

Spencer "Free Action" Support Brief for men

Spencer's revolutionary new concept of support in non-rubber, spandex elastic for back and abdomen.

Subtle in design to the degree of being mistaken for tailored, body-fitting underwear in the locker room, it actually provides powerful, functional support in elevating the viscera, thus relieving low back strain.

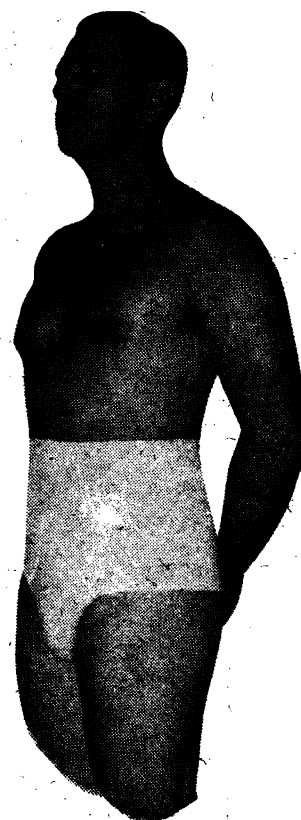

- ★ Front inner panels follow natural musculature.
- ★ Soft expansion areas at top edge and around legs allow motion and minimize bulging.
- ★ Comfortable, accommodating crotch section has easy access opening.

Patients have experienced relief from chronic low back pain while wearing the Support Brief.

We recommend this Brief for minor low back conditions and where it is considered beneficial to raise abdominal contents in aiding respiration, relieving ptosis, minimizing pooling of blood in lower abdomen, etc.

THE WORLD HEALTH ORGANIZATION, GENEVA

invites applications for a post of

SCIENTIFIC EDITOR

responsible for processing scientific manuscripts for publication, primarily in the *Bulletin of the World Health Organization*—WHO's principal scientific periodical. Duties include checking for accuracy and consistency, ensuring clarity, concision and conformity with scientific and medical terminology, preparing tabular material, annexes, figures and bibliographies, and proof reading. Also occasional writing of unsigned scientific articles, introductions, publicity texts, etc.

Qualifications: University degree, preferably in medicine or in science, and the ability to write clearly. English mother-tongue. Experience of editorial work.

Initial 2 year contract, with one year probationary period; initial salary U.S. \$8,889 a year, net of national income taxes, rising by annual increments to U.S. \$11,913 if work satisfactory; cost of living adjustment; dependants' allowance and children's education grant; health scheme; pension fund; paid home leave every two years; removal of household goods and personal effects to Geneva.

Short-listed candidates will be required to take an 8 hour written examination to be held in London (and possibly elsewhere) in March 1966. Detailed curriculum vitae should be sent to Chief, Personnel, WHO, Geneva, before 28 February, 1966. Applicants who do not hear from WHO by 30 March, 1966, should assume that they are not considered suitable for the post.

Distalgesic erases pain

Two tablets of Distalgesic taken three or four times daily bring prompt and lasting relief in pain of varying degrees. Distalgesic maintains its effect at this dosage level even in long-term use, such as in the aches and pains of rheumatism. It can be effective against more severe pain, often delaying the need for parenteral narcotics. Distalgesic itself is non-narcotic, does not cause constipation or addiction and does not irritate the gastric mucosa.

Distalgesic tablets each contain 32.5 mg. *dextropropoxyphene hydrochloride*, described as the most promising alternative to codeine, and 325 mg. *paracetamol*, generally regarded as the safest of the antipyretic analgesics.

But tropical climates give us greater research problems than insect repellents and sun-tan lotions. Amoebiasis was one such problem; an effective non-toxic amoebicide was the target of intensive research by Boots Research Department for a long time. After much work — research, investigation, clinical trials — Furamide was introduced. It gives a cure rate of over 90% in cases of intestinal amoebiasis without causing serious side effects.

No injections, no enemas, no special diet — just a simple dosage schedule of 1 tablet three times a day for 10 days.

THE ROYAL ARMY MEDICAL CORPS OFFERS OUTSTANDING OPPORTUNITIES FOR GENERAL PRACTICE

with every facility for a varied professional career: good equipment,
good pay, good allowances, trained staff and generous leave

You may not know that the Army nowadays provides more women and children than soldiers as patients for its General Practitioners. But not only are the opportunities wide and varied, the conditions of service are such that they permit a professional man to work in a professional way. The R.A.M.C. provides modern surgeries with first-class equipment; trained staff to help; a car and driver. All general practitioners are given postgraduate training and have access to military hospitals.

