

Indispensables

Certain things are basic... The books, for instance. You may not take them down every day, but you know them. Sound, fundamental.

You know Aspellin, too. A really effective, economical treatment for rheumatic conditions and muscular trauma—a spirit-based liniment containing Acid Acetylsalicylic to relieve symptomatic pain rapidly, and Methyl Salicylate, with Menthol and Camphor, to reduce inflammation and muscle tension.

Rheumatism sufferers can only obtain Aspellin if you prescribe it. Aspellin is only obtainable on prescription. Cost: 101d per oz.

ASPELLIN—indicated in the treatment of acute rheumatic conditions, sciatica, lumbago, fibrositis, muscular trauma.

Manufacturer's Information

Brand Name

NEO-LEDERCORT*
Eye and Ear Drops 0.1%

Active Ingredients

Neomycin-Triamcinolone Acetonide.

Indications

EYE: Useful in the treatment of conjunctivitis, corneal ulcer, acute and chronic uveitis, corneal oedema following removal of foreign bodies.

EAR: For acute, chronic, and eczematoid otitis externa and related non-infectious inflammatory conditions.

Administration

2-3 drops 3 or 4 times daily.

Side-effects

Topical application of steroids does not ordinarily produce side-effects but discontinue if irritation or idiosyncracy occur. Occasional discomfort immediately following instillation of the drops in the eye has been reported.

Contraindications

Neomycin sensitivity, although rare, has been reported and contraindicates use of this preparation.

Use of antibiotic-steroid combinations is contraindicated in cases of acute herpes simplex, vaccinia, varicella, virus diseases of the conjunctiva or cornea, fungal diseases, tuberculosis, and acute purulent infections (e.g., purulent blepharitis, purulent conjunctivitis) which may be masked or aggravated by the action of the steroid.

Presentation and Basic N.H.S. Cost

5 c.c. squeeze bottle, 9 -.

Manufacturer

Lederle Laboratories, a division of Cyanamid of Great Britain Ltd., Bush House, Aldwych, London, W.C.2.

ASERBINE FOR THE TREATMENT OF BURNS, VARIOUSE III CE

VARICOSE ULCERS AND INDOLENT ULCERS

ASERBINE IS A NEW SUCCESSFUL, TOPICAL TREATMENT FOR BURNS, VARICOSE ULCERS AND OTHER INDOLENT ULCERS

Experience suggests that the chief uses of Aserbine are:

- 1 As a de-sloughing agent in the treatment of burns and especially in preparing an area for skin grafting.
- 2 As a treatment for varicose ulcers.
- **3** As a treatment for pressure-sores.

It is indicated for topical use for regrowth of epithelium and formation of granulation tissue in chronic lesions of the skin.

Aserbine is available as a cream and as a solution.

ASERBINE FOR BURNS

Thirty-four superficial and full thickness burns treated with Aserbine were described in a report which concluded that the new solution is an effective method of cleansing and promoting the healing of open wounds.¹

Aserbine has been successfully used in

conjunction with plastic surgery where it accelerates de-sloughing and prepares the burn for grafting.

"In cases where grafting has been necessary it was considered that the new lotion reduced the period before grafting."

One paper¹³ reported the treatment of 21 patients with Aserbine and concluded that it was easy to use. The authors particularly noted the absence of immediate or secondary reactions, the aseptic condition of the burns and the rapid epithelialization.

No destruction of living tissue was observed in a large series of cases.² In this series Aserbine cream was applied on the second day after injury and application was repeated twice daily. Early application of the cream quickly differentiated superficial from full thickness burns. Crusts and dead skin were removed with forceps before new cream was applied. The woundswere rapidly cleaned, good granulation

Photomicrograph of chronic ulcer of ankle.

tissue produced and grafting was successful.

A significant comment is made in the report of a trial carried out in this country on thirtyfour children admitted to hospital with severe burns.

"It was proposed to carry out an initial investigation before proceeding to a clinical trial. Results have, however, demonstrated convincingly that the lotion is superior to treatment used in this hospital previously and we have therefore instituted the new lotion as routine treatment in all burn cases."

Aserbine keeps the burn aseptic, removes any dead tissue, encourages the formation of granulation tissue and the regrowth of epithelium.

ASERBINE FOR VARICOSE ULCERS

Varicose ulcers treated with Aserbine remain clean, slough is removed and there is an improvement in the formation of granulation tissue. In cases where plastic surgery is necessary Aserbine accelerates the de-sloughing process and prepares the area for grafting.

