## How many rheumatics today?

Probably several. Even more probably, they've visited you before—and they'll come again. You will want to prescribe a really effective treatment. Consider Aspellin. It is a spirit based liniment containing acid acetylsalicylic for fast relief of symptomatic pain, and methyl salicylate with menthol and camphor, for reduction of inflammation and muscle tension.

Remember rheumatism sufferers can only obtain Aspellin if you prescribe it. Aspellin gives you the chance to help them—eases your work load—and costs less than 1/- oz. dispensed.

## MINI-PULSE MONITOR FOR HEART PULSE INDICATION

This small simple instrument gives immediate warning of impending failure of the circulation. It has been in use in operating rooms of hospitals for many years in fourteen countries and is now redesigned for use by Doctors and Dental Surgeons. A small pressure transducer is applied to the finger of the patient and retained by a tension strap. The instrument is switched on and thereafter each heart beat is indicated on a meter placed in view of the Surgeon or Anaesthetist. Weakening or irregularities of the heart beat are apparent at once and allow action to be taken at an early stage. The instrument is powered by a small torch battery obtainable everywhere and in normal use lasts several months. Full technical details on request.

Sanborn's new Modular System adapts easily

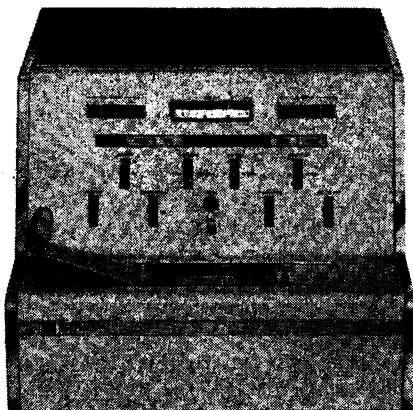

At the bedside . . . . . Individual modules form intensive care systems which fit the specific requirements of critical patients. Any bedside module grouping may be easily extended in capability through the addition of other fully

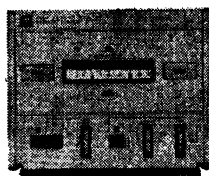

compatible units from Sanborn. Important patient variables, such as ECG, heart rate, temperature, respiration, systolic and diastolic pressures may be indicated and recorded. Units are also available for automatic pacing or synchro-

nized defibrillation. Remote alarms may be included to provide an immediate indication when a patient variable has exceeded individual limits established by the attending physician.

to changing intensive-care needs

At the central station . . . . . Data displays and patient distress signals enable one nurse to give complete attention to as many as eight critical patients in an intensive care or recovery room. A group of parameters, such as temperature,

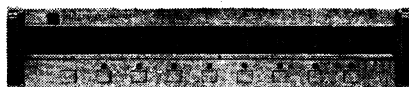

blood pressures, heart rate, and respiration can be simultaneously monitored while distress signals for any of a wide variety of patient parameters can be included at a central point. Also the recording of various physiological signals can

be accomplished without any disturbance to patients. All modules in the Sanborn 780 program have a high degree of built-in reliability which is assured through the use of all solid state components and careful circuit design.

# ALAVAC

*7-dose courses for the safe and effective  
treatment of allergy*

Alavac is the name for the Bencard Allergy Unit's range of adsorbed (pyridine-extracted, alum-precipitated) desensitising vaccines.

- ☐ **Only 7 injections** are required for a full course of treatment.
- ☐ **Effective protection** may be expected in 80 – 90 % of patients.
- ☐ **Optimum safety** because allergens are released slowly.
- ☐ **Even very sensitive patients** can tolerate effective doses.
- ☐ **Co-seasonal therapy** can be practised with confidence.
- ☐ **Simple to administer** from a new style treatment set complete with disposable syringes (+special finger-grip).
- ☐ **Above all, desensitisation is preventive – not merely palliative**

The Alavac range of vaccines provides desensitisation against a wide variety of common allergies:

**ALAVAC-P** standard grass pollen vaccine indicated for classical hay fever and pollen asthma; prepared from 12 varieties of common grass pollens (Bencard group B2).

**ALAVAC-D** standard house dust vaccine indicated for non-seasonal asthma and perennial rhinitis.

**ALAVAC-S** individually formulated specific vaccines, prepared from any one or more of a wide selection of adsorbed allergen extracts, in any desired proportion.

Literature, giving full details of the Alavac range (and including recommendations for their use) is available on request.

