

RESPIRATORY FUNCTION IN DISEASE

An Introduction to the Integrated Study of the Lung

By David V. Bates, M.D., M.R.C.P., *Director, Respiratory Division, Royal Victoria Hospital, Montreal*, and Ronald V. Christie, M.D., M.Sc., D.Sc., Sc.D., F.A.C.P., F.R.C.P., *Chairman, Faculty of Medicine, McGill University, Montreal*.

A truly excellent application of recently developed knowledge of pulmonary physiology to the understanding and management of respiratory disease. The opening chapters discuss methods of study of pulmonary function; the modern concept of evaluation of lung disease; and the various components of normal pulmonary function. The remaining chapters are devoted to individual disease entities, with discussions of clinical features, radiological features and pathology—plus an exhaustive explanation of the pathophysiological effects of that particular disorder on overall pulmonary function. Altogether, 54 illustrative clinical case histories are presented, as well as some very useful commentaries on the effects of treatment on the pattern of disordered function.

THE PRACTICE OF MEDICINE IN THE BRITISH ARMY

What are your thoughts in your pre-registration year? Have you decided to go direct into general practice?

To take up a hospital appointment? Or have you other ideas?

You may well consider a 3 or 5 year Short Service Commission in the ROYAL ARMY MEDICAL CORPS. You will have great scope for a well-paid job in general practice, or a chance to specialise.

At the end of the period of your Short Service Commission there is a tax-free terminal gratuity of £1500 or £3000. Rank during pre-registration is Lieutenant with promotion to Captain on full registration.

SCOPE OF THE WORK

Professional standards are high. The R.A.M.C. is responsible for the welfare not only of serving officers and men but also of their families, the Women's Services and some of the civilians working with the Army. Thus there is ample scope for good general practice. There are thirty well equipped hospitals at home and overseas, as well as field medical units to provide medical care for the Army in its active role. Research is an increasingly important aspect of work in the R.A.M.C.

PAY, ALLOWANCES AND LEAVE

The range of pay varies from not less than £2000 for the young married Captain up to £5000 for the senior consultant. Annual allowances may be paid to assist in the education of your children.

Six weeks leave may be taken each year and you are not responsible for finding and paying your relief.

LIVING ACCOMMODATION

If you are single you would live in a well appointed Officers' Mess, at very small cost from your pocket. If you are married you are usually provided with a fully furnished house for which the rent would be less than £200 a year.

YOUR FAMILY

For the married man the attitude of his wife to the Service is of the greatest importance. The community

spirit of Army life, especially overseas, embraces an officer's family as much as himself. In addition to having your family with you at home and with opportunities to take them with you overseas, such allowances as Marriage Allowance, Education Allowance, Disturbance Allowance and Local Overseas Allowance show the importance attached by the Army to your family life.

FUTURE PROSPECTS

If you decide to return to civil life at the end of your Short Service Commission you will have gained considerable experience and have a substantial sum behind you to get started.

If you decide to make a career in the Service you may apply for a permanent commission and serve up to the age of 60. Promotion to Major is after 5 years reckonable service, and to Lieut-Colonel after 13.

You may continue if you wish in general practice where great importance is attached to post-graduate study for such diplomas as D.Obst. R.C.O.G., and D.C.H. Refresher courses are arranged at the Royal Army Medical College and other post-graduate centres. Officers granted permanent commissions may apply for training in any of fourteen specialties and those selected are given ample time and opportunity for obtaining their higher qualifications. Senior specialists may be awarded consultant grading directly comparable with civilian standards and extra pay for specialists and consultants ranges between £109 and £584 a year.

FOR FURTHER INFORMATION

Please write giving your age and qualifications to:

Colonel A. D. Young, D.S.O., M.B., Army Medical Directorate, Dept. 452, Lansdowne House, Berkeley Square, London, W.1. or you may care to come and discuss your application personally.

The value of NEMBUTAL. The harassed housewife who needs light sedation during the day; the stress-loaded businessman who cannot get to sleep; the true insomniac . . . all these are candidates for Nembutal therapy. A small dose of Nembutal t.d.s. helps to smooth out life's rough edges, calming the patient and helping them to face life's problems rationally. Where insomnia is due to mild tension, a slightly larger sedative dose is often enough to let the patient drift into a natural sleep. Larger hypnotic doses bring sleep to even the most stubborn case.

