The image is a dense, overlapping collage of the chemical formula "HydroSaluric-K". The text is written in various styles, including cursive, bold, and simple print, and is oriented in multiple directions (horizontal, vertical, and diagonal). The background is a light, textured surface, possibly paper or fabric, which is covered by the repeated text. The overall effect is a complex, layered pattern that resembles a microscopic view of a material or a dense forest of text.

5000 times a day

'HydroSaluric'-K is endorsed 5,000 times a day

Every day, over 5,000 patients leave their doctors' surgeries with prescriptions for 'HydroSaluric'-K. Since its introduction in 1960, 'HydroSaluric'-K has been prescribed more than five million times.

**the most widely prescribed
diuretic agent**

Why 'HydroSaluric'-K is prescribed more than any other diuretic:

- Because during the past five years, 'HydroSaluric'-K has proved its value in the long-term management of oedema.
- Because 'HydroSaluric'-K produces a smooth and predictable diuresis in most cases of oedema.
- Because 'HydroSaluric'-K provides a measure of protection against potassium depletion in patients where dietary intake may be inadequate.

THE ROYAL ARMY MEDICAL CORPS OFFERS OUTSTANDING OPPORTUNITIES FOR GENERAL PRACTICE

with every facility for a varied professional career: good equipment,
good pay, good allowances, trained staff and generous leave

You may not know that the Army nowadays provides more women and children than soldiers as patients for its General Practitioners. But not only are the opportunities wide and varied: the conditions of service are such that they permit a professional man to work in a professional way. The R.A.M.C. provides modern surgeries with first-class equipment, trained staff to help; a car and driver. All general practitioners are given postgraduate training and have access to military hospitals.

Pay for a married Captain (the rank on entry) is over £2,000 with increases every two years and on promotion. Children's Educational Allowances are paid. A five year Short Service Commission earns a tax-free gratuity of £3,000, and there is excellent retired pay with Terminal Grant for those who go on to a career in the Corps. Six weeks' annual leave is normally granted, and reliefs are provided. Married general practitioners get a furnished house at low rental.

The "Battle of Britain" that's still being fought

The coming of winter once again underlines the disturbing fact that 15-20,000 people with respiratory symptoms will die during the next 6 months. The unceasing war against diseases of the bronchitis-asthma-emphysema group has plainly not yet been won.

About 30,000 deaths occur annually in Britain from bronchitis alone and the number shows no sign of decreasing. Deaths attributable to chronic bronchitis amount to nearly 10% of all deaths of men aged 45-64—more than from any other respiratory disease.

In another category—but none the less important—is the fact that bronchitis currently accounts for more working days off than any other illness.