It is estimated that this year even more people than ever will be taking their holidays overseas. Also in many cases they will be able to reach their destination even faster than before as there is a considerable increase in the number of jet airliners that will be in service. Super VC 10s, 707s, Tridents and even the BAC 111 will be speeding to resorts literally throughout the world.

All the airlines seem to be making a tremendous effort to encourage tourists to visit far off places at inclusive but relatively inexpensive cost. Prices include hotel accommodation, excursions and meals. The number of meals is normally limited to breakfast and dinner, but this does not really matter as in hot climates or when sight-seeing a light lunch is all that is necessary or good for you.

Apart from the increase in the "get there quickly" method there will be a further improvement in car ferry services. New and larger ships, extra harbour facilities on the Continent as well as in this country will considerably speed up, in a more leisurely way, transport of cars to the Continent.

Motoring in France can be quite a hair-raising experience, particularly as so many cars are merely "birds of passage" en route to Spain or Western Europe. Fortunately they stick to the national routes but for pleasant motoring there are some excellent minor roads running East or West that provide many attractions. One can, for instance, follow the line of such rivers as the Loire, Garonne or Dordogne and these give a pleasant mixture of seaside, beautiful

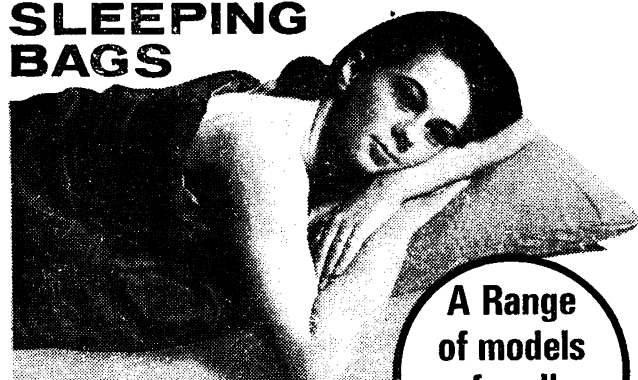

## ARE YOU AN INDIVIDUALIST?

Do you prefer to blaze your own holiday trails, avoid the beaten tourist track? Then you think as we do. We have travelled across Europe, North Africa, the Near East, America and the West Indies, searching not for cliché-ridden "pearls set high above shimmering seas", but for honest hotels offering comfort and value for money in pleasant uncrowded places. Many of these we offer exclusively. We do not offer "mass arrangements" or chancy charter flights — all our holidays are based on travel by scheduled IATA airlines (or rail and sea if you prefer). Our modest, sensible brochure "Holidays for the Individual" describes as fully as we can the places we have enjoyed discovering, and feel that you will too. The chief holiday requirements of most people are sunshine, good food, modern hotels and safe sandy beaches for sun and sea-bathing during the day and places of amusement for the evening. There is, therefore, no wonder that Italy is so popular. Alassio, Rimini, Cattolica, Sorrento, and the Lido de Jesolo are among the many gay resorts that are superbly suitable for holidays of this nature. The tourist attractions of Rome, Venice and Naples are all within easy reach of some resort.

Islands have a great attraction for many holiday makers, possibly because they have an atmosphere peculiarly their own. Cut off from the world the inhabitants and the visitors can, in theory at least, live their lives in much greater freedom. The venturesome can go to Iceland, the wealthy to the West Indies, but for most such islands as Capri, Corsica, Sicily or Malta have to suffice and this they do most admirably.

As the world grows smaller—travel wise—fashions are changing and now you do not hear the casual remark of the few about "my little cottage in the country" quite so frequently. Its place has been taken by the many who refer to their villa in Spain, their flat in Majorca or their "little place" in Malta. Undoubtedly this new trend has many advantages both as an investment for the present—rentals can help to pay the mortgage or repay capital—or for the future and thoughts of spending one's retirement in the warm sunshine where the cost of living is generally much lower.

### Cures in the Bavarian Spas serve to prevent illness, to aid Treatment and Convalescence

Reports about the restorative powers of balneo- and climatotherapy are at hand from all epochs of recorded history. — The up-to-date installations in the 32 Bavarian Spas, where the cure may be taken by drinking, bathing or by inhalation, are the result of medical and scientific research work. — The successful application of the natural healing powers of waters and climate require discriminative therapeutic methods. For this reason the cures are under the strict supervision of experienced spa physicians (balneologists.) — **Additional and supplementary methods of treatment in use are:** Kneipp hydrotherapy, special diets, graduated walking exercises, electrotherapy, breathing exercises, physiotherapy, and massage.

