Neatest short cut for hard-pressed gardeners

**Trim lawn edges  
in a trice****19 gns. with Battery Charger Carriage Paid**

A boon for busy "do it when you can" gardeners. Gone the back-breaking hours, the uneven shagginess of hand trimming. At the touch of a switch, the superbly efficient battery-powered Spintrim slices lawn edges sharp, clean and even. Trims arrow-straight or in a perfect curve . . . just as fast as you pace it. Edges stay firm and foursquare. No after-tidying necessary. Immaculate finish to 1 mile of lawn edge at each charging of the twin batteries. Foolproof plug-in charger restores batteries to peak power in 24 hours.

# allegron

nortriptyline hydrochloride

quickly relieves depression in any guise

The true condition of the depressed and anxious patient may often be hidden behind a variety of misleading symptoms until her appearance in the surgery becomes a problem in itself.

## Allegron simplifies treatment

It is one drug especially suited to treating those mental and emotional states often associated with refractory physical symptoms.

## Allegron acts quickly

It lifts the underlying depression, calms any anxiety and relieves psychosomatic symptoms by removing their cause.

## Allegron is well tolerated

It is without the restrictions of the MAOI's, and is one of the safest of psychotropic drugs.

Usual adult dosage: 25 mg. three times daily.

Tablets of 25 mg. (No. 1011) and 10 mg. (No. 1010) base equivalent. Liquid 10 mg. base equivalent per 5 ml. (No. 5010).

# ERYTHROCIN POWER | SAFETY | COVERAGE for 8 out of 10 bacterial infections

seen by GPs in schoolgirls (and their teachers)

## ERYTHROCIN (erythromycin, Abbott)

is a suitable first-line treatment for the majority of bacterial infections encountered in general practice. It provides powerful yet safe coverage against many causative organisms, leaving the broad spectrum antibiotics free for the specific cases in which they alone are effective.

## ERYTHROPEL

is the paediatric presentation of Erythrocin and offers the same advantages of power, safety and coverage.

## POWER

The potency of Erythrope against the cocci is considerably more than that of tetracyclines or chloramphenicol.

## SAFETY

Erythrope combines this potency with a remarkable degree of safety. It is, in fact, the least toxic and least allergenic antibiotic currently in use.

## COVERAGE

Erythrope is effective in a high percentage of the common bacterial infections. Its wide clinical spectrum of activity covers most Gram-positive organisms — especially Staphylococci, Streptococci, Pneumococci and Clostridia — and Gram-negative organisms such as Neisseriae and some strains of Haemophilus influenzae.

*By prescribing Erythrope or the associated Erythrocin preparations by name, you ensure that your patients receive erythromycin in safe, well-absorbed forms that produce effective blood levels rapidly.*

# Is there a bronchial barrier

which prevents some of your patients  
with bronchitis from getting the benefit of the Tetracycline you prescribe?

## THE PROBLEM ...

"Absorption of tetracycline is rather variable from patient to patient."<sup>1</sup>

"Tetracyclines are widely used in bronchitis but

often give relief rather than elimination of bacterial pathogens."<sup>2</sup>

## ...AND ITS EFFECTS

Permanent and irreversible lung damage can be prevented by tetracycline PROVIDED IT IS PRESENT IN SUFFICIENT QUANTITIES IN THE SPUTUM TO INHIBIT *H. INFLUENZAE*.

"The effective sputum level of tetracycline is 0.5 mcg./ml."<sup>2</sup>

BUT THE BRONCHIAL BARRIER  
RESTRICTS THE SPUTUM LEVEL

"The sputum level of tetracycline is 10-30% of the serum level in most patients."<sup>2</sup>

Since it has also been shown that up to 25% of patients can be poor tetracycline absorbers<sup>3</sup>, what happens to those bronchitics who have not achieved adequate serum levels?—they are prevented by the bronchial barrier from producing sputum levels capable of inhibiting *H. influenzae*.

raise the  
bronchial barrier

the tetracycline that most reliably ensures adequate serum levels even in the poor absorber.

**TETREX PROVIDES YOU WITH ALL THESE ADVANTAGES.** Many studies have shown: Higher average peak blood levels<sup>4</sup> which in some cases may be double those obtained with tetracycline hydrochloride. Faster blood levels<sup>5</sup> ensuring a more rapid onset of therapeutic effect. Reliability of absorption<sup>3</sup>, high tolerance, more efficiency and economy, low dosage produces high blood levels.

