

MEDICAL OFFICERS OF THE ROYAL AUSTRALIAN AIR FORCE

If you are under 53 years of age, a recently retired Medical Officer, a Clinical Registrar or a General Practitioner, you could be considered for one of the following vacancies:

(1) Ex-Service Medical Officers

Appointment to a Short Service Commission at a rank and with seniority determined on the basis of previous service rank, experience and academic qualifications. In suitable cases service may be extended on a S.S.C. basis, or where practicable from an age viewpoint, by appointment to a permanent commission.

(2) Clinical Registrars

If you have suitable experience and preferably appropriate postgraduate academic qualifications in general medicine, general surgery and anaesthesia, the R.A.A.F. offers appointment to a Short Service Commission. Successful applicants will be employed as clinical registrars in R.A.A.F. Hospitals in Australia or overseas. Appointment will be at the rank of Squadron Leader with seniority according to qualifications. Suitable officers may be offered a Permanent Commission after a preliminary period.

(3) General Practitioners

The R.A.A.F. offers appointments to a Short Service Commission for general medical duties. Rank and seniority will depend on experience and qualifications. Those without previous service in the Medical Branches of the Armed Forces will normally be appointed at the rank of Flight Lieutenant. Those with such previous service may be appointed Squadron Leader.

Duties

These involve medical duties at R.A.A.F. Hospitals or R.A.A.F. bases within Australia and/or overseas, and include active clinical work. Successful candidates will also be required to study and practise aviation medicine associated with the care of flying personnel.

Rates of Pay

Flight Lieutenant—single £A.2,515—£A.3,146
married £A.2,816—£A.3,447

Squadron Leader—single £A.3,295—£A.3,745
married £A.3,596—£A.4,046

Wing Commander—single £A.4,075—£A.4,256
married £A.4,376—£A.4,557

Group Captain—single £A.4,720—married £A.5,021.

Successful candidates will be appointed in London, and first class passages to Australia provided for themselves and families.

Price's Textbook of the Practice of Medicine

Edited by SIR RONALD BODLEY SCOTT,
K.C.V.O.

TENTH EDITION

This new edition is virtually a new work; the sections dealing with infection, antibacterial agents, diseases due to infection and infestation, chemical and physical agents, disorders of metabolism, diseases of the endocrine glands, of blood, of joints, of the skeleton and of connective tissue have been entirely rewritten. All other sections have been completely revised and brought up to date. The two-column layout has greatly improved the appearance of the printed page, and a number of references to review articles follow the various sections. The book still retains its original aim—to provide a convenient and comprehensive reference book in which the physician, the clinical teacher, the general practitioner and the student may find the accepted views and practice of contemporary British medicine. 1280 pages

A History of the Acute Abdomen

SIR ZACHARY COPE

In an earlier work—*Pioneers in Acute Abdominal Surgery*—Sir Zachary Cope told of the early attempts to treat some types of acute abdominal disease. In this present volume he has included the essential parts of his earlier account and added sections showing how the various pathological conditions were recognized and the signs and symptoms necessary for diagnosis determined—much of the material being taken from actual case histories. 132 pages 35s net

Girdlestone's Tuberculosis of Bone and Joint

and M. C. WILKINSON

THIRD EDITION

This new edition takes fully into account the great changes which have taken place in the treatment of surgical tuberculosis in recent years—changes brought about not only by the introduction of antibiotics and antituberculous drugs but also by new techniques of surgery. The revisers give an account of these new techniques and explain the factors upon which they are based. They have stressed throughout that the general nature of the disease cannot be overlooked nor the basic concepts of Hugh Owen Thomas and Robert Jones forgotten. 228 pages

The Theory and Practice of Public Health

Edited by W. HOBSON

SECOND EDITION

Because of the considerable advances made in many of the subjects covered by this book a new edition has been called for within four years of the last. Great advances have been made in the control of communicable disease, particularly the arthropod-borne diseases and the zoonoses, in genetics, and in the application of epidemiological methods to non-communicable disease. All chapters have been thoroughly revised and two new chapters added—'Social Science and Public Health' and 'The Planning and Evaluation of Health Services'—together with a number of new illustrations. 418 pages 43 illustrations

The image is a dense, overlapping collage of the word "HydroSaluric" written in various handwritten styles, sizes, and orientations. The text is layered, with some words appearing more prominent than others, creating a textured, almost abstract visual effect. The colors are primarily black and dark grey, with some lighter, faded instances of the word visible in the background. The overall composition is chaotic and energetic, suggesting a sense of movement and repetition.

5000 times a day

'HydroSaluric'-K is endorsed 5,000 times a day

Every day, over 5,000 patients leave their doctors' surgeries with prescriptions for 'HydroSaluric'-K. Since its introduction in 1960, 'HydroSaluric'-K has been prescribed more than five million times.

