**'FRAGRANT CLOUD'**

(From Harry Wheatcroft & Sons, Edwalton, Nottingham.)

From early summer until the first hint of the autumn frosts, these coral-red flowers will float a cloud of fragrance throughout your garden. 'Fragrant Cloud' is a rare combination, it has healthy, vigorous growth, well shaped, free-flowering blooms, and, as its name implies, a heady, intoxicating scent. It's no wonder that 'Fragrant Cloud' was the only rose, out of 249 entries, to win the coveted Gold Medal of the National Rose Society.

## Why it pays to select your medical electronic system from a single source... Sanborn

All the components in the Sanborn medical electronic system you select - transducer, amplifier, read-out - are designed to work together with maximum efficiency as a **system**.

Sanborn's matched units with plug-in versatility thus give you several important advantages. Physiological monitoring is made more reliable, more accurate. Operation is simple, training kept a minimum. Plug-in units can be installed and made operable with a minimum of set-up time. And with all units from one supplier, you eliminate problems of various impedance, d-c levels, and connector types.

In addition, systems can be modified or up-dated by simply exchanging or adding plug-in units.

There's a Sanborn system available for the measurement and recording of all physiological parameters of importance in diagnostic, surgical, post-operative and research work. Why not let an experienced, local Sanborn technician help you plan the right system for your present needs.

## The problem of the dirty mouth

Even in 1965 the dangers, and the unpleasantness, of the dirty mouth are still present in the post-operative period, as well as in many fevers; the geriatric patient being especially prone to them. Careful attention to oral hygiene will usually, of course, keep the patient comfortable and prevent complications. Such attention, however, is very time-consuming to the nurse; and it is not often realised that for most patients it can be replaced or supplemented by the use of chewing gum.

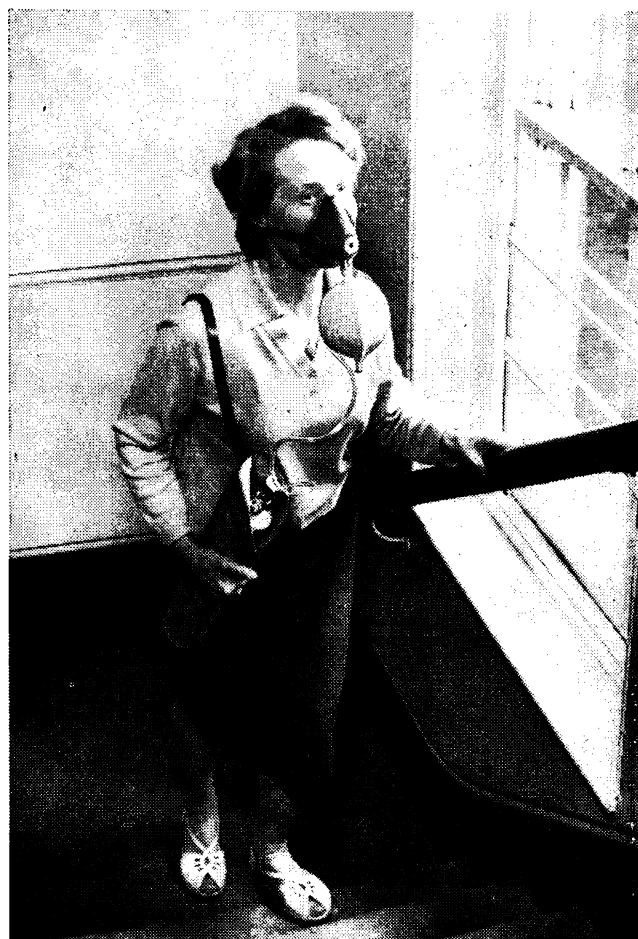

The regular use of chewing gum, by stimulating salivary flow, keeps the mouth clean in the most natural way possible. The patient is in a sense providing his own nursing care with the minimum of energy expenditure by himself.