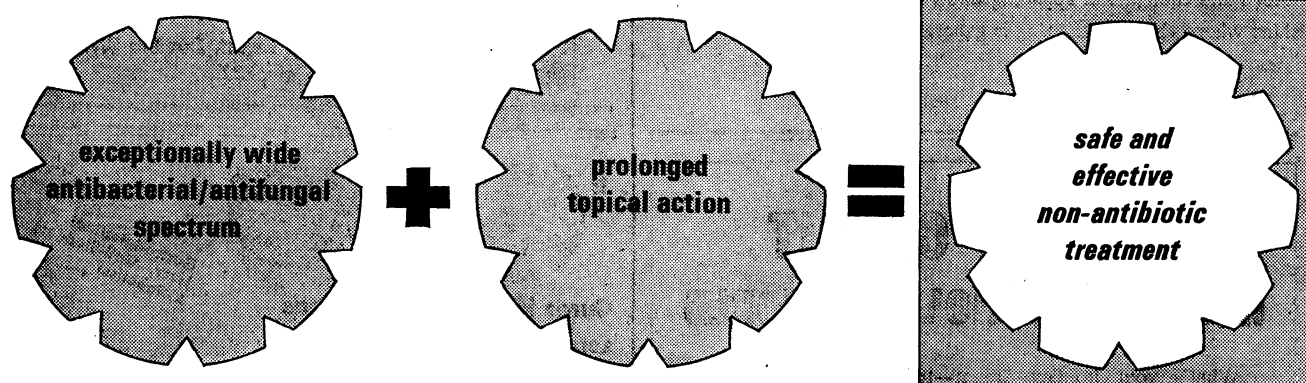

Change of environment, freedom from everyday worries, physical exercise in beautiful surroundings, and constant care inspire a sense of well-being in the patient that contributes to his recovery.

# extending the reach of diuretic therapy

# Edecrin

ETHACRYNIC ACID

REGD

## an entirely new class of diuretic

'Edecrin' extends the reach of diuretic therapy because of its multiple sites of action in the nephron. 'Edecrin' not only acts on the proximal and distal convoluted tubules, but more importantly, also on the ascending limb of the loop of Henle. This unique mode of action is reflected clinically in its effectiveness in many patients resistant to all other diuretics.

'Edecrin' is chemically and pharmacologically distinct from all other diuretics in current use. It has a wider range of effectiveness than the thiazides, and may be used in oedema of all grades of severity, whether acute or chronic. 'Edecrin' produces a more favourable ratio of sodium to potassium excretion than the thiazides, and has an extremely rapid onset of action—four times as fast as parenteral mercurials. 'Edecrin' has been intensively investigated for more than three years, and already many papers have been published in this country and abroad.

'Its effect may be dramatic in some patients previously unresponsive to other diuretics . . . ' *Brit.med.J.*, 1963, 2, 1169 (9 Nov)

'A powerful diuretic, it should be valuable for treating patients with oedema, both at home and in hospital.' *Lancet*, 1964, i, 947 (2 May)