Into combat—with tetracycline

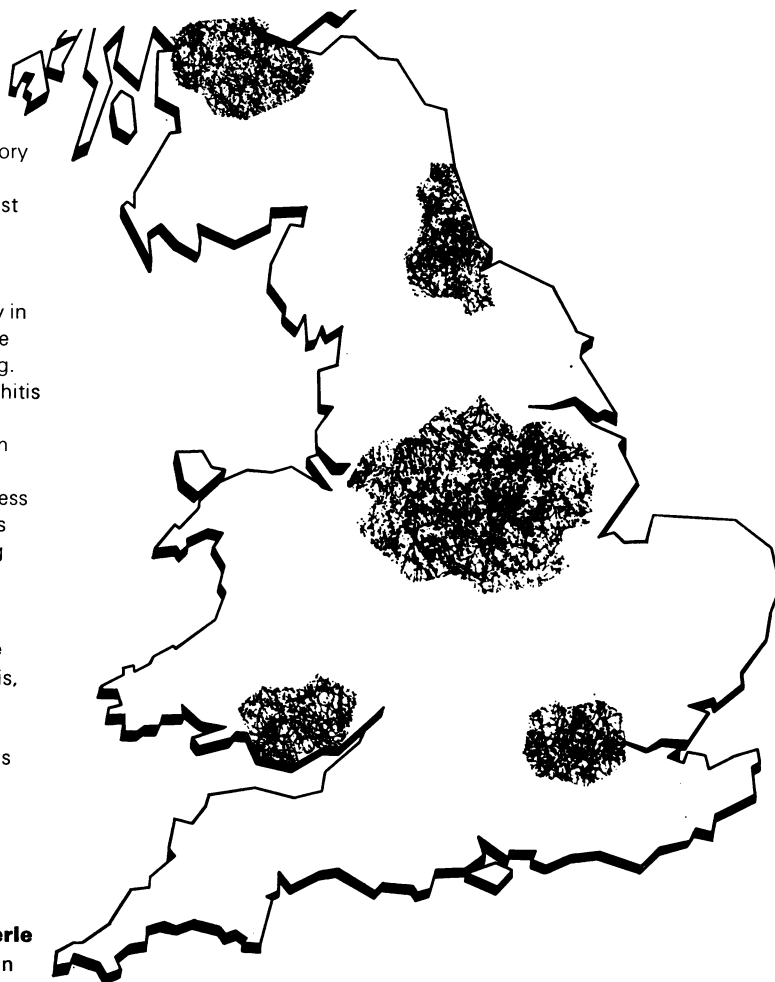

In the treatment of chronic bronchitis, current opinion advocates the employment of a drug capable of suppressing both the *Pneumococcus* and the *Haemophilus influenzae*. The one capable of doing this with safety is tetracycline. 1.

The most effective weapon— demethylchlortetracycline Lederle

The modern tetracycline—Ledermycin demethylchlortetracycline Lederle—has been shown to provide higher and more sustained antibacterial activity levels in the serum than other tetracyclines. Broad-spectrum coverage persists up to 48 hours after the final dose—a safeguard against stopping treatment too early. "Most clinicians are agreed that tetracycline is preferable to the oxy- and chlor- derivatives . . . demethylchlortetracycline may possibly become the treatment of choice." 2.

'MIGRIL' MASTERS MIGRAINE

It is paradoxical that ergotamine, accepted as the most effective drug against the headache of migraine, may cause nausea and vomiting—two of the very symptoms of a migraine attack.

'Migril' successfully overcomes these symptoms by the inclusion of cyclizine hydrochloride, the rapid-acting and effective anti-emetic.

Each 'Migril' tablet contains:

Ergotamine tartrate, B.P.	2 mg.
Cyclizine hydrochloride, B.P.	50 mg.

For greater simplicity in oral contraception...

Ovulen—the low dose oral contraceptive—now comes in this 3week wallet

Ovulen (brand of ethynodiol diacetate with mestranol) is the oral contraceptive with a progestin content of only 1 mg. per tablet. The new 3-week wallet means that Ovulen now combines the benefits of low dosage with a simple 3-week administration schedule. *This routine can be easily explained to the patient in a few minutes.*

SIMPLICITY The patient takes one tablet a day for 3 weeks, waits one week, then starts her next course of tablets. The complete 4-week cycle makes it easier for her to remember her 'pill routine', because her *starting day* will always be the same day of the week. Ovulen's low progestin content is consistently associated with a very low incidence of side effects.

For the majority of patients, oral administration of 'Indocid' (as capsules) is preferred, but in certain circumstances it may be desirable to give 'Indocid' as suppositories.

'Indocid' Suppositories may be useful:

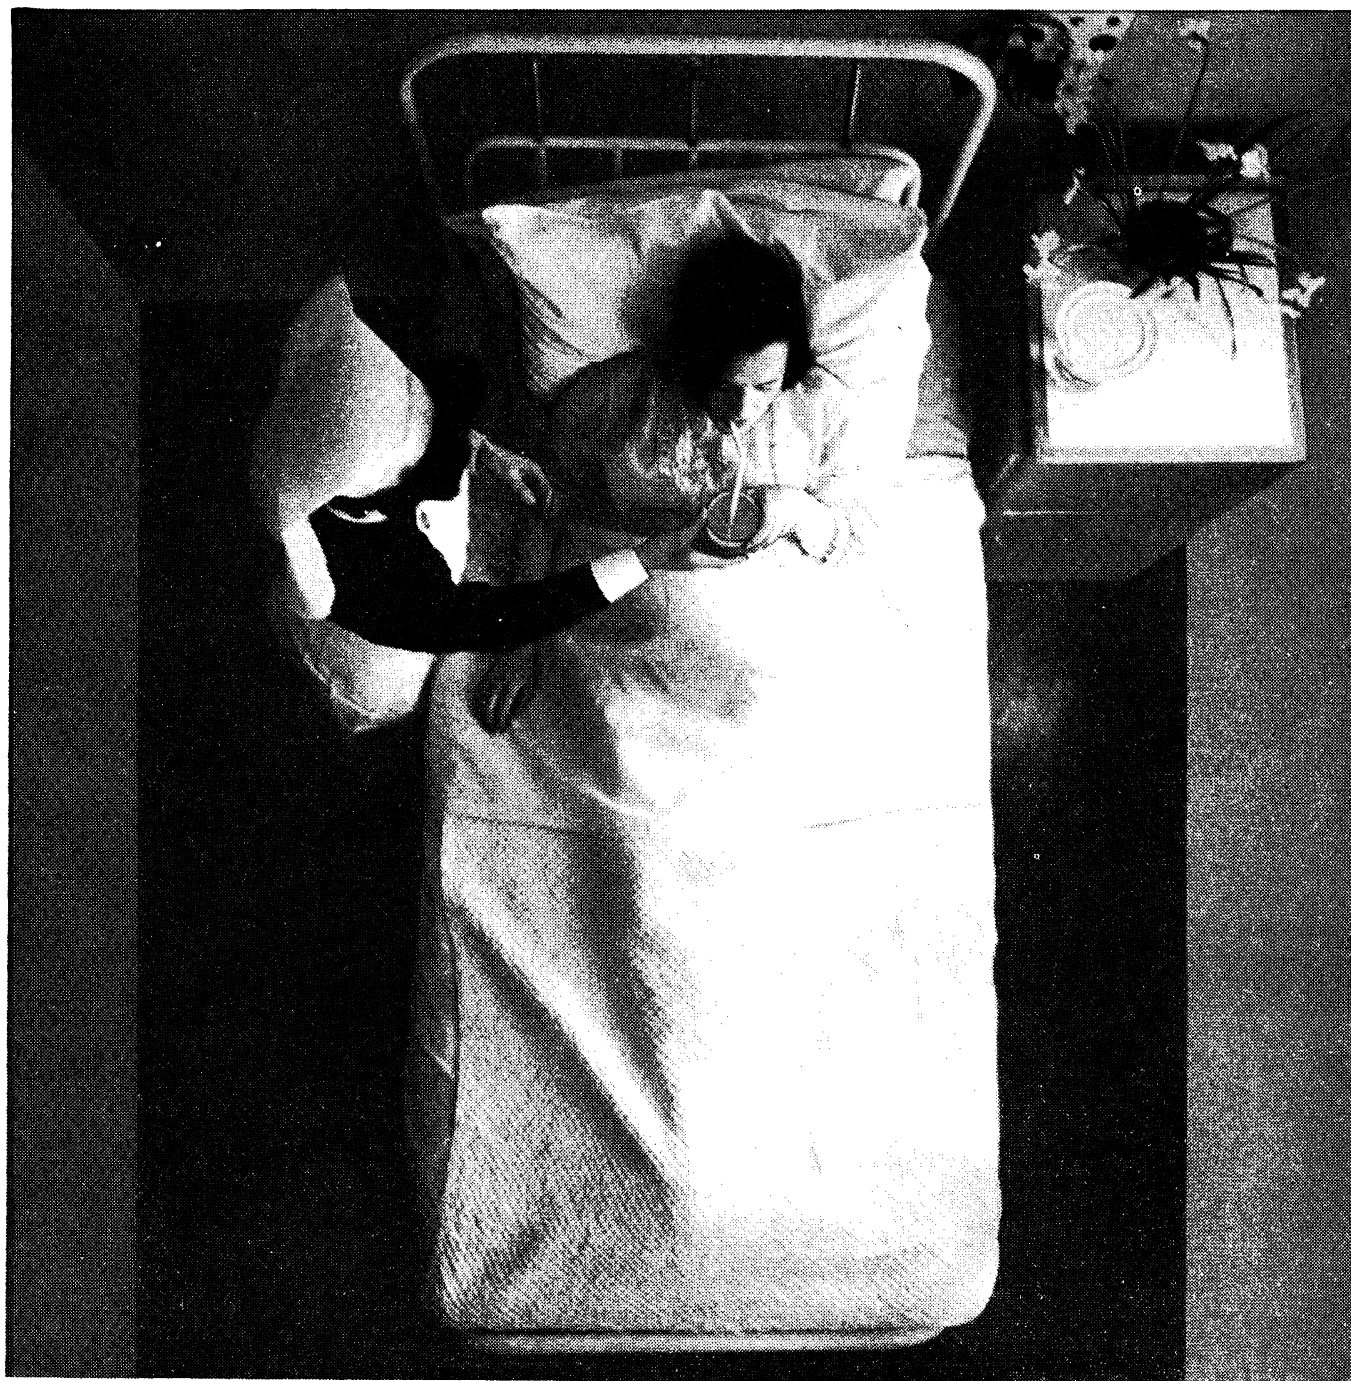

- in patients unable to tolerate an effective dosage of 'Indocid' by mouth.
- where it is desirable to administer a higher dosage of 'Indocid' than is possible orally.
- where relief of night pain and morning stiffness is particularly important. One suppository at bedtime will frequently give relief for 12 to 16 hours.

'Indocid' is supplied as 100 mg suppositories and 25 mg capsules.

ERYTHROCIN POWER|SAFETY|COVERAGE

for 8 out of 10 bacterial infections

seen by GPs in schoolboys (and their teachers)

ERYTHROCIN (erythromycin, Abbott) is a suitable first-line treatment for the majority of bacterial infections encountered in general practice. It provides powerful yet safe coverage against many causative organisms, leaving the broad spectrum antibiotics free for the specific cases in which they alone are effective.

ERYTHROPEL is the paediatric presentation of Erythrocin and offers the same advantages of power, safety and coverage.

POWER The potency of ErythropeL against the cocci is considerably more than that of tetracyclines or chloramphenicol.

SAFETY ErythropeL combines this potency with a remarkable degree of safety. It is, in fact, the least toxic and least allergenic antibiotic currently in use.

COVERAGE ErythropeL is effective in a high percentage of the common bacterial infections. Its wide clinical spectrum of activity covers most Gram-positive organisms—especially Staphylococci, Streptococci, Pneumococci and Clostridia—and Gram-negative organisms such as Neisseriae and some strains of Haemophilus influenzae.

By prescribing ErythropeL or the associated Erythrocin preparations by name, you ensure that your patients receive erythromycin in safe, well-absorbed forms that produce effective blood levels rapidly.

It *visually* demonstrates to the patient whether or not his diaphragmatic breathing technique is correct.

It strengthens abdominal muscles through *exercise*—thereby making the practice of diaphragmatic breathing more instinctive.

Expiratory ventilation of lungs is improved by the recoil-type thrust of the springs during exhalation.

The Gordon-Barach Support is an adjunct to diaphragmatic breathing. Special steel springs incorporated into the abdominal pad are compressed during inhalation when abdominal muscles are properly used. Increased tension of these compressed springs aids expiratory ventilation.

The invisible wedge that helps correct flat feet...