Child patients, of course, need no encouragement to chew gum. The older patient may need encouraging—but not once he has appreciated the very obvious cleansing and refreshing effect that chewing gum has upon the mouth. Chewing gum is also of value to patients who are forbidden to smoke.

## The PORTOGEN could make life more tolerable for some of your patients

Many patients suffering from chronic respiratory insufficiency are debarred from normal activities by their dependence on a supply of supplementary oxygen.

**THE PORTOGEN** has been designed to provide such a supply in extremely portable and handy form. It contains sufficient oxygen to last for 25 minutes at a continuous flow of 4 litres per minute, and yet the complete outfit, including 100 litre cylinder, regulator, control valve, gauge, and neat, ever-ready carrying case weighs little more than 3lbs.

**THE PORTOGEN** also constitutes a readily available source of oxygen for use in all kinds of respiratory emergencies, and is therefore eminently suitable for your surgery and your car.

**THE PORTOGEN** is simple and safe. Very little instruction is needed in its use, and cylinders may either be exchanged through a chemist, or recharged by the patient from a standard 48 cu. ft. cylinder in his home.

For further information, get in touch with your nearest Branch of British Oxygen. Our representative will be glad to call on you by arrangement.

# THE PRACTICE OF MEDICINE IN THE BRITISH ARMY

---

*What are your thoughts in your pre-registration year? Have you decided to go direct into general practice?  
To take up a hospital appointment? Or have you other ideas?*

---

You may well consider a 3 or 5 year Short Service Commission in the ROYAL ARMY MEDICAL CORPS. You will have great scope for a well-paid job in general practice, or a chance to specialise.

At the end of the period of your Short Service Commission there is a tax-free terminal gratuity of £1500 or £3000. Rank during pre-registration is Lieutenant with promotion to Captain on full registration.

## SCOPE OF THE WORK

Professional standards are high. The R.A.M.C. is responsible for the welfare not only of serving officers and men but also of their families, the Women's Services and some of the civilians working with the Army. Thus there is ample scope for good general practice. There are thirty well equipped hospitals at home and overseas, as well as field medical units to provide medical care for the Army in its active role. Research is an increasingly important aspect of work in the R.A.M.C.

## PAY, ALLOWANCES AND LEAVE

The range of pay varies from not less than £2000 for the young married Captain up to £5000 for the senior consultant. Annual allowances may be paid to assist in the education of your children.

Six weeks leave may be taken each year and you are not responsible for finding and paying your relief.

## LIVING ACCOMMODATION

If you are single you would live in a well appointed Officers' Mess, at very small cost from your pocket. If you are married you are usually provided with a fully furnished house for which the rent would be less than £200 a year.

## YOUR FAMILY

For the married man the attitude of his wife to the Service is of the greatest importance. The community

spirit of Army life, especially overseas, embraces an officer's family as much as himself. In addition to having your family with you at home and with opportunities to take them with you overseas, such allowances as Marriage Allowance, Education Allowance, Disturbance Allowance and Local Overseas Allowance show the importance attached by the Army to your family life.

## FUTURE PROSPECTS

If you decide to return to civil life at the end of your Short Service Commission you will have gained considerable experience and have a substantial sum behind you to get started.

If you decide to make a career in the Service you may apply for a permanent commission and serve up to the age of 60. Promotion to Major is after 5 years reckonable service, and to Lieut-Colonel after 13.

You may continue if you wish in general practice where great importance is attached to post-graduate study for such diplomas as D.Obst. R.C.O.G., and D.C.H. Refresher courses are arranged at the Royal Army Medical College and other post-graduate centres. Officers granted permanent commissions may apply for training in any of fourteen specialties and those selected are given ample time and opportunity for obtaining their higher qualifications. Senior specialists may be awarded consultant grading directly comparable with civilian standards and extra pay for specialists and consultants ranges between £109 and £584 a year.

---

*Please write giving your age and qualifications to:*

A second group of Co-tabs will be introduced in the course of 1965 making the majority of commonly used non-proprietary standard tablets available in Co-tab form.

