

# a new antacid palatable effective economical

Alcin is a new antacid offering several important advantages. It provides safe and effective treatment of symptoms associated with gastric hyperacidity and peptic ulceration.

**Palatability** Having an absence of chalkiness and an agreeable flavour, Alcin is non-nauseating.

**Buffering Activity** Alcin not only rapidly neutralises excess acid, but at the same time its sustained buffering activity maintains the level of acidity of the gastric contents within the desired range.

**Safety** Alcin is safe for prolonged administra-

tion. There is no risk from overdosage as Alcin cannot cause either alkalosis or acid rebound.

**No Digestive tract ill-effects** Alcin has no known laxative or constipating effects.

**Economy** Alcin is economical in use. The basic N.H.S. cost of 50 tablets is 1/9½d.

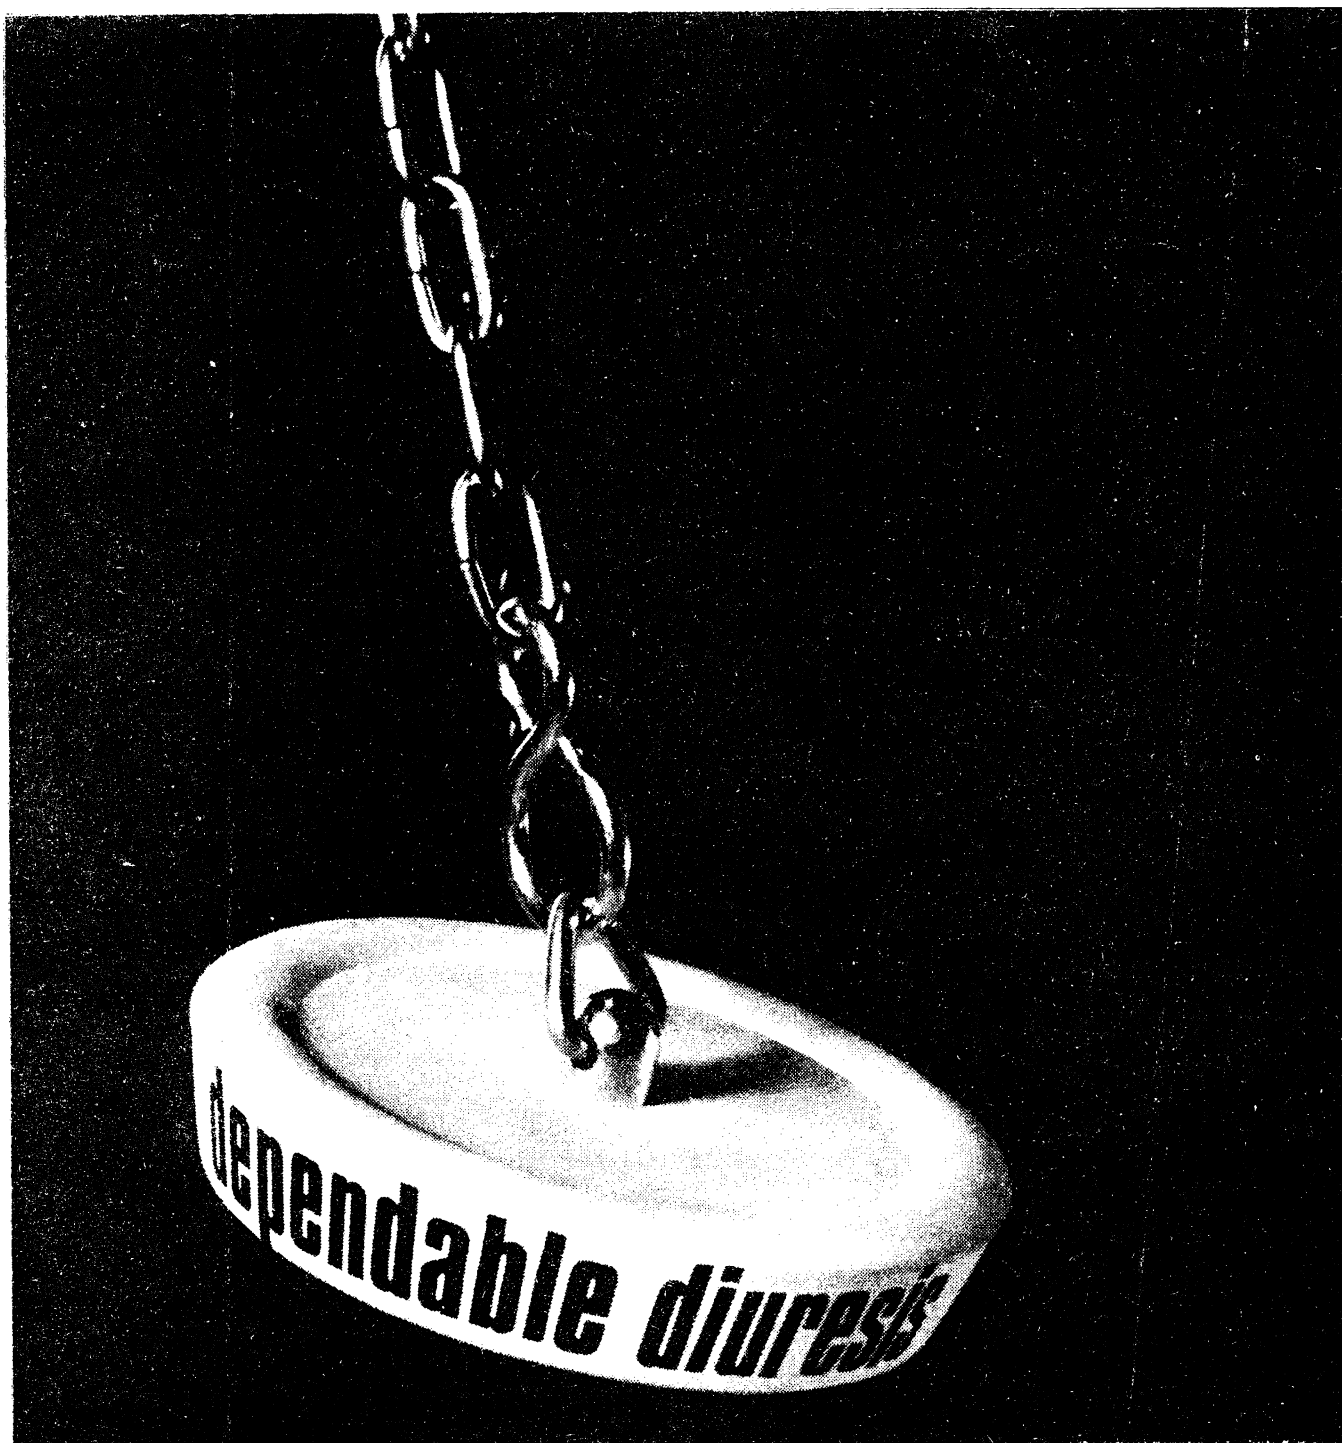

**Composition:** Each tablet contains 360 mg. anhydrous co-prepared sodium magnesium aluminium silicate and basic magnesium aluminate.

# The success of BIOGASTRONE (carbenoxolone sodium) in gastric ulcer

## further proof in 1965

“It is the only drug therapy for gastric ulcer which has been demonstrated conclusively to accelerate healing, which can be

achieved with patients remaining up and about, often at work, and with minimum change in diet,”

from editorial synopsis: GUT (1965) 6:19

In 1959, the first clinical trial of Biogastrone\* was begun in patients with gastric ulcer. The results indicated that Biogastrone significantly reduced the size of ulcer niche.

“It is suggested that Biogastrone promotes the healing of gastric ulcers.”

Lancet (1962) ii: 793

Now, in a further trial, the same author proves beyond any doubt that Biogastrone is successful in assisting gastric ulcers to heal. The average degree of healing was similar in both trials—72 and 78% in the Biogastrone groups and 35 and 39% for the control.