Do you recommend an external wedge? Those outside wedges soon wear away, and very often the child is made to feel self-conscious because his shoes look different from other children's. They also disturb the plane of forepart and heel. Surely it's more logical to have a wedge built in between the inner and outer sole where it remains invisible and completely unaffected by wear or repair of the shoe. That is how Start-rite INNERAZE shoes are made—on remedial lasts specially adapted to accommodate the internal wedge. That is why they are the only practical and thoroughly effective solution to this problem. Information from Mr. C. James, Fitting Consultant, James Southall & Co. Ltd., Crome Road, Norwich, NOR 80A. ACTHAR GEL

ACTH Gel BP

PROMPT RELIEF OF PAIN

Effective and Reliable

For over 15 years ACTHAR GEL therapy has brought new life to rheumatoid patients. It is still the most effective treatment and the most reliable long-acting corticotrophin available.

Safe Stimulation Therapy

ACTHAR GEL stimulates the adrenal cortex to release the full range of natural steroids, thereby avoiding the hazards of adrenal suppression associated with synthetic corticosteroid therapy.

The toxicity of the more potent analgesics is avoided and such side-effects as may occur are usually due to over-dosage. These are seldom serious and may be reversed by adjusting the dosage.

INCREASED MOBILITY

For Self-Administration

When the maintenance dose has been determined, the patient can easily be taught self-administration of ACTHAR GEL. Several thousand self-injections have now been given and many previously crippled patients have returned to, and remained at, their occupations.

For fuller details please write for the book "The Place of ACTHAR GEL in the Treatment of Rheumatoid Arthritis".

Glaxo brief

When the severity of infection demands urgent action...

... it is obviously desirable to begin treatment with an antibiotic which is bactericidal, broad-spectrum—and essentially safe. More than any other antibiotic, Ceporin (cephaloridine) measures up to these standards. It kills most gram-positive and gram-negative organisms quickly and completely, including the penicillin-resistant staphylococci. Such is the safety of Ceporin that it may be used with confidence not only in patients hypersensitive to penicillin, but even where renal function may be impaired. This combination of attributes—unique to

Ceporin—puts the treatment of severe infection on the safe side from the start.

To minimise the danger of potassium depletion during long-term diuretic therapy...

... Glaxo have added a generous potassium supplement to the reliable bendrofluazide diuretic Neo-NaClex. The newer preparation, known as Neo-NaClex-K, is presented in a unique two-tier tablet. The tablet is designed to overcome the problems of gastric disturbance and possible small bowel ulceration which are sometimes associated with a potassium supplement. Shortly after the tablet is swallowed, bendrofluazide is released from one tier; the diuretic dose is therefore promptly available. Thereafter, the potassium supplement is released very slowly from the second tier; this will usually ensure that most of the potassium passes

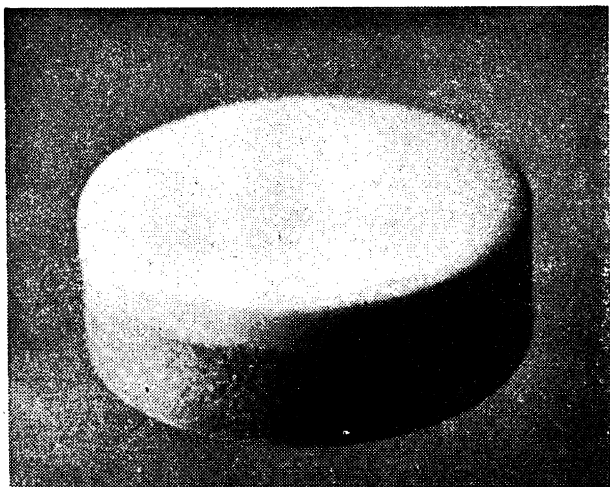

the stomach before dissolving and that no great local concentration of potassium is reached on its passage through the intestine.

When a potassium supplement is unnecessary, plain Neo-NaClex will provide smooth, sustained diuresis on one dose a day.

