## DORLAND'S ILLUSTRATED MEDICAL DICTIONARY

—New 24th Edition—

Under the Editorial Supervision of L. R. C. Agnew, A.M., M.D.; Domingo M. Aviado, M.D.; Jerome I. Brody, M.A., M.D.; William Burrows, Ph.D.; Roy F. Butler, Ph.D.; C. Murphy Combs, Ph.D.; Carl M. Gambill, M.D., M.P.H.; Otto Glasser, Ph.D.; Walter B. Shelley, M.D., Ph.D.; *Fundamentals of Medical Etymology* by Lloyd W. Daly, A.M., Ph.D., Litt.D. With contributions by 58 authorities.

For more than sixty years the familiar red-backed "Dorland Dictionary" has been the standard of the medical world. It sets a tradition of accuracy, authority, and quick, simple usefulness. In this new edition, an attempt has been made to keep abreast of the new terms that have gained a place in the vocabulary of medicine and its allied sciences, and to recognise the many shifts in the meanings of standard terms. The anatomical nomenclature has been standardised to conform to the *Nomina Anatomica* prepared by the International Nomenclature Committee (1955). All plates and illustrations have been checked for scientific accuracy and currency, and many incorporate new knowledge gained through the use of electron microscopy and improved techniques of radiography. With the inclusion of nearly 20,000 more definitions—now making over 130,000 in all—the new 24th edition of DORLAND is sure to maintain its brilliant reputation the world over.

## CONN'S 1965 CURRENT THERAPY

*An Annual Volume.* Edited by **Howard F. Conn, M.D.** Board of Consulting Editors: George E. Burch, M.D., F.A.C.P.; M. Edward Davis, M.D., F.A.C.S.; Vincent J. Derbes, M.D., F.A.C.P.; Garfield G. Duncan, M.D., C.M., F.A.C.P.; Hugh J. Jewett, M.D.; Clarence S. Livingood, M.D.; Perrin Hamilton Long, M.D., F.R.C.P.; H. Houston Merritt, M.D.; Walter L. Palmer, M.D., Ph.D., M.A.C.P.; Hobart A. Reimann, M.D., F.A.C.P.; Ralph Wayne Rundles, M.D., Ph.D., F.A.C.P.; Robert H. Williams, M.D., F.A.C.P., with contributions by 310 American authorities.

Since the first volume of *Current Therapy* was published some sixteen years ago, the editors have carefully selected the most useful treatments known to medical science, bringing them all together here in this one annual volume—to act as guide and consultant for the practising physician. Virtually every disease and disorder which you are likely to meet in normal practice is covered. In this year's volume, some 247 articles have been rewritten—either to incorporate an entirely new treatment, modify an existing one, or to give the differing viewpoint of another authority. Articles in the 1965 volume include: *New procedure for freezing injuries—Endocrine therapy in porphyria—Newer Rx in chronic leukaemia—Latest measles immunisation methods—Treatment of digitalis intoxication.* Once you have made your definite diagnosis, you can safely turn to 1965 *Current Therapy* for a proven and effective course of treatment.