## Prescription of Co-tabs

In writing a prescription the doctor simply has to write 'Co-tab. . . .' where he would previously have written 'Tab. . . .' in the inscription, thus:

'R Co-Tab. Acid Acetylsal. 300 mg.'  
 'R Co-tab. Phenobarb. 30 mg.'  
 'R Co-tab. Paracetam. 500 mg.'

In other words, simply by writing 'Co-' in front of the tablet name in his prescriptions the doctor ensures that he and any other doctor (or a pharmacist or a member of a hospital staff) will be able at once to identify what tablet a patient has been taking. The code numbers are meant to be used

Doctors who have not received a copy of the Co-tabs Brochure explaining this important advance in TABLET IDENTIFICATION are asked to notify

St. George ne'er confronted a more fiendish, diabolical dragon than this two-headed monster which inflicts both pain and spasm on your patients with musculo-skeletal disorders. Now, with Robaxisal-Forte in your armamentarium you have a double-edged therapeutic sword which combats and conquers pain and spasm simultaneously. Robaxisal-Forte combines the dependable skeletal muscle relaxant, Robaxin (methocarbamol) with the pain-relieving benefits of acetylsalicylic acid in one convenient dosage form. During \*clinical trials it was observed that these compounds have a potentiating effect upon one another. Higher plasma salicylate levels can be attained than with the same dosage of acetylsalicylic acid alone.

Where did Lister's Carbolic Spray go? It went to the Museum, of course. As an antiseptic spray it was superseded by modern aseptic techniques. In medicine, perhaps more than in any other field, the old is constantly being replaced by the new. Consider the treatment of anxiety states, for example. Since the introduction of Librium\*, earlier forms of therapy have had to take second place. Today, over 1,000 published reports testify to the effectiveness of Librium in the treatment of anxiety and tension.

# which hypertensive patients are best treated with 'Esbatal'?

All new patients requiring an adrenergic neurone-blocking agent

"Bethanidine sulphate is an important and potent hypotensive drug, and by its use the regime of many patients has been simplified and side-effects avoided". *J. Irish med. Ass.*, 1965, 56, 9.

"While expecting the symptoms of adrenergic neurone blockade, we have been pleasantly surprised by the lack of other side-effects, and especially by the absence of diarrhoea". *Lancet*, 1962, ii, 897.

Male hypertensives

'Esbatal' does not cause impotence, but as with other adrenergic neurone-blocking agents, failure of ejaculation may occur. When this causes concern, withdrawal of 'Esbatal' for 24 hours usually reverses this side-effect. Good control of blood pressure is regained rapidly on resuming treatment. (See *Lancet*, 1964, ii, 659.)

Patients in whom other forms of hypotensive therapy cause diarrhoea

". . . . a useful alternative to established means of therapy. It seldom causes diarrhoea, and the dose is easily manipulated. *Lancet*, 1964, ii, 659.

When rapid control of blood pressure is essential

". . . . it has the advantage of more rapid action and excretion so that its dose can be increased more rapidly and the blood pressure brought under control more quickly". *Brit. med. J.*, 1964, ii, 865.

"Bethanidine sulphate is of particular value for the rapid reduction of high blood pressure . . . ." *J. Irish med. Ass.*, 1965, 56, 9.

# NORMAX

## THIS CAPSULE

## PROMOTES REGULARITY

It contains dioctyl-sodium sulphosuccinate 60 mg, and 1-8 dihydroxyanthraquinone 50mg.

Normax acts by softening the faeces and gently stimulating colonic peristalsis. It is indicated especially during pregnancy and for the elderly patient, when its gentle action in restoring regularity is most appreciated.

1-8 dihydroxyanthraquinone acts on the lower bowel and has no irritant actions. Dioctyl-sodium sulphosuccinate is not absorbed and does not break down during its passage through the intestine.