Pay for a married Captain (the rank on entry) is over £2,000, with increases every two years and on promotion. Children's Educational Allowances are paid. A five year Short Service Commission earns a tax-free gratuity of £3,000, and there is excellent retired pay with Terminal Grant for those who go on to a career in the Corps. Six weeks' annual leave is normally granted, and reliefs are provided. Married General Practitioners get a furnished house at low rental.

Is there a bronchial barrier

which prevents some of your patients
with bronchitis from getting the benefit of the Tetracycline you prescribe?

THE PROBLEM . . .

"Absorption of tetracycline is rather variable from patient to patient."¹

"Tetracyclines are widely used in bronchitis but often give relief rather than elimination of bacterial pathogens."²

. . . AND ITS EFFECTS

Permanent and irreversible lung damage can be prevented by tetracycline PROVIDED IT IS PRESENT IN SUFFICIENT QUANTITIES IN THE SPUTUM TO INHIBIT *H. INFLUENZAE*.

"The effective sputum level of tetracycline is 0.5 mcg./ml."²

BUT THE BRONCHIAL BARRIER RESTRICTS THE SPUTUM LEVEL.

"The sputum level of tetracycline is 10-30% of the serum level in most patients."²

Since it has also been shown that up to 25% of patients can be poor tetracycline absorbers,³ what happens to those bronchitics who have not achieved adequate serum levels?—they are prevented by the bronchial barrier from producing sputum levels capable of inhibiting *H. influenzae*.

raise the
bronchial barrier
by prescribing

TETREX*

(tetracycline phosphate complex)

the tetracycline that most reliably ensures adequate serum levels even in the poor absorber.

TETREX PROVIDES YOU WITH ALL THESE ADVANTAGES

Many studies have shown:

Higher average peak blood levels⁴ which in some cases may be double those obtained with tetracycline hydrochloride.

Faster blood levels⁵ ensuring a more rapid onset of therapeutic effect.

Reliability of absorption³, high tolerance, more efficiency and economy, low dosage produces high blood levels.

DOSAGE: 1 G. per day in 4 divided doses of 250 mg.

PRESENTATION bottles of 16, 100 and 1,000.

