

whichever the grade it's still hypertension!

... and the most widely prescribed antihypertensive agent is 'Aldomet'

'Producing singularly few side-effects, particularly hypotension and severe gastro-intestinal symptoms, methyldopa presents a great advance in the treatment of hypertension.'

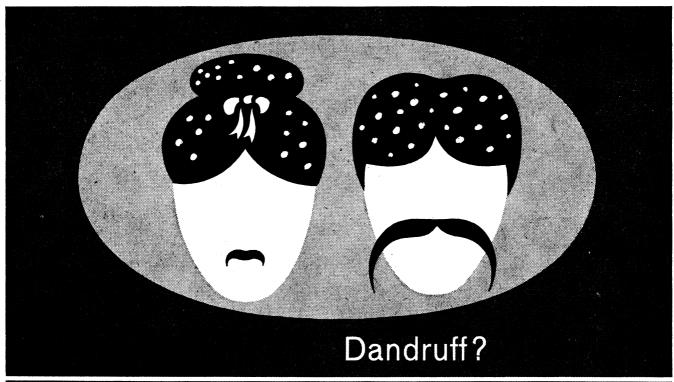

Brit.med.J., 1963,1, 151 (19 Jan)

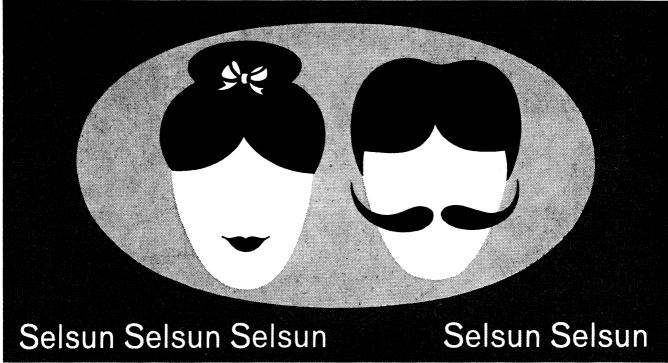

Supplied as 250 mg tablets and, for emergency use, as an injection. Detailed information is available to physicians on request.

Merck Sharp & Dohme Limited, Hoddesdon, Hertfordshire

Selsun®

Frank seborrhoeic dermatitis of the scalp is clearly recognised as a medical problem. For this doctors will prescribe Selsun suspension in the knowledge that eight out of ten cases will rapidly be improved and controlled. The much more common dandruff, too, is better treated as a medical than as a cosmetic problem: the same ethical preparation completely controls dandruff in an even larger proportion of cases.

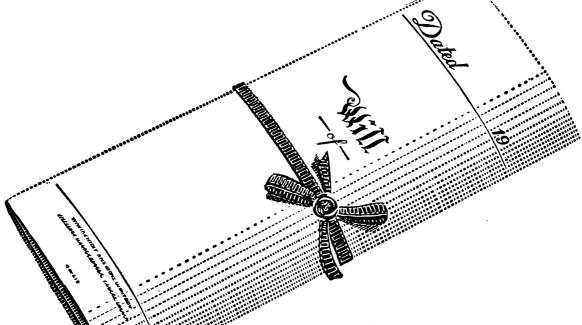

Selsun suspension combines selenium sulphide with a powerful detergent. Its joint cleansing and therapeutic action quickly clears the scalp of debris and thereafter dandruff is easily controlled by the periodic use of Selsun. Selsun suspension is available in bottles of 1, 2 and 4 fl. oz.

® SELSUN is a Registered Trade Mark of

WITH A WILL!

When you are consulted about bequests for medical work that deserves support, please remember the work of the Imperial Cancer Research Fund. Founded on the initiative of the Royal Colleges of Physicians and Surgeons, the I.C.R.F. is fighting all forms of cancer, including leukaemia, with every weapon of modern science in up-to-date laboratories. It has no official grants and is entirely supported by voluntary contributions. Will you please help—now?

How to word your Will

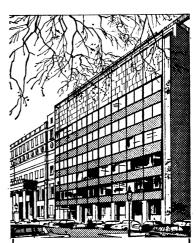

'I hereby bequeath the sum of.....pounds free of duty to the Imperial Cancer Research Fund, Lincoln's Inn Fields, WC2 for the purpose of scientific research, and I direct that the receipt of the Honorary Treasurer shall be a good discharge for such legacy'.

