“Doctor,
I feel awful”

Once she might have been diagnosed as “anxiety state”. Today, you know she might be a depressive, but it doesn't seem as simple as all that. The truth of the matter is that patients don't always fit neatly into diagnostic categories. They may suffer from such diverse symptoms as depression, agitation, loss of appetite and tension-fatigue at the same time.

The great strength of ‘Aventyl’ is that its beneficial actions range widely over the symptoms which plague these

problem patients. ‘Aventyl’ is not merely an anti-depressant, nor is it a combination of drugs. It is a *single substance* which relieves a constellation of mental and emotional symptoms embracing depression, anxiety and their effects on awareness and mood.

‘Aventyl’ is not a monoamine oxidase inhibitor, and no serious side-effects have been reported at the recommended dosage.

THE SUPPORT STOCKING SHE WILL WEAR

ELBEO SUPP-HOSE

are support stockings made entirely of nylon. Because of their fashionable appearance, they are accepted and worn consistently by women who would reject an unflattering form of leg support even when medically advised of its necessity.

Exceptional elasticity

The nylon yarn used in Supp-hose is specially coiled, twisted and fixed before the stockings are knitted. This ensures exceptional elasticity in a lengthwise direction. The stockings therefore provide adequate compressive elastic support which is maintained over months of wear and washing.

Beneficial in many conditions

Supp-hose are beneficial in venous states of the lower extremities causing oedema and requiring elastic support. They relieve to a significant extent the symptoms associated with varicose veins, the postphlebitic phenomenon or chronic

venous insufficiency. Supp-hose can also be recommended to the many patients who suffer from the condition termed 'tired legs', particularly during pregnancy.

Worn by hundreds of thousands of women

Since they were introduced to this country some five years ago, Supp-hose have been worn by hundreds of thousands of women, many of whom have sent us enthusiastic testimonials. The stockings are available in 23 fittings, from all leading stores.

A clinical leaflet will gladly be sent to doctors requiring further information about Supp-hose.

This is no ordinary tetracycline tablet

in fact this tablet is unique

It has the widest range of activity of the broad-spectrum antibiotics available today, for, in addition to tetracycline, it contains a highly effective antifungal antibiotic, nystatin, which can prevent the monilial superinfection often found when tetracycline alone is given. Thus, the patient receiving this tetracycline tablet is protected against monilial side-effects such as nausea and vomiting; diarrhoea; ano-genital pruritus; and thrush¹

But tropical climates give us greater research problems than insect repellents and sun-tan lotions. Amoebiasis was one such problem; an effective, non-toxic amoebicide was the target of intensive research by Boots Research Department for a long time. After much work — research, investigation, clinical trials — Furamide was introduced. It gives a cure rate of over 90% in cases of intestinal amoebiasis without causing serious side effects. No injections, no enemas, no special diet — just a simple dosage schedule of 1 tablet three times a day for 10 days.

"The placid individual often has no subjective symptoms until serious complication occurs."†

'Nefrolan'* brand clorexolone by enabling the blood pressure to be maintained at a safe level without discomfort or inconvenience to the patient reduces the risk of complications developing in patients with symptomless hypertension.

One 10 mg. tablet once or twice daily is usually sufficient in such cases. Higher dosage can be given, if necessary, and additional antihypertensive agents can be introduced, if required.