Clinically Unexcelled

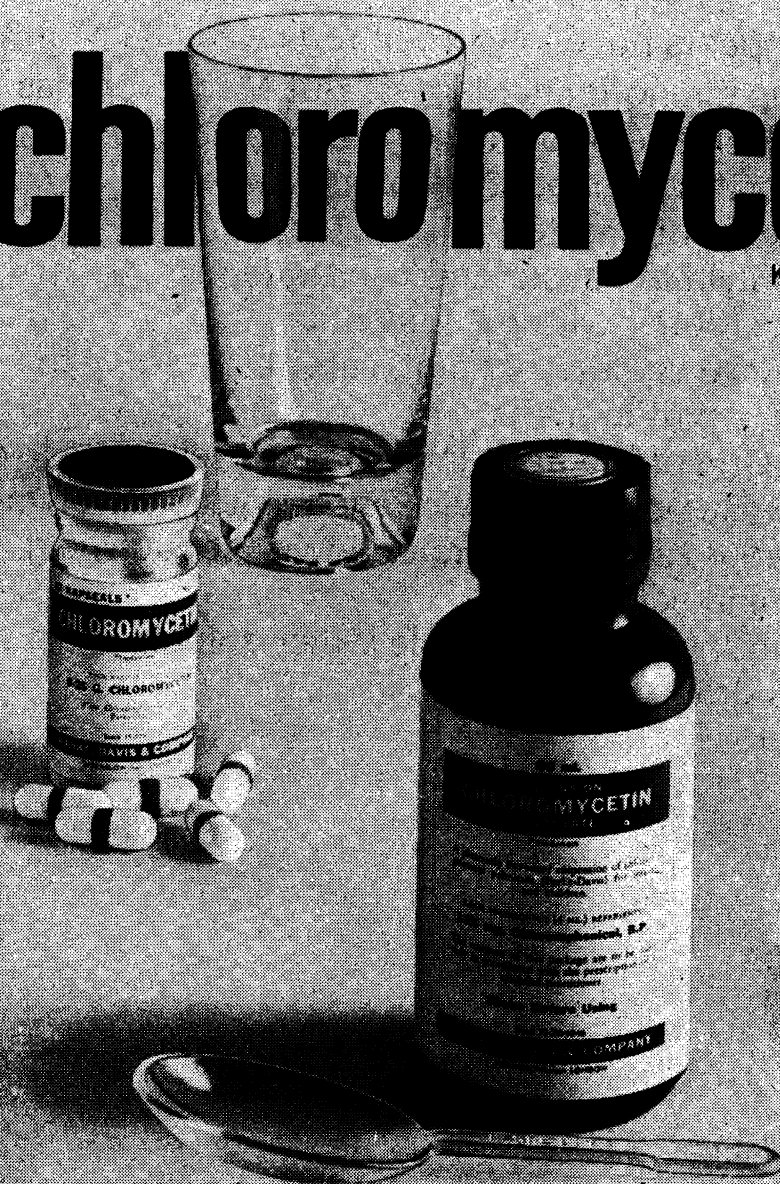

Clinical use throughout the world has established CHLOROMYCETIN* (Chloramphenicol B.P. Parke-Davis) as an antibiotic of outstanding efficacy in a wide variety of bacterial, viral and rickettsial infections. CHLOROMYCETIN possesses extremely high anti-microbial activity, crosses tissue barriers readily, diffuses widely and rapidly through nearly all body tissues and fluids, and is well tolerated. It is rapidly absorbed and bacterial resistance is minimal. And because of these notable properties, therapy with CHLOROMYCETIN generally results in prompt response and rapid recovery.

Available in Kapseals* of 250 mg and Palmitate Suspension containing the equivalent of 125 mg Chloromycetin per 4 ml teaspoonful.

An analysis of the nutritional properties of Mackeson

Of course, dark beers have long been regarded as a valuable aid in building up strength after illness. But Mackeson has the important advantage of being more acceptable to invalids and convalescents because of its taste.

Instead of having a bitter taste

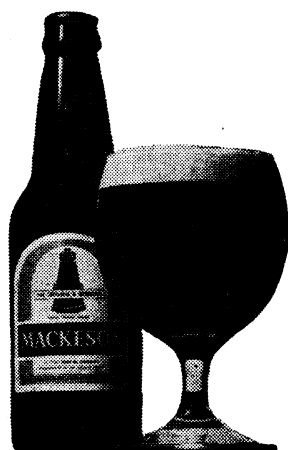

it is smooth and mild in flavour and consequently 'goes down' much better with the patients.

Calorific Value: 276 calories per pint, essentially equal to three quarters of a pint of milk.

Lactose Sugar: One of the main ingredients, easily digested and quickly assimilated even by weakened digestive systems.

Nitrogenous Matter: as protein break-down products, e.g. peptides and amino acids.

B-Group Vitamins: contains valuable water-soluble members of this group of vitamins.

not only a potent diuretic but also highly convenient

The convenience of Lasix is best appreciated in the less severe conditions calling for diuretic therapy. If the patient is working, he can have daily treatment with Lasix, without affecting either his working hours or his sleeping hours. For this type of patient a teatime dose is recommended. Lasix is rapidly effective, and its action is usually over in four to five hours. When the patient goes to bed he can be sure of undisturbed sleep. Lasix lets the patient work all day and sleep all night.

Alavac is the name for the Bencard Allergy Unit's range of adsorbed (pyridine-extracted, alum-precipitated) desensitising vaccines.

- ☐ **Only 7 injections** are required for a full course of treatment.
- ☐ **Effective protection** may be expected in 80 – 90 % of patients.
- ☐ **Optimum safety** because allergens are released slowly.
- ☐ **Even very sensitive patients** can tolerate effective doses.
- ☐ **Co-seasonal therapy** can be practised with confidence.
- ☐ **Simple to administer** from a new style treatment set complete with disposable syringes (+special finger-grip).
- ☐ **Above all, desensitisation is preventive – not merely palliative**

The Alavac range of vaccines provides desensitisation against a wide variety of common allergies:

ALAVAC-P standard grass pollen vaccine indicated for classical hay fever and pollen asthma; prepared from 12 varieties of common grass pollens (Bencard group B2).

ALAVAC-D standard house dust vaccine indicated for non-seasonal asthma and perennial rhinitis.

ALAVAC-S individually formulated specific vaccines, prepared from any one or more of a wide selection of adsorbed allergen extracts, in any desired proportion.

Literature, giving full details of the Alavac range (and including recommendations for their use) is available on request.

For the majority of patients, oral administration of 'Indocid' (as capsules) is preferred, but in certain circumstances it may be desirable to give 'Indocid' as suppositories.