The qualities of NEMBUTAL. It is rapid in onset, and has a duration of action of about 4 to 6 hours, which lessens the possibility of hangover. It may be used for any degree of CNS depression, from mild sedation to deep hypnosis, by adjusting the dose.

Nembutal is available in three strengths 30 mg ($\frac{1}{2}$ gr), 50 mg ($\frac{3}{4}$ gr), 100 mg (1½ gr) also as Elixir containing approx. 20 mg/5 ml. *For daytime sedation:* One 30 mg capsule t.d.s. (One 50 mg

capsule t.d.s. if required). *As an aid to natural sleep:* One 50 mg capsule nocte. *For hypnosis:* One (or two) 100 mg capsules nocte (up to four capsules for basal hypnosis).

SAFER & MORE EFFECTIVE TREATMENT OF OEDEMA

DYTIDE

DYTIDE acts on both proximal *and* distal renal tubules to induce ample diuresis and, at the same time, conserve potassium. With 'Dytide', there is **no** need to complicate therapy with potassium supplements.

The selective control of electrolyte loss made possible by 'Dytide' is particularly important in the safer management of the oedematous cardiac patient, in whom increased potassium excretion can adversely influence the action of digitalis.

Each 'Dytide' capsule contains 50 mg. 'Dytac' (brand of triamterene) and 25 mg. benzthiazide.

Literature containing prescribing information is available on request.

HELP BUILD A BETTER WORLD

WANTED-DOCTORS AND MEDICAL SPECIALISTS TO HELP THE DEVELOPING COUNTRIES

All over the world, as you read this, thousands of British men and women are serving the developing countries in their struggle to raise their standard of living.

In this fight against hunger, disease, and poverty British experts are lending their skills. The developing countries are looking to Britain for many more doctors. Will you contribute your professional skill for two or three years? This will not be a leap in the dark. The British Government is well aware of the personal and financial problems that service overseas raises, and appointments offered through the Ministry of Overseas Development carry with them a comprehensive set of benefits. These include attractive pay with overseas allowances, accommodation at low rental, children's education allowances, and free passages for them to visit you.

WATCH OUT
for specific appointments giving conditions of service, etc., in the classified columns of the national press and professional journals.

Distalgesic

**kills the pain

the pain Distalgesic kills pain in a wide range of conditions from toothache to malignancy. It contains dextropropoxyphene*, a potent non-narcotic analgesic which mg. for mg. is as effective as codeine and comparable with oral pethidine. Dextropropoxyphene maintains effectiveness over long periods without tolerance developing in the patient.

the whole pain Distalgesic tablets contain 32.5 mg. dextropropoxyphene with the addition of 325 mg. paracetamol to broaden the scope of analgesia and add a useful antipyretic action.

nothing but the pain Distalgesic is free from the side-effects associated with aspirin, phenacetin and codeine; it causes neither gastric irritation, nor constipation, nor smooth muscle spasm. Dextropropoxyphene, classified by the W.H.O. as non-narcotic, does not produce euphoria or physical dependence. Adverse reactions to paracetamol are rare.

usual adult dosage* two tablets three or four times a day.

*Dextropropoxyphene has been the subject of several well-controlled clinical trials and described as the most promising alternative to codeine. (Brit. med. J., 1963, 7, 318.)

ANTIBIOTICS AND THE INTESTINAL FLORA

Treatment with broad spectrum antibiotics suppresses the normal flora, which may be replaced by abnormal resistant organisms causing diarrhoea.

This change can be prevented or reversed by the implantation of *Lactobacillus acidophilus* which has been rendered antibiotic-resistant, and is thus able to multiply freely under these abnormal conditions. This organism itself forms an antibiotic which may contribute to its rapid preponderance over other species.^{1, 2}

Oral treatment with antibiotic-resistant *L. acidophilus* in the form of ENPAC has been shown to eliminate *Candida* from the faeces of infants with antibiotic-induced diarrhoea, with relief of symptoms succeeded by rapid gain in weight^{3, 4} and greatly to reduce the numbers of staphylococci in the faeces of patients treated with tetracyclines.⁵

SIDROS—FOR THE PATIENT DEFICIENT IN IRON

well tolerated iron compound plus reducing agent to aid absorption

In the treatment of iron-deficiency anaemia many iron salts can produce the desired increase in haemoglobin level. Some also have a tendency to produce side-effects, and there can be a great deal of wastage through non-absorption.