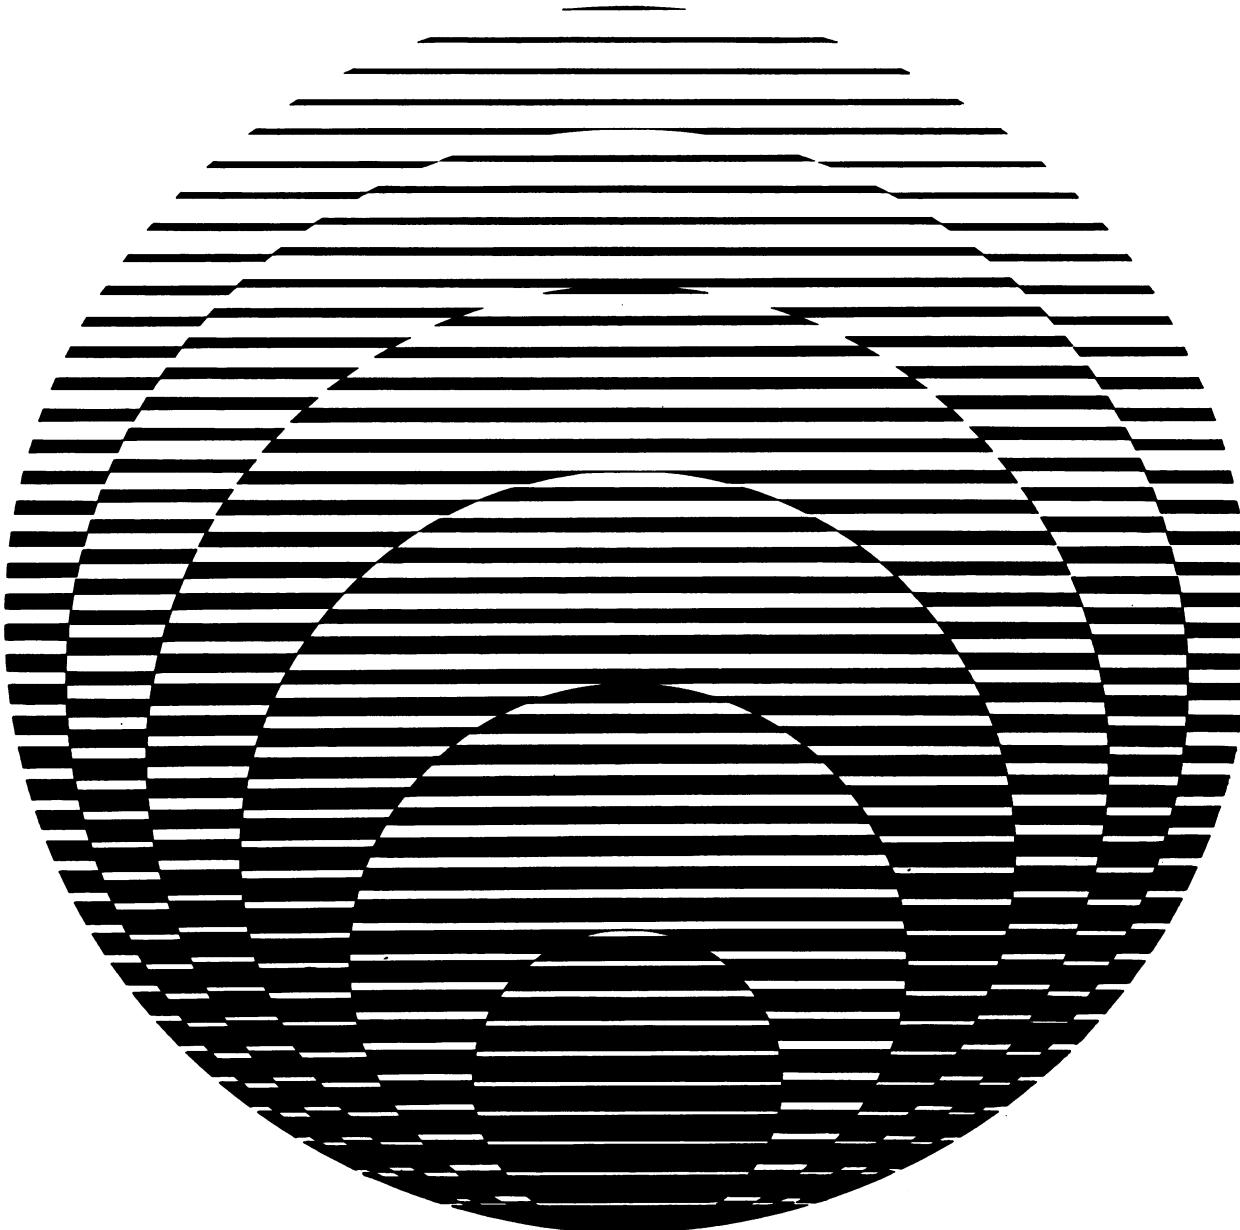

The diuretic property of 'Nefrolan' at higher dosage levels will help relieve the load on the heart. Patients with oedematous conditions, not necessarily related to hypertension, will also respond to the diuretic activity of 'Nefrolan'.