'Indocid' Suppositories may be useful:

- in patients unable to tolerate an effective dosage of 'Indocid' by mouth.
- where it is desirable to administer a higher dosage of 'Indocid' than is possible orally.
- where relief of night pain and morning stiffness is particularly important. One suppository at bedtime will frequently give relief for 12 to 16 hours.

'Indocid' is supplied as 100 mg suppositories and 25 mg capsules.

CYCLOSPASMOL®

for ageing arteries

Cyclospasmol (cycloandelate) has been shown valuable in the treatment of the elderly and delicate patient with chilblains, cold hands and feet, intermittent claudication and leg-cramps.

Concomitant cerebrovascular disorders such as mental confusion, passing strokes and memory loss also benefit from Cyclospasmol therapy.

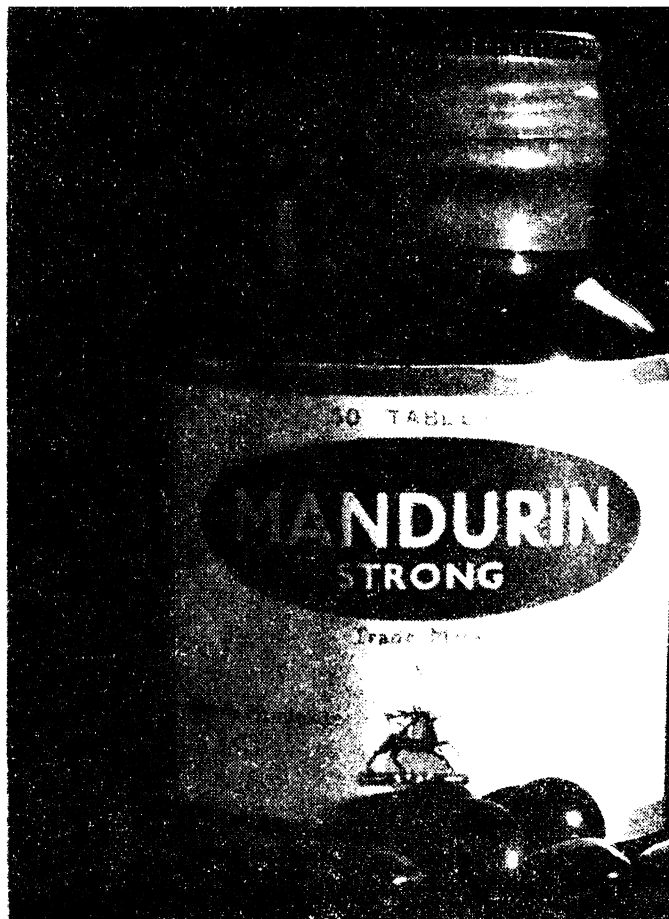

Cyclospasmol is an accepted, safe and effective vasodilator, it produces no variation in bloodpressure or heart rate and may be given even in the presence of coronary vascular disorders.

The dosage is usually 4 x 200 mg. daily, but may be raised to 1600 mg. with safety. Maintenance dosage is 400 mg. daily.

oral contraception...
Ovulen—the low dose
oral contraceptive—now
comes in this 3week wallet

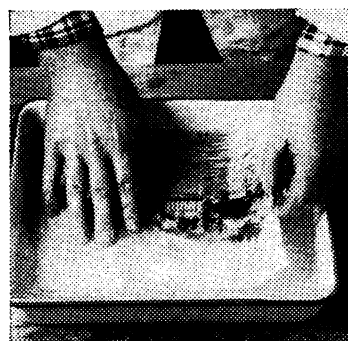

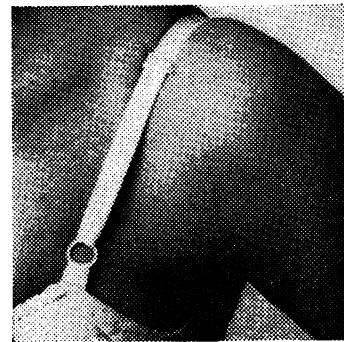

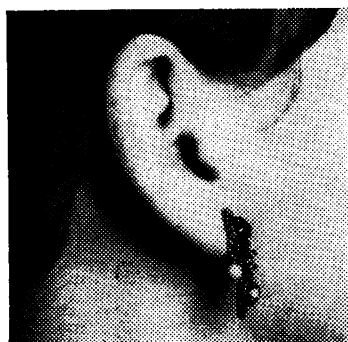

Ovulen (brand of ethynodiol diacetate with mestranol) is the oral contraceptive with a progestin content of only 1 mg. per tablet. The new 3-week wallet means that Ovulen now combines the benefits of low dosage with a simple 3-week administration schedule. *This routine can be easily explained to the patient in a few minutes.*

SIMPLICITY The patient takes one tablet a day for 3 weeks, waits one week, then starts her next course of tablets. The complete 4-week cycle makes it easier for her to remember her 'pill routine', because her *starting day* will always be the same day of the week. Ovulen's low progestin content is consistently associated with a very low incidence of side effects.

