

# For young doctors: clinical freedom, modern equipment and complete medical responsibility. Where?

On land and sea. At home and overseas. As a Medical Officer in the Royal Navy.

Here is a medical career that can give you more scope and responsibility than most doctors in civilian life have—while still in your mid-twenties.

You will have the most modern equipment; clinical freedom; the opportunity to gain wide experience, both in the traditional fields of medicine and in the new sciences of nuclear, underwater and aviation medicine. And you could study for higher degrees, specialise in one of many medical subjects and even aim for consultant status—all at the expense of the Royal Navy.

But you're more than a doctor. You're a Naval Officer, too. You lead an active, varied life; have a very special status; exceptional opportunities for sport, travel and the outdoor life. And your pay and prospects are excellent. For example, your *starting* salary would be considerably higher than that of a civilian hospital registrar. And marriage and other allowances can add considerably to your income. You enter initially for a Short Service Commission—with the opportunity of a Permanent Commission after 1 year.

#### 3 Ways of Entry

1 As a fully registered doctor; any civilian experience counts towards your seniority.

2 During your pre-registration year.

3 As a student any time after passing 2nd M.B. For fully registered women doctors there is a special Short Service Commission.

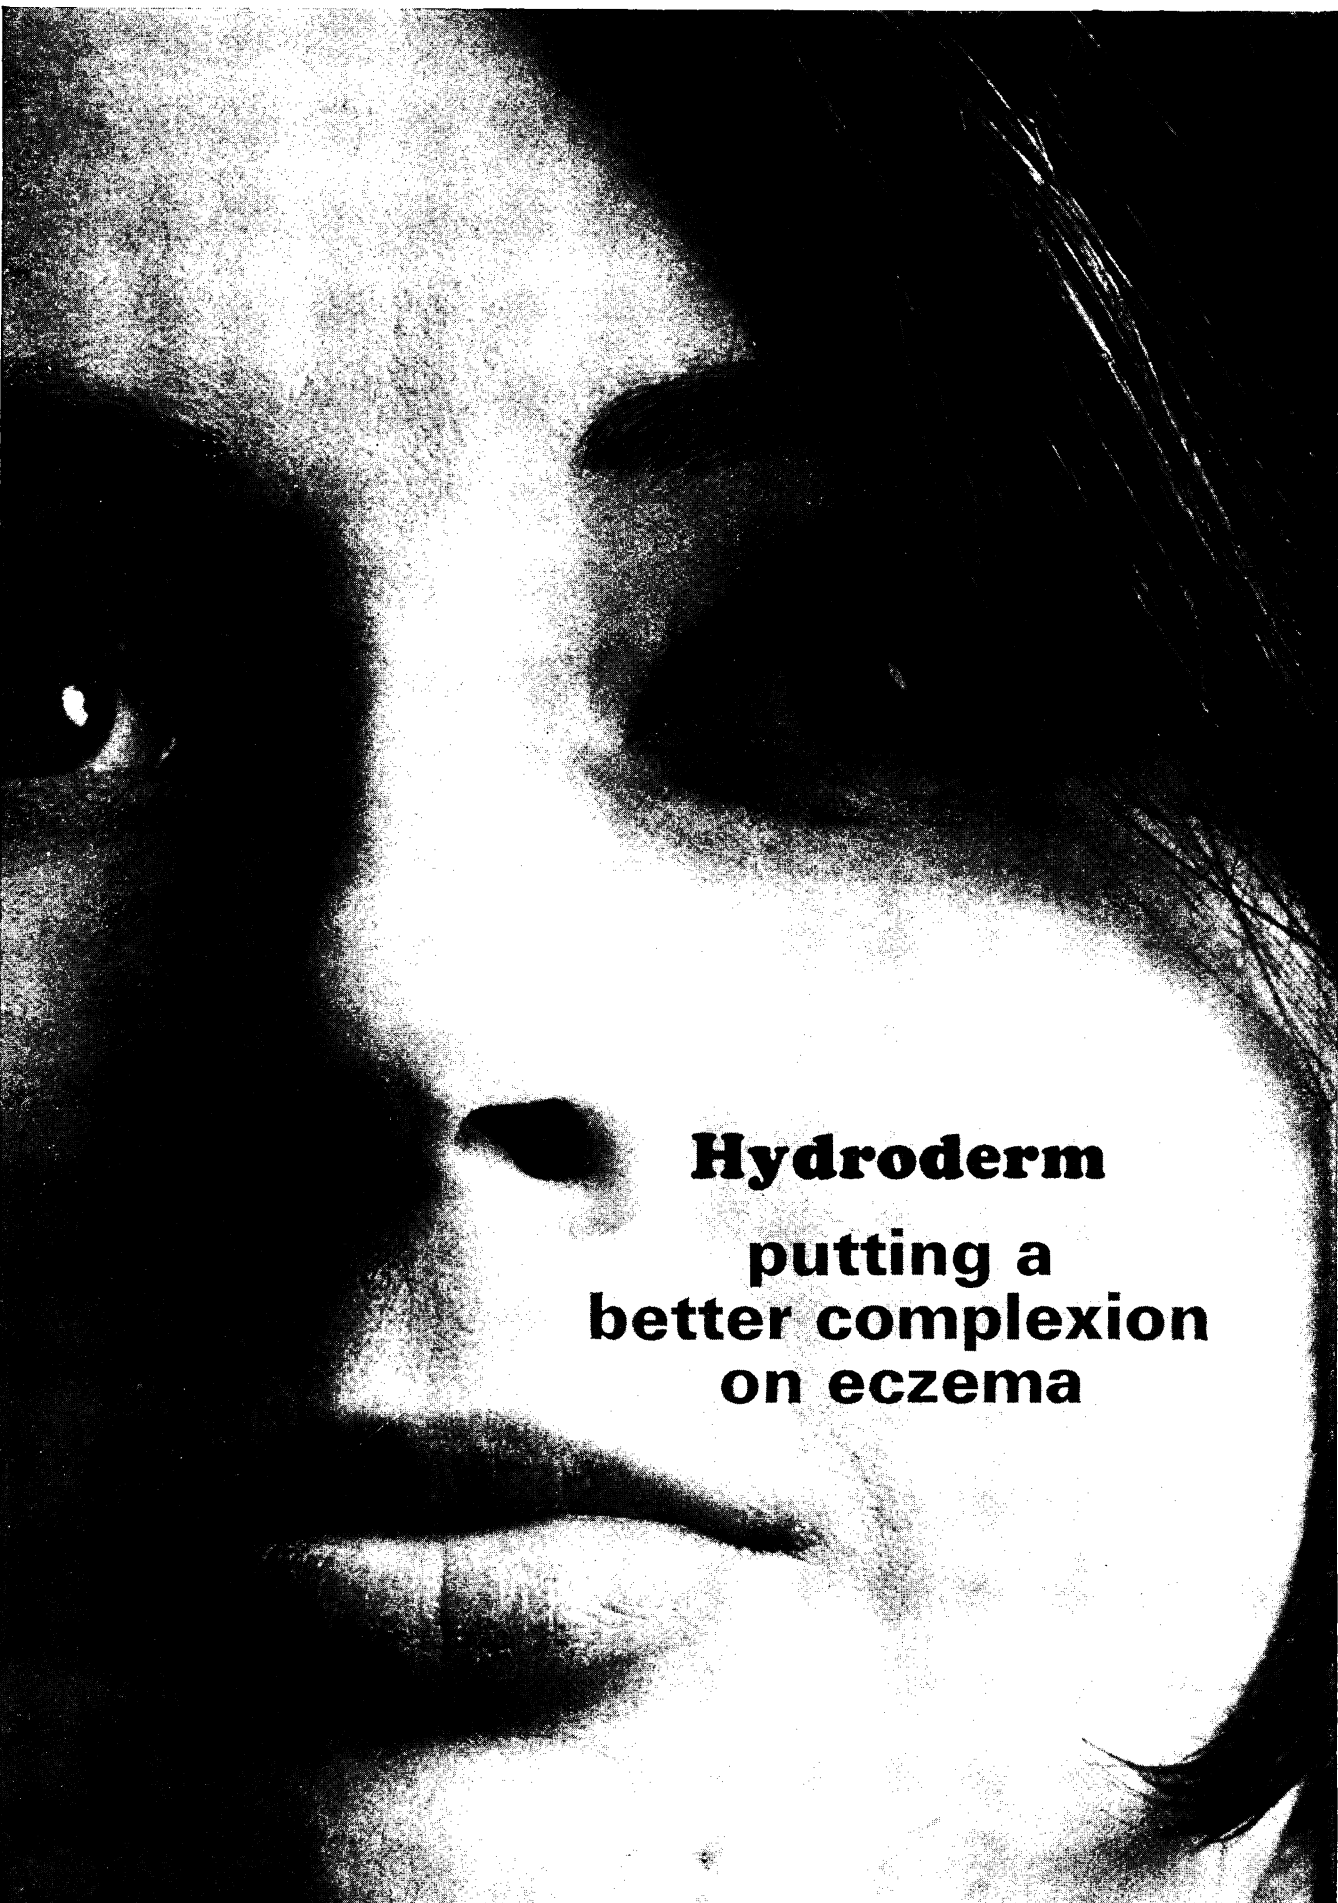

If you would like more information, write to the address below, giving details of your age and qualifications. A personal interview can be arranged if desired.

**Hydroderm**  
putting a

on eczema

Eczema and other common skin conditions, whether wet or dry, usually respond rapidly to treatment with 'Hydroderm' ointment. It provides the anti-inflammatory, anti-allergic and antipruritic actions of hydrocortisone; and the antibacterial cover of neomycin and bacitracin, which are effective against most common skin pathogens. Moreover, there is only one base and one strength of 'Hydroderm' ointment—an added advantage when prescribing.