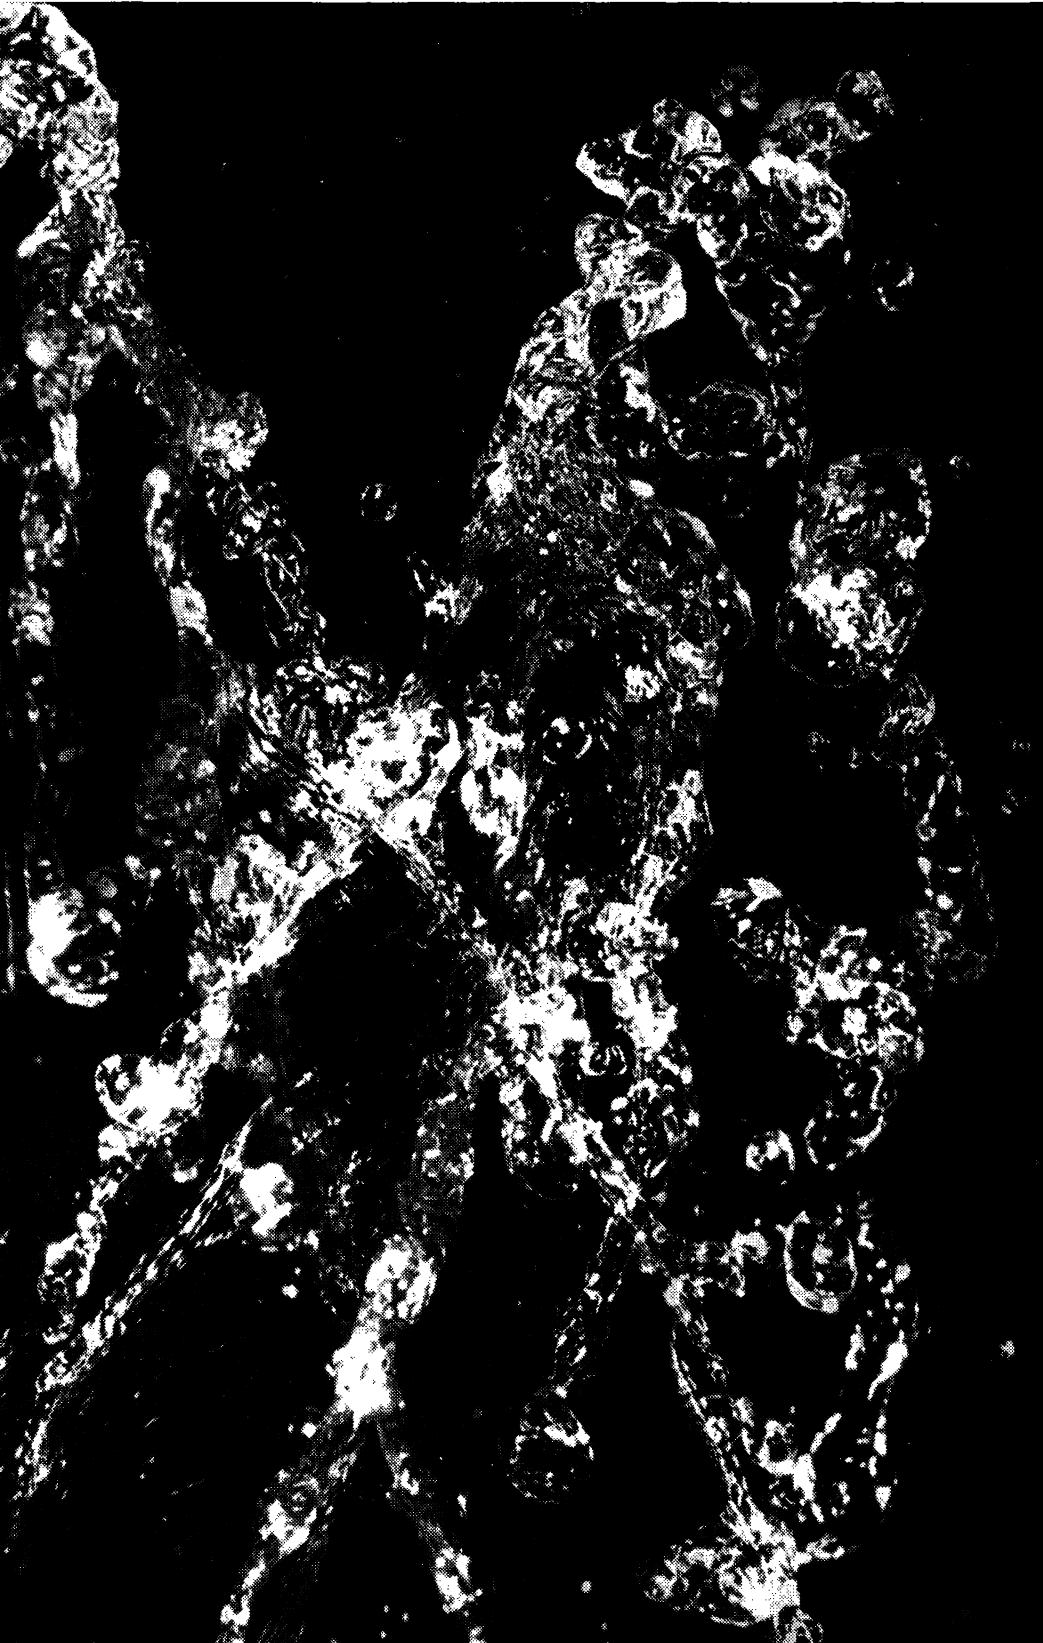

'Nefrolan' is presented as 10 mg. tablets for hypotensive use and 25 mg. tablets for diuresis and more severe hypertension.