Patron: H.M. The Queen

IMPERIAL CANCER RESEARCH FUND

LINCOLN'S INN FIELDS, LONDON WC2

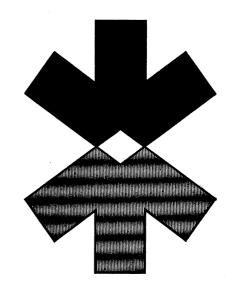

The I.C.R.F. laboratories in Lincoln's Inn Fields rely entirely on public support. Research is costly. £750,000 is needed every year to continue the fight against human suffering. Will you help us to fight cancer with modern equipment and trained minds?

NEW PRODUCT

Triptafen

for concurrent depression and anxiety

Triptafen helps depressed, anxious patients to regain a balanced outlook.

Each Triptafen Tablet contains

Amitriptyline hydrochloride

25 mg

Perphenazine BP

2 mg

Most psychoneurotic patients seen in general practice show features of both depression and anxiety and if either is treated alone the other may become exaggerated. Triptafen combines a proved antidepressant and a well-tried tranquilliser to provide a well balanced treatment for such patients.

For the domiciliary or ambulatory patient a dose of one Triptafen Tablet 3 times a day is recommended. If necessary an additional tablet may be prescribed at night. Full information is available on request.

MERCK SHARP & DOHME LIMITED, HODDESDON, HERTFORDSHIRE

Glaxo announce a new type of tablet for diuretic and anti-hypertensive treatment

Prompt anti-hypertensive/diuretic effect Gradual, sustained potassium release and absorption

Glaxo's new two-layer tablet helps to counter the problem of potassium depletion during prolonged treatment. It is designed for gradual, sustained potassium release and absorption and to minimise gastric irritation.

This unique tablet design has been applied to two new products:

Neo-NaClex-K

Bendrofluazide 2.5 mg, potassium chloride 630 mg—pink and white. In bottles of 25,100 and 500.

Serplex

Reserpine 0·125 mg, bendrofluazide 2·5 mg potassium chloride 630 mg—blue and white. In bottles of 25, 100 and 500.

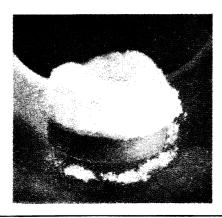

Neo-NaClex-K and Serplex are Glaxo trade marks

Detailed literature is available from Glaxo Laboratories Limited

How Neo-NaClex-K and Serplex tablets work

The film-coated tablets are tasteless and easily swallowed.

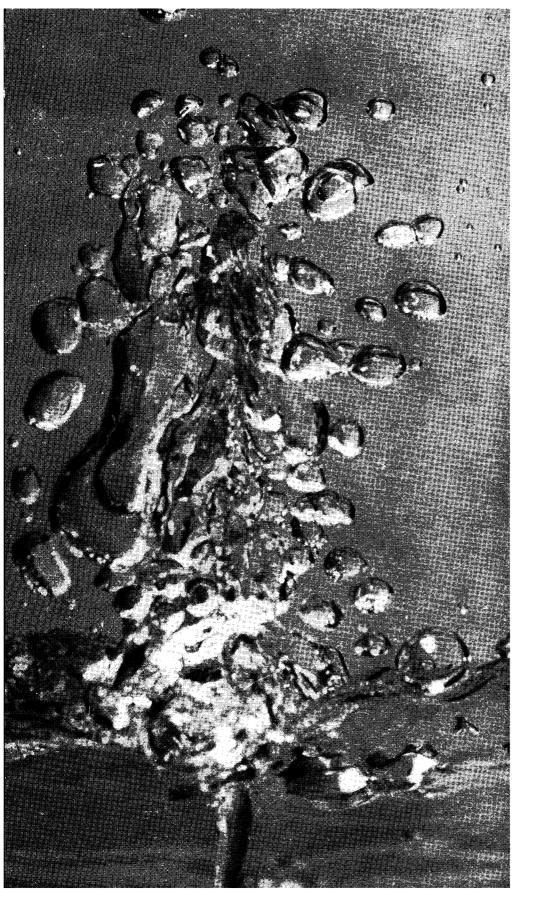

Very shortly after the tablet is swallowed, the white layer disintegrates and the diuretic/ anti-hypertensive dose is available for absorption.