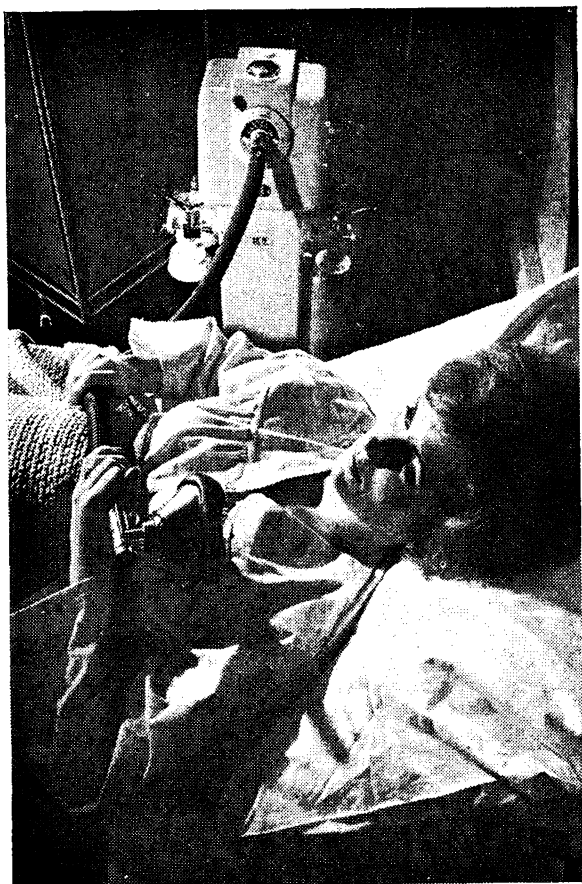

“It is concluded that carbenoxolone sodium [Bio-gastrone] facilitates the healing of gastric ulcers.” Gut (1965) 6: 19

## MEDICAL EQUIPMENT FROM BRITISH OXYGEN

# Confidence— is half the battle

The Lucy Baldwin apparatus represents a significant advance in obstetric analgesia. It is designed for the administration of nitrous oxide and oxygen mixtures, the composition of which may be varied between 70% N<sub>2</sub>O/30% O<sub>2</sub> and 100% O<sub>2</sub>. The mixture inhaled by the patient corresponds closely to the control setting, regardless of changes in draw-off conditions and will flow only in response to the patient's inspirations. Safety features include an emergency oxygen control and an automatic cut-off valve to prevent inhalation of nitrous oxide in the event of undetected failure of the oxygen supply.

## The problem of the dirty mouth

Even in 1965 the dangers, and the unpleasantness, of the dirty mouth are still present in the post-operative period, as well as in many fevers; the geriatric patient being especially prone to them. Careful attention to oral hygiene will usually, of course, keep the patient comfortable and prevent complications. Such attention, however, is very time-consuming to the nurse; and it is not often realised that for most patients it can be replaced or supplemented by the use of chewing gum.

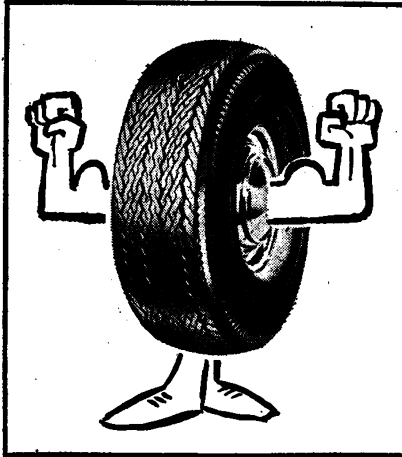

The regular use of chewing gum, by stimulating salivary flow, keeps the mouth clean in the most natural way possible. The patient is in a sense providing his own nursing care with the minimum of energy expenditure by himself.

Child patients, of course, need no encouragement to chew gum. The older patient may need encouraging—but not once he has appreciated the very obvious cleansing and refreshing effect that chewing gum has upon the mouth. Chewing gum is also of value to patients who are forbidden to smoke.