1. CLINICAL EFFICACY

"Experience over a period of 20 months with 80 patients, mostly in congestive heart failure, including four with ascites and oedema due to hepatic cirrhosis, warrants the opinion that this diuretic is of great value."

Brit. med. J. 1965, **2**, 813

Lasix **the new** **diuretic**

A product of Hoechst world-wide research

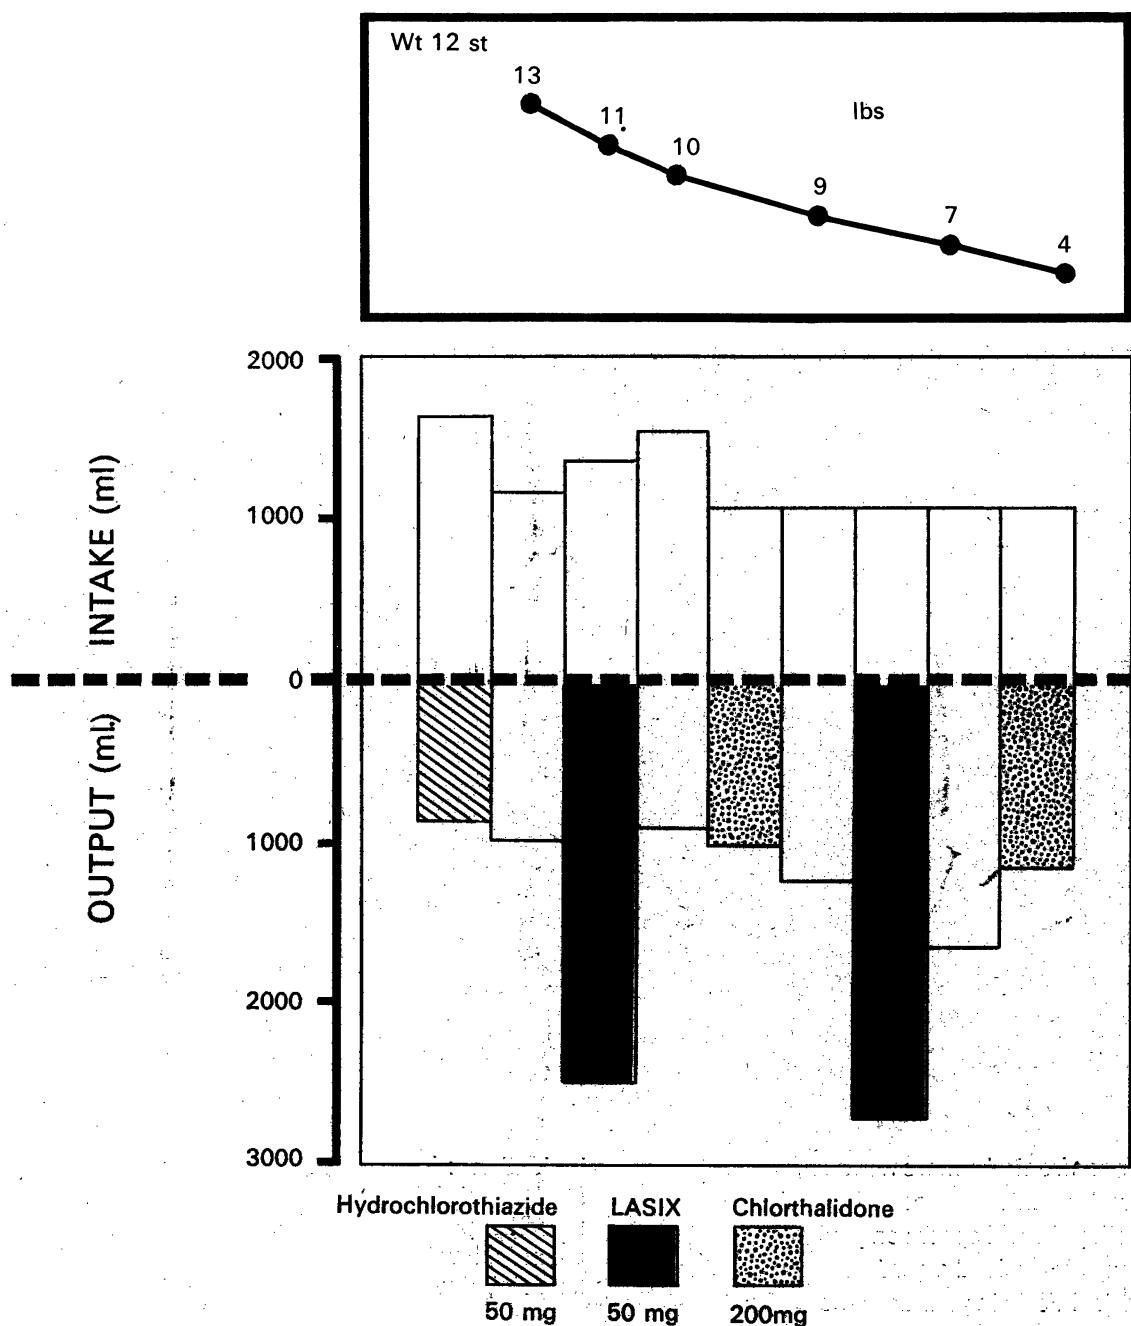

Lasix is clinically more effective than comparable standard doses of other diuretic agents, including hydrochlorothiazide. The interesting thing is that higher doses of Lasix increase the diuretic response: this is contrary to experience with other diuretics. This point was made in the paper quoted above and after making it clear that normal doses are around 50 mg. the authors add that "up to 300 mg. has been successfully used in cases of resistant oedema when mercurial diuretics and thiazides have failed."

precise control of response

This diagram shows fluid input and output in congestive heart failure comparing Lasix 50 mg., hydrochlorothiazide 50 mg., and chlorthalidone 200 mg. Weight loss is shown in lbs.

Lasix is presented as tablets of 40 mg. frusemide in containers of 50 and 250; and in ampoules containing 20 mg. in 2 ml. in packages of 5 and 25.

St. George ne'er confronted a more fiendish, diabolical dragon than this two-headed monster which inflicts both pain and spasm on your patients with musculo-skeletal disorders.

Now, with Robaxisal-Forte in your armamentarium you have a double-edged therapeutic sword which combats and conquers pain and spasm

simultaneously. Robaxisal-Forte combines the dependable skeletal muscle relaxant, Robaxin (methocarbamol) with the pain-relieving benefits of acetylsalicylic acid in one convenient dosage form.

During *clinical trials it was observed that these compounds have a potentiating effect upon one another. Higher plasma salicylate levels can be attained than with the same dosage of acetylsalicylic acid alone.

indications: Effective in treating sprains and strains, painful back disorders, "whiplash" injury, myositis, pain and spasm associated with arthritis, low back pain, torticollis, and headache associated with muscular tension.