In one trial³, Aserbine was found highly successful in approximately half the 40 cases of leg ulcers treated, and promoted healing of all ulcers within a few weeks. Another published report⁴ included 19 patients with ulcer or trophic wounds, one with ecthyma and one with a pressure-sore. Eighteen of the ulcers showed a rapid, complete and successful healing without relapse. Only one case showed slower rate of healing than normal. This report describes Aserbine as a new and acceptable treatment for difficult ulcers and pressure-sores.

The following case history⁴ illustrates the treatment with Aserbine of a varicose ulcer on the right leg of a female patient. There was little granulation tissue and the size of the ulcer was 86 x 45 mm. Dressings were well tolerated, although a slight burning sensation was experienced 5-10 minutes after application. There were no other side effects.

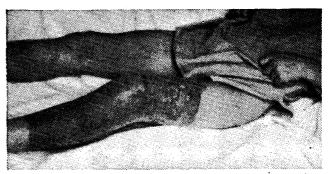

Improvement was noticed in 15 days and by the 45th day the healing of the ulcer was almost complete.

2. Prominent granulation tissue after treatment begun with Aserbine.

3. Wound almost healed after 28 days' treatment with Aserbine.

Stages in the treatment of a varicose ulcer with Aserbine showing the rapid process of healing. 12

ASERBINE FOR INDOLENT ULCERS

Reports on the use of Aserbine in the treatment of varicose ulcers have stressed its value when dealing with indolent or "difficult" ulcers.3.4

"It seems to have an antiseptic and healing action. It does not promote uneven healing but rather a progressive epithelialization from the edges of the wound. In some cases Aserbine promotes the formation of a scab under which healing progresses satisfactorily."3

One report⁴ refers to Aserbine as an acceptable treatment for pressure-sores.

There is a reference to pressure-sores in another report⁶ which states that the use of Aserbine, in conjunction with modern nursing methods, produces a marked improvement in the healing of sloughing pressuresores in paraplegic and bed-ridden patients.

BACTERICIDAL AND BACTERIOSTATIC PROPERTIES

Aserbine has bactericidal properties and has been found effective against most common infective organisms. Aserbine is bactericidal against E. Coli, within 10 minutes, pyocyanea within 5 minutes, proteus vulgaris within $2\frac{1}{2}$ minutes, staphylococcus aureus within 10 minutes and streptococcus pyocyanea within 10 minutes.5

Aserbine has been tested in vivo on burn cases and appears to have bacteriostatic and bactericidal potency.5,2

SAFETY IN USE

No serious side effects have been experienced in patients treated with Aserbine.

An initial smarting sensation has been reported in some patients treated with the solution. The probable explanation is the presence of propylene glycol in the solution. It is not, however, regarded as a sensitizer, and there are no records of contact dermatitis due to propylene glycol. Aserbine solution may be described as a bland dressing which causes no skin sensitivity, no pain or inflammation of raw surfaces.13

Pyrexia is common in extensive burns treated with Aserbine cream. It has never been proved to be serious and is not associated with a positive blood culture. Localized urticaria at the periphery of the wound particularly where the exudate collects has been reported.

Now you can add Schweppes 'Slimline' to low-carbohydrate diet sheets

The new low-calorie 'Slimline' drinks put a full range of Schweppes popular carbonated drinks and squashes on low-carbohydrate diet sheets for the very first time – at no extra cost.

To make this possible, Schweppes have introduced a new sweetening ingredient, sodium cyclamate, which has been used successfully in America for some time.

Fully approved

Sodium cyclamate has been approved as a safe food additive by the Ministry of Agriculture, Fisheries and Food and the Ministry of Health. It is also approved by the U.S. Department of Health Education and Welfare Food and Drug Administration; and by the Canadian Department of National Health and Welfare.

Instead of 'no sweet soft drinks' your patients can happily enjoy Schweppes 'Slimline'.

Obviously 'Slimline' drinks are not intended to replace a diet, but it does mean that your overweight patients can now safely enjoy a wide selection of highly palatable, low-calorie soft drinks by Schweppes. And they have the approval of the British Diabetic Association.