**PENBRITIN**  
brings renewed hope to  
the Chronic Bronchitic...

...whatever the severity of the condition

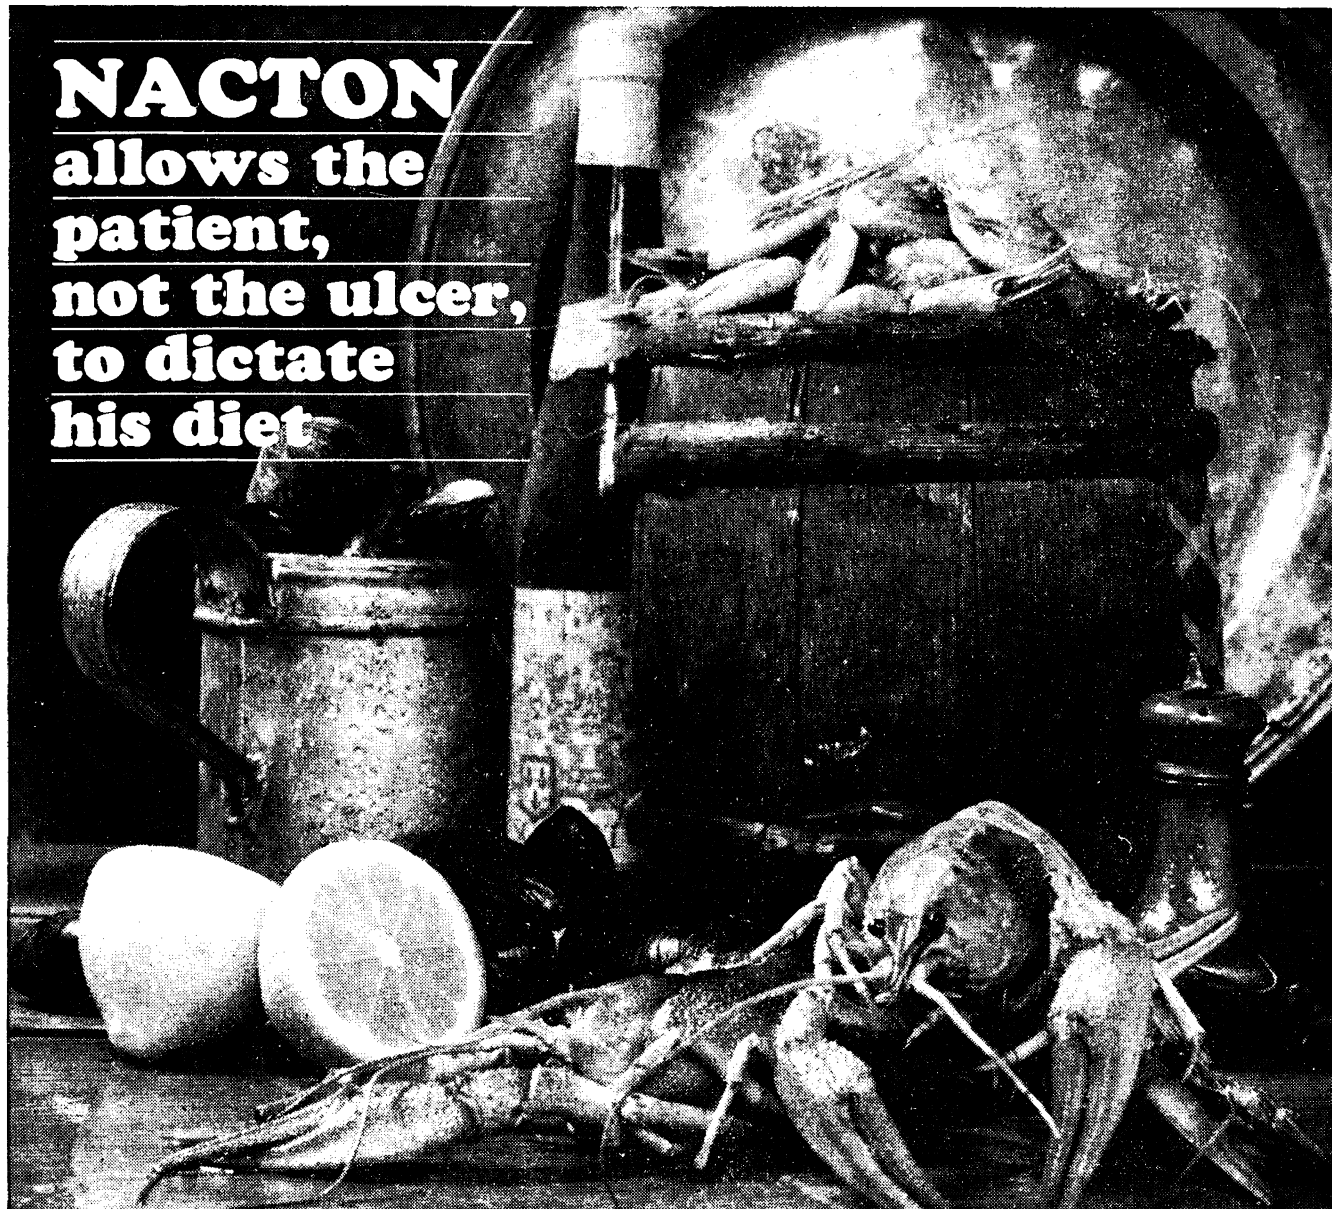

One Penbritin capsule four times a day for a week or more brings an excellent response in the majority of patients, reducing the volume of sputum and the severity of exacerbations. When other antibiotics fail, four Penbritin capsules four times a day for a week or more usually provide effective treatment for advanced bronchitic patients, including those with extensive bronchiectasis. Used in this way, Penbritin is also successful in clearing the sputum of those winter-long purulent cases which would otherwise require continuous antibiotic cover. Early relapse is uncommon and many patients remain free from further infection for as long as two to three months after treatment.

One man's meat (or fish!)...

Are delectable foods barred to your ulcer patients?

Once control is established with NACTON, more pleasures of the table can be enjoyed. How does NACTON achieve this control?