Betnovate widens the scope of topical steroid therapy

The excellence of Betnovate (betamethasone 17-valerate) in treating psoriasis and eczema of all types has now been firmly established. The evidence from extensive clinical trials—"that a better response is more likely with betamethasone 17-valerate than with any of the other corticosteroids tested"—has been fully substantiated by the outstanding results obtained with Betnovate in hospital and general practice. Used increasingly for many conditions other than psoriasis and eczema, Betnovate has also been shown to produce a better response throughout the whole range of steroid-responsive dermatoses. The majority of such skin disorders can in fact be treated satisfactorily by simply applying a Betnovate preparation once or twice daily.

Enhancing the benefits of betamethasone: Betnesol—the corticosteroid tablet patients drink

One of the most active steroids available for clinical use, betamethasone is nevertheless designed for safer systemic therapy. Treatment carries virtually no risk of oedema and hypertension—the reduced mineralocorticoid activity of betamethasone produces minimum disturbance of electrolyte balance—and there is no mental depression from the steroid. Betamethasone is also relatively well tolerated by the stomach. However, gastric tolerance—and the general therapeutic efficiency of the steroid—are greatly enhanced when the water-soluble phosphate (Betnesol) is used. Dropped into a glass of water

the Betnesol Tablet effervesces quickly to form a clear true solution which is easily administered as a drink, thus achieving consistent absorption. Local irritation of the stomach wall is avoided by having no solid steroid particles and the efficiency of absorption is reflected in a better, more predictable therapeutic response.

As the incidence of strep. throat increases in winter — so does the use of Crystapen

Today, more than ever, penicillin G is the drug of choice for beta-haemolytic streptococcal infections—many of which are now proving to be tetracycline-resistant. Much more economical than the newer penicillin derivatives, it still yields nothing to them in therapeutic effectiveness. For throat infections caused by beta-haemolytic streptococci therefore, the obvious choice is oral penicillin—and that means Crystapen, the Glaxo penicillin (G or V). Glaxo has a background of more than twenty years' penicillin manufacturing experience and Crystapen has proved reliable in the treatment of millions of patients. This is why the use of Crystapen grows as the strep. throat season advances.

SALURIC

Chlorothiazide BP

HydroSALURIC

Hydrochlorothiazide BP

The standard thiazide diuretics, 'Saluric' and 'HydroSaluric', have established their place in the treatment of oedema. Wide use in hospital and general practice over many years reflects their dependability. From the 1st October 1965, by arrangement with the Ministry of Health, chlorothiazide and hydrochlorothiazide became officially available in all British hospitals as the original products 'Saluric' and 'HydroSaluric'.

'Saluric' is available as tablets containing 0.5 G chlorothiazide BP and 'HydroSaluric' as tablets containing 25mg and 50 mg hydrochlorothiazide BP. 'Saluric' and 'HydroSaluric' are registered trademarks.

Triominic

Oral Nasal Decongestant **WANDER**

'Triominic' timed-release tablets and orange-flavoured syrup contain antihistamines and a decongestant in balanced proportions to ensure relief from nasal congestion for between 6 and 8 hours. The active constituents of 'Triominic'—the original *oral* decongestant—reach the nasal mucosa systemically. This obviates the rebound congestion which may follow the topical use of decongestants.

Formula per timed-release tablet.

Phenylpropanolamine hydrochloride.....	50 mg.
Mepyramine maleate B.P.....	25 mg.
Pheniramine maleate.....	25 mg.

Part I S.7

'Triominic' is also available
as an orange-flavoured syrup.
Basic N.H.S. prices: 50 tablets 5/9½;
4 fl. oz. 2/2 (ex dispensing packs).

ANTIBIOTICS AND THE INTESTINAL FLORA

Treatment with broad spectrum antibiotics suppresses the normal flora, which may be replaced by abnormal resistant organisms causing diarrhoea.

This change can be prevented or reversed by the implantation of *Lactobacillus acidophilus* which has been rendered antibiotic-resistant, and is thus able to multiply freely under these abnormal conditions. The products of growth of the organism are inimical to that of many other bacteria^{1,2} and thus contribute to its rapid preponderance over other species.