# The go-ahead LIFE of a NAVAL MEDICAL OFFICER

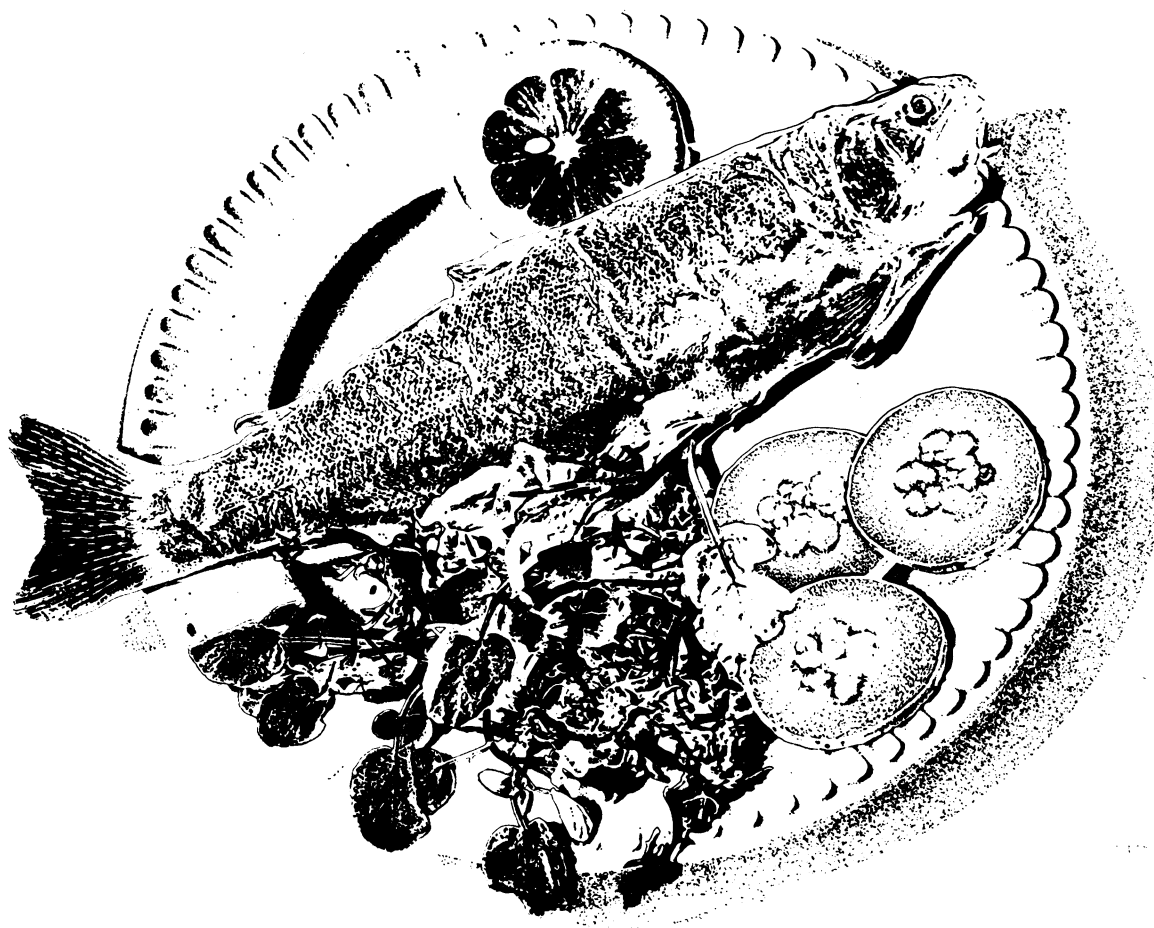

*A pilot being prepared for a simulated high altitude test.*

**This is a life of unbounded opportunity.** Anywhere in the world, you practise medicine with complete medical freedom. Among 100,000 Naval men and women you gain extensive medical experience of the most varied nature. Civilian patients, too, of both sexes and all ages, are treated in Naval hospitals. You have excellent opportunities for specialising in the normal clinical subjects, and in the less usual, such as Nuclear, Underwater, and Aviation medicine. You are actively encouraged and financially assisted to acquire higher degrees. You can gain consultant status.

As a Medical Officer, your pay, allowances, and gratuity—or permanent commission pension—are very good: for example, your initial pay is considerably higher than that of a civilian hospital registrar.

You can enter in one of three ways: as a registered Medical Practitioner—your civilian experience back-dating seniority—or as a qualified doctor doing your pre-registration year, or as a student with a 2nd M.B. For qualified women doctors, there is a special short service commission. For fullest details of your Royal Navy life as a Medical Officer, write, mentioning your own qualifications and age to: **The Medical Director-General of the Navy, Medical Dept. # RASTINON

IS THE FIRST CHOICE IN INITIATING  
ORAL ANTIDIABETIC THERAPY

For the maturity-onset diabetic whose blood sugar levels are inadequately controlled by diet, Rastinon provides control at normoglycaemic levels.

