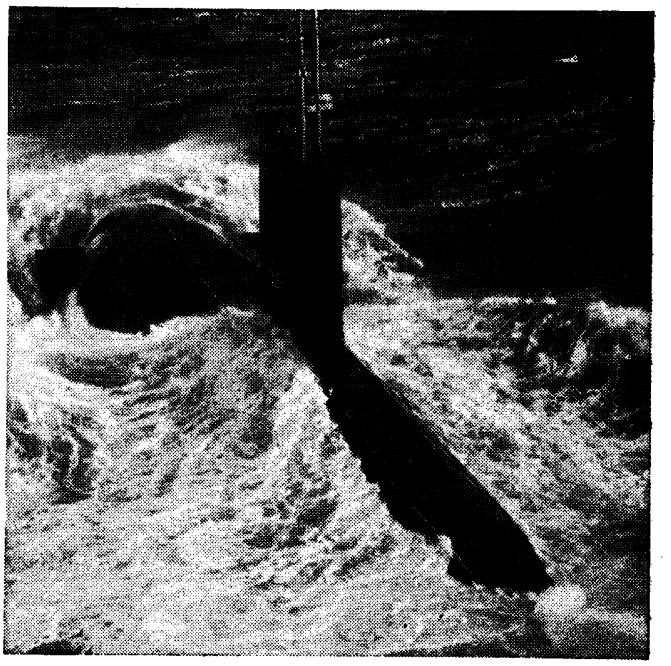

● The names of those receiving awards from the Foundation were announced in the *British Medical Journal* of November 16th, 1963 and March 6th, 1964.

● The above research activities depend entirely upon the success of the Heart Appeal for which an initial target of three and a half million pounds has been set. The eventual aim is to provide for expenditure of half a million pounds per annum – the minimum required to finance an adequate research programme.

Life Membership of the Foundation is open for a single payment of 100 gns. (or more), (or £10 per annum on a seven-year Covenant). Ordinary Members are welcome at 5 gns. per year (£3.5.0d on a seven-year Covenant).

Information and forms of application for research grants may be obtained from The Appeal Office (BM3), British Heart Foundation, Tavistock House, Tavistock Square, London WC99.

The go-ahead OPPORTUNITY that is ROYAL NAVY

you find it as a MEDICAL OFFICER

As a Medical Officer, you have complete clinical freedom and a widely varied medical experience. Your practice is among 100,000 Naval men and women. Ashore or afloat, it can take you anywhere in the world from Malta to Singapore: and, when you have a shore appointment abroad, your family can be with you. Go-ahead, too, is your opportunity to specialize: not only in traditional categories, but in the modern sciences of aviation and nuclear medicine.

As a Medical Officer, your pay, allowances, and gratuity—or permanent commission pension—are very good: for example, your initial pay is considerably higher than that of a civilian hospital registrar.

You can enter by one of three ways: as a Registered Medical Practitioner—your civilian experience back-dating seniority—or as a qualified doctor doing your pre-registration year, or as a student with a 2nd M.B. For qualified women doctors, there is a special short service commission.

For fullest details of your Royal Navy life as a Medical Officer, write, mentioning your own qualifications and age to:

The Medical Director-General of the Navy, Medical Department (HN20/L) Empress State Building, London, S.W.6.

HOMES

NORTHUMBERLAND HOUSE
Finchley, N.3. Tel.: Finchley 5283.
A psychiatric Nursing Home providing all modern treatments. Elderly patients accepted. Moderate inclusive terms. Apply Resident Physician.

ST. ANDREW'S HOSPITAL, NORTHAMPTON
FOR NERVOUS AND MENTAL DISORDERS
President: The Earl Spencer
Medical Superintendent:
D. J. O'Connell, M.D., D.P.M.
This private hospital receives patients, both male and female, suffering from nervous and mental disorders, including alcoholism and senile illnesses. The fees range from fifteen guineas per week. Private rooms with special nurses can be provided, either in the hospital or in one of the villas in the grounds. The hospital is situated in 130 acres of pleasant grounds which provide all recreational facilities. These include a nine-hole golf course, sports ground, tennis courts, etc. A Recreation and Occupation Centre, known as Gloucester House, has been opened recently which includes an occupational therapy department, a swimming pool, a squash court, and a library with an adjoining reading room.
WANTAGE HOUSE
This is a separate reception unit to which patients may be admitted. It is equipped for the complete investigation of nervous and mental disorders by the most modern methods. All forms of treatment are available. It contains laboratories for biochemical, bacteriological and pathological research.
MOULTON PARK
Some two miles from the main hospital is the farm of approximately 600 acres. Occupational therapy is a feature of this branch and patients are given every facility for occupying themselves in farming, gardening, fruit growing, etc.
For terms and further particulars apply to the Medical Superintendent (Telephone No.: 34354 Northampton), who can be seen in London by appointment.

WYKE HOUSE, ISLEWORTH
A private hospital, established in 1826, for the individual treatment and care of a limited number of psychiatric patients. Apply Resident Physician. Tel.: ISL 7000.

DUROPHET-M

one capsule at breakfast
curbs the day's appetite
**while relieving the stresses
which often underlie overeating**

As overeating is often rooted in emotional stress, the weight reducing programme must do more than depress the appetite. *Durophet*-M contains laevo- and dextro-amphetamine (ratio 1 : 3), the most effective appetite depressant available today, and methaqualone, a calmative which helps alleviate the patient's underlying tensions and frustrations.

Capsules are available in two strengths stated in terms of the laevo- and dextro-amphetamine content. Both contain 40 mg. methaqualone.
Durophet: registered trade mark.