Oral treatment with antibiotic-resistant *L. acidophilus* in the form of ENPAC has been shown to eliminate *Candida* from the faeces of infants with antibiotic-induced diarrhoea, with relief of symptoms succeeded by rapid gain in weight^{3,4} and greatly to reduce the numbers of staphylococci in the faeces of patients treated with tetracyclines.⁵

MEDICAL RESEARCH COUNCIL JUNIOR RESEARCH FELLOWSHIPS 1966-67

The Medical Research Council invite applications for Junior Research Fellowships, tenable at centres in the United Kingdom during the academic year 1966-67.

The Fellowships will ordinarily be restricted to British subjects resident in the United Kingdom who intend to make their career in medical or dental research in the United Kingdom. The awards are intended primarily for medical graduates who have completed their pre-registration hospital appointments, or for young dental graduates of similar standing. They will also be open to science graduates with postgraduate degrees who wish to have a further period of specialized research experience; preference will be given to those candidates who wish to hold their fellowships in departments other than those in which they studied for their first and postgraduate degrees.

The awards will be made for a period of one year in the first instance and will be renewable annually up to a maximum of three years in all, subject to satisfactory progress. The initial stipend will be between £1,085 per annum and £1,310 per annum, according to the successful candidate's age, qualifications and experience, with superannuation provision in addition. The stipend will be reduced if the Fellow holds at the same time an award from another body to enable him to carry on the same work. Further particulars, and forms of application for these Fellowships, may be obtained from the Secretary, Medical Research Council, 20 Park Crescent, London W.1, to whom the completed form should be returned not later than March 1, 1966. UNIVERSITY OF CAMBRIDGE
SCHOOL OF CLINICAL RESEARCH AND
POSTGRADUATE TEACHING

1. Two six-day postgraduate courses specially planned for general practitioners will be held at Addenbrooke's Hospital, the United Cambridge Hospitals and Papworth. (1) from July 4 to 19, 1966; (2) from July 11 to 16, 1966. These will consist mainly of lectures, discussions and clinical demonstrations. Accommodation for doctors attending will be provided in Downing College, close to the hospital. Enrolment forms and particulars of grants for the course fee (£9 12s. 6d.), travelling subsistence and lodging expenses under the Ministry of Health scheme may be obtained from the Secretary of the Medical School, Tennis Court Road, Cambridge.

A refresher course in family psychiatry will be held in conjunction with the East Anglian Regional Hospital Board at the Department of Family Psychiatry, Ipswich and East Suffolk Hospital from March 28 to April 1, 1966. The principles of family psychiatry will be demonstrated. There will be sessions on the management of family psychopathology including family group diagnosis and family group therapy as developed in this department. Special emphasis will be given to vector therapy in the management of family problems. The aim is to present all the features of a family psychiatric service based on the principle of the family as the functional unit throughout the clinical procedure. The fee is £8 8s. Provisional application should be made to the Department of Family Psychiatry, 23 Henley Road, Ipswich, at once. Final confirmation should be made not later than March 1, 1966. (6516)

UNIVERSITY OF EXETER
Postgraduate Medical Institute

A full-time postgraduate course lasting 10 weeks will begin on April 20, 1966. These courses are held three times a year starting in October, January and April. Each course includes instruction in general medicine, paediatrics, preventive medicine, pathology, psychiatry, orthopaedics and general surgery. The programme is planned so that students wishing to specialize in a particular clinical subject are given facilities to do so, while other students receive teaching in each of the main clinical departments in turn. Unpaid clinical attachments can be arranged at the end of the course for students requiring a longer period of training.