- ☐ It halves gastric secretion of acid
- ☐ and reduces gastric and intestinal spasm.

With this established, the patient can:

- choose his own food
- gain prolonged relief from pain
- get a good night's rest
- do away with milk and cream diets
- reduce or eliminate antacid consumption
- lead a normal life.

---

**PRODEXIN** tablets give all the benefits of continuous intragastric drip therapy<sup>1</sup> without any of its disadvantages.

The slow suck down tablets are specially formulated to give prolonged antacid buffer effect, unaffected by stomach emptying rate.<sup>2</sup>

Immediate relief of pain is achieved by rapidly raising pH to 2 neutralising excess acid and controlling the acid secretion by slowly building up the pH to a desirable level of pH3.5 and pH4.5

### **DOSAGE:**

For continuous therapeutic effect one tablet at a time should be sucked slowly.  
For peptic ulcer one or more tablets an hour.

# PAYNOCIL\*

## in the short term treatment of Influenza and the Common Cold

Some analgesics are more effective than others. Some are more palatable. Some produce a faster action. PAYNOCIL has these advantages, combining the effectiveness of aspirin with palatability and giving rapid relief of symptoms.

---

Each Paynocil tablet contains ten grains of acetylsalicylic acid—double the usual amount—in a glycine base, thus halving the number of tablets needed daily.

---

Paynocil disperses easily in the mouth and can be taken anywhere, any time, without water immediately the first symptoms are felt.

---

The aspirin enters the stomach in finely divided particles and acts within minutes of swallowing.

---

Dosage: One tablet when necessary.

Contra-Indication: Paynocil should not be given when aspirin is contra-indicated.

## for ageing arteries

Cyclospasmol (cyclandelate) has been shown valuable in the treatment of the elderly and delicate patient with chilblains, cold hands and feet, intermittent claudication and leg-cramps.

Concomitant cerebrovascular disorders such as mental confusion, passing strokes and memory loss also benefit from Cyclospasmol therapy.

**Cyclospasmol is an accepted, safe and effective vasodilator, it produces no variation in bloodpressure or heart rate and may be given even in the presence of coronary vascular disorders.**

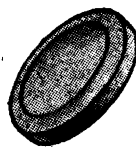

The dosage is usually 4 x 200 mg. daily, but may be raised to 1600 mg. with safety. Maintenance dosage is 400 mg. daily.

# Nulacin and only Nulacin provides intragastric milk-alkali drip therapy for the ambulant patient

*“In view of the ineffectiveness of most of the tableted antacids, the milk-alkali tablet (Nulacin) would appear to be the antacid of choice for ambulatory therapy.”*  
Med. Times, N.Y., 1958, 1, 74

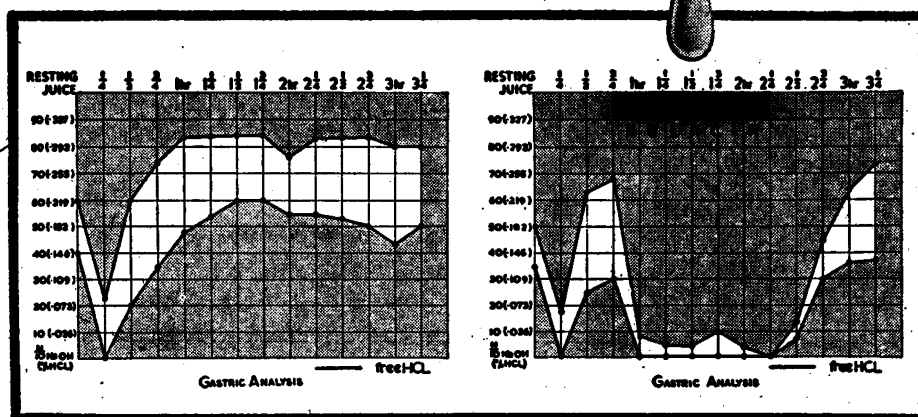

## Safe, Simple, Effective

NULACIN TABLETS provide a safe, simple and effective treatment of peptic ulcer.

In treating peptic ulcer a Ryle's tube may be passed through the nose and into the oesophagus and a mixture of milk and antacid allowed to flow continuously over the affected area. This form of therapy can only be employed in those patients who are in bed and for the ambulant patient Nulacin tablets are preferable. Nulacin tablets are prepared from whole milk combined with dextrins and maltose, together with the trisilicate, oxide and carbonate of magnesium and calcium carbonate. Nulacin tablets when allowed to dissolve slowly in the mouth provide milk-alkali drip therapy. In fact, Nulacin tablets have revolutionized the treatment of peptic ulcer.