Dioctyl-sodium sulphosuccinate acts by lowering the surface tension of the impacted faecal mass and in association with the mild peristaltic movement induced by the 1-8 dihydroxyanthraquinone, leads to facilitated passage of soft stools. Animal experiments and extensive clinical observations have failed to reveal evidence of toxicity.<sup>1,2</sup>

Because of this the therapeutic effect of Normax can be obtained without the danger of toxicity. Normax has a wide application in the treatment of constipation and it retains its effectiveness even when used regularly over long periods.<sup>1</sup> Normax restores regularity and is a rational approach to the treatment of constipation.

Normax capsules are available in bottles of 30 and 250 at basic NHS price of 4/10d. and 26/10d. respectively. Normax is subject to purchase tax.

# Alphosyl-today's most widely prescribed product used specifically for the treatment of Psoriasis

In case after case, Alphosyl's effectiveness in controlling psoriasis is repeatedly confirmed. Even in chronic and refractory cases outstanding results have been achieved despite the failure of all previous forms of therapy. Evidence of four recent clinical trials<sup>1,4,5,6</sup> shows that from a total of 249 patients treated with Alphosyl, 111 were completely cleared, 80 were 75%–99% improved, 44 were 50%–74% improved and only 14 showed less than 50% improvement.

**Why Alphosyl is so effective** In Alphosyl, allantoin and a specially refined coal-tar extract were combined for the first time. Allantoin has been found to be particularly effective in loosening psoriatic scales,<sup>3</sup> while the keratoplastic effect of coal-tar is well known.<sup>3</sup> Alphosyl

is non-greasy and non-staining and vanishes on application. It is notably safe,<sup>1,3</sup> being free from the risks which are found in other forms of treatment such as arsenicals, mercury, corticosteroids, x-ray, etc. It certainly deserves a trial in all cases of psoriasis.

**New Alphosyl Cream** Following the success of Alphosyl Lotion, this coal-tar allantoin combination is now available in Britain as a lubricating cream. The cream base has proved a particularly effective vehicle for Alphosyl as it incorporates a combination of free fatty acids (saturated and unsaturated) naturally occurring triglycerides, sterols and esters to give the lipid phase of the base a significant resemblance to the lipid array of normal human skin.<sup>6</sup>

**Alphosyl Lotion** formula—allantoin 2% + 90% alcoholic extract of coal-tar (5=1) 5% in a smooth, non-greasy lotion base.

**Alphosyl Cream** formula—allantoin 2% + 90% alcoholic extract of coal-tar (5=1) 5% in a vanishing cream base.

This is no ordinary tetracycline tablet

It has the widest range of activity of the broad-spectrum antibiotics available today, for, in addition to tetracycline, it contains a highly effective antifungal antibiotic, nystatin, which can prevent the monilial superinfection often found when tetracycline alone is given. Thus, the patient receiving this tetracycline tablet is protected against monilial side-effects such as nausea and vomiting; diarrhoea; ano-genital pruritus; and thrush<sup>1</sup>

# IRON on an empty stomach

To prescribe iron before breakfast would be asking for trouble with ordinary ferrous sulphate tablets. Even taken after meals and in divided doses, such tablets cause irritation and unpleasant side effects in many patients, often leading to the abandonment of therapy.

But "One **FERRO-GRADUMET**® tablet before breakfast" is right. This once-daily haematinic is made to be taken on an empty stomach, for the Ferro-Gradumet is a unique approach to the treatment of iron-deficiency anaemia. Just one tablet daily, before breakfast, gives steady, trouble-free assimilation of ample amounts of iron. Instead of releasing a corrosively large dose of ferrous sulphate in the stomach, the Gradumet slowly leaches out its contents over a period of hours throughout the gastro-intestinal tract until, finally, the empty matrix is excreted.

The secret of the Gradumet lies in this inert sponge-like matrix, the pores of which are permeated with ferrous sulphate and a soluble "channelling agent". The predetermined release pattern, which is independent of body chemistry, retains the greater part of the ferrous sulphate until the tablet has passed out of the stomach into the small intestine, where it is better absorbed with less irritation.