**If she rejects  
support stockings  
because  
they're  
too thick—  
recommend  
Supp-hose®  
(they're sheer)**

Only her face will show that she's wearing Supp-hose. Many women reject support stockings because they think that such a stocking is thick and unattractive. Consequently they are prepared to sacrifice their health for the sake of their appearance. But this is where Elbeo Supp-hose stockings have a tremendous advantage; they look scarcely any different from everyone else's nylon stockings. They are made in fashionable colours—seamed or seamfree. They are sheer, unbelievably sheer for the strong support they give. Yet they give as much relief as the thicker type of support stocking and are entirely acceptable from a medical point of view.

**Medically beneficial.** Made in nylon yarn, specially coiled, twisted and fixed before the stockings are knitted, Supp-hose

stockings provide adequate compressive elastic support which is maintained over months of wear and washing. This makes them suitable for venous states of the lower extremities causing oedema and requiring elastic support. Supp-hose stockings will relieve, significantly, the symptoms associated with varicose veins, the post-phlebotic phenomenon or chronic venous insufficiency. Supp-hose can also be recommended to patients suffering from the condition termed 'tired legs', particularly during pregnancy.

**ELBEO**

**Thousands of women are wearing Supp-hose stockings.** Each year we receive dozens of enthusiastic testimonials. A report on clinical trials—and information about sizing—will gladly be sent on request. Write to Dept BM1, Elbeo House, Woodborough Road, Nottingham.

### Accident Service

*Edited by L. W. Plewes, C.B.E., M.A., M.D., F.R.C.S.(E.), F.R.C.S., with 16 contributors*

A recent upsurge in the criticism of Casualty Departments in this country forms the background for "Accident Service." The book sets out to cover the diagnosis and emergency treatment of all manner of accidents, medical and surgical, from the so-called "minor casualty" to the major "multiple injury." The contributors are all members of the medical and surgical team of the Luton and Dunstable Hospital, which has one of the biggest and most up-to-date Accident Service Departments in the country. A most important contribution to the literature on this subject.

VI+ 137 p., 69 fig., 22 tab., 1966 (Bibliotheca Haematologica, Fasc. 22)  
£3 1s. 3d.

This volume begins with a comprehensive review, to 1965, of previous studies of the life span, production and destruction of platelets in man. Particular emphasis is placed on the use of radioisotopes in this field. The experimental section deals with the use of radiochromium as a label for platelets. There follows a detailed analysis of platelet survival and distribution in normal subjects. As for platelet survival in disease states, emphasis has been placed on the correlations between platelet levels and turnover, in thrombocytoses and thrombocytopenias of various aetiologies. The role of the spleen in thrombocytopenias is also given particular attention. This work, then, is a definitive review of current knowledge of the life of platelets in man. It might serve as a handbook for haematologists who are engaged in work in this field.

## The International AUDIO FESTIVAL and FAIR

Once again this very popular exhibition is being held in the Hotel Russell, Russell Square, W.C.1. It opens on Thursday, 14th April, and closes on Sunday evening, 17th April.

During these four days hundreds of amateur and professional hi-fi and tape recording enthusiasts will visit the 90 Stands, 70 Demonstration Rooms and 55 Booths.

The range of exhibits that can be seen or heard is widening every year as the interest in both hi-fi and tape recording increases.

Most of the leading firms will be there with their specialities :— Goodmans and their Maxamp 30 and loud-speaker systems, Tandberg stereo tape recorders, Celestion loud speakers, Armstrongs, Truvox with a new speaker, Dual Electronics, the Garrard range of turntables, Decca, S.M.E. pick-up arms, Lustraphone, Kodak tape and a host of others.

Until a few years ago the appeal was limited to a relatively small audience, but the growth of interest in hi-fi, record players and tape recording has been so considerable that they are now as much a way of life as anything else.

Although the main emphasis at the Festival is for the general public and "audiophiles" there are a number of exhibits of a wider

significance and of particular value to the medical profession, particularly on the teaching side. New and improved loud-speaker systems, amplifiers and tuner units for Lecture Halls. Electronic stethoscopes, miniature transistors for deaf aids and speech-aid equipment are amongst the other more specialized items that will be on show.