**the most widely prescribed
diuretic agent**

Why 'HydroSaluric'-K is prescribed more than any other diuretic:

- Because during the past five years, 'HydroSaluric'-K has proved its value in the long-term management of oedema.
- Because 'HydroSaluric'-K produces a smooth and predictable diuresis in most cases of oedema.
- Because 'HydroSaluric'-K provides a measure of protection against potassium depletion in patients where dietary intake may be inadequate.

Electrolytes and Cardiovascular Diseases*Physiology—Pathology—Therapy*

Edited by EÖRS FAJUSZ, University of Montreal, (Canada)

Vol. 1 *Fundamental Aspects*
XII+412 p., 70 fig., 39 tab., 1 cpl., 1965. £5.13.9.Vol. 2 *Clinical Aspects*
VI+442 p., 139 fig., 19 tab., 1966. £5.13.9.

Interest in the role of electrolytes in cardiovascular diseases has been stimulated markedly in recent years by experimental and clinical findings that suggest that dietary electrolytes may be implicated in the genesis of atherosclerosis, hypertensive conditions, degenerative and functional cardiomyopathies and even the so-called "coronary heart disease". The recognition that electrolytes may influence a number of entities in cardiovascular pathology that had largely been considered an inevitable consequence of aging is a real challenge to medical science. The purpose of the present book is to acquaint the investigator and practising physician with the recent advances and major points of progress in current basic and clinical research, and to summarize the most recent observations concerning the value of electrolyte therapy in cardiology.

XVI+376 p., 68 fig., 91 tab., 1965. £7.15.9.

This volume contains approximately fifty papers devoted to five principal subjects: purification of antigens, adjuvants of immunity, tetanus prophylaxis, mycotic allergens, typhoid vaccines, preparation and control of vaccines against respiratory diseases of poultry, and general papers. Four round tables discuss diphtheria carriers, foot-and-mouth disease, African swine fever, and questions of interest to government inspectors. The book sets out our present-day knowledge of the subject and brings a further contribution to the basic elements essential for standardization.

Management of Emotional Problems of Children and Adolescents

A. H. Chapman, M.D.

Following the success of the author's first book entitled "The Management of Emotional Disorders" in 1962, and in response to the demands of his followers for a commonsense sequel that would deal with children and adolescents, Dr. Chapman has recently completed this work. It provides clear, concise information on problems ranging from "temper tantrums to schizophrenia" in a language which shuns elaborate theory and specialized language.

summer-long protection against HAY FEVER with

D-VAC Pollens 3 dose course

Sufferers from 'classical' hay fever and pollen asthma can look forward to relief next summer after desensitisation with D-VAC Pollens. This provides fundamental treatment of pollen allergy, giving a high degree of protection in the majority of patients and halting any tendency to deterioration. Long-term relief will be obtained in most cases from a pre-seasonal course given in each of three successive years.

D-VAC Pollens, Bencard emulsified 'depot' pollen vaccine, is the latest development in desensitising vaccines. The course of three carefully graded injections—fewer than for any other available—has been shown to be at least as effective as the much longer course with aqueous vaccine. Injection from a specially designed syringe ensures the controlled release of active emulsion through surrounding 'shield' emulsion. Local or systemic reactions are therefore rare provided that the recommended technique of administration is employed under antihistamine cover.

D-VAC Pollens is prepared from extracts of 12 varieties of common grass pollens (Bencard group B2), which are responsible for over 80% of cases of 'classical' hay fever and pollen asthma. Two alternative courses are available:

Primary Course (D-VAC Pollens Nos. 1, 2 and 3—250, 750 and 3,500 Noon units respectively): designed for patients who have not received pollen vaccine treatment in the last five years, or who are known to be highly sensitive to grass pollens, and for children (aged 6-12 years).

Advanced Course (D-VAC Pollens Nos. 2, 3 and 4—750, 3,500 and 7,500 Noon units respectively): designed for patients aged over 12 who have had pollen vaccine treatment in the last five years and whose symptoms are not very severe.

(Patients known to exhibit very strongly positive skin test reactions or suffering from atopic eczema should first be referred to an allergy clinic.)

The 3 injections are administered pre-seasonally at intervals of exactly 4 weeks, the first dose being given in February or March. Full technical details (administration, precautions, possible reactions, etc.) are supplied with each dose, or on request.

TO BE SURE

of obtaining D-VAC Pollens, it is advisable to prescribe and order before 31st December: no order can be accepted after 21st January.

Prescriptions and orders, for D-VAC Pollens 'Primary' or 'Advanced', should state the exact date (between 14th February and 12th March) on which the first dose is to be injected. The first dose will be despatched to arrive by this date. (D-VAC Pollens is not available outside the U.K.)

In chest infections

Ceporin

provides effective, safe
broad-spectrum activity

Cephaloridine . . . "is not inactivated by penicillinase and has a remarkably broad spectrum."