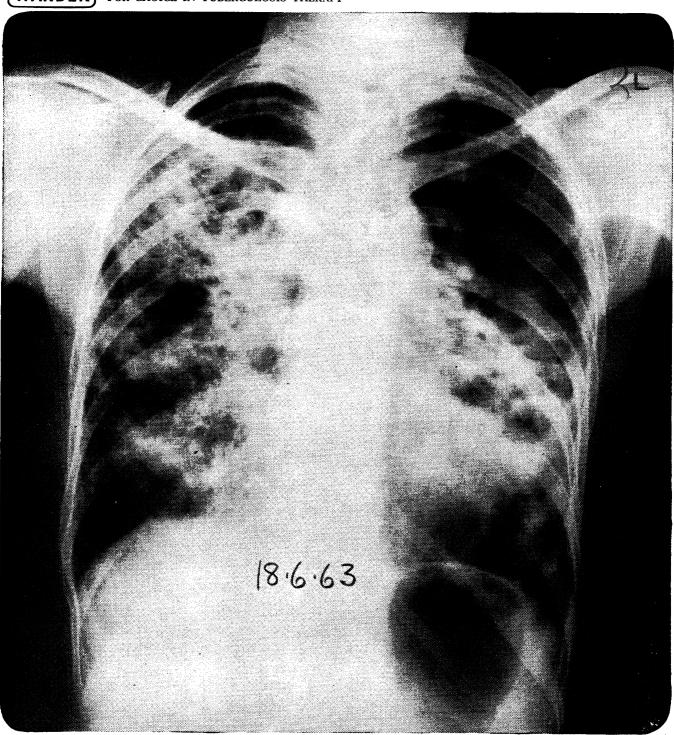

These drinks are advertised to the public, so they cannot be prescribed on form EC 10.

Schweppes 'Slimline' range

Orange Squash, Lemon Squash, Lime Juice Cordial, Bitter Lemon, Tonic Water, American Ginger Ale, and Sparkling Golden Orange.

In the treatment of eczema the use of a topical corticosteroid alone is often unsatisfactory because it cannot protect the lesion from the ever-present risk of secondary infection.

Remiderm combines a highly effective antibacterial and antifungal agent, halquinol, with the rapidly-acting corticosteroid, triamcinolone acetonide, to provide the most comprehensive treatment of eczemata yet devised. Unlike the antibiotic-corticosteroid combinations, Remiderm cannot induce the development of antibiotic-resistant bacteria.

Squibb Remiderm trademark

Remiderm cream and ointment each contain triamcinolone acetonide 0.025% and halquinol 0.75%.

Remiderm spray contains triamcinolone acetonide 4.95mg. and halquinol 31.2mg. in a 75gm. aerosol spray.

Remiderm cream and ointment, 15gm. tubes 7/9 basic NHS price.

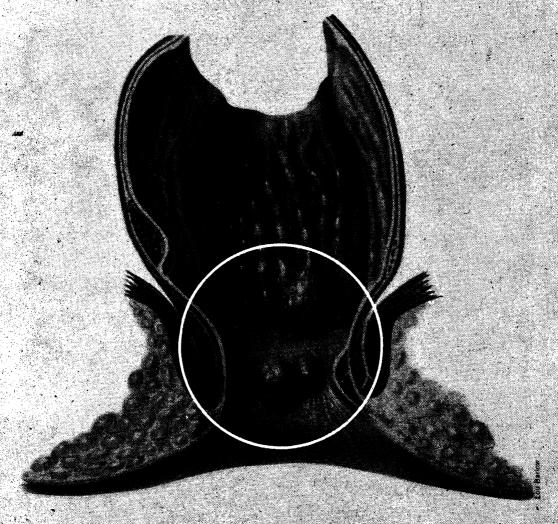

Remiderm spray, 75gm. canister 16/- basic NHS price.

Medihaler-Ergotamine sets a new standard of speed. predictability and convenience of treatment. An entirely new route, oral inhalation, enables ergotamine to provide the speed and predictability of relief expected only of injections. Yet Medihaler-Ergotamine is as simple to use and carry as a tablet. Attacks are aborted by a much smaller dose than is needed orally, with correspondingly less risk of side-effects. One to three inhalations ensure profound relief in most cases, at a cost of only 3d. to 9d. per treatment. Basic NHS prices are: complete unit 17/4, refill 15/-

SIPPORT STOCKING SIE WILL WEAR

entirely of nylon. Because of their fashionable appearance, they are accepted and worn consistently by women who would reject an unflattering form of leg support even when medically advised of its necessity.

Exceptional elasticity

The nylon yarn used in Supp-hose is specially coiled, twisted and fixed before the stockings are knitted. This ensures exceptional elasticity in a lengthwise direction. The stockings therefore provide adequate compressive elastic support which is maintained over months of wear and washing.