# POWER SAFETY COVERAGE **ERYTHROCIN®**

**ERYTHROCIN (erythromycin, Abbott)** is a suitable first-line treatment for the majority of bacterial infections encountered in general practice. It provides powerful yet safe coverage against many causative organisms, leaving the broad spectrum antibiotics free for the specific cases in which they alone are effective.

**POWER** The potency of Erythrocin against the cocci is considerably more than that of tetracyclines or chloramphenicol.

**SAFETY** Erythrocin combines this effectiveness with a remarkable degree of safety. It is, in fact, the least toxic and least allergenic antibiotic currently in use.

**COVERAGE** Erythrocin is effective in a high percentage of the common bacterial infections. Its wide clinical spectrum of activity covers most Gram-positive organisms—especially Staphylococci, Streptococci, Pneumococci and Clostridia—and Gram-negative organisms such as Neisseria and some strains of Haemophilus influenzae.

By prescribing Erythrocin preparations by name you ensure that your patients receive erythromycin in safe, well-absorbed forms that produce effective blood levels rapidly.

# Even the wrapper typifies Tampax convenience

Women dislike fumbling with cumbersome menstrual protection devices. At a time when nerves are already on edge, difficulties seem to magnify with the pin-pad-belt routine. Tampax, on the other hand, is immediately available for instant use – merely pull the handy tear-thread in the linen-paper wrapper and there it is, ready for simple, efficient insertion into the vagina.

This wrapper has hygienic importance, too. Not only does it assure complete cleanliness, but it enables the user to carry spares in her handbag, or special Tampax handbag container, with assurance that they will remain hygienic right up to the moment of need.

Your patients will welcome the tidy convenience of Tampax and will soon recognise, as have millions of other women around the world, its many other advantages. With Tampax, the problem of menstrual odour is virtually eliminated. It is easily disposable by flushing away, as are the container-applicator tubes, so necessary for correct and easy insertion. Bathing and showering are made aesthetically possible. Even sitting and walking are more comfortable.

If you have patients who are having psychological or emotional difficulties over menstruation, perhaps you can ease their problems by recommending Tampax. Its use, comfortable and practical as it is, can improve a woman's or girl's whole attitude toward the complex of menstruation.

Tampax is available in Regular and Super absorbencies to meet the varying needs during the menstrual period.

The co-operation of doctors in this respect is urgently needed, if the Society is to continue successfully with its work.

If you have a patient who is suffering from Multiple Sclerosis, and you decide that it would be in his best interest to apprise him of the fact, the Society will be grateful if you tell him of the work it is doing; how it can, if he so desires, through his local branch, put him in touch with other people similarly afflicted and generally help with his welfare.

Durabolin and Deca-Durabolin stimulate tissue-building and counteract nitrogen loss in many clinical conditions. The effect in osteoporosis and in advanced breast cancer is often marked, leading to an improvement in the patient's general condition, relief of pain and a regression of specific symptoms. Other conditions in which these preparations are useful include severe debility, post-operative catabolism, severe trauma, slow-healing fractures, burns and renal failure—in all these, the correction of an adverse nitrogen balance helps in the patient's recovery. Durabolin is ideal for initial therapy: it is normally given at weekly intervals. Deca-Durabolin is a longer acting form which is ideal for maintenance therapy: it only needs to be given every three weeks.

# For young doctors: clinical freedom, modern equipment and complete medical responsibility. Where?

On land and sea. At home and overseas, as a Medical Officer in the Royal Navy.

Here is a medical career that can give you more scope and responsibility than most doctors get in civilian life—while still in your mid-twenties.

You will have the most modern equipment; clinical freedom; the opportunity to gain wide experience, both in the traditional fields of medicine and in the new sciences of nuclear, underwater and aviation medicine. And you could study for higher degrees, specialise in one of many medical subjects and even aim for consultant status—all at the expense of the Royal Navy.

But you're more than a doctor. You're a Naval Officer too. You lead an active, varied life; have a very special status; exceptional opportunities for sport, travel and the outdoor life. And your pay and prospects are excellent. For example, your *starting* salary would be considerably higher than that of a civilian hospital registrar. And marriage and other allowances can add considerably to your income. You enter initially for a Short Service Commission—with the opportunity of a Permanent Commission after 1 year.