Given in divided doses after meals, Rastinon is rapidly absorbed and this ensures the maximum effect when the need is greatest. As hypoglycaemia is an exception with Rastinon, nocturnal hypoglycaemia will not present a hazard even with high doses.

Since side effects are few and minor the unsurpassed ratio of safety to effectiveness makes Rastinon the first choice for initiating oral antidiabetic therapy. Rastinon tablets each contain 0.5 g. tolbutamide B.P.

# Glaxo announce a new type of tablet for diuretic and anti-hypertensive treatment

---

**Prompt anti-hypertensive/diuretic effect**  
**Gradual, sustained potassium release and absorption**

Glaxo's new two-layer tablet helps to counter the problem of potassium depletion during prolonged treatment. It is designed for gradual, sustained potassium release and absorption and to minimise gastric irritation.

---

This unique tablet design has been applied to two new products :

## Neo-NaClex-K

Bendrofluazide 2·5 mg, potassium chloride 630 mg—pink and white. In bottles of 25, 100 and 500.

## Serplex

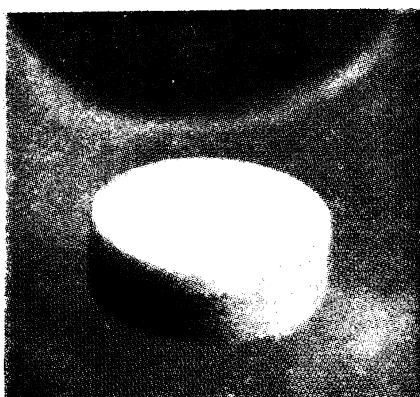

Reserpine 0·125 mg, bendrofluazide 2·5 mg, potassium chloride 630 mg—blue and white. In bottles of 25, 100 and 500.

---

Neo-NaClex-K and Serplex are Glaxo trade marks

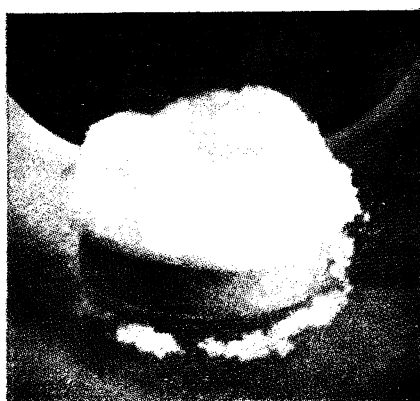

Detailed literature is available from Glaxo Laboratories Limited

### **How Neo-NaClex-K and Serplex tablets work**

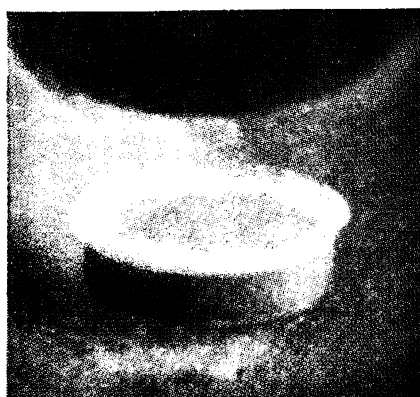

The film-coated tablets are tasteless and easily swallowed.

---

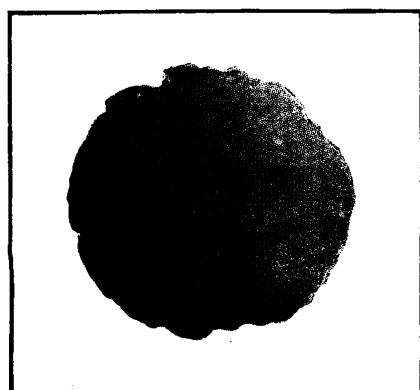

Very shortly after the tablet is swallowed, the white layer disintegrates and the diuretic/anti-hypertensive dose is available for absorption.