side effects: Lightheadedness, slight drowsiness, dizziness, and nausea may infrequently occur but usually disappear on reduction of dosage. There are no specific contraindications for Robaxisal-Forte other than hypersensitivity to one of the components.

dosage: 2 tablets four times daily or as directed.

Distalgesic

**kills the pain

but the pain**

the pain Distalgesic kills pain in a wide range of conditions from toothache to malignancy. It contains dextropropoxyphene*, a potent non-narcotic analgesic which mg. for mg. is as effective as codeine and comparable with oral pethidine. Dextropropoxyphene maintains effectiveness over long periods without tolerance developing in the patient.

the whole pain Distalgesic tablets contain 32.5 mg. dextropropoxyphene with the addition of 325 mg. paracetamol to broaden the scope of analgesia and add a useful antipyretic action.

nothing but the pain Distalgesic is free from the side-effects associated with aspirin, phenacetin and codeine; it causes neither gastric irritation, nor constipation, nor smooth muscle spasm. Dextropropoxyphene, classified by the W.H.O. as non-narcotic, does not produce euphoria or physical dependence. Adverse reactions to paracetamol are rare.

usual adult dosage two tablets three or four times a day.

*Dextropropoxyphene has been the subject of several well-controlled clinical trials and described as the most promising alternative to codeine. (Brit. med. J., 1963, 1, 318.)

The success of BIOGASTRONE in peptic ulcer

further proof:

In October 1962, Biogastrone* was used in a clinical trial among patients with peptic ulcer. The results indicated that Biogastrone significantly reduced the size of ulcer niche.

"It is suggested that Biogastrone promotes the healing of gastric ulcers."

Lancet (1962) ii: 793

Now, in the latest 1964 trial, the same author proves beyond any doubt that Biogastrone is successful in assisting peptic ulcers to heal. The average degree of healing was similar in both trials—72 and 77% in the Biogastrone groups and 35 and 44% for the control.