The coloured layer, containing potassium chloride crystals, is designed to give a gradual release of the potassium to minimise gastric irritation. Reliable absorption of this material from the intestine has been demonstrated.

This layer dissolves slowly, exposing and releasing the crystals of potassium chloride very slowly so that no great concentration is reached at one time. The final photograph shows (after magnification) what remains of the coloured matrix after the potassium chloride has leached out steadily and completely for absorption.

effective where thiazides fail precise control of response

FURTHER INFORMATION ON LASIX the new diuretic

6. LESS POTASSIUM LOSS

"urinary potassium concentration . . . was 34.8 milliequivalents/litre when [Lasix] was given, as opposed to 67.7 milliequivalents/litre during hydrochlorothiazide therapy."

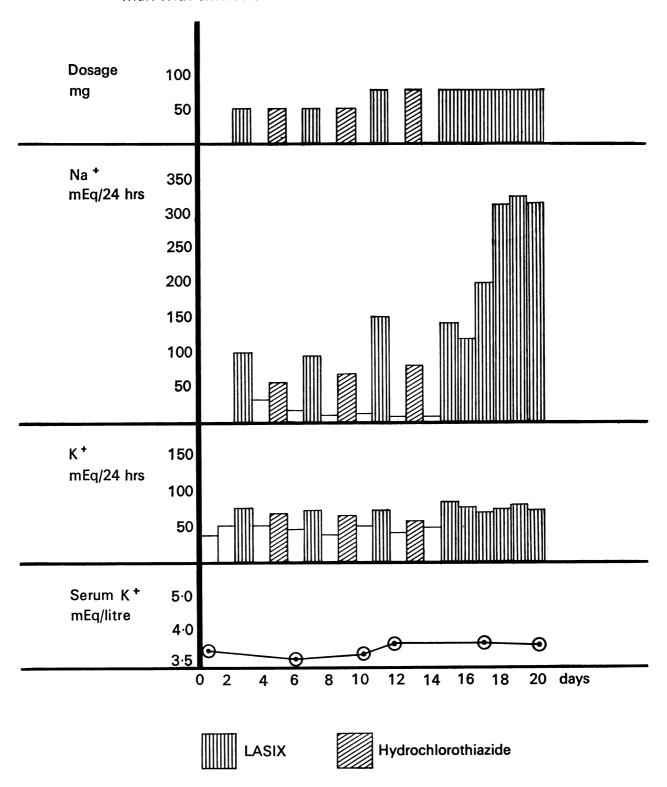

Dtsch. med. Wschr., 1963, 88, 1695

Lasix the new diuretic

A product of Hoechst world-wide research

In a paper reporting investigations and clinical trials with Lasix, it was suggested that the best way of comparing potassium losses during treatment with different diuretics is to express potassium excretion in relation to urine volume. The quotation above gives the mean values obtained with eight patients mostly with severe oedema. The diagram opposite shows the course of treatment in another patient, a 60-year-old man with severe cirrhosis of the liver. "During the period of preliminary observation sodium excretion ranged between 1 and 2 milliequivalents/24 hours.... Hydrochlorothiazide in doses of 50 and 75 mg. had scarcely any effect on urinary output, although it produced a moderate rise in sodium excretion. It was again noted that potassium loss during treatment with hydrochlorothiazide reached almost exactly the same level as it attained during the intense diuresis induced by [Lasix]. Before the commencement of treatment, the serum potassium level was somewhat low—3.7 milliequivalents/ litre—but during treatment it showed no significant change."

The diagram shows the course of treatment in a 60-year-old man with cirrhosis of the liver.

PRESENTATION:

Lasix is presented as tablets of 40 mg. frusemide in containers of 50 and 250; and in ampoules containing 20 mg. in 2 ml. in packages of 5 and 25.

Detailed information and samples will gladly be sent on request to the Medical Information Department.