---

The coloured layer, containing potassium chloride crystals, is designed to give a gradual release of the potassium to minimise gastric irritation. Reliable absorption of this material from the intestine has been demonstrated.

---

This layer dissolves slowly, exposing and releasing the crystals of potassium chloride very slowly so that no great concentration is reached at one time. The final photograph shows (after magnification) what remains of the coloured matrix after the potassium chloride has leached out steadily and completely for absorption.

# Heinz cooking retains the maximum nutritional value

Heinz use only the finest ingredients for their Baby Foods—superior, in fact, to those normally available to the average housewife.

Special cooking facilities, strict quality control—all these specialist resources combine to make Heinz Baby Foods exceptionally nutritious.

For a start, instrumentally controlled cooking ensures uniformity with each batch of foods, and prevents over-cooking.

Ingredients are carefully steam-cooked.

Once hot, the foods are exposed as little as possible to air; juices formed during cooking are retained to avoid loss of valuable soluble nutrients.

Strained foods are forced through

a fine sieve to eliminate any rough fibres or coarseness.

(With Heinz more advanced Junior Foods, ingredients are diced or minced prior to cooking.)

They are sterilized under carefully controlled conditions.

At every stage of this preparation, cooking and packing, Heinz Quality Control inspectors take samples from each batch of baby foods to ensure that the quality, taste, consistency, purity, and hygiene reach Heinz demanding standards.

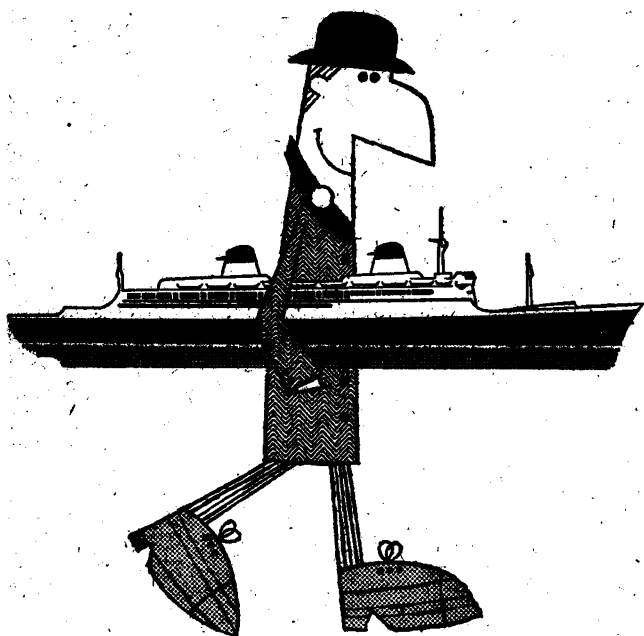

For further details about Heinz Strained and Junior Foods, please write to: Foods Science Advisory Service, H. J. Heinz Co. Ltd. Hayes Park, Hayes, Middlesex.

# iron before breakfast

## FERRO-GRADUMET®

To prescribe iron before breakfast would be asking for trouble with ordinary ferrous sulphate tablets. Even taken after meals and in divided doses, such tablets cause irritation and unpleasant side effects in many patients, often leading to the abandonment of therapy. But "One Ferro-Gradumet tablet before breakfast" is right. This once-daily haematinic is designed to be taken on an empty stomach. Because iron absorption is in inverse proportion to the amount of food present, just one tablet daily, taken before breakfast, gives steady, trouble-free assimilation of ample amounts of iron. Instead of a corrosively large dose of ferrous sulphate being released in the stomach, the contents of the Gradumet—a unique controlled-release vehicle which is independent of gastro-intestinal chemistry and motility—are slowly leached out over a period of hours throughout the gastro-intestinal tract.