Beneficial in many conditions

Supp-hose are beneficial in venous states of the lower extremities causing oedema and requiring elastic support. They relieve to a significant extent the symptoms associated with varicose veins, the postphlebitic phenomenon or chronic

venous insufficiency. Supp-hose can also be recommended to the many patients who suffer from the condition termed 'tired legs', particularly during pregnancy.

Worn by hundreds of thousands of women

Since they were introduced to this country some five years ago, Supp-hose have been worn by hundreds of thousands of women, many of whom have sent us enthusiastic testimonials. The stockings are available in 23 fittings, from all leading stores.

A clinical leaflet will gladly be sent to doctors requiring further information about Supp-hose.

of a NAVAL MEDICAL OFFICER

This is a life of unbounded opportunity. Anywhere in the world, you practise medicine with complete medical freedom. Among 100,000 Naval men and women you gain extensive medical experience of the most varied nature. Civilian patients, too, of both sexes and all ages, are treated in Naval hospitals. You have excellent opportunities for specialising in the normal clinical subjects, and in the less usual, such as Nuclear, Underwater, and Aviation medicine. You are actively encouraged and financially assisted to acquire higher degrees. You can gain consultant status.

As a Medical Officer, your pay, allowances, and gratuity—or permanent commission pension—are very good: for example, your initial pay is considerably higher than that of a civilian hospital registrar. You can enter in one of three ways:

as a registered Medical Practitioner—your civilian experience back-dating seniority—or as a qualified doctor doing your preregistration year, or as a student with a 2nd M.B. For qualified women doctors, there is a special short service commission. For fullest details of your Royal Navy life as a Medical Officer, write, mentioning your own qualifications and age to: The Medical Director-General of the Navy, Medical Dept. (HN66/M), Empress State Building, London, S.W.6.

If hyperacidity is indicated recommend the patient tries . . .

VICHY

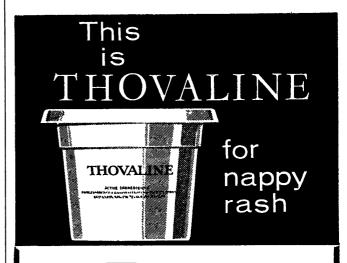

CELESTINS WORLD-FAMOUS FRENCH SPA WATER

Bottled as it flows from the Spring

For generations, medical men in all parts of the world have often established a favourable prognosis in rheumatism and arthritic therapy by recommending Vichy-Celestins, which is likewise of the utmost clinical value in disorders of the digestive and urinary tract.

HYPERBARIG INSTALLATIONS

Normalair Limited, for 20 years Europe's largest and most experienced manufacturer of pressurization, air conditioning and oxygen breathing systems for aircraft, is also the leading U.K. organisation specialising in the design and installation of all types of hyperbaric facility.

Any type of installation can be provided from a small emergency treatment chamber, to a fully comprehensive facility incorporating an operating theatre and associated treatment and recovery rooms, all of which are pressurized and air conditioned and fitted with individual air locks and intercommunicating doors. The associated power plant and control systems are also supplied and installed by Normalair.

Normalair provides a fully comprehensive service covering all aspects of the entire installation. This

service includes preparation of the overall design of the facility, production and provision of all necessary equipment, supervision and co-ordination of all subsidiary contractors i.e. builders, plumbers, electricians etc: and training of hospital engineers.

An efficient after sales support organisation is operated to ensure the ready availability of a full range of spares and to provide on-the-spot technical assistance, at short notice, if required.

The leading specialists in hyperbaric engineering

in skeletal muscle disorders control the 2-headed dragon of pain and spasm

with Robaxisal Forte

Tablets-Methocarbamol 400 mg. Acetylsalicylic Acid 325mg.

St. George ne'er confronted a more fiendish, diabolical dragon than this two-headed monster which inflicts both pain and spasm on your patients with musculo-skeletal disorders.

Now, with Robaxisal-Forte in your armamentarium you have a double-edged therapeutic sword which combats and conquers pain and spasm simultaneously. Robaxisal-Forte combines the dependable skeletal muscle relaxant, Robaxin (methocarbamol) with the pain-relieving benefits of acetylsalicylic acid in one convenient dosage form. During *clinical trials it was observed that these compounds have a potentiating effect upon one another. Higher plasma salicylate levels can be attained than with the same dosage of acetylsalicylic acid alone.