PENIDURAL

the most reliable and effective treatment for the majority of infections encountered in General Practice

PENIDURAL* (Benzathine Penicillin B.P.) is available in a range of dosage forms to meet the needs of every patient—paediatric drops for infants, suspension for children and tablets for adults plus two injectable forms (All-Purpose and Long-Acting) which provide rapid and sustained blood levels to combat more severe infections.

DORBANEX
Dorbanex: trade mark
softens the stool
then gently evacuates
the constipated bowel

Pain caused by hard, dry stools can be a distressing aspect of constipation. Discomfort leads to retention and, in turn, overloading of the rectum. But if — as with *Dorbanex* — treatment is directed at softening the stool and stimulating colonic peristalsis, the cycle of pain-retention-accumulation is broken. Defaecation is comfortable; anxiety is allayed; and the bowel is helped back to normal function.

Because *Dorbanex* contains the laxative 1 : 8-dihydroxyanthraquinone *plus* a new faecal softening agent, poloxalkol, it both softens and mobilises the stool. This dual action avoids straining and is invaluable in patients with anal fissures or haemorrhoids, or in whom the muscles are weakened, for example in pregnancy.

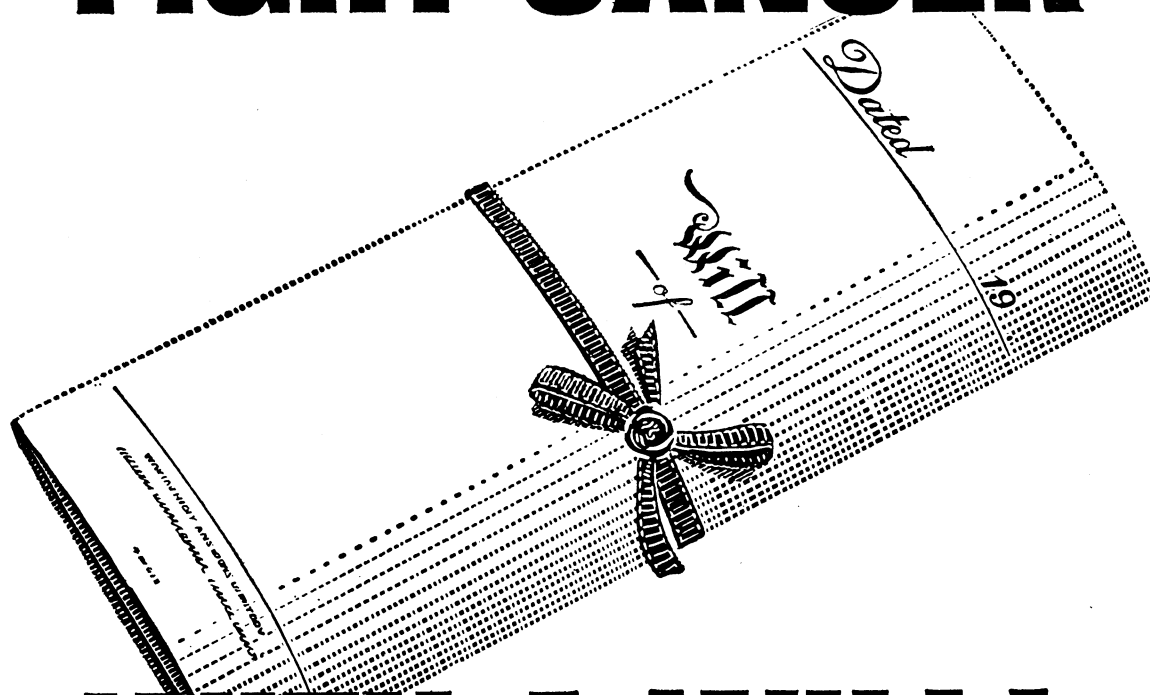

Disadvantages of laxative treatment, such as unpredictability, griping, leakage, or interference with gastro-intestinal function do *not* arise with *Dorbanex*. Especially appreciated by patients old, young or pregnant are its advantages of small dosage (1 or 2 teaspoonsful at bedtime) and palatability.