Each Ferro-Gradumet tablet contains the exsiccated equivalent of 525 mg ferrous sulphate, providing 105 mg elemental iron—a sufficient daily dose in all cases of iron-deficiency anaemia.

**PRESENTATION** Each red Filmtab® (film-coated tablet, Abbott) contains 525 mg ferrous sulphate (in exsiccated form), equivalent to 105 mg elemental iron.

## FLAT FOOT?

**TRADITIONAL METHOD**  
*ANY SHOE with external wedge. Any external wedge to heel disturbs plane of forepart and heel.*

**OUR METHOD**  
*INNERAZE keeps sole and heel in perfect alignment.*

### ... do you recommend an external wedge on the shoes?

But the wedges soon wear away; and very often the child is made to feel self-conscious because his shoes look different from other children's. As the diagram on the left clearly shows, any external wedge to heel disturbs the plane of forepart and heel. Surely it's more logical to have a wedge built-in between the inner and the outer sole—where it can correctly corset the foot, remain invisible, and completely unaffected by wear or repair of the shoe. That is how Start-rite INNERAZE shoes are made—on remedial lasts specially adapted to accommodate the internal wedge. That is why they are the only practical and thoroughly effective solution to this problem.

People don't build cars like they used to?  
Bond do.

The Bond Equipe G.T.4.S. is built by hand.

The reinforced glass fibre body is hand moulded, and incidentally, totally rustproof. The doors are hand-hung. The roof lining is hand-trimmed by a gentleman using infinite skill and a pair of scissors. The various accessories are hand-fitted.

Then seven coats of paint are sprayed on (by hand too, of course).

The result is a very special car.

But not a car left out on a limb when you want it serviced or seen to.

The Bond Equipe G.T.4.S. is built by Bond in association with Standard Triumph and carries a 12,000 mile/12 month warranty. It's powered by the nippy but frugal 67 B.H.P. Triumph Mark II Spitfire Engine. It has the

tiny Triumph Herald turning circle. Its front wheels have Triumph disc brakes and all four of its wheels have Triumph independent suspension. It sits on that marvellously strong Triumph all steel chassis.

So, as well as having a very definitely and delightfully different car, you have always available the full Standard Triumph dealer servicing network.

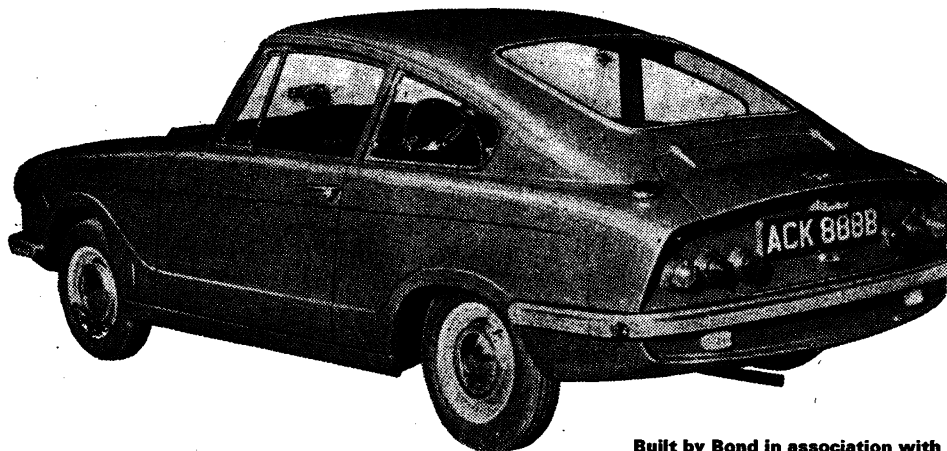

Its Ex works price incl. Purchase Tax is £829-5-5d. and this includes heater, windscreen washers and twin reversing lights. It will seat, very comfortably, 4 people. Its boot will take an orgy of shopping. Its parcel shelf and glove box will absorb a mass of clutter.

It has lots of room.

If you feel you have room in your life for it, you can find it at many Standard Triumph dealers.

It's not a car in a million; the Bond Equipe G.T.4.S. That's one of its charms.

**THE BERKELEY FELLOWSHIP**

(Founded in memory of the late Sir G. H. A.  
Comyns Berkeley and his wife, Ethel Rose  
Berkeley)

The Berkeley Fellowship was founded under  
the Will of the late Sir G. H. A. Comyns  
Berkeley to provide an opportunity for re-  
search in medicine, or for visits to medical  
institutions or hospitals to a person elected  
jointly by the Master and Fellows of Gonville  
and Caius College, Cambridge, and the Coun-  
cil of the Middlesex Hospital Medical School.  
Under the terms of the bequest medical  
centres in any part of the world may be  
visited, with the exception of Oxford or  
Cambridge.

Applications from graduates in medicine  
are invited for the Fellowship. The period  
of tenure of the Fellowship and the emolu-  
ments will depend upon the circumstances of  
each case. A fellowship will not normally be  
awarded for a period shorter than three  
months or longer than one year, but applica-  
tion for renewal will be considered. The  
emolument may be paid as a stipend or as  
a grant, but will not normally be  
necessarily incurred by the Fellow in the  
performance of his programme of work, or  
partly as stipend and partly as grant. The  
first year's emolument will not normally  
exceed £3,000 during one year's tenure.

Applications (six copies) should reach the  
Dean of the Middlesex Hospital Medical  
School by April 30, 1965, and should include  
the following information:

- Name, address and age.
- Qualification and experience.
- Present appointment.
- Programme of work proposed, with  
estimate of necessary expenses.
- Other sources of financial assistance,  
including any stipend from present  
appointment, if continued during the  
tenure of the Fellowship. (7713)

**UNIVERSITY OF TASMANIA****LECTURESHIPS OR SENIOR LECTURESHIPS IN  
ANATOMY, PHYSIOLOGY AND BIOCHEMISTRY**

The University invites applications for appointment as Lecturers  
or Senior Lecturers in each of the medical departments of Anatomy,  
Physiology, and Biochemistry.

The present salary scales for Lecturers are Grade II, £A.1,800 by  
£A.100 to £A.2,100; Grade I, £A.2,200 by £A.100 to £A.2,600,  
and for Senior Lecturers, £A.2,750 by £A.100 to £A.3,250. How-  
ever, these are under review, and are expected to rise shortly to  
£A.2,400 by £A.100 to £A.2,700, £A.2,800 by £A.100 to £A.3,200,  
£A.3,300 by £A.100 to £A.3,800, respectively. Appointments will  
be offered within one of the three grades according to qualifications  
and experience. Appointees will be encouraged to develop or con-  
tinue their own research interests.

The decision to establish a Medical School has been taken by the  
Council of the University with the support of the Tasmanian State  
Government and the Australian Universities Commission, which is  
responsible for advising the Commonwealth Government on the pro-  
vision of funds for universities. The first pre-clinical courses (follow-  
ing pre-medical courses in the basic sciences) will be offered in 1966.  
The holders of the three pre-clinical chairs are Professor C. H.  
Barnett, M.A., M.B., B.Chir., F.R.C.S. (Anatomy), Professor A. F.  
Cobbold, B.Sc., Ph.D. (Physiology), and Professor E. S. Holdsworth,  
B.Sc., Ph.D., F.R.I.C. (Biochemistry), to whom intending applicants  
are invited to write for any further information required.

An amount of £A.600,000 has been allocated for a building and  
equipment for the three pre-clinical departments. This will not be  
ready before 1967 and these departments will therefore be housed  
in temporary accommodation initially. The planning of the perman-  
ent building and facilities will proceed in anticipation of an eventual  
enrolment in the first pre-clinical year of 60 students, a figure that  
is unlikely to be achieved for some years after the establishment of  
the degree course.

Conditions of Appointment and information as to the method of  
application should be obtained from the Association of Common-  
wealth Universities (Branch Office), Marlborough House, Pall Mall,  
London, S.W.1.

Applications close in Australia and London on April 30, 1965.  
It is hoped that the appointees can take up their duties by October,  
1965. (7696)

DEPARTMENT OF PHYSIOLOGY

Applications are invited for a new position of Associate Professor in the Department of Physiology in the Faculty of Medicine.

The Department of Physiology provides courses for students in both Faculties of Medicine and Science. An appointment to this position will be made in the general areas of either respiratory, renal or electrolyte physiology or fields related to these areas.

Salary will be at the rate of £A.4,300 per annum (incorporating cost of living adjustments).

Information concerning superannuation, housing scheme, sabbatical leave, etc., and method of application, is obtainable from the Association of Commonwealth Universities (Branch Office), Marlborough House, Pall Mall, London, S.W.1.

Applications close in Australia and London on April 30, 1965. (7697)

**APPLICANTS ARE ADVISED NOT** to send original testimonials when replying to advertisements. Copies will serve the purpose quite as well, and in the event of their being lost or mislaid no inconvenience will ensue.

## DUNEDIN, NEW ZEALAND

There is a vacancy in the Pathology Department for an **ASSISTANT LECTURER OR LECTURER** (Salary £NZ.1,300 by £NZ.100 to £NZ.3,000) in late 1965 or early 1966.

Applicants must be medical graduates who have held resident hospital appointments for at least one year. Previous experience in pathology is not essential as the Department is a recognized training centre in all diagnostic branches of the subject.

Duties include undergraduate teaching and there are good opportunities for research.

Although the position is intended for a person wishing to specialize in pathology, consideration would also be given to an applicant who desires to study pathology for a limited period before entering another specialty.

The starting salary will be determined by age and experience.

Assistance with removal costs is provided.

Applications, with the names of three persons to whom reference can be made, should be sent to Professor Wynn Williams, from whom further particulars may be obtained.—J. W. Hayward, Registrar. (7664)

## DISORDERS

President: The Earl Spencer  
Medical Superintendent:  
D. J. O'Connell, M.D., D.P.M.  
This private hospital receives patients, both  
male and female, suffering from nervous and  
mental disorders, including alcoholism and  
senile illnesses. The fees range from sixteen  
guineas per week. Private rooms with special  
nurses can be provided, either in the hospital  
or in one of the villas in the grounds. The  
hospital is situated in 130 acres of pleasant  
grounds which provide all recreational facili-  
ties. These include a nine-hole golf course,  
sports ground, tennis courts, etc. A Recre-  
ation and Occupation Centre, known as  
Gloucester House, has been opened recently  
which includes an occupational therapy de-  
partment, a swimming pool, a squash court,  
and a library with an adjoining reading room.

## WANTAGE HOUSE

This is a separate reception unit to which  
patients may be admitted. It is equipped  
for the complete investigation of nervous and  
mental disorders by the most modern  
methods. All forms of treatment are avail-  
able. It contains laboratories for biochemi-  
cal, bacteriological and pathological research.

## MOULTON PARK

Some two miles from the main hospital is  
the farm of approximately 600 acres. Occu-  
pational therapy is a feature of this branch  
and patients are given every facility for  
occupying themselves in farming, gardening,  
fruit growing, etc.

For terms and further particulars apply to  
the Medical Superintendent (Telephone No.:  
34354 Northampton), who can be seen in  
London by appointment.

## continuous drip control of ulcer by tablet

PRODEXIN tablets give all the benefits of continuous intragastric drip therapy<sup>1</sup> without any of its disadvantages.

The slow suck down tablets are specially formulated to give prolonged antacid buffer effect, unaffected by stomach emptying rate.<sup>2</sup>

Immediate relief of pain is achieved by rapidly raising pH to 2 neutralising excess acid and controlling the acid secretion by slowly building up the pH to a desirable level of pH3.5 and pH4.5

### DOSAGE:

For continuous therapeutic effect one tablet at a time should be sucked slowly.  
For peptic ulcer one or more tablets an hour.