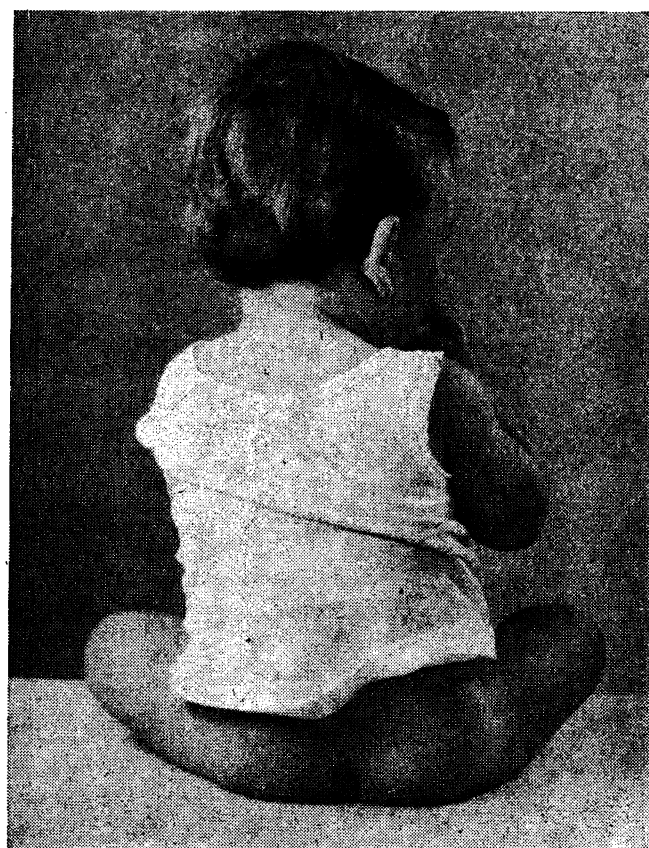

## 3 Ways of Entry

1. As a fully registered doctor; any civilian experience counts towards your seniority.
2. During your pre-registration year.
3. As a student any time after passing 2nd M.B. For fully registered women doctors there is a special Short Service Commission.

If you would like more information, write to the address below, giving details of your age and qualifications. A personal interview can be arranged if desired.

**If she rejects  
support stockings  
because  
they're

recommend  
Supp-hose®  
(they're *sheer*)**

Only her face will show that she's wearing Supp-hose. Many women reject support stockings because they think that such a stocking is thick and unattractive. Consequently they are prepared to sacrifice their health for the sake of their appearance. But this is where Elbeo Supp-hose stockings have a tremendous advantage; they look scarcely any different from everyone else's nylon stockings. They are made in fashionable colours—seamed or seamfree. They are sheer, unbelievably sheer for the strong support they give. Yet they give as much relief as the thicker type of support stocking and are entirely acceptable from a medical point of view.

**Medically beneficial.** Made in nylon yarn, specially coiled, twisted and fixed before the stockings are knitted, Supp-hose

stockings provide adequate compressive elastic support which is maintained over months of wear and washing. This makes them suitable for venous states of the lower extremities causing oedema and requiring elastic support. Supp-hose stockings will relieve, significantly, the symptoms associated with varicose veins, the post-phlebitic phenomenon or chronic venous insufficiency. Supp-hose can also be recommended to patients suffering from the condition termed 'tired legs', particularly during pregnancy.

**ELBEO**

Thousands of women are wearing Supp-hose stockings. Each year we receive dozens of enthusiastic testimonials. A report on clinical trials—and information about sizing—will gladly be sent on request. Write to Dept BM1, Elbeo House, Woodborough Road, Nottingham.

## Postgraduate Medical Institute

A full-time postgraduate course lasting 10 weeks will begin on April 20, 1966. These courses are held three times a year starting in October, January and April. Each course includes instruction in general medicine, paediatrics, preventive medicine, pathology, psychiatry, orthopaedics and general surgery. The programme is planned so that students wishing to specialize in a particular clinical subject are given facilities to do so, while other students receive teaching in each of the main clinical departments in turn. Unpaid clinical attachments can be arranged at the end of the course for students requiring a period of training.

Further particulars and application forms for these courses are obtainable from the Director, The Postgraduate Medical Institute, The University, Exeter, Devon.

## UNIVERSITY OF LONDON

**Rowntree**

and Company Limited

**ROWNTREE AND COMPANY LIMITED  
YORK**

We shall have a vacancy in the summer of 1966 for a

**MEDICAL OFFICER**

to take charge of our long-established Medical Department and ancillary medical services. He will be responsible for all pre-placement medical examinations and for the supervision of daily clinics for the company's employees. He will also have a responsibility for advising management about working conditions, and for supervising the company's convalescent home. He will maintain liaison between the company and local general practitioners, hospitals and health organizations.