SIDROS is designed to overcome these disadvantages, and provides a reliable treatment for iron-deficiency anaemia.

Ferrous gluconate Each Sidros tablet contains 300 mg of ferrous gluconate which produces a highly satisfactory clinical response and is very well tolerated.

Ascorbic acid Sidros also contains stabilized ascorbic acid (30 mg per tablet) which is known to aid absorption by maintaining iron in the reduced state.

The basic NHS price of 100 Sidros tablets is 2/8 as dispensed from 1000 tablet bottle. Samples of Sidros are available on request.

SIDROS is effective, well absorbed, well tolerated and economical

These facts are true of only one oral contraceptive...

Ovulen (brand of ethynodiol diacetate with mestranol) is the only oral contraceptive with a progestin content of only 1 mg. per tablet. This very low dosage is accompanied by fewer side effects.

Ovulen has a background of 12 years' research and clinical experience. It is made by Searle, who developed the first oral contraceptive.

a new first-choice antibiotic

Mycivin is a new antibiotic, lincomycin hydrochloride, which is chemically unrelated to all others clinically available. Mycivin provides the physician with a first-choice antibiotic capable of achieving high and sustained serum levels, providing effective treatment of Gram-positive infections. Its especial value is in its ability to act against those resistant to other antibiotics.

Mycivin is available for oral and parenteral use.

Capsules of 500 mg. lincomycin as hydrochloride in containers of 20 and 100 capsules.

Ampoules of 600 mg. lincomycin as hydrochloride in packs of 3 x 2 ml. ampoules.

INDOCID

INDOMETHACIN

REGD

'Indocid' is a new, non-steroid anti-inflammatory agent with analgesic and antipyretic properties, for oral administration in rheumatoid arthritis, osteoarthritis, ankylosing spondylitis, gout, and certain soft-tissue disorders. 'Indocid' is chemically unique, unrelated to the corticosteroids, butazones and salicylates.

'Indocid' rapidly relieves pain and inflammation; in osteoarthritis, it is often effective where other agents are inadequate. 'Indocid' is suitable for prolonged and uninterrupted therapy.

'Indocid' has been the subject of long and exhaustive controlled clinical trials. A number of British papers have already been published.

Nulacin and only Nulacin provides intragastric milk-alkali drip therapy for the ambulant patient

“In view of the ineffectiveness of most of the tableted antacids, the milk-alkali tablet (Nulacin) would appear to be the antacid of choice for ambulatory therapy.”

Med. Times, N.Y., 1958, 1, 74

Safe, Simple, Effective

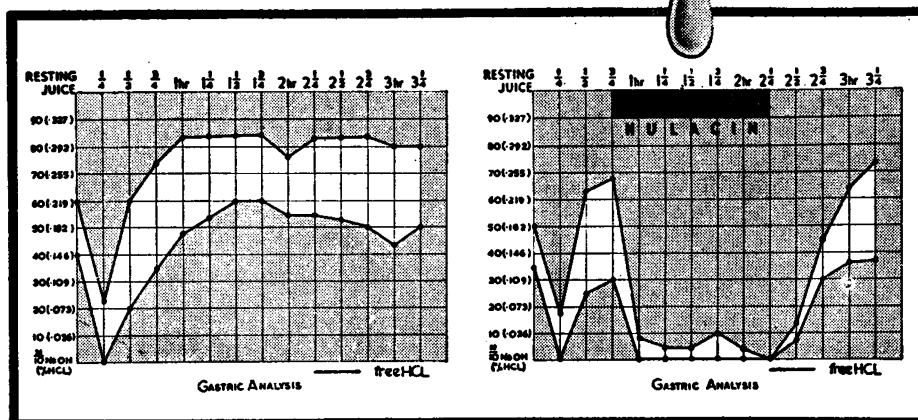

NULACIN TABLETS provide a safe, simple and effective treatment of peptic ulcer.