HOECHST

British made is the other

Achromycin—Great Britain's most widely prescribed tetracycline—Ledermycin (demethylchlortetracycline), Aureomycin and Achromycin V are the broad-spectrum antibiotics which are wholly made in this country. They are manufactured to the most exacting standards at Lederle's fermentation plant at Gosport in Hampshire, and every prescription for these outstanding antibiotics supports both British industry and the research facilities dependent on its buoyancy.

Nulacin and only Nulacin provides intragastric milk-alkali drip therapy for the ambulant patient

66In view of the ineffectiveness of most of the tableted antacids, the milk-alkali tablet (Nulacin) would appear to be the antacid of choice for ambulatory therapy. 99 Med. Times, N.Y., 1958, 1, 74

Safe, Simple, **Effective**

NULACIN TABLETS provide a safe, simple and effective treatment of peptic ulcer.

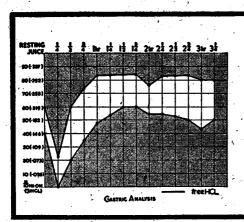

In treating peptic ulcer a Ryle's tube may be passed through the nose and into the oesophagus and a mixture of milk and antacid allowed to flow continuously over the affected area. This form of therapy can only be employed in those patients who are in bed and for the ambulant patient Nulacin tablets are preferable. Nulacin tablets are prepared from whole milk combined with dextrins and maltose, together with the trisilicate, oxide and carbonate of magnesium and calcium carbonate. Nulacin tablets when allowed to dissolve slowly in the mouth provide milk-alkali drip therapy. In fact, Nulacin tablets have revolutionized the treatment of peptic ulcer.8

Psoriasis ... rapid response to Alphosyl

... even in previously intractable cases. A patient of 48 who had a generalised psoriasis for 20 years was essentially clear in six weeks.² A girl of 10 with a strong familial history of psoriasis, cleared almost completely after three weeks' application of Alphosyl Cream.² These are just two typical cases from the extensive clinical records underlining Alphosyl's outstanding effectiveness in bringing psoriasis under control.

New Alphosyl lubricating cream. A new waterin-oil dosage form, Alphosyl Lubricating Cream is particularly significant in the treatment of the dry, extremely scaly psoriatic lesion confined to the small site and the intertriginous area. Alphosyl cream is especially helpful in clearing psoriatic plaques exposed to constant friction. By enhancing lubrication of the skin folds, it serves to lessen irritation and facilitate healing. Clearing is prompt, even in previously resistant cases. The effectiveness of Alphosyl in this form is attributable in large measure to its unique cream base. This consists of a combination of saturated and unsaturated free fatty acids, naturally occurring triglycerides and esters that resemble the lipoid constituents of normal healthy skin. The vehicle also contains hydrophylic-lipophilic bipolar substances which

enhance the moisture uptake and retention of the amphoteric proteins of the stratum corneum. Significantly, it has been shown that squalane, one of the components of the base, is most effective in dissolving a cement substance in psoriatic scales.

Formula: Allantoin 2%+90% alcoholic extract of coal-tar (5=1) 5% in a vanishing type cream base or a smooth, non-greasy lotion base.

'MIGRIL' MASTERS MIGRAINE

It is paradoxical that ergotamine, accepted as the most effective drug against the headache of migraine, may cause nausea and vomiting—two of the very symptoms of a migraine attack.

'Migril' successfully overcomes these symptoms by the inclusion of cyclizine hydrochloride, the rapid-acting and effective anti-emetic.