Tape recording has of course been used by doctors for professional purposes for many years, but it is also a most rewarding out-of-doors pastime. The naturalist, the bird-watcher, the collector of dialects, of country sounds, of market life, of . . .—the list is unending—can all obtain infinite pleasure from tape. Suitable portable battery recorders, special microphones and a lot of valuable advice and suggestions can be obtained at the Hotel Russell during those four days.

The value of having first-rate equipment to the average man-in-the-street is so that he may sit back quietly and enjoy listening to just whatever he pleases with the barest minimum of interference or loss. This is the ultimate aim. Although Festivals such as this fulfil a worthwhile purpose for the true perfectionist, for the amateur the result can be a little upsetting. However, the greatest value of this and of all exhibitions is the opportunity given to discuss with specialist technicians any of the major or minor problems that have arisen and see all the new equipment.

# 'MIGRIL' MASTERS MIGRAINE

It is paradoxical that ergotamine, accepted as the most effective drug against the headache of migraine, may cause nausea and vomiting—two of the very symptoms of a migraine attack.

'Migril' successfully overcomes these symptoms by the inclusion of cyclizine hydrochloride, the rapid-acting and effective anti-emetic.

Each 'Migril' tablet contains:

|                               |         |
|-------------------------------|---------|
| Ergotamine tartrate, B.P.     | 2 mg.   |
| Cyclizine hydrochloride, B.P. | 50 mg.  |
| Caffeine hydrate, B.P.        | 100 mg. |

## To minimise the danger of potassium depletion during long-term diuretic therapy...

... Glaxo have added a generous potassium supplement to the reliable bendrofluazide diuretic Neo-NaClex. The newer preparation, known as Neo-NaClex-K, is presented in a unique two-tier tablet. The tablet is designed to overcome the problems of gastric disturbance and possible small bowel ulceration which are sometimes associated with a potassium supplement. Shortly after the tablet is swallowed, bendrofluazide is released from one tier; the diuretic dose is therefore promptly available. Thereafter, the potassium supplement is released very slowly from the second tier; this will usually ensure that most of the potassium passes the stomach before dissolving and that no great local concentration of potassium is reached on its passage through the intestine.

### Neo-NaClex-K

When a potassium supplement is unnecessary, plain Neo-NaClex will provide smooth, sustained diuresis on one dose a day.

# Two new insulins by NOVO INDUSTRI A/S

## Actrapid

### Neutral Insulin Injection

#### A NEW SOLUBLE NEUTRAL INSULIN

##### DESCRIPTION

Pork insulin, purified by repeated recrystallisation, in a stable, neutral solution.

##### ADVANTAGES

The advantages have been reported as being—

1. No change in pH is necessary for resorption from the site of injection; there is therefore a rapid initial action.
2. At a pH of 7.4 the solution is compatible with blood and tissue fluids and the local irritation seen with ordinary soluble insulin (which is acid in reaction) does not occur.
3. It has a minimum of antigenic properties as it is a pig pancreas product.
4. It can be mixed with long-acting insulins provided they, too, are neutral in reaction.  
*J. Irish Med. Assoc., 1965, 57, 71.*

##### DURATION OF ACTION

The duration of action is similar to that of ordinary soluble insulin but, because of its speed of resorption, it may have a slightly more rapid initial effect.

### Biphasic Insulin Injection

#### A NEW BIPHASIC INSULIN WITH AN INTERMEDIATE LENGTH OF ACTION

##### DESCRIPTION

A biphasic preparation containing beef insulin crystals suspended in a rapid-acting neutral solution of insulin (pH 7). RAPITARD insulin is available in two strengths 40 iu and 80 iu insulin per ml—10 and 20 iu in solution and 30 and 60 iu in crystalline form respectively.

The two types of insulin act independently of each other. The duration of action is not due to zinc or other added retarding agents but to the special nature of the crystalline phase—

rhombohedral beef insulin crystals of constant shape and size (25—30 $\mu$ ).  
RAPITARD insulin is stable and neutral.

##### DURATION OF ACTION

RAPITARD insulin has a slightly shorter duration of action than that of LENTE insulin, but has a more pronounced initial effect due to the soluble component.