Further particulars, and application forms for these courses are obtainable from the Director, The Postgraduate Medical Institute, The University, Exeter, Devon. (6537)

ROCHE

CLINICAL RESEARCH

We have a vacancy for a Medical Officer, to be based on our Clinical Research Department at Welwyn Garden City, Hertfordshire. Some travelling in this country will be necessary in connection with the duties of the post, which concern the initiation and supervision of clinical trials on the products of Roche research. We are looking for a man who has a good understanding of the pharmacological and biochemical basis of drug action and who would now like to apply his knowledge to the broader aspects of clinical research. A working knowledge of German and some understanding of statistical methods would be additional advantages. A good starting salary will be negotiated, and is thereafter subject to annual review; there is an exceptional contributory pension scheme, and other conditions of service are also attractive.

Interested medical practitioners should write, in confidence, to the Staff Officer at:

ROCHE PRODUCTS LIMITED
15 MANCHESTER SQUARE LONDON W1 (H.4516)

MEDICAL ADVISER

Applications are invited from male registered practitioners for the position of Medical Adviser in the Pharmaceutical Division of PFIZER LIMITED. The person appointed will be responsible to the Director of Medical Services and will be mainly concerned with the initiating and progressing of clinical trials for products which are already on the market.

The Medical Adviser will also be concerned with the maintenance of an advisory service to practitioners on various aspects of the Company's products and, in addition, he will assist in the training of medical representatives.

The person appointed will be preferably between the ages of 27 and 35 and will have had experience in general practice and hospitals. Salary will be commensurate with the qualifications and experience of the successful applicant and also with the responsibility of this important position.

Attractive fringe benefits will include non-contributory pension and life assurance schemes, a profit-sharing bonus scheme, and the payment of removal expenses.

The Company is located at Sandwich on the East Kent coast in an area offering attractive residential facilities.

Applications, giving details of age, education, professional experience and salary, quoting reference G 2109, should be addressed in strict confidence to:

ST. ANDREW'S HOSPITAL,
NORTHAMPTON
FOR NERVOUS AND MENTAL
DISORDERS

President: The Earl Spencer

Medical Superintendent: Dr. J. O'Connell, M.D., D.P.M.

This private hospital receives patients, both male and female, suffering from nervous and mental disorders, including alcoholism and senile illnesses. The fees range from eighteen guineas per week. Private rooms with special nurses can be provided, either in the hospital or in one of the villas in the grounds. The hospital is situated in 130 acres of pleasant grounds which provide all recreational facilities. These include a nine-hole golf course, sports ground, tennis courts, etc. A Recreation and Occupation Centre, known as Gloucester House, has been opened recently which includes an occupational therapy department, a swimming pool, a squash court, and a library with an adjoining reading room.

WANTAGE HOUSE

This is a separate reception unit to which patients may be admitted. It is equipped for the complete investigation of nervous and mental disorders by the most modern methods. All forms of treatment are available.

MOULTON PARK

Some two miles from the main hospital is the farm of approximately 600 acres. Occupational therapy is a feature of this branch. For terms and further particulars, apply to the Medical Superintendent (Telephone No.: 34354 Northampton) who can be seen in London by appointment.

and they all had
a good night's sleep
on one teaspoonful of
Pholtex

eight to ten hours' cough relief from one teaspoonful

Night coughing disturbs not only the cougher but also other members of the household. Each teaspoonful dose of *Pholtex* is effective for up to *ten hours*, long enough to ensure that sleep — for everyone — is undisturbed by troublesome cough.

The characteristic smooth and extended action of *Pholtex* results from ion-exchange release of the constituents — the cough depressant pholcodine and the antihistamine phenyltoloxamine. Because cough relief is prolonged, two or three doses daily are usually adequate and 2 fl. oz. can provide a week's treatment.

Pholtex is ideal for paediatric use. It tastes pleasant and is easy to administer — even to infants.

Dosage: one teaspoonful (4 ml.) two or three times daily. (Children half to full adult dosage, according to age.) Each teaspoonful contains pholcodine 15 mg. and phenyltoloxamine 10 mg. as ion-exchange resin complexes.

PHOLTEx

Pholtex: registered trade mark

Basic NHS cost: 2 fl. oz. 5/0d. 20 fl. oz. 47/4d.