Each teaspoonful (5 ml.) of *Dorbanex* contains 25 mg. 1 : 8-dihydroxyanthraquinone and 200 mg. poloxalkol. Bottles of 60 ml. (4/-) and 500 ml. (30/-). P.T. extra.

FIGHT CANCER

WITH A WILL!

When you are consulted about bequests for medical work that deserves support, please remember the work of the Imperial Cancer Research Fund. Founded on the initiative of the Royal Colleges of Physicians and Surgeons, the I.C.R.F. is fighting all forms of cancer, including leukaemia, with every weapon of modern science in up-to-date laboratories. It has no official grants and is entirely supported by voluntary contributions. Will you please help—now?

How to word your Will

'I hereby bequeath the sum of.....pounds free of duty to the Imperial Cancer Research Fund, Lincoln's Inn Fields, WC2 for the purpose of scientific research, and I direct that the receipt of the Honorary Treasurer shall be a good discharge for such legacy'.

THE BERKELEY FELLOWSHIP (Founded in memory of the late Sir G. H. A. Comyns Berkeley and his wife, Ethel Rose Berkeley.)

The Berkeley Fellowship was founded under the Will of the late Sir G. H. A. Comyns Berkeley to provide an opportunity for research in medicine or for visits to medical institutions or hospitals to a person elected jointly by the Master and Fellows of Gonville and Caius College, Cambridge, and the Council of the Middlesex Hospital Medical School. Under the terms of the bequest medical centres in any part of the world may be visited, with the exception of Oxford or Cambridge.

Applications from graduates in medicine are invited for the Fellowship. The period of tenure of the Fellowship and the emoluments will depend upon the circumstances of each case. A fellowship will not normally be awarded for a period shorter than three months or longer than one year, but application for renewal will be considered. The emolument may be paid as a stipend or as a grant to cover travel and other expenses necessarily incurred by the Fellow in the performance of his programme of work, or partly as stipend and partly as grant. The total emolument allowed will not normally exceed £2,000 during one year's tenure.

Applications (six copies), should reach the Dean of the Middlesex Hospital Medical School by April 30, 1966, and should include the following information:

- (a) Name, address, and age.
- (b) Qualifications and experience.
- (c) Present appointment.
- (d) Programme of work proposed, with estimate of necessary expenses.
- (e) Other sources of financial assistance, including any stipend from present appointment, if continued during the tenure of the Fellowship. (8247)

THE HEINZ FELLOWSHIPS OF THE BRITISH PAEDIATRIC ASSOCIATION

H. J. Heinz Company Limited have generously endowed Fellowships in Paediatrics which the Nuffield Foundation has agreed to administer in conjunction with the British Paediatric Association.

Three types of Fellowship will be offered each year and the number and type awarded in any one year will depend on circumstances and the calibre of applicants available.

The three types of Fellowship will be:

- (a) To enable a paediatrician from any part of the Commonwealth overseas to spend six to eight weeks visiting centres in the United Kingdom. Preference will be given to those recently established in an academic career, who can arrange their visit to allow attendance at the Annual Meeting of the British Paediatric Association.
- (b) To enable a young paediatrician in training from any part of the Commonwealth overseas to spend one year of post-graduate study in paediatrics, child health or in paediatric preventive medicine at approved centres in the United Kingdom. The award is not primarily intended to enable a Fellow to obtain a higher degree in medicine, but this would not be precluded.
- (c) To support a Paediatric Registrar, Senior Paediatric Registrar or Consultant Paediatrician from the United Kingdom in the carrying out of some short-term study or a special research project (clinical, laboratory or Public Health, etc.), the practical facilities for the study or research being favourable in a particular overseas centre and not available where the candidate is normally employed.

Applications for these awards must be received by the Nuffield Foundation not later than July 15, 1966.

The conditions for the Fellowships and application forms may be obtained from the Director of the Nuffield Foundation, Nuffield Lodge, Regent's Park, London N.W.1. (H.5058)

COURSE IN GASTROENTEROLOGY

The Gastrointestinal Unit will hold a postgraduate course in Gastroenterology in the Western General Hospital, Edinburgh, from September 19 to 23, 1966, inclusive.

The Gastrointestinal Unit is staffed by a team of physicians, surgeons and radiologists who have clinical charge of wards devoted entirely to diseases of the alimentary tract. Patients admitted are not designated as medical or surgical but instead both physician and surgeon have different responsibilities towards the individual patient.