Practitioner, 1965, **195**, 408

In serious infections of the respiratory tract, especially mixed infections, the unique activity of Ceporin can be used to particularly good advantage. The common infecting organisms in bronchitis and bronchopneumonia are highly sensitive to the bactericidal action of Ceporin, including penicillinase-producing staphylococci. This is why Ceporin frequently gives dramatic clearance of infection, rendering the sputum sterile and providing rapid relief of symptoms. Ceporin can be safely used in patients hypersensitive to penicillin. In all patients and in all indications the injections are remarkably painless and make the whole

dose available to the body.

Other indications for Ceporin include urinary tract infections, meningitis, septicaemia, bacterial endocarditis and soft tissue infections.

NACTON allows the patient, not the ulcer, to dictate his diet

One man's meat (or fish!) ...

Are delectable foods barred to your ulcer patients?

Once control is established with NACTON, more pleasures of the table can be enjoyed. How does NACTON achieve this control?

- ☐ It halves gastric secretion of acid
- ☐ and reduces gastric and intestinal spasm.

With this established, the patient can:

- choose his own food
- gain prolonged relief from pain
- get a good night's rest
- do away with milk and cream diets
- reduce or eliminate antacid consumption
- lead a normal life.

NACTISOL- where anxiety complicates ulcer management

NACTISOL combines the advantages of NACTON with butabarbital, a mild sedative which provides relief from anxiety and tension.

Each Nacton tablet contains 2mg. poldine methylsulphate B.P.

NACTON* and NACTISOL* are products of British research at

POWER SAFETY COVERAGE **ERYTHROCIN®**

ERYTHROCIN (erythromycin, Abbott) is a suitable first-line treatment for the majority of bacterial infections encountered in general practice. It provides powerful yet safe coverage against many causative organisms, leaving the broad spectrum antibiotics free for the specific cases in which they alone are effective.

POWER The potency of Erythrocin against the cocci is considerably more than that of tetracyclines or chloramphenicol.

SAFETY Erythrocin combines this effectiveness with a remarkable degree of safety. It is, in fact, the least toxic and least allergenic antibiotic currently in use.

COVERAGE Erythrocin is effective in a high percentage of the common bacterial infections. Its wide clinical spectrum of activity covers most Gram-positive organisms—especially Staphylococci, Streptococci, Pneumococci and Clostridia—and Gram-negative organisms such as Neisseria and some strains of Haemophilus influenzae.

By prescribing Erythrocin preparations by name you ensure that your patients receive erythromycin in safe, well-absorbed forms that produce effective blood levels rapidly.

Filmtab®

THE ROYAL ARMY MEDICAL CORPS OFFERS OUTSTANDING OPPORTUNITIES FOR GENERAL PRACTICE

with every facility for a varied professional career: good equipment,
good pay, good allowances, trained staff and generous leave

You may not know that the Army nowadays provides more women and children than soldiers as patients for its General Practitioners. But not only are the opportunities wide and varied: the conditions of service are such that they permit a professional man to work in a professional way. The R.A.M.C. provides modern surgeries with first-class equipment; trained staff to help; a car and driver. All general practitioners are given postgraduate training and have access to military hospitals.

Pay for a married Captain (the rank on entry) is over £2,000 with increases every two years and on promotion. Children's Educational Allowances are paid. A five year Short Service Commission earns a tax-free gratuity of £3,000, and there is excellent retired pay with Terminal Grant for those who go on to a career in the Corps. Six weeks' annual leave is normally granted, and reliefs are provided. Married general practitioners get a furnished house at low rental.

Isolates the noise so only the cardiac signal goes on paper

NEW SANBORN 500 VISO

In systole and diastole, the human heart produces a maximum signal of only a few millivolts between two ECG limb electrodes. Mixed in with this tiny signal may be some unwanted electrical "noise", caused by power lines, nearby X-ray or diathermy machines, or even ordinary office equipment. Until now, eliminating this noise from the record usually meant time-consuming adjustments and rerunning records until the complexes were clear.

The new Sanborn 500 Viso-Cardiette now isolates such noise from the cardiac signal to an extent never before achieved—and simultaneously maintains even greater protection for the patient without the use of fragile patient fuses. The "500", in effect, sees all

of the wanted ECG signal and little or no noise, to give you a diagnostically useful tracing with greater ease and speed.

This highly refined new instrument also uses the new Redux® Creme—an improved non-abrasive electrolyte easily applied and removed *without rubbing*... and has operating features including two chart speeds and three recording sensitivities, simplified control arrangement, color-coded patient cable and pictorial connection diagram on the instrument panel. Housed in a compact, vinyl-clad aluminum case that's easy to carry, or effortlessly rolled on a matching mobile cart. Price: £278. For further information please call or write.