SERENID\* (oxazepam, Wyeth) is a new and versatile agent which enables you to achieve *prompt and effective* control of all the symptoms of stress. Patients on SERENID begin to feel better from the start of treatment and you can reasonably expect complete symptom control—relief of anxiety, tension, agitation etc., and thus in many instances a lightening of associated depression—in three to seven days. What's more, at effective dose levels SERENID causes few side effects—undue sedation and ataxia are rarely problems—making it particularly suitable for those patients who must remain alert and active or for the elderly and debilitated. Available as 15 mg. and 10 mg. scored tablets in bottles of 100 and 500.

## continuous drip control of ulcer by tablet

**PRODEXIN** tablets give all the benefits of continuous intragastric drip therapy<sup>1</sup> without any of its disadvantages.

The slow suck down tablets are specially formulated to give prolonged antacid buffer effect, unaffected by stomach emptying rate.<sup>2</sup>

Immediate relief of pain is achieved by rapidly raising pH to 2 neutralising excess acid and controlling the acid secretion by slowly building up the pH to a desirable level of pH3.5 and pH4.5

### **DOSAGE:**

For continuous therapeutic effect one tablet at a time should be sucked slowly.  
For peptic ulcer one or more tablets an hour.

Many clinical studies have already proved the healing influence of Biogastrone on gastric ulcer. Now confirmation comes from a new source. 'A controlled double-blind trial of carbenoxolone in the treatment of radiologically confirmed gastric ulcer is reported. Radiological examination at two weeks showed a reduction in the ulcer area of 88% in the carbenoxolone group

compared with 50% in those receiving dummy tablets ( $P < 0.01$ ). These results show that carbenoxolone is very effective in reducing the size of the ulcer.'<sup>\*</sup> After healing, Biogastrone 25 mg. tablets are given as a safeguard against recurrence. The dosage is one tablet twice daily.

## "Something about a Porsche" . . . Autocar

New, since our last advertisement in the *British Medical Journal*, is the Type 912 4-cyl. 1.6-litres Porsche, with Porsche 5-speed all-synchromesh gear-box. Other leading features are the entirely new chassis design, and new built-by-hand 2+2 fixed head coupé bodywork, with increased all-round visibility, increased interior room and much increased luggage accommodation, while many safety features are incorporated. It is difficult to decide which of the many complimentary reports to reprint—*Autocar* summarizes its road-test of the 912 in these words:

"There is something about a Porsche which gets you. It takes a day at the wheel for the bug to bite, but from then on the attraction blossoms to a heart-and-soul affair which can only end in complete captivation. Strangest of all is the way the Porsche seems to like you; it flatters your driving."

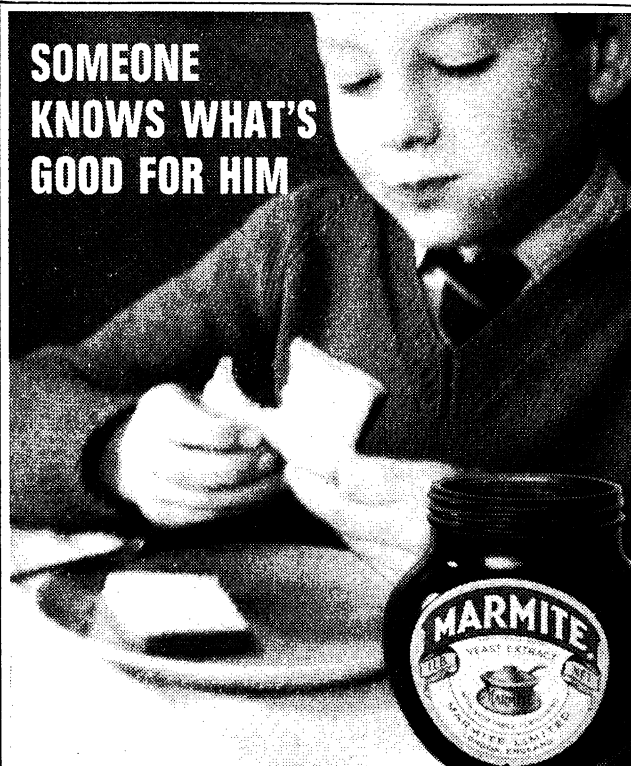

If you would like to know more about this new Porsche, please write for literature. The 912 costs £2,466 11s. 3d., inclusive of purchase tax.