The course is not designed to cover all diseases of the alimentary tract but will concentrate on those conditions of which the Unit has special experience, and on recent advances and growing points in gastroenterology.

It is designed for both physicians and surgeons of Consultant or Senior Registrar status and similar who are interested in advancing their knowledge of this branch of medicine. No attempt will be made to cover the requirements of any examination. Fee £15. The class will be limited in number.

All meetings will be held in the Teaching Unit Western General Hospital. Lunch and tea will be available at the hospital.

Applications should be made to the Director of Studies, Edinburgh Postgraduate Board for Medicine, Pfizer Foundation, Hill Square, Edinburgh 8. (8291)

RIFOCIN: THE ANTIBIOTIC DISCOVERED IN THE LEPETIT RESEARCH LABORATORIES

In the field of antibiotics, since 1953 the Lepetit Research Laboratories have isolated and tested more than 42,000 colonies of streptomycetes from approximately 3,500 samples of earth from all parts of the world. Outstanding among these, the *Streptomyces mediterranei* nova species, producer of a group of

new antibiotic substances: rifamycins. More than 200 rifamycin derivatives were obtained by fermentation and synthesis including rifamycin SV (RIFOCIN®) and rifamide (RIFOCIN® M), which on pharmacological screening and clinical trials showed by far the most promising therapeutic activity. In the course of 6 years

of clinical trials with rifamycins, Lepetit's Medical Division has collected more than 14,000 case-histories; furthermore, over 500 papers on these antibiotics have appeared in international medical literature. Rifamycins are patented in the most important countries of the world.

The diabetic's treatment extends, at the moment, throughout his lifetime. The long-term safety of the preparations used is just as important as their ability to maintain satisfactory blood levels. Rastinon has a record of safety exceeding that of any comparable preparation. Its effectiveness is such that during the last 8 years over three million of the world's diabetics have been stabilized on Rastinon. This is why Rastinon is the first choice in initiating and continuing treatment of diabetes.

A. WANDER LIMITED

42 UPPER GROSVENOR STREET, LONDON W.1.

Before you commit yourself to a practice, work 3 or 5 years in the R.A.F.

You'll do some interesting, out-of-the-rut medicine, see a bit of the world, live well, and 'retire' with up to £3,000, tax free.

Your first job in the R.A.F. would probably be junior M.O. at a Station: rather like being an 'Assistant with a view'. In a typical case you could be one of two doctors with, between you, 1500 to 2500 people to take care of, and your own 'cottage hospital' with wards, theatre and laboratory, and secretarial as well as nursing staff.

You'd have a shorter list than a civilian G.P., and to this extent you would live a less strenuous life. To compensate, you would give much more comprehensive care. It is this—and the variety of your work—that makes practice in the R.A.F. so interesting.

In the R.A.F. you combine several functions. You are in medical care not only of people, but of the environment they live in, and of the work they do. In proportion you do less curative work and more preventive work than is even possible for most civilian doctors.

A lot of people hold the view that this is the way all medicine should be practised—with the closest possible integration of the doctor and the community.

This is the choice you face

Think of two doctors, both aged 40. One went to his practice straight from his teaching hospital, and has been there ever since. The other went into the R.A.F. on a 5-year commission. He lived

—and lived well—in the tropics with his family for 2½ years and, on leave or on duty, visited 7 countries: two European, three Asiatic, and two Australasian. By now he's been in civilian practice for 10 years; he's as well established as the other doctor. But which of the two has got more out of life, and has the richer memories to look back upon?

In many ways, the transition from hospital into the R.A.F. seems more 'natural' than the movement to civilian practice. You go from one community to another—and they have much in common: both are young, cheerful, energetic, rather self-contained—and at the same time very professional, with a marked sense of purpose. If you can feel, now, that you are going to miss Medical School—think about the R.A.F. Service life would probably be 'right' for you.

The time for bold decisions is when you are young and free

Today, because you are at the beginning of your career, you can take a short time out from the main stream of civilian practice *just by deciding to do it.*

Now, you are free to go. In a few years time, you probably won't be.

You'll have a practice 'with your name on it'; children who want a permanent home to strike root in; and soon. It will be time for you to settle down.

Meanwhile, at the parting of the ways, you have this chance. Now is the time to find out about it.

The address to write to is: Wing Commander D. G. M. Hills, O.B.E., M.B., B.S., D.P.H., R.A.F., Ministry of Defence (MAI/HN12/B), 1-6 Tavistock Square, London, W.C.1. Please give your age and qualifications.