**Presentation** Each red Ferro-Gradumet Filmtab® (film-coated tablet, Abbott) contains the exsiccated equivalent of 525 mg ferrous sulphate B P, providing 105 mg elemental iron—a sufficient daily dose for all cases of iron deficiency.

## HAVE A LINE FOR EVERY CALL ON INFANT FEEDING

No two babies are exactly alike, but the vast majority will thrive on our standard infant foods. A very small percentage, however, present a wide variety of differing feeding problems.

The whole of our medical research, over the past fifty years, has been directed towards the production of superlative infant foods. As a result, we claim to produce not only the best food for the majority, but also for this small but vitally important minority.

## today's treatment for constipation

Normax is the rational approach to the treatment of constipation. Normax capsules contain Dioctyl-sodium sulphosuccinate and 1-8 Dihydroxyanthraquinone.

**Faecal softener.** Clinical observation has shown that Dioctyl-sodium sulphosuccinate is a softening agent which reduces surface tension, allowing water to penetrate and soften the hard, dry impacted stools, thereby facilitating passage through the colon and expulsion through the rectum. "It is not an irritant, laxative or bulk purgative."<sup>1</sup> Animal experiments have shown that this substance is not absorbed, nor does it break down during its passage through the intestine, and no side effects have been revealed to date.

**Mild peristaltic stimulant.** The faecal softening action has been supplemented in the Normax capsule by a mild peristaltic stimulant (1-8 Dihydroxyanthraquinone) which gently and

safely promotes the natural bowel movement to produce a comfortable, effortless evacuation.

**Advantages.** By combining a faecal softener with a mild peristaltic stimulant, Normax eliminates the strain to stool. The low dosage required, and the effectiveness of Normax, make it the ideal treatment for chronic functional constipation in all ages.

**Presentation.** Normax capsules are available in bottles of 30 and 250 at basic N.H.S. prices of 4/10d. and 26/10d., respectively. Normax is subject to Purchase Tax.

**'FRAGRANT CLOUD'**

*(From Harry Wheatcroft & Sons, Edwalton, Nottingham.)*

From early summer until the first hint of the autumn frosts, these coral-red flowers will float a cloud of fragrance throughout your garden. 'Fragrant Cloud' is a rare combination, it has healthy, vigorous growth, well shaped, free-flowering blooms, and, as its name implies, a heady, intoxicating scent. It's no wonder that 'Fragrant Cloud' was the only rose, out of 249 entries, to win the coveted Gold Medal of the National Rose Society.

## Psoriasis... rapid response to Alphosyl

... even in previously intractable cases. A patient of 48 who had a generalised psoriasis for 20 years was essentially clear in six weeks.<sup>2</sup> A girl of 10 with a strong familial history of psoriasis, cleared almost completely after three weeks' application of Alphosyl Cream.<sup>2</sup> These are just two typical cases from the extensive clinical records underlining Alphosyl's outstanding effectiveness in bringing psoriasis under control.

**New Alphosyl lubricating cream.** A new water-in-oil dosage form, Alphosyl Lubricating Cream is particularly significant in the treatment of the dry, extremely scaly psoriatic lesion confined to the small site and the intertriginous area. Alphosyl cream is especially helpful in clearing psoriatic plaques exposed to constant friction. By enhancing lubrication of the skin folds, it serves to lessen irritation and facilitate healing. Clearing is prompt, even in previously resistant cases. The effectiveness of Alphosyl in this form is attributable in large measure to its unique cream base. This consists of a combination of saturated and unsaturated free fatty acids, naturally occurring triglycerides and esters that resemble the lipid constituents of normal healthy skin. The vehicle also contains hydrophylic-lipophilic bipolar substances which

Oct. 9th.

enhance the moisture uptake and retention of the amphoteric proteins of the stratum corneum. Significantly, it has been shown that squalane, one of the components of the base, is most effective in dissolving a cement substance in psoriatic scales.