"It is concluded, therefore, that the drug is of real therapeutic benefit."

Scot.med.J. (1964) 9: 183

Dosage: Two tablets (each 50 mg. carbenoxolone sodium) to be taken three times a day after meals for the first week, followed by one tablet three times a day for the next three weeks, the tablets best being taken with a little water or milk.

PENBRITIN

brings new hope to the Chronic Bronchitic

Three effective dosage schemes can now be considered for bronchitic patients

1 Routine Dosage

Doses of 250mg. q.i.d. of Penbritin or other broad spectrum antibiotics will usually suppress *H. influenzae*, the most pathogenic organism in Chronic Bronchitis, with consequent relief of exacerbations. In the majority of cases, this method, repeated whenever an exacerbation occurs, is all that is required to keep the patient ambulant.

2 Prophylaxis

When continuous daily treatment is considered desirable, one capsule (250mg.) is recommended every twelve hours.

3 High Dosage Therapy*

This technique offers great promise in the treatment of winter-long purulent cases, particularly those which fail to respond to other antibiotic regimens² or who have previously required continuous antibiotic cover¹. Moreover, many of the patients remained free from exacerbations for long periods after treatment was stopped. These high doses have been given without side-effects^{1,2}.

A likely explanation for these clinical results is that a concentration of Penbritin bactericidal to *H. influenzae* has been attained in the sputum^{1,2,3}, and estimations of sputum level of the antibiotic give support to this probability¹. A bactericidal concentration of the tetracyclines is unattainable in any practical dosage¹. One of the authors¹ commented: 'Such a response to other antibiotics is, in our experience, extremely rare in patients of the type taking part in this trial.'

BURROUGHS WELLCOME & CO. LONDON
(The Wellcome Foundation Ltd.)

The **EUTONYL®** perspective on hypertension

Eutonyl (pargyline hydrochloride, Abbott) possesses a unique combination of properties for the treatment of severe hypertension. Not only is it a potent antihypertensive, but it also has the advantage of being an MAO (monoamine oxidase) inhibitor.

Reduction of the blood pressure—obviously the first requirement—fills the picture with other antihypertensives. With Eutonyl it occupies only the foreground. Eutonyl brings down the blood pressure in even the most severe and stubborn cases: it has been shown to produce an antihypertensive response in some 80-85% of patients, with the diastolic reduction usually similar in all body positions.

MAO inhibition—a unique plus There is a good case for the use of Eutonyl on grounds of antihypertensive potency alone; but dominating the background of the Eutonyl picture is a property which is unique amongst antihypertensives. Eutonyl is an MAO inhibitor. Whereas some other antihypertensives themselves cause depression, any effect on the patient's mood due to Eutonyl will almost certainly be for the better. MAO inhibitors must, of course, be looked at in perspective. The so-called 'cheese reaction' was serious; but it need no longer be so, for with the identification of the foods and drugs responsible such reactions are avoidable. In any case, it is thought that they are likely to be less severe than with tranylcypromine (which is

chemically related to the amphetamines). As regards organic toxicities, there is no evidence that Eutonyl, a non-hydrazine, shares these toxicities of the hydrazine MAO inhibitors.

Side effects not troublesome Eutonyl would be not merely unique but incredible among potent drugs if it had no undesirable side effects. Of course it has; but they compare favourably with those of alternative drugs for the treatment of severe hypertension. If side effects are troublesome, the dosage of Eutonyl should be reduced: its combination with Enduron® (methyclothiazide, Abbott) maintains therapeutic effect and further reduces the level of side effects.

Eutonyl a drug of choice Thus if one stands back to view the details of antihypertensive therapy in perspective, Eutonyl stands out in a third dimension as an undoubted drug of choice in the patient depressed by previous therapy, and as a most valuable alternative to other drugs for the treatment of any patient (subject to contra-indications) suffering from severe hypertension.

Eutonyl (pargyline hydrochloride, Abbott) is supplied in Filmtab® tablets under the names Eutonyl (25 mg, orange) and Eutonyl-Ten (10 mg, pink). Enduron (methyclothiazide, Abbott) is supplied in square grooved tablets of 5 mg. Detailed reference literature available on request.

Durabolin and Deca-Durabolin stimulate tissue-building and counteract nitrogen loss in many clinical conditions. The effect in osteoporosis and in advanced breast cancer is often marked, leading to an improvement in the patient's general condition, relief of pain and a regression of specific symptoms. Other conditions in which these preparations are useful include severe debility, post-operative catabolism, severe trauma, slow-healing fractures, burns and renal failure—in all these, the correction of an adverse nitrogen balance helps in the patient's recovery.