★ Southern Medical Journal Volume 54 Number 3 March 1961 Pages 318-321

indications: Effective in treating sprains and strains, painful back disorders, "whiplash" injury, myositis, pain and spasm associated with arthritis, low back pain, torticollis, and headache associated with muscular tension.

side effects: Lightheadedness, slight drowsiness, dizziness, and nausea may infrequently occur but usually disappear on reduction of dosage. There are no specific contraindications for Robaxisal-Forte other than hypersensitivity to one of the components.

dosage: 2 tablets four times daily or as directed.

Also available: Robaxisal: Methocarbamol* 250 mg., Acetylsalicylic Acid 2½ gr. *Patented No. 789,283

THE WORLD'S DIABETICS AND HOECHST

One of the biggest breakthroughs in medical history was the discovery and isolation of insulin. But daily injections remained, at best, a gross inconvenience for all diabetics until a drug was discovered with which more than a third of the world's diabetics could be treated. Hoechst have played an important part in this story.

Over the years diabetes has changed from an incurable and virtually untreatable disease almost to a problem of social education. Today, finding diabetics is as important as treating them: and for many of them that treatment is as simple as a couple of tablets a day. Once they are found it is difficult to get it across to

diabetics that their condition is serious and that they must take certain precautions even though they may not feel ill. On the other hand, it is vital to reassure the patient already ill that treatment is possible and not as unpleasant as it used to be.

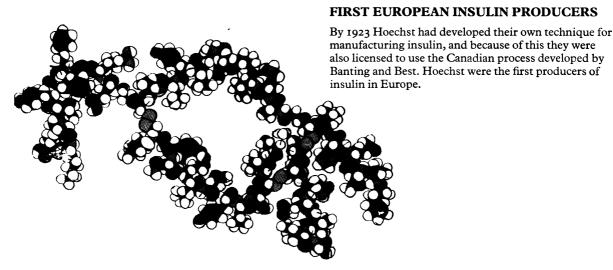

1910

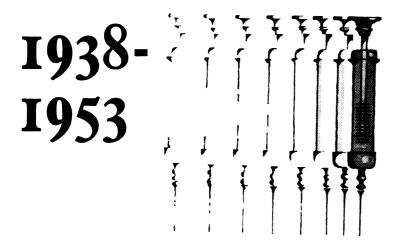

PANCREATIC EXTRACT

Hoechst have been associated with the diabetic problem since the beginning of the century. Discovery of the relationship between diabetes and the pancreas in 1889 prompted the search for an effective pancreatic extract. In 1910 Hoechst started to develop Zulzer's process for pancreatic extraction, but it was 1921 before the first high purity preparations were ready for clinical trial. In the same year Banting and Best made their famous discovery and isolated insulin.

1923

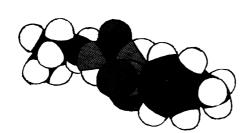

INSULIN PRESENTATION REFINED

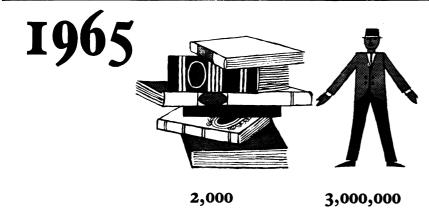

In the succeeding years Hoechst continued their research on insulin. With the preparation of pure crystalline insulin, exact standardization became possible, and between 1938 and 1953 all the variants in insulin presentation so familiar to today's medical profession were developed: short-acting, long-acting, depot preparations, combinations of all sorts to suit all purposes and make life as easy as possible for the diabetic. But still the curse of the daily injection had to be borne, and concurrently with insulin development research had been pursued to find a synthetic compound that could be taken orally.

1955

D 860

Although the hypoglycaemic action of some sulphonamides had been known for years, all compounds tested proved too toxic until, in 1955, D 860 was synthesized in the research laboratories at Hoechst. Eight hundred and fifty-nine compounds had already been investigated and found wanting, mostly on grounds of toxicity. A drug which was to be taken by a patient every day for years had to be virtually harmless, and all the promising compounds were subjected to strict and extensive tests for safety. D 860, now known as tolbutamide and marketed as Rastinon by Hoechst, emerged as one truly safe drug.

RASTINON—ORAL ANTIDIABETIC

There was, inevitably, initial scepticism when Rastinon was first introduced. Now, after more than two thousand clinical papers have been published and three million patients are being treated, tolbutamide is the standard oral treatment for diabetes. More than a third of the world's diabetics can be satisfactorily treated with tolbutamide and relieved of the difficulties of daily insulin injections.