In treating peptic ulcer a Ryles tube may be passed through the nose and into the oesophagus and a mixture of milk and antacid allowed to flow continuously over the affected area. This form of therapy can only be employed in those patients who are in bed and for the ambulant patient Nulacin tablets are preferable.¹ Nulacin tablets are prepared from whole milk combined with dextrans and maltose, together with the trisilicate, oxide and carbonate of magnesium and calcium carbonate. Nulacin tablets when allowed to dissolve slowly in the mouth provide milk-alkali drip therapy. In fact, Nulacin tablets have revolutionized the treatment of peptic ulcer.⁸

Alphosyl-today's most widely prescribed product used specifically for the treatment of Psoriasis

In case after case, Alphosyl's effectiveness in controlling psoriasis is repeatedly confirmed. Even in chronic and refractory cases outstanding results have been achieved despite the failure of all previous forms of therapy. Evidence of four recent clinical trials^{1,4,5,6} shows that from a total of 249 patients treated with Alphosyl, 111 were completely cleared, 80 were 75%–99% improved, 44 were 50%–74% improved and only 14 showed less than 50% improvement.

Why Alphosyl is so effective In Alphosyl, allantoin and a specially refined coal-tar extract were combined for the first time. Allantoin has been found to be particularly effective in loosening psoriatic scales,³ while the keratoplastic effect of coal-tar is well known.³ Alphosyl

is non-greasy and non-staining and vanishes on application. It is notably safe,^{1,3} being free from the risks which are found in other forms of treatment such as arsenicals, mercury, corticosteroids, x-ray, etc. It certainly deserves a trial in all cases of psoriasis.

New Alphosyl Cream Following the success of Alphosyl Lotion, this coal-tar allantoin combination is now available in Britain as a lubricating cream. The cream base has proved a particularly effective vehicle for Alphosyl as it incorporates a combination of free fatty acids (saturated and unsaturated) naturally occurring triglycerides, sterols and esters to give the lipid phase of the base a significant resemblance to the lipoid array of normal human skin.⁶

Alphosyl Lotion formula—allantoin 2% + 90% alcoholic extract of coal-tar (5=1) 5% in a smooth, non-greasy lotion base.

Alphosyl Cream formula—allantoin 2% + 90% alcoholic extract of coal-tar (5=1) 5% in a vanishing cream base.

Pfizer
Europe

PFIZER EUROPE is creating a new major medicinal research group to be located in Belgium. This new group will play an important and integrated part in the total research effort of Pfizer International and will, in the first instance, embrace medicinal chemical research, pharmacological research and clinical research. The activities of the group will be directed specifically towards the search for new chemotherapeutic agents which are effective in the prevention and treatment of diseases of major clinical importance. To play a vital role in the activities of this new group, PFIZER EUROPE is seeking the services of a highly qualified and widely experienced Physician who will be the DIRECTOR OF CLINICAL RESEARCH. He will have had wide clinical experience at the hospital level, and be strongly interested in clinical pharmacology—he will be concerned with the direction of the initial investigations of new drugs in man. For this important appointment nationality is not important, but the successful applicant will be competent in verbal and written English, and preferably also in German and French. He will be required to recruit such staff as are appropriate to the objectives of his new department. He will have close liaison with prominent European academic institutions related to his field of activity. This is a senior and important appointment for which we therefore invite applications from Physicians of the appropriate calibre. The successful candidate will enjoy a salary commensurate with these standards. Enquiries, which will be treated in the strictest confidence, should be in English, include extensive curricula vitae, and be addressed to:

The Research Director,
PFIZER EUROPE,

Osteoporosis?

Calcium-SANDOZ Effervescent Tablets

the most acceptable
high-dose calcium treatment
in postmenopausal and senile
osteoporosis

Calcium-Sandoz Effervescent Tablets (orange flavoured):

calcium gluconogalactogluconate
(0.38 g. Ca equivalent to 4 g. calcium gluconate)
and 20 mg. ascorbic acid

2 to 5 effervescent tablets daily

"Studies are reported here which suggest that calcium deficiency is an important factor in many cases of postmenopausal and senile osteoporosis. Many patients with these forms of osteoporosis absorb and retain calcium abnormally avidly when on a high calcium intake in the form of supplements (calcium gluconate Sandoz), and moreover may continue to retain it avidly for at least three and a half years. Symptoms of the disease are relieved and no further fractures take place."