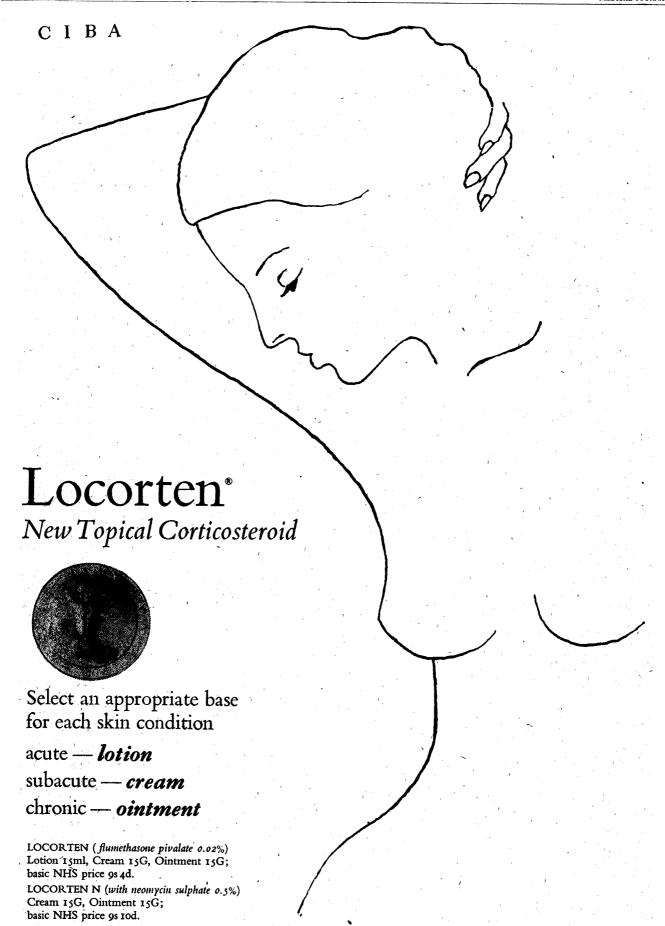

Each 'Migril' tablet contains:
Ergotamine tartrate, B.P. 2 mg.
Cyclizine hydrochloride, B.P. 50 mg.
Caffeine hydrate, B.P. 100 mg.

'MIGRIL' brand

Ergotamine Compound Tablets

In the treatment of eczema the use of a topical corticosteroid alone is often unsatisfactory because it cannot protect the lesion from the everpresent risk of secondary infection.

Remiderm combines a highly effective antibacterial and antifungal agent, halquinol, with the rapidly-acting corticosteroid, triamcinolone acetonide, to provide the most comprehensive treatment of eczemata yet devised. Unlike the antibiotic-corticosteroid combinations, Remiderm cannot induce the development of antibiotic-resistant bacteria.

Squibb Remiderm trademark

Remiderm cream and ointment each contain triamcinolone acetonide 0.025% and halquinol 0.75%.

Remiderm spray contains triamcinolone acetonide 4.95mg. and halquinol 31.2mg. in a 75gm. aerosol spray.

Remiderm cream and ointment, 15gm. tubes 7/9 basic NHS price.

Remiderm spray, 75gm. canister 16/- basic NHS price.

NORMAX

today's treatment for constipation

Normax is the rational approach to the treatment of constipation. Normax capsules contain Dioctyl-sodium sulphosuccinate and 1-8 Dihydroxyanthraquinone.

Faecal softener. Clinical observation has shown that Dioctylsodium sulphosuccinate is a softening agent which reduces surface tension, allowing water to penetrate and soften the hard, dry impacted stools, thereby facilitating passage through the colon and expulsion through the rectum. "It is not an irritant, laxative or bulk purgative." Animal experiments have shown that this substance is not absorbed, nor does it break down during its passage through the intestine, and no side effects have been revealed to date.

Mild peristaltic stimulant. The faecal softening action has been supplemented in the Normax capsule by a mild peristaltic stimulant (1-8 Dihydroxyanthraquinone) which gently and safely promotes the natural bowel movement to produce a comfortable, effortless evacuation.

Advantages. By combining a faecal softener with a mild peristaltic stimulant, Normax eliminates the strain to stool. The low dosage required, and the effectiveness of Normax, make it the ideal treatment for chronic functional constipation in all ages.

Presentation. Normax capsules are available in bottles of 30 and 250 at basic N.H.S. prices of 4/10d. and 26/10d., respectively. Normax is subject to Purchase Tax.

Try this test. Add Aldactone-A to conventional diuretic treatment and see for yourself how it can improve the patient's condition

'In addition, and most important, he felt well. He did not feel like the weak, washed-out patient that I have come to expect after intensive diuretic therapy.'

The Use of Aldosterone Antagonists in Cardiological Practice.

Paper presented before the Cardiac Society of Australia
.and New Zealand, October 1960.

Conventional diuretics act on the proximal renal tubule. They allow reabsorption of sodium and water and loss of potassium to continue at the distal tubule. But Aldactone-A (brand of spironolactone), added to the regimen, acts at the distal tubule, and prevents excessive sodium reabsorption and potassium loss.