# RASTINON

IS THE FIRST CHOICE IN INITIATING  
ORAL ANTIDIABETIC THERAPY

For the maturity-onset diabetic whose blood sugar levels are inadequately controlled by diet, Rastinon provides control at normoglycaemic levels.

Given in divided doses after meals, Rastinon is rapidly absorbed and this ensures the maximum effect when the need is greatest. As hypoglycaemia is an exception with Rastinon, nocturnal hypoglycaemia will not present a hazard even with high doses.

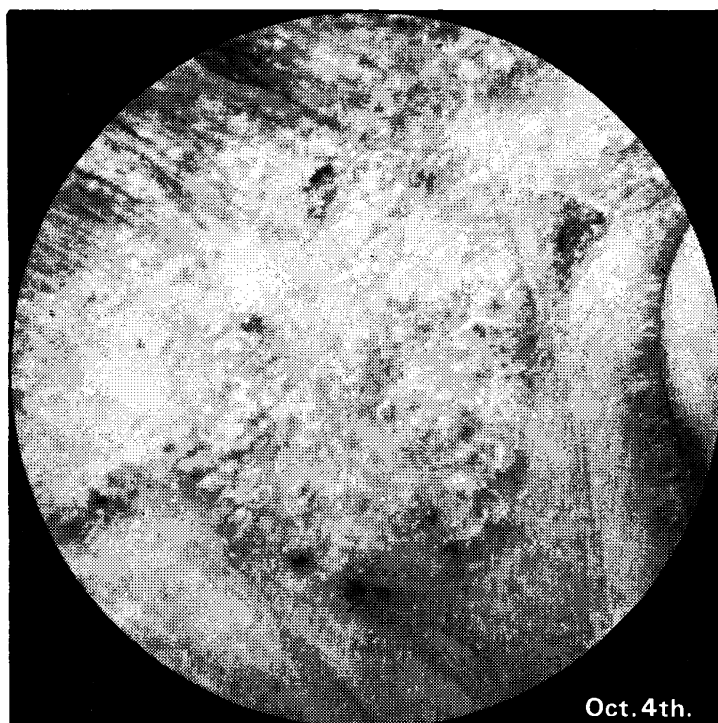

Since side effects are few and minor the unsurpassed ratio of safety to effectiveness makes Rastinon the first choice for initiating oral antidiabetic therapy. Rastinon tablets each contain 0.5 g. tolbutamide B.P.

## Psoriasis ... rapid response to Alphosyl

... even in previously intractable cases. A patient of 48 who had a generalised psoriasis for 20 years was essentially clear in six weeks.<sup>2</sup> A girl of 10 with a strong familial history of psoriasis, cleared almost completely after three weeks' application of Alphosyl Cream.<sup>2</sup> These are just two typical cases from the extensive clinical records underlining Alphosyl's outstanding effectiveness in bringing psoriasis under control.

**New Alphosyl lubricating cream.** A new water-in-oil dosage form, Alphosyl Lubricating Cream is particularly significant in the treatment of the dry, extremely scaly psoriatic lesion confined to the small site and the intertriginous area. Alphosyl cream is especially helpful in clearing psoriatic plaques exposed to constant friction. By enhancing lubrication of the skin folds, it serves to lessen irritation and facilitate healing. Clearing is prompt, even in previously resistant cases. The effectiveness of Alphosyl in this form is attributable in large measure to its unique cream base. This consists of a combination of saturated and unsaturated free fatty acids, naturally occurring triglycerides and esters that resemble the lipid constituents of normal healthy skin. The vehicle also contains hydrophilic-lipophilic bipolar substances which

Oct. 9th.

enhance the moisture uptake and retention of the amphoteric proteins of the stratum corneum. Significantly, it has been shown that squalane, one of the components of the base, is most effective in dissolving a cement substance in psoriatic scales.

**Formula:** Allantoin 2% + 90% alcoholic extract of coal-tar (5=1) 5% in a vanishing type cream base or a smooth, non-greasy lotion base.