# Ease of insertion is most important in vaginal tamponage

Ease of insertion—so important for the successful employment of internal menstrual protection—has been achieved by Tampax with its individual, hygienic container-applicator. This useful device facilitates correct and easy placement of the Tampax tampon well into the vagina without the necessity of contact with hands or fingers.

If your patients are like the thousands of women who are turning to Tampax every year, they will quickly discover its many other advantages. Tampax affords complete freedom from the bother of belts, pins, and pads . . . eliminates chafing and irritation . . . abolishes conspicuous bulges . . . minimises offensive odours . . . permits eliminative functions without removal . . . renders bathing possible, even swimming . . . and promotes normal external daintiness. The user is practically unaware of its presence.

It's also important that, with Tampax, a woman feels clean and tidy. In fact, the psychological and emotional advantages of the Tampax method are significant. Its use has served to improve the attitude of many women and girls toward the whole complex of menstruation. Perhaps your patients might benefit similarly.

Tampax is available in Regular and Super absorbencies to meet varying needs during the menstrual period.

BRITISH MEDICAL  
ASSOCIATIONHEAD OF DEPARTMENT OF  
AUDIO-VISUAL  
COMMUNICATIONS

Applications are invited from suitably qualified persons for the post of Head of Department of Audio-Visual Communications. This newly created Department will expand the activities of the existing Film Committee of the British Medical Association, building up an advisory, co-ordinating and distributing service of audio-visual aids. The applicant should have knowledge of the production and distribution of medical, scientific, and educational films, experience in the use of T.V., particularly in the educational field, and in audio-visual techniques, including video-tapes. Whereas previous experience in this developing field is all-important, the applicant should preferably be a graduate; a medical qualification would be preferred but it is not essential. The salary will be in the range of £3,000 to £4,000 per annum, according to age and experience.

Applications, accompanied by the names of three referees, should be submitted by May 14 to the Secretary of the British Medical Association, B.M.A. House, Tavistock Square, London W.C.1, from whom further particulars may be obtained.

*A candidate's identity will not be disclosed unless he gives permission after a confidential discussion.*

**Director****The Hospital Centre**

Applications are invited for the post of Director of The Hospital Centre, which is part of King Edward's Hospital Fund for London. This vacancy has arisen following the retirement of the present holder through illness. The King's Fund is a well endowed charitable organisation concerned with the hospital service, which it assists in many ways, such as the making of grants, post-graduate education, research and the promotion of the exchange of ideas and information.

The Hospital Centre was established in 1963 and concentrates on advisory services to hospitals, the development of new ideas and the organization of conferences. The new Director of The Centre would be required to exercise broad supervision over research projects of the hospital service (other than professional medical matters) based on The Centre, to integrate these with other activities of the Fund, particularly with those of the four King's Fund Staff Colleges, and to facilitate relations with other research organisations and with the Ministry of Health.

Candidates should be between 40 and 55 years of age and well educated. They should have received a professional training, and should have reached a position of seniority in a post dealing with medical or hospital administration, or in the Civil Service, or the King's Fund itself. This important post calls for a man or woman of high personal qualities and standing, a fine perspective of the expanding hospital world, and one who possesses the flair for achieving results by encouragement and persuasion. Initial salary and other emoluments will be by arrangement, but the eventual salary expectations could approach £5,000 per annum. The King's Fund has its own pension scheme which includes transfer arrangements with the National Health Service superannuation scheme. Please write to S. W. J. Simpson, quoting AM. 6594, and stating how each requirement is met.

The Winthrop Products Company requires a

# Medical Manager—Scandinavia

who, based at Surbiton-upon-Thames, Surrey,  
will report to the Area Director – and advise him on all  
medical matters in Scandinavia.

He will ■ become an authority on Scandinavian medicine.

■ participate actively in Scandinavian medical affairs so that he can adequately interpret the company to the Medical Profession; in turn he will interpret the attitudes, trends and developments in Scandinavian medicine to the company.

■ become the technical adviser, on our product range, to Scandinavian doctors and pharmacists, to our Local Directors and to our staff.

■ act as the company's "Medical Conscience" in Scandinavia.

The post will appeal to the younger doctor, aged 28-37, who has good hospital experience. A knowledge of, and sympathy for, the role of the general practitioner is essential. The man appointed must be acceptable to a broad range of medical men on an international

basis. He must wish to participate in international medicine.