Durabolin is ideal for initial therapy: it is normally given at weekly intervals. Deca-Durabolin is a longer acting form which is ideal for maintenance therapy: it only needs to be given every three weeks.

Nulacin and only Nulacin provides intragastric milk-alkali drip therapy

“In view of the ineffectiveness of most of the tableted antacids, the milk-alkali tablet (Nulacin) would appear to be the antacid of choice for ambulatory therapy.”

Med. Times, N.Y., 1958, 1, 74

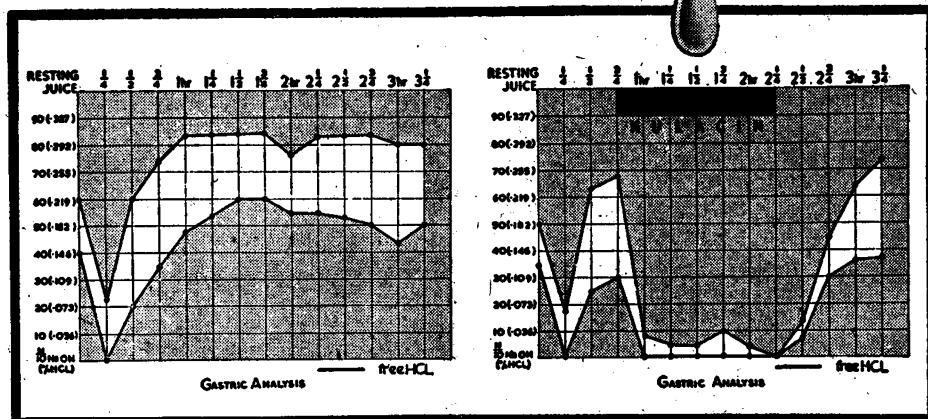

Safe, Simple, Effective

NULACIN TABLETS provide a safe, simple and effective treatment of peptic ulcer.

In treating peptic ulcer a Ryles tube may be passed through the nose and into the oesophagus and a mixture of milk and antacid allowed to flow continuously over the affected area. This form of therapy can only be employed in those patients who are in bed and for the ambulant patient Nulacin tablets are preferable.¹ Nulacin tablets are prepared from whole milk combined with dextrins and maltose, together with the trisilicate, oxide and carbonate of magnesium and calcium carbonate. Nulacin tablets when allowed to dissolve slowly in the mouth provide milk-alkali drip therapy. In fact, Nulacin tablets have revolutionized the treatment of peptic ulcer.⁸

Just Published

TO-DAY'S DRUGS

This book has just been published—on December 22. It is based on a series of review articles which were printed in the "To-day's Drugs" section of the BRITISH MEDICAL JOURNAL between January 1963 and May 1964. These articles have been edited and brought completely up to date so as to form an authoritative and practical guide to modern therapeutics. The book is designed to cover the drug treatment of those common conditions which are met with in general and hospital practice. There are important sections dealing with antibiotic therapy, cardiovascular conditions, rheumatic disorders, oral contraceptives, and the special problems involved in paediatric and geriatric prescribing. Special attention has been paid to the precautions which should be taken in using these drugs and their toxic and side-effects. This book should be of value to all doctors concerned in the day-to-day treatment of patients.

AMENDED ADVERTISEMENT ABSTRACTS OF WORLD MEDICINE

ASSISTANT EDITOR

The Council of the British Medical Association invites applications from registered practitioners for the appointment of Medical Assistant Editor of *Abstracts of World Medicine* at a salary of £2,365 a year, rising by annual increments of £142 to £3,648 a year. In exceptional circumstances the initial salary may be above the minimum of the scale. The appointment will be for a probationary period of six months in the first place. The Association's Superannuation Scheme will apply on substantive appointment.

Preference will be given to candidates under 45 years of age with a wide knowledge of medicine (up to M.D. or M.R.C.P. standard) who can present evidence of literary ability and/or journalistic experience. A knowledge of one or more foreign languages is highly desirable and an interest in the proper use of the English language essential.

Applications, giving details of qualifications and experience and accompanied by the names of three persons to whom reference may be made, should be addressed to the Editor of *Abstracts of World Medicine*, B.M.A. House, Tavistock Square, London W.C.1, and must be received before January 31, 1965.

MEDICAL RESEARCH COUNCIL

FELLOWSHIPS IN CLINICAL RESEARCH 1965-66

The Medical Research Council invite applications for a further series of their Fellowships in Clinical Research, tenable at centres in the United Kingdom during the academic year 1965-66.