Medical cadetships. Commissions as a cadet are available to students who have passed second M.B. (or equivalent). Initially your basic pay would be £630 p.a. Appropriate R.A.F. allowances, examination and tuition fees are paid in addition. You would continue to live and work as a medical student and when fully registered you would start work in the R.A.F. as a doctor in the rank of Flight Lieutenant on a five year short service commission. Further information may be obtained from the above address.

COMMERCIAL APPOINTMENTS

THE INTERNATIONAL MEDICAL RESEARCH DEPARTMENT of BRISTOL LABORATORIES

invites applications for the appointment of
ASSISTANT MEDICAL DIRECTOR
at its address in Middlesex, England

We are in the process of building up a new clinical research team. It will take a vital place in a world-wide Company research programme.

It is anticipated that applicants will be aged between 35 to 45, will be well qualified and experienced and will either already hold a position in the pharmaceutical industry in Britain or Europe or work in a Research appointment or in a Department of Medicine at a large Hospital or Institute.

Applicants holding other appointments will, of course, be considered, but the successful one will be a person who is "internationally" minded and "research" minded, who believes that thinking like a doctor is important—particularly in industry—and who can stand on his own two scientific feet and make decisions. He must feel at home in major European hospital circles. Telephoning a Nobel Prize Winner for instance should not intimidate him!

In his work he will be responsible solely to doctors and scientists and this work will comprise:

1. Arranging and evaluating clinical (and sometimes pre-clinical) trials of research-orientated compounds.
2. Advising medically people who are very good at their own non-medical jobs and very helpful to doctors.
3. Acting as one of a medical headquarters team for overseas medical directors of Bristol pharmaceutical companies.
4. Preparing definitive statements and judgements on medical/scientific problems for doctors and managers.
5. Guiding and assisting clinical trials of marketed products in many countries.
6. Attending, reporting and contributing to medical conferences.
7. Occasionally lecturing to medical and non-medical groups (e.g., hospital staff meetings, sales representatives, etc.)

This work will entail travelling—mainly European and mainly in short bursts—for about 25 per cent to 35 per cent of the time and thus the ability to explain his work in a major European language, as well as in English, would be an advantage. It also entails much reading of the literature in our own library and elsewhere, and this must be a labour of love. A facility to put thoughts on to paper succinctly is essential.

The position is new, challenging and rewarding. It is included in the Company's excellent Pension and Superannuation scheme, offers good prospects for the future and a starting salary of not less than £4,000 per annum.

All this is why we must have the right person.

Applications in handwriting, giving full details of why you think you are right for the job, to Box M2058.

SOUTH AUSTRALIA. ASSISTANTSHIP with view to partnership offered in country town practice. Current receipts over £A.10,000 per annum, scope for increase. Salary £A.70 per week. the members of the Medical Profession are reminded that the Distressed Gentlefolk's Aid Association can provide assistance under three main headings:

The long-term sick and infirm—middle-aged as well as aged who unfortunately are not blessed with loving relatives or friends who can care for them.

The frail and aged—who with financial help can still be cared for in their own homes.

The middle-aged—who through illness or misfortune are in grave financial distress, especially women with young families deprived of their husbands' support through sudden illness or death.

A psychiatric Nursing Home. Elderly patients accepted. Moderate inclusive terms. Apply Resident Physician.

ST. ANDREW'S HOSPITAL**NORTHAMPTON****FOR NERVOUS AND MENTAL DISORDERS**

President: The Earl Spencer

Medical Superintendent:

D. J. O'Connell, M.D., D.P.M.

This private hospital receives patients, both male and female, suffering from nervous and mental disorders, including alcoholism and senile illnesses. The fees range from eighteen guineas per week. Private rooms with special nurses can be provided, either in the hospital or in one of the villas in the grounds. The hospital is situated in 130 acres of pleasant grounds which provide all recreational facilities. These include a nine-hole golf course, sports ground, tennis courts, etc. A Recreation and Occupation Centre, known as Gloster House, was opened in 1962, which comprises an occupational therapy department, a swimming pool, a squash court, and a library with an adjoining reading room.

WANTAGE HOUSE

This is a separate reception unit to which patients may be admitted. It is equipped for the complete investigation of nervous and mental disorders by the most modern methods. All forms of treatment are available.

MOULTON PARK

Some two miles from the main hospital is the farm of approximately 600 acres. Occupational therapy is a feature of this branch. For terms and further particulars, apply to the Medical Superintendent (Telephone No. 34354 Northampton), who can be seen in London by appointment.