We employ some 9,000 people in York, almost equally divided between men and women. The works surgery is staffed by six S.R.N.s and two more nurses are employed as sick visitors.

We are seeking a doctor preferably under 45 years of age, who has had considerable experience of general practice; previous industrial or administrative experience would be an advantage, and a D.I.H. would be a further recommendation. We should like to make this appointment during the spring in order to enable the new medical officer to take up his duties in the summer. The starting salary, which will be subject to discussion, will be within the recommended B.M.A. range for industrial medical officers.

The appointment will be based on York, which has two main hospitals and a postgraduate medical centre; it also enjoys excellent schools, reasonably priced houses, and ease of access both to work and to the countryside.

Please apply in the first instance, giving full personal details to:

## The "Battle of Britain" that's still being fought

The presence of winter once again underlines the disturbing fact that 15-20,000 people with respiratory symptoms will die during the next 6 months. The unceasing war against diseases of the bronchitis-asthma-emphysema group has plainly not yet been won.

About 30,000 deaths occur annually in Britain from bronchitis alone and the number shows no sign of decreasing. Deaths attributable to chronic bronchitis amount to nearly 10% of all deaths of men aged 45-64—more than from any other respiratory disease. In another category—but none the less important—is the fact that bronchitis currently accounts for more working days off than any other illness.

### Into combat—with tetracycline

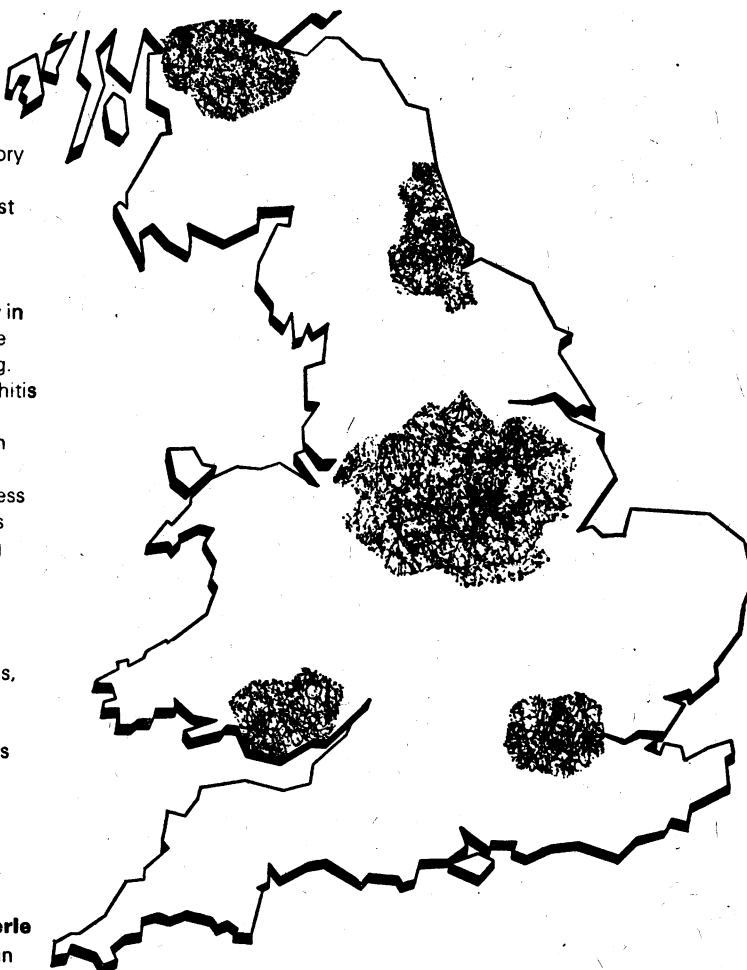

In the treatment of chronic bronchitis, current opinion advocates the employment of a drug capable of suppressing both the *Pneumococcus* and the *Haemophilus influenzae*. The one capable of doing this with safety is tetracycline. 1.

### The most effective weapon— demethylchlortetracycline Lederle

The modern tetracycline—Ledermycin demethylchlortetracycline Lederle—has been shown to provide higher and more sustained antibacterial activity levels in the serum than other tetracyclines. Broad-spectrum coverage persists up to 48 hours after the final dose—a safeguard against stopping treatment too early. "Most clinicians are agreed that tetracycline is preferable to the oxy- and chlor- derivatives . . . demethylchlortetracycline may possibly become the treatment of choice." 2.