These Fellowships, which are ordinarily restricted to British subjects resident in the United Kingdom, are open to suitably qualified medical or dental graduates who desire to prepare themselves for a career in clinical research. In general, it is intended that each Fellow to whom an award is made under the scheme should be given an opportunity, as part of his training for clinical research, to study methods of research in the basic subject most relevant to his particular clinical interest, and to broaden his experience by working in departments other than his parent department either at the same centre or elsewhere. In appropriate cases arrangements can be made for Fellows to work in the Council's own research establishments, including the National Institute for Medical Research.

Applications must be made in each case on behalf of the candidate by the head of the department sponsoring the candidate on the understanding that the head of the department will take all possible steps to ensure that a suitable academic post in a clinical department in the same University, Medical or Dental School will be available to the candidate on satisfactory completion of the period of study under the Fellowship.

The awards will be made for a period of one year in the first instance, and will be renewable annually up to a maximum of three years. The subject of gallstone processes. LONDON BOROUGH OF REDBRIDGE SENIOR MEDICAL OFFICER (Mental Health and Welfare)

With the approval of the London Government Staff Commission, applications are invited for the above-mentioned post in this newly constituted London Borough formed by the union of Ilford and Wanstead and Woodford. The administrative centre will be in Ilford which is easily reached from Central London by good public transport services.

The duties will be mainly connected with Mental Health and Welfare, but other experience may be included in order that the post may be a stepping stone for promotion in the public health service. With respect to Mental Health, the duties will be partly administrative and partly clinical, but for Welfare, which is included in the new Health and Welfare Department, the duties will be mainly of a medical nature. In Redbridge, the Mental Health Services will be reorganized following modern trends: psychiatric hospitals concerned are within the boundaries of the Borough, and it is hoped to have joint employment of certain categories of staff, including consultant psychiatrists, with these hospitals.

Salary according to experience on Whitley scale £2,090 to £2,770 (ultimate maximum £2,855). Superannuation. Medical examination.

Preference will be given to candidates employed by authorities in the Greater London area who are affected by local government reorganization, but applications from candidates from other parts of the country will also be considered.

Application forms, obtainable from Medical Officer of Health, Town Hall, Ilford, Essex, returnable by January 25, 1965. (7124)

MEDICAL OFFICER

SOUTH GEORGIA
(South Atlantic)

Here is a splendid opportunity for a doctor to save money to set himself up in practice.

South Georgia has an urgent need for a Medical Officer for general duties now.

The appointment is for 12 to 18 months, with a salary of £2,000 per annum, plus a terminal gratuity.

Single men will get free board and lodgings, while a married man, if accompanied, will have free quarters, free light and fuel, plus £132 a year in lieu of messing.

South Georgia is a remote island in the South Atlantic, and the climate is rather cold. Nevertheless, there are excellent quarters, centrally heated and well furnished. There are 50 potential patients, and the occasional visiting whaling ship's crew.

There will be every opportunity for the man who wishes to study, or for one interested in skiing or bird watching.

Candidates who must possess qualifications registrable in the United Kingdom, should apply NOW (quoting reference RC/205/60/02), to

The Appointments Officer,
MINISTRY OF OVERSEAS
DEVELOPMENT,
Room 403

MEDICAL OFFICERS

required to serve in the

ZAMBIA DEFENCE FORCE

Applications are invited from Medical Officers who are serving or have served in the Armed Forces; or Doctors without previous military experience, for appointments on contract for 3-4.5 years' duration, in Zambia's modern and well-equipped Defence Force.

Successful candidates will normally enter the Force with the rank of either Captain or Major (depending on qualifications and experience) and be based in Lusaka, Broken Hill or the Copperbelt.

Rate of Pay and other Benefits

Captain £1,550-£1,850 p.a.

Major £1,985-£2,285 p.a.

plus a Professional Allowance of £500-£600 depending on rank.

A Terminal Gratuity is payable of 25% of total gross pay received over the period of the contract, subject to 30 months service completed. Married Quarters and hard furniture supplied. Passage to Zambia and back to U.K., on completion of tour, for wife and children under age of 19.

General Information

Zambia is a fast growing energetic Country with a cost of living on a par to the U.K. (Income Tax lower). Some items, e.g. cigarettes and petrol, are cheaper. It has a warm, dry climate most of the year, allowing for a wide range of outdoor and sporting activities—swimming, boating, fishing and hunting. Its National Parks, Victoria Falls, lakes and wild life offer exciting sightseeing and photography opportunities.

Applications, quoting age, qualifications, experience and brief history of previous military service (if any), should be sent to:
