### a new antacid palatable effective economical

Alcin is a new antacid offering several important advantages. It provides safe and effective treatment of symptoms associated with gastric hyperacidity and peptic ulceration.

17 April 1965

Palatability Having an absence of chalkiness and an agreeable flavour, Alcin is nonnauseating.

Buffering Activity Alcin not only rapidly neutralises excess acid, but at the same time its sustained buffering activity maintains the level of acidity of the gastric contents within the desired range.

Safety Alcin is safe for prolonged administra-

tion. There is no risk from overdosage as Alcin cannot cause either alkalosis or acid rebound.

No Digestive tract ill-effects Alcin has no known laxative or constipating effects.

Economy Alcin is economical in use. The basic N.H.S. cost of 50 tablets is  $1/9\frac{1}{2}d$ .

**Composition:** Each tablet contains 360 mg. anhydrous co-prepared sodium magnesium aluminium silicate and basic magnesium aluminate.

Samples available on request to Reckitt & Sons Limited, Pharmaceutical Department, Hull.

# SOME PATIENTS DO

Unpalatable iron preparations often lead to a steady surplus in the medicine cupboard and a persisting deficiency in the body. When you prescribe Ferrodic, you know you are giving *pleasant* oral iron that patients will take. Ferrodic tablets are so palatable that they can be chewed or sucked without giving rise to nausea or gastric upset.

Ferrodic iron goes into the body - not the medicine cupboard!

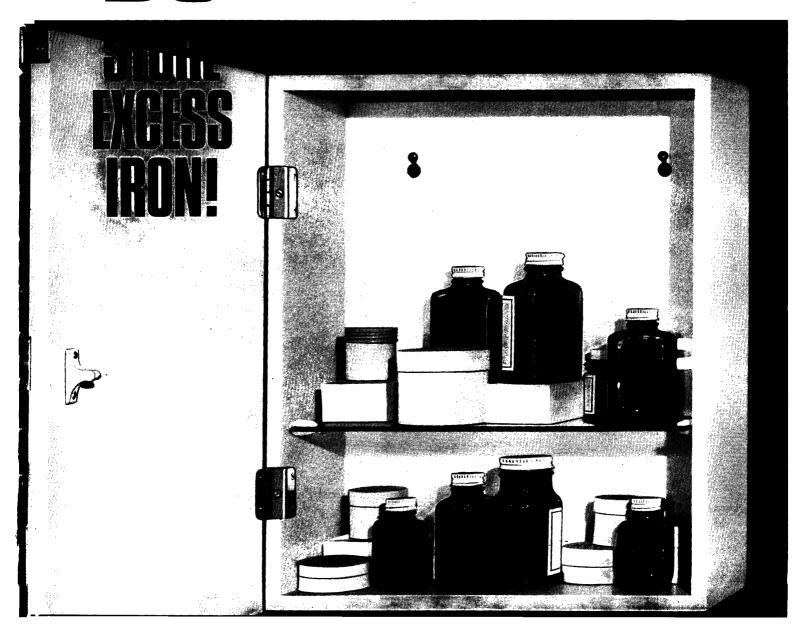

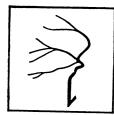

### **Low-Toxicity Iron**

Each Ferrodic tablet contains: Ferrous iron (as ferrous carbonate) 50 mg, Ascorbic acid BP 12.5 mg.

# ASERBINE FOR THE TREATMENT OF BURNS, VARIOUSE III OF

### VARICOSE ULCERS AND INDOLENT ULCERS

ASERBINE IS A NEW SUCCESSFUL, TOPICAL TREATMENT FOR BURNS, VARICOSE ULCERS AND OTHER INDOLENT ULCERS

### Experience suggests that the chief uses of Aserbine are:

- 1 As a de-sloughing agent in the treatment of burns and especially in preparing an area for skin grafting.
- 2 As a treatment for varicose ulcers.
- 3 As a treatment for pressure-sores.

It is indicated for topical use for regrowth of epithelium and formation of granulation tissue in chronic lesions of the skin.

Aserbine is available as a cream and as a solution.

### **ASERBINE FOR BURNS**

Thirty-four superficial and full thickness burns treated with Aserbine were described in a report which concluded that the new solution is an effective method of cleansing and promoting the healing of open wounds.<sup>1</sup>

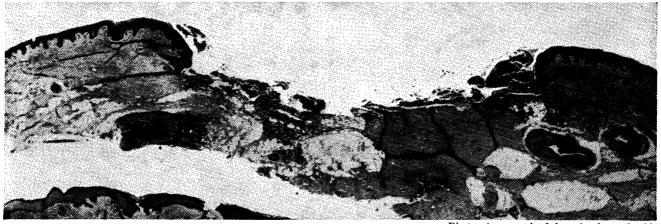

Aserbine has been successfully used in

conjunction with plastic surgery where it accelerates de-sloughing and prepares the burn for grafting.

"In cases where grafting has been necessary it was considered that the new lotion reduced the period before grafting."

One paper<sup>13</sup> reported the treatment of 21 patients with Aserbine and concluded that it was easy to use. The authors particularly noted the absence of immediate or secondary reactions, the aseptic condition of the burns and the rapid epithelialization.

No destruction of living tissue was observed in a large series of cases.<sup>2</sup> In this series Aserbine cream was applied on the second day after injury and application was repeated twice daily. Early application of the cream quickly differentiated superficial from full thickness burns. Crusts and dead skin were removed with forceps before new cream was applied. The woundswere rapidly cleaned, good granulation

Photomicrograph of chronic ulcer of ankle.

tissue produced and grafting was successful.

A significant comment is made in the report of a trial carried out in this country on thirtyfour children admitted to hospital with severe burns.

"It was proposed to carry out an initial investigation before proceeding to a clinical trial. Results have, however, demonstrated convincingly that the lotion is superior to treatment used in this hospital previously and we have therefore instituted the new lotion as routine treatment in all burn cases."

Aserbine keeps the burn aseptic, removes any dead tissue, encourages the formation of granulation tissue and the regrowth of epithelium.

### ASERBINE FOR VARICOSE ULCERS

Varicose ulcers treated with Aserbine remain clean, slough is removed and there is an improvement in the formation of granulation tissue. In cases where plastic surgery is necessary Aserbine accelerates the de-sloughing process and prepares the area for grafting.

In one trial<sup>3</sup>, Aserbine was found highly successful in approximately half the 40 cases of leg ulcers treated, and promoted healing of all ulcers within a few weeks. Another published report<sup>4</sup> included 19 patients with ulcer or trophic wounds, one with ecthyma and one with a pressure-sore. Eighteen of the ulcers showed a rapid, complete and successful healing without relapse. Only one case showed slower rate of healing than normal. This report describes Aserbine as a new and acceptable treatment for difficult ulcers and pressure-sores.

The following case history illustrates the treatment with Aserbine of a varicose ulcer on the right leg of a female patient. There was little granulation tissue and the size of the ulcer was 86 x 45 mm. Dressings were well tolerated, although a slight burning sensation was experienced 5–10 minutes after application. There were no other side effects.

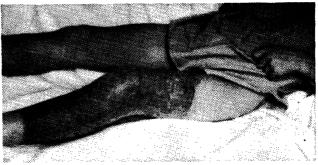

Improvement was noticed in 15 days and by the 45th day the healing of the ulcer was almost complete.

1. Appearance of burnt leg showing slough after 5 days.

2. Prominent granulation tissue after treatment begun with Aserbine.

3. Wound almost healed after 28 days' treatment with Aserbine.

Stages in the treatment of a varicose ulcer with Aserbine showing the rapid process of healing.<sup>12</sup>

### **ASERBINE** FOR INDOLENT ULCERS

Reports on the use of Aserbine in the treatment of varicose ulcers have stressed its value when dealing with indolent or "difficult" ulcers.3,4

"It seems to have an antiseptic and healing action. It does not promote uneven healing but rather a progressive epithelialization from the edges of the wound. In some cases Aserbine promotes the formation of a scab under which healing progresses satisfactorily."3

One report refers to Aserbine as an acceptable treatment for pressure-sores.

There is a reference to pressure-sores in another report<sup>6</sup> which states that the use of Aserbine, in conjunction with modern nursing methods, produces a marked improvement in the healing of sloughing pressuresores in paraplegic and bed-ridden patients.

### BACTERICIDAL AND BACTERIOSTATIC PROPERTIES

Aserbine has bactericidal properties and has been found effective against most common infective organisms. Aserbine is bactericidal against E. Coli, within 10 minutes, pyocyanea within 5 minutes, proteus vulgaris within  $2\frac{1}{2}$  minutes, staphylococcus aureus within 10 minutes and streptococcus pyocyanea within 10 minutes.5

Aserbine has been tested in vivo on burn cases and appears to have bacteriostatic and bactericidal potency.5,2

### SAFETY IN USE

No serious side effects have been experienced in patients treated with Aserbine.

An initial smarting sensation has been reported in some patients treated with the solution. The probable explanation is the presence of propylene glycol in the solution. It is not, however, regarded as a sensitizer, and there are no records of contact dermatitis due to propylene glycol. Aserbine solution may be described as a bland dressing which causes no skin sensitivity, no pain or inflammation of raw surfaces.13

Pyrexia is common in extensive burns treated with Aserbine cream. It has never been proved to be serious and is not associated with a positive blood culture. Localized urticaria at the periphery of the wound particularly where the exudate collects has been reported.

#### PRICE AND PRESENTATION

#### ASERBINE CREAM

#### Method of Application

Aserbine cream should be applied Aserbine solution is applied as a to the affected area once or wet dressing and it is important twice daily.

HORLICKS LIMITED Pharmaceutical Division **SLOUGH · BUCKS** 

### a major discovery for rheumatic disorders

"... the first non-corticosteroid agent which produced a predictable and measurable reduction in joint-swelling in most cases of active rheumatoid arthritis."

Brit. med. J., 1963, 2, 965 (19 Oct)

## INDOMETHACIN

'Indocid' is a new, non-steroid anti-inflammatory agent with analgesic and antipyretic properties, chemically unrelated to the corticosteroids, butazones or salicylates.

Widespread clinical experience has shown that 'Indocid' rapidly relieves pain and inflammation and allows the patient greater mobility. In osteoarthritis 'Indocid' is often effective where other agents are inadequate; it has given excellent results in osteoarthritis of the hip. In rheumatoid arthritis, objective evidence of effect may be seen as a measurable reduction of joint swelling. 'Indocid' has also proved effective in ankylosing spondylitis, gout, and certain soft-tissue disorders.

'Indocid' has been the subject of long and exhaustive controlled clinical trials. A number of British papers have already been published.

### now available for general prescribing

'Indocid' is supplied as 25 mg capsules. Detailed information is available to physicians on request.

'Indocid' was discovered and developed by the Merck Sharp & Dohme Research Laboratories and is made in England by MERCK SHARP & DOHME LIMITED, HODDESDON, HERTFORDSHIRE

### Glaxo announce a new type of tablet for diuretic and anti-hypertensive treatment

### Prompt anti-hypertensive/diuretic effect Delayed, sustained potassium release and absorption

Glaxo's new two-layer tablet helps to solve the problem of potassium depletion during prolonged treatment. The purpose of the tablet action illustrated opposite is to make the 630 mg potassium chloride available to the patient as it is required, causing minimum gastric irritation.

This unique tablet design has been applied to two new products:

### Neo-NaClex-K

Bendrofluazide 2.5 mg, potassium chloride 630 mg—pink and white. In bottles of 25,100 and 500.

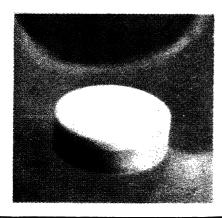

### Serplex

Reserpine 0·125 mg, bendrofluazide 2·5 mg potassium chloride 630 mg—blue and white. In bottles of 25, 100 and 500.

Neo-NaClex-K and Serplex are Glaxo trade marks

Detailed literature is available from Glaxo Laboratories Limited

### How Neo-NaClex-K and Serplex tablets work

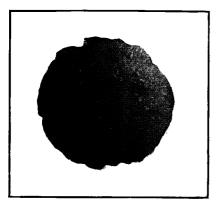

The film-coated tablets are tasteless and easily swallowed.

Very shortly after the tablet is swallowed, the white layer disintegrates and the diuretic/ anti-hypertensive dose is available for absorption.

The coloured layer, containing potassium chloride crystals, is designed to give a delayed release of the potassium to minimise gastric irritation. Most of the crystal mass will usually have passed the stomach before it dissolves. Reliable absorption of this material from the intestine has been demonstrated.

This layer dissolves slowly, exposing and releasing the crystals of potassium chloride very slowly so that no great concentration is reached at one time. The final photograph shows (after magnification) what remains of the coloured matrix after the potassium chloride has leached out steadily and completely for absorption.

### **SYNADRIN**

### "an effective drug for treating angina pectoris"3

Synadrin reduces the incidence of anginal attacks during long-term treatment by producing a prolonged improvement in the coronary blood supply. Its effectiveness is shown by a number of double blind studies,<sup>1-7</sup> and it is indicated in all forms of ischaemic heart disease.<sup>8-10</sup> Synadrin tablets contain 15 mg. prenylamine lactate. Treatment is initiated with two tablets three times a day and this dose may be reduced as beneficial effects become apparent.

Synadrin in angina pectoris treats the patient rather than his attack

# The success of BIOGASTRONE in gastric ulcer

### further proof in 1965

6 6 It is the only drug therapy for gastric ulcer which has been demonstrated conclusively to accelerate healing, which can be

achieved with patients remaining up and about, often at work, and with minimum change in diet ? ?

from editorial synopsis: GUT (1965) 6:19

In 1959, the first clinical trial of Biogastrone\* was begun in patients with gastric ulcer. The results indicated that Biogastrone significantly reduced the size of ulcer niche.

"It is suggested that Biogastrone promotes the healing of gastric ulcers."

Lancet (1962) ii: 793

Now, in a further trial, the same author proves beyond any doubt that Biogastrone is successful in assisting gastric ulcers to heal. The average degree of healing was similar in both trials—72 and 78% in the Biogastrone groups and 35 and 39% for the control.

"It is concluded that carbenoxolone sodium [Bio-gastrone] facilitates the healing of gastric ulcers." Gut (1965) 6: 19

### **Nulacin** and only Nulacin provides intragastric milk-alkali drip therapy for the ambulant patient

66In view of the ineffectiveness of most of the tableted antacids, the milk-alkali tablet (Nulacin) would appear to be the antacid of choice for ambulatory therapy. 99 Med. Times, N.Y., 1958, 1, 74

### Safe, Simple, **Effective**

NULACIN TABLETS provide a safe, simple and effective treatment of peptic ulcer.

In treating peptic ulcer a Ryles tube may be passed through the nose and into the oesophagus and a mixture of milk and antacid allowed to flow continuously over the affected area. This form of therapy can only be employed in those patients who are in bed and for the ambulant patient Nulacin tablets are preferable. Nulacin tablets are prepared from whole milk combined with dextrins and maltose, together with the trisilicate, oxide and carbonate of magnesium and calcium carbonate. Nulacin tablets when allowed to dissolve slowly in the mouth provide milk-alkali drip therapy. In fact, Nulacin tablets have revolutionized the treatment of peptic ulcer.8

### THE INTERNATIONAL STANDARD OF LENGTH $\dots$

...is the Metre, which is defined as equal to 1,650,763.73 times the wavelength *in vacuo* of the orange line emitted by the atom of krypton of mass 86, in dry air at 15°C and at standard atmospheric pressure.

This definition of the Metre was accep-

ted by the International Committee of Weights and Measures in 1958. The International Prototype Metre, which was established in 1889, was the distance between two transverse graduation lines engraved on a platinum-iridium bar, kept at Sèvres, near Paris.

Patients suffering from rheumatic lesions obtain rapid relief with Transvasin, the well-proven and economical therapy. The esters of nicotinic, salicylic and paminobenzoic acids penetrate the skin

and are concentrated at the point of injury, producing superficial erythema and deep hyperaemia. Transvasin is a most valuable adjuvant in the treatment of both osteo- and rheumatoid-arthritis.

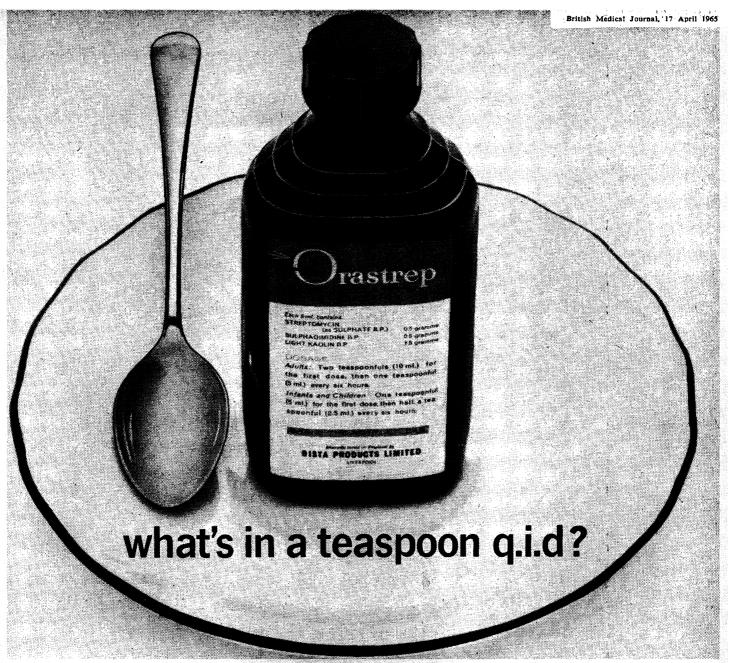

### LLOYD-HAMOL LTD. 36-38 BERKELEY SQUARE, LONDON, W.1

#### **FORMULA**

Ethyl nicotinate ...... 2% Tetrahydrofurfuryl n-Hexyl nicotinate ..... 2% salicylate ....... 14% Ethyl p-aminobenzoate 2% Base ....... to 100%

The N.H.S. price of the 30 g, tube is 2/6 and the cost of an average application of cream is under 1d.

### The optimum daily dose of streptomycin

two grammes daily\* rapidly clears most infectious diarrhoeas.

## ()rastrep

'Orastrep' Suspension provides half a gramme each of streptomycin and sulphadimidine, and one and a half grammes of kaolin, per teaspoonful.

The 50 ml. bottle is usually sufficient for a course of treatment. Also in tablet form. \*Lancet, 1956, 1, 723

### **NEW PRODUCT**

# Triptafen

# for concurrent depression and anxiety

Triptafen helps depressed, anxious patients to regain a balanced outlook.

Each Triptafen Tablet contains

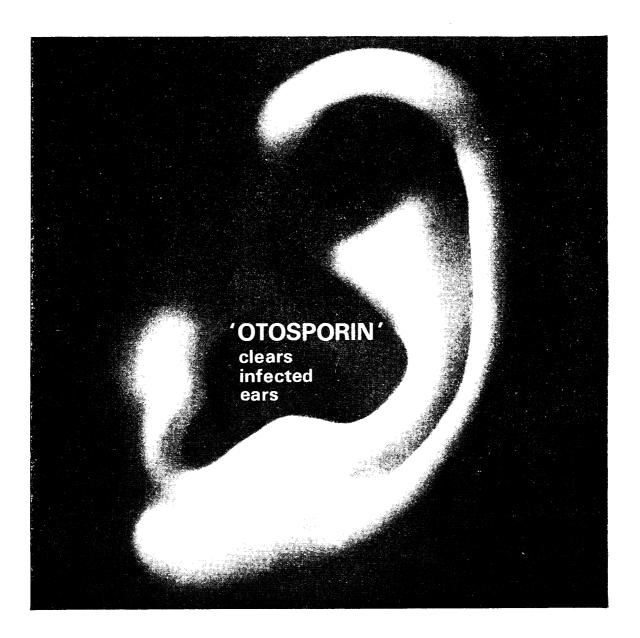

Amitriptyline hydrochloride 25 mg Perphenazine BP 2 mg

Most psychoneurotic patients seen in general practice show features of both depression and anxiety and if either is treated alone the other may become exaggerated. Triptafen combines a proved antidepressant and a well-tried tranquilliser to provide a well balanced treatment for such patients.

For the domiciliary or ambulatory patient a dose of one Triptafen Tablet 3 times a day is recommended. If necessary an additional tablet may be prescribed at night. Full information is available on request.

Allen & Hanburys Limited London E2

- "A mixture of polymyxin B sulphate, neomycin sulphate and hydrocortisone has the capacity to control the growth of all organisms commonly encountered in the ear canal". Current Pediatric Therapy (1964)
- 'Otosporin' is—"A mixture of polymyxin B sulphate, neomycin sulphate and hydrocortisone".

Altogether effective in the treatment of otitis externa, chronic suppurative otitis media and infected mastoid cavities.

### OTOSPORIN' drops

17 April 1965

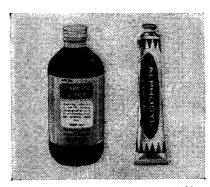

### Alphosyl-today's most widely prescribed product used specifically for the treatment of Psoriasis

In case after case, Alphosyl's effectiveness in controlling psoriasis is repeatedly confirmed. Even in chronic and refractory cases outstanding results have been achieved despite the failure of all previous forms of therapy. Evidence of four recent clinical trials 1.4.5.6. shows that from a total of 249 patients treated with Alphosyl, 111 were completely cleared, 80 were 75%-99% improved, 44 were 50%-74% improved and only 14 showed less than 50% improvement.

Why Alphosyl is so effective In Alphosyl, allantoin and a specially refined coal-tar extract were combined for the first time. Allantoin has been found to be particularly effective in loosening psoriatic scales,3 while the keratoplastic effect of coal-taris well known.3 Alphosyl

is non-greasy and non-staining and vanishes on application. It is notably safe,1.3. being free from the risks which are found in other forms of treatment such as arsenicals, mercury, corticosteroids, x-ray, etc. It certainly deserves a trial in all cases of psoriasis.

New Alphosyl Cream Following the success of Alphosyl Lotion, this coal-tar allantoin combination is now available in Britain as a lubricating cream. The cream base has proved a particularly effective vehicle for Alphosyl as it incorporates a combination of free fatty acids (saturated and unsaturated) naturally occurring triglycerides, sterols and esters to give the lipid phase of the base a significant resemblance to the lipoid array of normal human skin.6

Alphosyl Lotion formula—allantoin 2%+ 90% alcoholic extract of coal-tar (5=1) 5% in a smooth, non-greasy lotion base. Alphosyl Cream formula—allantoin 2%+ 90% alcoholic extract of coal-tar (5=1) 5% in a vanishing cream base.

### iron before breakfast

To prescribe iron before breakfast would be asking for trouble with ordinary ferrous sulphate tablets. Even taken after meals and in divided doses, such tablets cause irritation and unpleasant side effects in many patients, often leading to the abandonment of therapy. But "One Ferro-Gradumet tablet before breakfast" is right. This once-daily haematinic is designed to be taken on an empty stomach. Because iron absorption is in inverse proportion to the amount of food present, just one tablet daily, taken before breakfast, gives steady, trouble-free assimilation of ample amounts of iron. Instead of a corrosively large dose of ferrous sulphate being released in the stomach, the contents of the Gradumet—a unique controlled-release vehicle which is independent of gastro-intestinal chemistry and motility—are slowly leached out over a period of hours throughout the gastro-intestinal tract.

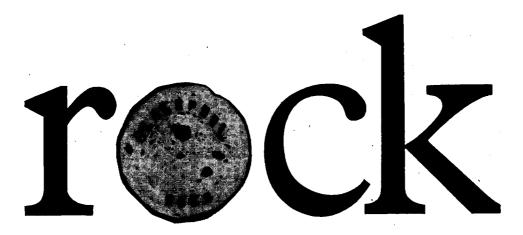

**Presentation** Each red Ferro-Gradumet Filmtab R (film-coated tablet, Abbott) contains the exsiccated equivalent of 525 mg ferrous sulphate B P, providing 105 mg elemental iron—a sufficient daily dose for all cases of iron deficiency.

### Vitamins from Vitamins Limited

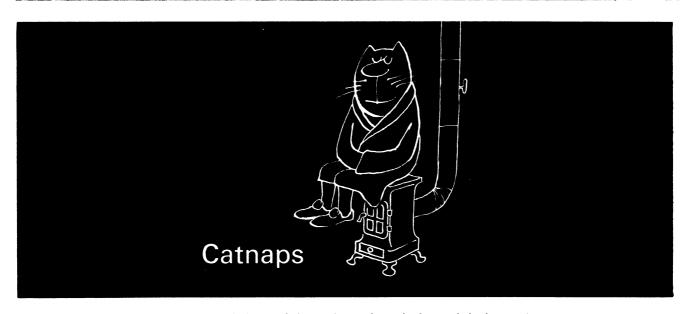

When prescribing vitamins the General Practitioner is only too aware of the multiplicity of available preparations. On these occasions it is reassuring for him to know that Vitamins Limited, who are the acknowledged leaders in this field, have been conducting research into, and the development of, vitamins for more than 40 years. As a result Vitamins Limited offer an unrivalled range of vitamin preparations.

PRESCRIBING COSTS: In no case is the cost of a Vitamins Limited preparation greater than that of the official equivalent preparation and in some cases it is less. There is no official equivalent to some Vitamins Limited specialities.

## GRANILES

**Triple Enteric-coated** Strength (CLAY AND ABRAHAM)

There are several substances which are used alone or in combination for the enteric coating of pharmaceutical preparations. In 1948, when these granules were originally prepared, a formula was chosen which clinical results have proved to be eminently successful. (Recent Advances in Paediatrics, Churchill, 1954, page 256.) Furthermore, a process was evolved by which not merely each granule but each particle of triple strength pancreatin receives its coating to prevent the destructive action of the gastric acid secretion while allowing the enzymes to become active in the duodenum.

Bottles containing eight ounces. Literature on request.

# **ANTIBIOTICS** THE INTESTINAL

Treatment with broad spectrum antibiotics suppresses the normal flora, which may be replaced by abnormal resistant organisms causing diarrhoea.

This change can be prevented or reversed by the implantation of Lactobacillus acidophilus which has been rendered antibiotic-resistant, and is thus able to multiply freely under these abnormal conditions. This organism itself forms an antibiotic which may contribute to its rapid preponderance over other species. 1, 2

Oral treatment with antibiotic-resistant L. acidophilus in the form of ENPAC has been shown to eliminate Candida from the facces of infants with antibiotic-induced diarrhoea, with relief of symptoms succeeded by rapid gain in weight <sup>3, 1</sup> and greatly to reduce the numbers of staphylococci in the faces of patients treated with tetracyclines. §

i.... the use of Pentovis orally was effective in relieving the symptoms of senile vaginitis. In the series (30 patients) there was no evidence that the drug had any unpleasant side effects or produced withdrawal bleeding. Pentovis therefore merits further use, as it seems to be a valuable preparation in the treatment of a distressing and difficult condition.'

Ulster med. J. (1964), 33, 62.

'Before the present series, all cases of senile cervicitis or vaginitis or both (in my wards) were treated by vaginal pessaries containing 0.1 mg. oestrone (B.P.C.) daily. No oral treatment was given. There is no doubt that the results with Pentovis are better, in that more effective and quicker improvement is obtained.'

J. Endocr. (1964), 29, 209.

# **PENTOVIS**

# the selective oral oestrogen for the postmenopausal patient

Biopsies before and after treatment repeatedly showed that, while Pentovis has a beneficial effect on vaginal epithelium, endometrial changes do not take place and therefore withdrawal bleeding does not occur.

Pentovis provides oral treatment for

Atrophic vaginitis Kraurosis vulvae and related conditions The side effects common to other oestrogens with multiple sites of action have not been seen with Pentovis. Nausea and gastric disturbances are very uncommon. Subjectively, patients usually feel better when taking Pentovis. There are no objections to raising the dose, but this is ordinarily unnecessary.

### **Pentovis**

Dosage: One 0.25 mg. oapsule twice daily for fourteen days. This course may be repeated, if necessary.

Packages: Pentovis

Packages: Pentovis (Quinestradol) is available in bottles of 30 and 250 capsules. The Basic NHS cost of 25 capsules is 8/5d.

### COMMERCIAL APPOINTMENTS

# Glaxo Laboratories Ltd.

# Medical Adviser

Expansion of the Medical Department has created a vacancy for an additional MEDICAL ADVISER. The duties will be concerned with problems in a broad field of medicine, arising from the world wide use of established products and the developments of a large and successful research organisation. These functions will include responsibility for clinical trials, the preparation of medical information, examination of medical literature, and the medical teaching of representatives. It is expected that regular clinical work will be available and that some travel may be necessary. Wide experience in hospital or academic medicine is required, preferably with a higher medical qualification.

This permanent, pensionable post offers interest, responsibility, and scope for advancement. The conditions of employment are attractive and experience and qualifications will be recognised in the payment of a generous salary. There will be an opportunity to participate in the Company's profitability.

Applications in writing giving brief details of age, experience, and qualifications should be sent to Dr. E. S. Snell, Medical Director, Glaxo Laboratories Ltd., Greenford, Middlesex.

### SURGICAL — MEDICAL DIRECTOR

17 April 1965

Prominent American Corporation seeks a Medical Director for the company's hospital in West Africa. Candidates must be qualified surgeons who have completed their hospital residency and have had at least five years of private, industrial, or military experience.

The successful candidate will supervise the activities of the company hospital and its staff. He will be expected to perform all necessary surgery which is conducted at the hospital and to assist in the administering of medical care to non-surgical patients.

Starting salary range is \$14,000 to \$20,000 per annum, plus liberal fringe benefits including such items as free housing and

Applications, stating age, qualifications, and previous experience, should be addressed in confidence to our management consultant :

### **GREATER BALTIMORE MEDICAL CENTER** BALTIMORE, MARYLAND, U.S.A.

Approved Rotating Internships; 400-bed General Hospital. Board-certified physicians in charge of Departments. Rounds with members of the Johns Hopkins faculty. Available July 1, 1965. Salary \$6,000 per annum. Passage can be negotiated. Interviews in London in May, 1965. Send credentials and E.C.F.M.G. to George H. Buck, Director, Greater Baltimore Medical Center. (9018)

## MEDICAL OFFICER

### **WANKIE** COLLIERY COMPANY LIMITED RHODESIA

Applications are invited from registered medical practitioners for an appointment as a Medical Officer.

The Company operates a modern well-equipped hospital with 330 beds.

The successful candidate will work with five other Medical Officers, including a Surgical Specialist, and duties will include general practice, assisting in the Company's hospital and clinics and administering anaesthetics.

The basic salary will be dependent upon qualifications and experience but will be not less than £3,300 per annum.

Other benefits include a generous pension scheme, Medical Aid Society and a monthly car allowance. Leave is granted at the rate of 54 days per annum, plus seven days' casual leave. Unfurnished married accommodation is immediately available at a rental of between £10 to £24 per month.

Excellent sporting and recreational facilities exist. Education

at Wankie is provided by a Nursery School, Junior and Infant

Government Schools.

Outward passages will be provided for the successful applicant and his family. An allowance of up to £200 will be paid by the Company to cover the cost of transporting personal effects.

Applications, giving full particulars of age, marital status,

qualifications and experience, should be addressed to:

The Appointments Officer, Dept. C/64, 40 Holborn Viaduct, London E.C.1.

the broadest coverage with the simplest dosage 300 mg b.i.d. or two 150 mg tablets twice daily

presentation and basic NHS cost capsules and tablets 150 mg also 300 mg tablets one day's treatment-3/11d. (ex 100 pack)

Lederle Laboratories

a division of Cyanamid of Great Britain Ltd Bush House London WC2

Since its introduction in 1953, Rauwiloid has provided highly effective treatment in a wide range of patients with mild to moderate hypertension. Its main characteristics — simplicity of dosage, economy, and freedom from tolerance or serious side-effects — make it an ideal "first-time" product for the early stages of hypertension. Even in the more severe cases, Rauwiloid can be of considerable value when combined with more potent agents.

Tablets contain 2 mg. alseroxylon fraction (selected alkaloid hydrochlorides) of Rauwolfia serpentina in bottles of 60 and 500. Basic N.H.S. price of 60 tablets 8s. 8d.

RAUWILOID UNEXCELLED AFTER ELEVEN YEARS USE IN THE TREATMENT OF HYPERTENSION