That isn't the end of the story. Since Rastinon was discovered, three thousand compounds have been synthesized in the incessant search to find even safer, even more useful drugs to help sufferers from diabetes. So far none of them has shown any significant advantage, and Rastinon is still going strong. But who knows what tomorrow will bring?

The success of BIOGASTRONE in gastric ulcer

further proof in 1965

6 6 It is the only drug therapy for gastric ulcer which has been demonstrated conclusively to accelerate healing, which can be

achieved with patients remaining up and about, often at work, and with minimum change in diet,

from editorial synopsis: GUT (1965) 6:19

In 1959, the first clinical trial of Biogastrone* was begun in patients with gastric ulcer. The results indicated that Biogastrone significantly reduced the size of ulcer niche.

"It is suggested that Biogastrone promotes the healing of gastric ulcers."

Lancet (1962) ii: 793

Now, in a further trial, the same author proves beyond any doubt that Biogastrone is successful in assisting gastric ulcers to heal. The average degree of healing was similar in both trials-72 and 78% in the Biogastrone groups and 35 and 39% for the control.

"It is concluded that carbenoxolone sodium [Bio-gastrone] facilitates the healing of gastric ulcers." Gut (1965) 6: 19

NORMAX

today's treatment for constipation

Normax is the rational approach to the treatment of constipation. Normax capsules contain Dioctyl-sodium sulphosuccinate and 1-8 Dihydroxyanthraquinone.

Faecal softener. Clinical observation has shown that Dioctylsodium sulphosuccinate is a softening agent which reduces surface tension, allowing water to penetrate and soften the hard, dry impacted stools, thereby facilitating passage through the colon and expulsion through the rectum. "It is not an irritant, laxative or bulk purgative." Animal experiments have shown that this substance is not absorbed, nor does it break down during its passage through the intestine, and no side effects have been revealed to date.

Mild peristaltic stimulant. The faecal softening action has been supplemented in the Normax capsule by a mild peristaltic stimulant (1-8 Dihydroxyanthraquinone) which gently and

safely promotes the natural bowel movement to produce a comfortable, effortless evacuation.

Advantages. By combining a faecal softener with a mild peristaltic stimulant, Normax eliminates the strain to stool. The low dosage required, and the effectiveness of Normax, make it the ideal treatment for chronic functional constipation in all ages.

Presentation. Normax capsules are available in bottles of 30 and 250 at basic N.H.S. prices of 4/10d. and 26/10d., respectively. Normax is subject to Purchase Tax.

'PRO-ACTIDIL'

a very versatile antihistamine

'Pro-Actidil' contains triprolidine hydrochloride. It is specially formulated to give continuous action for 19 to 24 hours.

If given in the evening four to five hours before retiring, 'Pro-Actidil' will ensure a good night's sleep for the patient, free from sneezing, nasal congestion, irritation and restlessness. If drowsiness is induced, it will occur at bedtime.

A most interesting clinical observation has been reported indicating that 'Pro-Actidil' also provides excellent protection in various forms of solar dermatosis [Brit. J. Derm. (1963). 75, 254; Med. Proc. (1963). 9, 461]. Wider clinical application is needed to confirm this specific action.

'Pro-Actidil' is recommended for adults and children over ten years.

'PRO-ACTIDIL'

acts in minutes-lasts for hours

Supplied as 250 mg tablets and, for emergency use, as an injection. Detailed information is available to physicians on request.

He's the worrying kind and he complains of indigestion and gastrointestinal pain. He may simply be a dyspeptic. On the other hand he may have an ulcer. Whatever your suspicions you can help him by prescribing Aludrox* SA. Aludrox SA combines an antacid with a sedative and an antispasmodic to rest his mind, his gut and his ulcer. Each 5 ml. suspension contains 4.75 ml. Aluminium hydroxide gel B.P., 100 mg. Magnesium hydroxide B.P.C., 8 mg. Butabarbitone and 2.5 mg. Ambutonium bromide. Bottles of 12 fl. oz. Also in tablet form in bottles of 50 and 250. John Wyeth and Brother Limited, Taplow, Maidenhead, Berkshire.

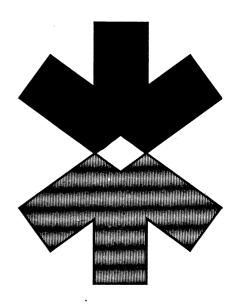

ALUDROX SA for the initial treatment of suspected peptic ulcer

NEW PRODUCT

Triptafen

for concurrent depression and anxiety

Triptafen helps depressed, anxious patients to regain a balanced outlook.