# Why put ascorbic acid in an iron tablet?

The "Sidros Absorption Bridge" is built with Lego

## TO HELP YOUR PATIENT

The "Sidros Absorption Bridge" illustrates today's views on iron absorption. Iron is absorbed from the intestine only in its ferrous state. It is oxidized to the ferric salt on entering the mucosa and has to be reduced to ferrous iron before it can cross the barrier between mucosa and blood stream. Ascorbic acid acts as a reducing agent in this process.<sup>1, 2, 3</sup>

*Each Sidros tablet contains 300 mg. ferrous gluconate and 30 mg. stabilized ascorbic acid.  
Dosage: 1-2 tablets three times daily.*

Stabilized ascorbic acid is present in SIDROS to keep iron in its absorbable ferrous state in the alkaline environment of the bowel and to act as a reducing agent in the mucosa.

And to help you  
Fewer complaints. . . . The incidence of side effects with ferrous gluconate is one-fifth of that with ferrous sulphate.<sup>4</sup>

## THE INTERNATIONAL STANDARD OF TEMPERATURE...

*Platinum thermometer by courtesy of H. Tinsley & Co. Ltd*

... is based on the variation with temperature of the pressure of hydrogen gas kept at constant volume. In practice, certain reference temperatures are obtained by means of physical changes which take place under well-defined conditions at exactly repeatable temperatures, such as the freezing points of gold or silver, or the crystallization points of certain pure compounds.

The two fundamental points of the temperature scale are the temperatures of melting ice ( $0^{\circ}$ ) and of boiling water at standard pressure ( $100^{\circ}$ ). The interval between these two temperatures is divided into 100 parts; each part is called a Celsius degree ( $^{\circ}\text{C}$ ). By international decision made in 1948, the name Celsius replaced the centigrade.

KNOWLE AND COLDEAST HOSPITALS  
near Fareham, Hampshire

**REGISTRAR IN PSYCHIATRY**

Married or single accommodation available.  
This appointment, which will fall vacant on or after August 1, 1965, is a training post under the Wessex Regional Scheme for Postgraduate Education in Psychiatry.

Regular tutorial courses for Parts I and II of the D.P.M. are held in the Southampton-Fareham area; and Knowle Hospital is one of the main centres for this. The hospital provides a comprehensive psychiatric service for the adults of a large and varied district, including a modern Mental Health Centre in Southampton. It is approved for the D.P.M. and there is a good psychiatric library.

Special arrangements are made for clinical supervision and teaching by the Consultant staff, and regular medical meetings are held.

Coldeast Hospital provides a similar comprehensive service for subnormality. In order that the Registrar may gain experience in the field of subnormality, he will for the whole or part of his period of service work half-time at Coldeast Hospital and half-time at Knowle Hospital. He will be expected to participate fully in the Regional Scheme for Postgraduate Education in Psychiatry, and at the appropriate stage will be regularly released for the tutorial courses.

Good general academic ability is valued in candidates as much as previous psychiatric experience.

Candidates may visit the hospitals by arrangement with the Physician Superintendents concerned. Forms of application, returnable if possible by July 10, can be obtained from the Group Secretary, Knowle Hospital, Fareham, Hants.

(Telephone WICKHAM 2271). (5251)

# MEDICAL SERVICE OVERSEAS HELPS DEVELOPMENT

Doctors are offered a break from normal routine in undertaking short tours of up to three years in developing countries overseas, where their services are urgently needed.

Valuable and interesting experience can be gained in appointments which offer attractive salaries and gratuities, overseas allowances, education allowances for children and free family passages (or free passages for children to visit parents overseas during the holidays). Accommodation is provided free, or at a low rental, and income tax is usually low. In most cases superannuation rights can be preserved or maintained.

# ABSTRACTS OF WORLD MEDICINE

*The selective abstracting journal*

Covers the whole field of clinical medicine and many allied sciences.

Some 1,500 medical journals of the world are scrutinized for each issue and only the *most significant papers* are chosen for abstracting — only those considered to be of lasting value to medical knowledge.

The journal also publishes Review Articles from time to time, each dealing with a subject of topical interest. These articles have been widely appreciated.

This is essentially a *selective* abstracting journal — not fully comprehensive but