Ala	lactone-A thus
	Enhances sodium excretion
	Conserves potassium
	Overcomes diuretic resistance
	Improves diuresis
	Leaves patients feeling well
	ALDACTONE-A is a registered trade mark.

Aldactone-A

PANCREATIN GRANULES

Triple Strength Enteric-coated (CLAY AND ABRAHAM)

There are several substances which are used alone or in combination for the enteric coating of pharmaceutical preparations. In 1948, when these granules were originally prepared, a formula was chosen which clinical results have proved to be eminently successful. (Recent Advances in Paediatrics, Churchill, 1954, page 256.) Furthermore, a process was evolved by which not merely each granule but each particle of triple strength pancreatin receives its coating to prevent the destructive action of the gastric acid secretion while allowing the enzymes to become active in the duodenum.

Bottles containing eight ounces. Literature on request.

ELECTRONICS FOR THE PRACTITIONER

FOR THE PRACTITIONER

The increasing number of applications of electronics to present day medicine makes knowledge of this subject of great practical importance.

We have just produced a special "homestudy" PRACTICAL course in Basic Electronics. No previous knowledge is assumed and no mathematics is used. The course starts with the building of a simple cathodray oscilloscope and this is then used to carry out some 40 experiments on all the basic electronic circuits.

Full details without any obligation from:
BRITISH NATIONAL RADIO SCHOOL.
Dept. MI, READING, Berks.

AUSTRALIAN NATIONAL UNIVERSITY INSTITUTE OF ADVANCED STUDIES THE JOHN CURTIN SCHOOL OF MEDICAL RESEARCH FOUNDATION CHAIR OF CLINICAL SCIENCE

Applications are invited for appointment to the Chair of Clinical Science in the John Curtin School of Medical Research, Institute of Advanced Studies.

Advanced Studies.

The Professor will be Head of a new Department of Clinical Science to be established as a department of the John Curtin School, but housed in a new wing of the Canberra Community Hospital. Construction of this wing will soon commence, and an area in it of approximately 8,000 square feet has been allotted to the Department of Clinical Science. The date of appointment is subject to negotiation, but it is hoped that the Professor will be able to suggest his requirements for laboratory layout and equipment before the new hospital wing is ready for occupation in December, 1966. Plans have been developed for the staffing of the department and the provision of funds for research equipment and running expenses; details may be obtained on request. obtained on request.

obtained on request.

There is no restriction placed on the field of clinical science in which the department will be expected to concentrate its interests. There will be opportunities for the staff of the new department to form close links with one or more of the existing groups in the John Curtin School—i.e., in biochemistry, physical biochemistry, medical chemistry, microbiology, experimental pathology, genetics, physiology, and electron microscopy. The school is well equipped for research in all of the fields mentioned, and there are also animal breeding and workshop facilities. The staff of the Department of Clinical Science will be able to utilize these facilities as well as those already available in the Capherra Community Hospital.

will be able to utilize these facilities as well as those already available in the Canberra Community Hospital.

There is no undergraduate faculty of medicine within the University at present, and the Department of Clinical Science will operate entirely as a research department, being able to take research scholars for courses leading to the degree of Doctor of Philosophy. The University has a postgraduate awards scheme and students would be able to apply for awards tenable in the Department of Clinical Science. The salary of the Professor of Clinical Science will be £A.5,700 per annum, and he will be entitled to one year's study leave on full pay, plus a grant of up to £A.1,600 towards expenses, within each four-year period. Superannuation is on the F.S.S.U. pattern, with supplementary benefits. The University will pay first-class fares for the appointee and his family and will also provide a grant towards the costs of removal of furniture and effects. The University would also provide assistance in housing.

costs of removal of furniture and effects. The University would also provide assistance in housing.

Further information about the proposed Department of Clinical Science and the facilities and interests of departments in the John Curtin School of Medical Research may be obtained from the Association of Commonwealth Universities (Branch Office), Marlborough House, Pall Mall, London S.W.1. A summary of the conditions of appointment and instructions for application are also available.

Applications close with the Registrar of the University and with the A.C.U. on August 27, 1965.