Each Triptafen Tablet contains

Amitriptyline hydrochloride

25 mg

Perphenazine BP

2 mg

Most psychoneurotic patients seen in general practice show features of both depression and anxiety and if either is treated alone the other may become exaggerated. Triptafen combines a proved antidepressant and a well-tried tranquilliser to provide a well balanced treatment for such patients.

For the domiciliary or ambulatory patient a dose of one Triptafen Tablet 3 times a day is recommended. If necessary an additional tablet may be prescribed at night. Full information is available on request.

Allen & Hanburys Limited London E2

Where pollen brings allergy, Benadryl brings relief

For those who react to pollen with sneezing, lachrymation, nasal congestion and pruritus—BENADRYL* provides rapid relief. Indeed, whatever the allergy, BENADRYL effectively relieves the symptoms. Benadryl (diphenhydramine hydrochloride B.P. Parke-Davis) in 25 mg. capsules, and 50 mg. Kapseals* (both in bottles of 50 and 500) and in Elixir form in bottles of 4,16 and 80 fl. oz.

Savoury Bovril is more than just a delicious drink. It has a way of stimulating the jaded appetites of patients recuperating after sickness or surgery. Bovril's palate-tempting properties enable them to take more interest in mealtimes and so help speed recovery. Moreover, Bovril contains the extracted goodness of prime lean beef and B vitamins (Riboflavin and Niacin). Always enjoyable and easy to digest, Bovril on the menu can hasten convalescence.

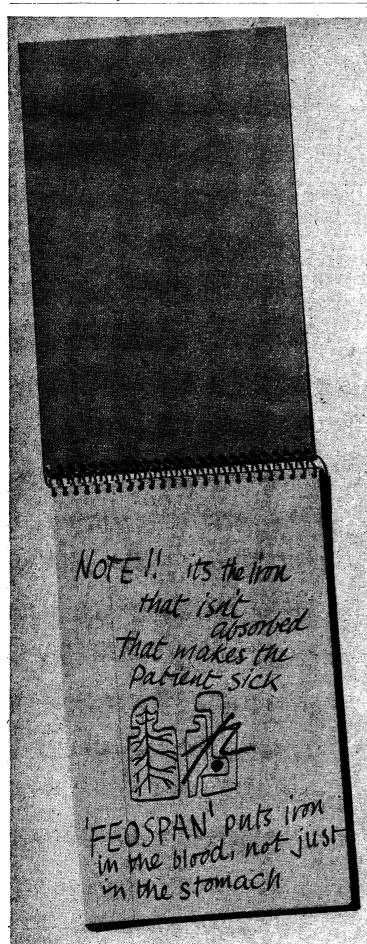

Peritrate SA aids survival

encourages the development of collateral circulation

increases myocardial blood flow

Peritrate SA long-acting vasodilator with twelve-hourly dosage schedule.

Each tablet of Peritrate SA (sustained action) contains 80 mg. pentaerythritol tetranitrate. William R. Warner & Co. Ltd., Eastleigh, Hampshire. Telephone Eastleigh 3131

With iron tablets, only about 15 per cent. of the dose is absorbed—and the gastric side effects may make the patient abandon treatment.

'FEOSPAN' can give you a haemoglobin rise of up to one per cent. a day on a daily dose of only 150 mg.

In 'Feospan Spansule' sustained-release capsules the iron is distributed among hundreds of minute pellets with protective coatings. These disintegrate gradually, releasing most of the iron in the duodenum and small intestine. In effect, on a single daily dose of 'Feospap', the patient receives hundreds of minute doses of iron throughout the day; compared with ferrous sulphate tablets, a very high proportion of each dose is absorbed and haemoglobin levels are higher per dose ingested. Side effects are drastically reduced.

Each 'Feospan Spansule' capsule contains 150 mg. exsiccated ferrous sulphate and 3 mg. aneurine hydrochloride (Vitamin B₁).

MA1606

the antihistamine for the patient who must continue working

Effective at very low dosage, extremely well tolerated, Metrulen-M greatly reduces the cost of progestational therapy

'The most significant advantage of this compound [ethynodiol diacetate 1 mg. with mestranol 0.1 mg.] is that with increased effectiveness at lower dosage, there has been appreciable lowering of side effects.'

Andrews, W. C. and Andrews, M. C. (1964) Fertility and Sterility, 15, 75

By using Metrulen-M you can considerably reduce the incidence of side effects often experienced in progestational therapy. Moreover, since Metrulen-M is effective at low dosage, the cost of treatment is greatly reduced.