**Formula:** Allantoin 2%+90% alcoholic extract of coal-tar (5=1) 5% in a vanishing type cream base or a smooth, non-greasy lotion base.

# Even the wrapper typifies Tampax convenience

Women dislike fumbling with cumbersome menstrual protection devices. At a time when nerves are already on edge, difficulties seem to magnify with the pin-pad-belt routine. Tampax, on the other hand, is immediately available for instant use – merely pull the handy tear-thread in the linen-paper wrapper and there it is, ready for simple, efficient insertion into the vagina.

This wrapper has hygienic importance, too. Not only does it assure complete cleanliness, but it enables the user to carry spares in her handbag, or special Tampax handbag container, with assurance that they will remain hygienic right up to the moment of need.

Your patients will welcome the tidy convenience of Tampax and will soon recognise, as have millions of other women around the world, its many other advantages. With Tampax, the problem of menstrual odour is virtually eliminated. It is easily disposable by flushing away, as are the container-applicator tubes, so necessary for correct and easy insertion. Bathing and showering are made aesthetically possible. Even sitting and walking are more comfortable.

If you have patients who are having psychological or emotional difficulties over menstruation, perhaps you can ease their problems by recommending Tampax. Its use, comfortable and practical as it is, can improve a woman's or girl's whole attitude toward the complex of menstruation.

Tampax is available in Regular and Super absorbencies to meet the varying needs during the menstrual period.

## Surgery—contd. on p. xlvii

*Flt. Lt. John Bradshaw, M.B., Ch.B., has just taken up his first appointment on an R.A.F. Station. "I like the way the R.A.F. treats its doctors," he says. "The conditions of work are much better than in general practice under the National Health Scheme." Dr. Bradshaw is 24 and qualified at Sheffield. His wife is an ex-Nurse and they have two young children.*

# Before you commit yourself to a practice, work 3 or 5 years in the R.A.F.

You'll do some interesting, out-of-the-rut medicine, see a bit of the world, live well, and 'retire' with up to £3,000, tax free.

## If you are in your pre-Registration year, here is something for you to think about.

You do not, now, need to take up your workaday N.H.S. career straight away. Furthermore, there are good reasons why you should not be in too much of a hurry. After 3 or 5 years you'll know, far better than you do now, where your particular talents and interests lie, and what sort of a future—personal as well as professional—you want to make for yourself. If you're a round peg, you'll know what a square hole looks like.

A short spell in the R.A.F. is, in fact, a *breathing-space*. It gives you the chance to make up your mind about all sorts of things.

You'd get your first job in the R.A.F. 3 months after you joined—probably as junior M.O. at a Station: rather like being an "Assistant with a view". In a typical case you could be one of two doctors with, between you, 1500 to 2500 people to take care of, and your own 'cottage hospital' with wards, theatre and laboratory, and secretarial as well as nursing staff.

*You'd have a shorter list than a civilian G.P., and to this extent you would live a less strenuous life. To compensate, you would give more comprehensive care. It is this—and the variety of your work—that makes practice in the R.A.F. so interesting.*

In the R.A.F. you combine several functions. You are in medical care not only of people, but of the environment they live in, and of the work they do. In proportion you do less curative work and more preventive work than is even possible for most civilian doctors.

A lot of people hold the view that this is the way all medicine should be practised: with the

closest possible integration of the doctor and the community.

## This is the choice you face

Think of two doctors, both aged 40. One went to his practice straight from his teaching hospital, and has been there ever since. The other went into the R.A.F. on a 5-year commission. He lived—and lived well—in the tropics with his family for 2½ years, and, on leave or on duty, visited 7 countries: two European, three Asiatic, and two Australasian. By now he's been in civilian practice for 10 years: he's as well established as the other doctor. But which of the two has got more out of life, and has the richer memories to look back upon?