The post demands a high degree of tact, exceptional analytical ability and an above-average ability at making verbal and written presentations.

A willingness to make short visits to Scandinavia is essential.

Salaries in the Winthrop Products Company are highly competitive and salary increases are related to the individual's contribution.

The working environment is stimulating.

If you wish to discuss this appointment in greater detail, please write, in confidence, enclosing a concise curriculum vitae to David Rowlands, Staff Director, The Winthrop Products Company, Winthrop House, Surbiton-upon-Thames, Surrey, who has been asked to deal with this matter personally.

**CERVICAL  
CYTOLOGIST**

Applications are invited for the position of Cervical Cytologist in the above department.

The successful applicant will be required to take charge of the cytology unit, which is responsible, in conjunction with the division of morbid anatomy, for diagnostic exfoliative cytological techniques. At present the work is concerned with the cytological diagnosis of malignant disease of the female genital tract, but opportunities will be made available, if the successful applicant desires, in other fields of cytology.

The department of pathology serves the Brisbane Hospital, the Children's Hospital and the Women's Hospital, a total of about 1,700 beds. The cytology unit is housed in a new modern laboratory of about 3,000 square feet and has a staff of 10 part-time screeners and four technicians.

These hospitals are the major teaching hospitals for the University of Queensland, and the position may carry some teaching duties to undergraduate and postgraduate students.

Applicants should be medically qualified and hold a specialist qualification in pathology registrable in Queensland and should have experience in the field.

The position carries a salary of \$A.9,324, subject to future basic wage adjustments, and is superannuable. Travelling expenses to Brisbane may be paid subject to certain conditions.

Further details may be obtained on enquiry from the Director, Department of Pathology, Brisbane Hospital, Herston Road, Brisbane N.9, Queensland, Australia.

Applications, stating full details of academic record, qualifications, and experience, citing published papers and including names of three referees, should reach the Manager, the North Brisbane Hospitals Board, Herston Road, Brisbane N.9, Queensland, Australia, by April 8, 1966. (H.5962)

# Nulacin and only Nulacin provides intragastric milk-alkali drip therapy for the ambulant patient

*“In view of the ineffectiveness of most of the tableted antacids, the milk-alkali tablet (Nulacin) would appear to be the antacid of choice for ambulatory therapy.”*

Med. Times, N.Y., 1958, 1, 74

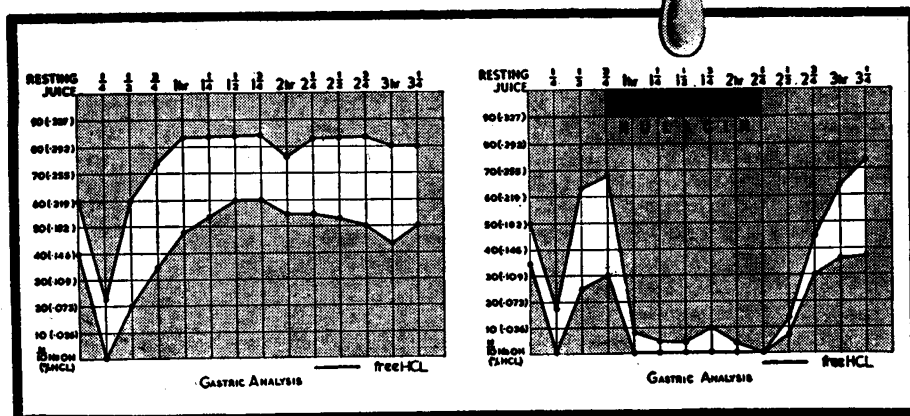

## Safe, Simple, Effective

NULACIN TABLETS provide a safe, simple and effective treatment of peptic ulcer.

In treating peptic ulcer a Ryle's tube may be passed through the nose and into the oesophagus and a mixture of milk and antacid allowed to flow continuously over the affected area. This form of therapy can only be employed in those patients who are in bed and for the ambulant patient Nulacin tablets are preferable. Nulacin tablets are prepared from whole milk combined with dextrans and maltose, together with the trisilicate, oxide and carbonate of magnesium and calcium carbonate. Nulacin tablets when allowed to dissolve slowly in the mouth provide milk-alkali drip therapy. In fact, Nulacin tablets have revolutionized the treatment of peptic ulcer.