Metrulen is a registered trade mark.

IN GYNAECOLOGY Metrulen-M
Searle

kills the pain the whole pain and nothing but the pain

the pain Distalgesic kills pain in a wide range of conditions from toothache to malignancy. It contains dextropropoxyphene*, a potent non-narcotic analgesic which mg. for mg. is as effective as codeine and comparable with oral pethidine. Dextropropoxyphene maintains effectiveness over long periods without tolerance developing in the patient

the whole pain Distalgesic tablets contain 32.5 mg. dextropropoxyphene with the addition of 325 mg. paracetamol to broaden the scope of analgesia and add a useful antipyretic action.

nothing but the pain Distalgesic is free from the side-effects associated with aspirin, phenacetin and codeine; it causes neither gastric irritation, nor constipation, nor smooth muscle spasm. Dextropropoxyphene, classified by the W.H.O. as non-narcotic, does not produce euphoria or physical dependence. Adverse reactions to paracetamol are rare.

usual adult dosage

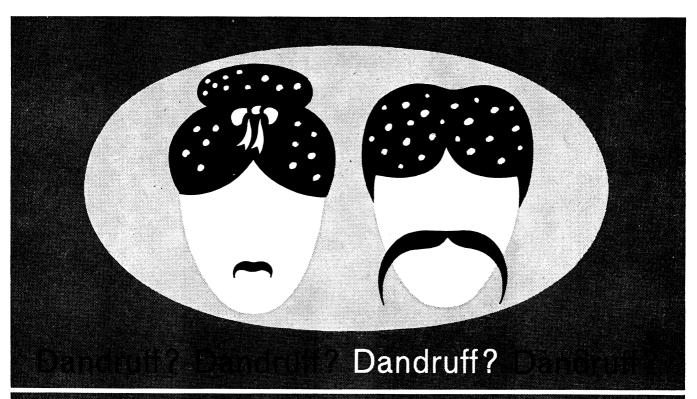

two tablets three or four times a day.

*Dextropropoxyphene has been the subject of several well-controlled clinical trials and described as the most promising alternative to codeine. (Brit. med. J., 1963, 1, 318.)

Selsun®

Frank seborrhoeic dermatitis of the scalp is clearly recognised as a medical problem. For this doctors will prescribe Selsun suspension in the knowledge that eight out of ten cases will rapidly be improved and controlled. The much more common dandruff, too, is better treated as a medical than as a cosmetic problem: the same ethical preparation completely controls dandruff in an even larger proportion of cases.

Selsun suspension combines selenium sulphide with a powerful detergent. Its joint cleansing and therapeutic action quickly clears the scalp of debris and thereafter dandruff is easily controlled by the periodic use of Selsun. Selsun suspension is available in bottles of 1, 2 and 4 fl. oz.

PLEASE REMEMBER CANCER!

You may be asked from time to time to suggest a deserving cause as the subject of a bequest. Please remember that every year the British Empire Cancer Campaign for Research has to find more and more money for cancer research work not only in this country but in many parts of the Commonwealth. All this money must come from voluntary donations and bequests. The appropriate words to use in a will are: "I bequeath to the British Empire Cancer Campaign for Research the sum of £......" or "I devise and bequeath the residue of my estate to the British Empire Cancer Campaign for Research".

For further information please write to Sir Joseph Lockwood, Hon. Treasurer, British Empire Cancer Campaign for Research, Dept. (B.M.J.5).11 Grosvenor Crescent, London SW1.

Nulacin and only Nulacin provides intragastric milk-alkali drip therapy for the ambulant patient

66 In view of the ineffectiveness of most of the tableted antacids, the milk-alkali tablet (Nulacin) would appear to be the antacid of choice for ambulatory therapy.?? Med. Times, N.Y., 1958, 1, 74

Safe, Simple, Effective

NULACIN TABLETS provide a safe, simple and effective treatment of peptic ulcer.

In treating peptic ulcer a Ryles tube may be passed through the nose and into the oesophagus and a mixture of milk and antacid allowed to flow continuously over the affected area. This form of therapy can only be employed in those patients who are in bed and for the ambulant patient Nulacin tablets are preferable. Nulacin tablets are prepared from whole milk combined with dextrins and maltose. together with the trisilicate, oxide and carbonate of magnesium and calcium carbonate. Nulacin tablets when allowed to dissolve slowly in the mouth provide milk-alkali drip therapy. In fact, Nulacin tablets have revolutionized the treatment of peptic ulcer.8