*In many ways, the transition from hospital into the R.A.F. seems more 'natural' than the movement to civilian practice. You go from one community to another—and they have much in common: both are young, cheerful, energetic, rather self-contained—and at the same time very professional, with a marked sense of purpose. If you can feel, now, that you are going to miss Medical School—think about the R.A.F. Service life would probably be 'right' for you.*

## The vulgar matter of £. s. d. . . .

Next year, if you were in the R.A.F. as a married officer aged 25, your pay and allowances would be over £2000 and your cost of living would be low. If you were single, living in the mess, you'd get the equivalent of first class hotel accommodation and service for only a few shillings a day out of your pay.

*Leave the Service after 3 years, and you get a gratuity of £1,500, cash. Stay on for 5, and*

*you get £3,000. With this, you could put down a deposit on a house and furnish it very well indeed, attic to cellar.*

What a start to a civilian career!

## The time for bold decisions is when you are young and free

Today, because you are at the beginning of your career, you can take a short time out from the main stream of civilian practice *just by deciding to do it.*

Now, you are free to go. In a few years time, you probably won't be.

You'll have a practice 'with your name on it'; children who want a permanent home to strike roots in; and so on. It will be time for you to settle down.

Meanwhile, at the parting of the ways, you have this chance. Now is the time to find out about it.

The best thing is to write off straight away. If you can't—tear this page out and put it in your pocket to remind you.

The address to write to is: Wing Commander D. G. M. Hills, O.B.E., M.B., B.S., D.P.H., R.A.F., Ministry of Defence (MAI/HN 206A), 1-6 Tavistock Square, London, W.C.1. Please give your age and qualifications.

# Nulacin and only Nulacin provides intragastric milk-alkali drip therapy for the ambulant patient

*“In view of the ineffectiveness of most of the tableted antacids, the milk-alkali tablet (Nulacin) would appear to be the antacid of choice for ambulatory therapy.”*

Med. Times, N.Y., 1958, 1, 74

## Safe, Simple, Effective

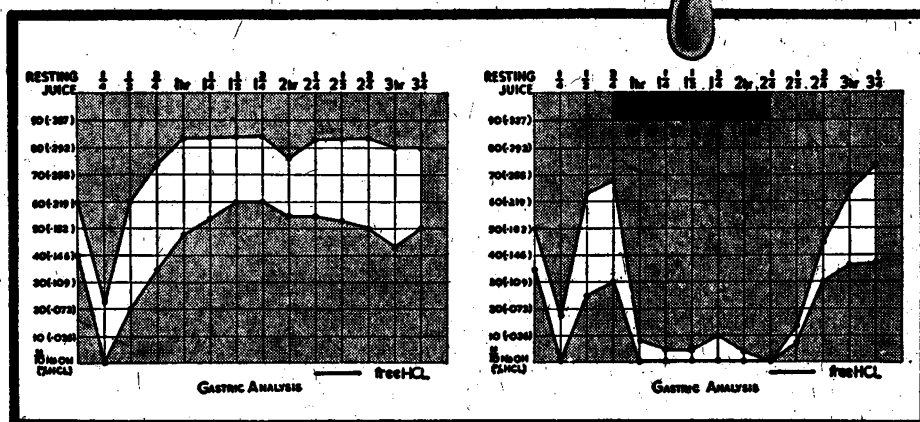

NULACIN TABLETS provide a safe, simple and effective treatment of peptic ulcer.

In treating peptic ulcer a Ryle's tube may be passed through the nose and into the oesophagus and a mixture of milk and antacid allowed to flow continuously over the affected area. This form of therapy can only be employed in those patients who are in bed and for the ambulant patient Nulacin tablets are preferable.<sup>1</sup> Nulacin tablets are prepared from whole milk combined with dextrins and maltose, together with the trisilicate, oxide and carbonate of magnesium and calcium carbonate. Nulacin tablets when allowed to dissolve slowly in the mouth provide milk-alkali drip therapy. In fact, Nulacin tablets have revolutionized the treatment of peptic ulcer.<sup>8</sup>