This summary of published clinical papers well illustrates Penbritin's outstanding success rate in respiratory diseases, infections of the urinary and gastro-intestinal tracts, skin and soft tissues, venereal diseases and typhoid which may be attributed to its high activity and bactericidal action.

Over 600 publications from 29 countries endorse Penbritin (Ampicillin) as a broad-spectrum antibiotic. A full list of references is available.

**Availability:** capsules, paediatric tablets, syrup and vials for injection.

**Usual Dosage:** 250mg. to 500mg. q.i.d. In severe cases and in certain conditions the dosage should be increased.

Wide international usage is in itself striking testimony to the merits of Gynovlar 21. But more important are the clinical advantages which have earned such wide usage.

**First**, Gynovlar 21 provides four-fold security by ovulation control, protective changes in the endometrium and the cervical mucus and by the 21-tablet dosage scheme which virtually eliminates patient error.

**Secondly**, Gynovlar 21 is extremely well tolerated. Tolerance depends not only on the choice of progestogen, but especially on the type of dosage of oestrogen. Gynovlar 21 tablets contain 3 mg. norethisterone acetate—a progestogen used throughout the world in gynaecological medication and renowned

for its excellent tolerance—and 0.05 mg. ethinyl-oestradiol B.P., which is the lowest dose to be employed for oral contraception. No other presentation contains less oestrogen, many contain more.

**Thirdly**, the substances used in Gynovlar 21 produce normal menstrual cycles, which have been described as being of 'almost clockwork precision'. Thus Gynovlar 21 is ideally suited to the 21-tablet dosage scheme, which this product pioneered and the advantages of which have, meanwhile, been generally recognized.

## Is there a bronchial barrier

which prevents some of your patients  
with bronchitis from getting the benefit of the Tetracycline you prescribe?

### THE PROBLEM...

"Absorption of tetracycline is rather variable from patient to patient."<sup>1</sup>

"Tetracyclines are widely used in bronchitis but often give relief rather than elimination of bacterial pathogens."<sup>2</sup>

### ... AND ITS EFFECTS

Permanent and irreversible lung damage can be prevented by tetracycline PROVIDED IT IS PRESENT IN SUFFICIENT QUANTITIES IN THE SPUTUM TO INHIBIT *H. INFLUENZAE*.

"The effective sputum level of tetracycline is 0.5 mcg./ml."<sup>2</sup>

BUT THE BRONCHIAL BARRIER RESTRICTS THE SPUTUM LEVEL.

"The sputum level of tetracycline is 10-30% of the serum level in most patients."<sup>2</sup>

Since it has also been shown that up to 25% of patients can be poor tetracycline absorbers,<sup>3</sup> what happens to those bronchitics who have not achieved adequate serum levels?—they are prevented by the bronchial barrier from producing sputum levels capable of inhibiting *H. influenzae*.

raise the

the tetracycline that most reliably ensures adequate serum levels even in the poor absorber.

### TETREX PROVIDES YOU WITH ALL THESE ADVANTAGES

Many studies have shown:

Higher average peak blood levels<sup>4</sup> which in some cases may be double those obtained with tetracycline hydrochloride.

Faster blood levels<sup>5</sup> ensuring a more rapid onset of therapeutic effect.

Reliability of absorption<sup>5</sup>, high tolerance, more efficiency and economy, low dosage produces high blood levels.

## TALKING OF CARAVANNING

One of the most interesting  
and rewarding forms of recrea-  
tion and relaxation is caravan  
touring. It means that apart  
from normal holidays any free

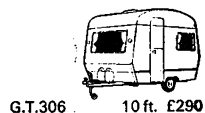

week-end as soon as the last patient has been seen on the Friday  
evening, you and the rest of your family can just hitch up the van and  
be away. Just that two or three days with no telephone calls and  
no paper work does the world of good. The domestic side, properly  
organized, can be reduced to a minimum.

To be a caravanner is by no means a difficult business. There are  
a considerable number of dealers throughout the country and if you  
choose one who represents the leading makers, such as Sprite, Eccles,  
Bluebird, Bessacarr, etc., you are bound to arrive at a satisfactory  
choice. There is a wide range of sizes. The smallest is 8 ft. x 5 ft.,  
the family size 16 ft. x 6 ft. 6 in. and then up to the luxury models  
of 22 ft. x 7 ft. 6 in. Prices range from £250 to £1,000. The dealer  
will be able to advise you upon the size most suitable for your car.  
It is possibly wiser to let him or your garage fit the tow bracket  
though they can be bought as a do-it-yourself kit. There are other  
fittings that are essential such as plug and socket for electrical services  
from the car to the van, for road lights, stop lights, and flashers.  
Wing mirrors are a "must."

Towing a caravan is not difficult. There are a few things that must  
be remembered—the extra length, extra width, and the fact that the

van does not follow the wheel tracks of the car when cornering and will cut in.

Naturally the power of acceleration is reduced and the gear box has to be used more frequently. The average driver, though, can be reasonably proficient after as little as an hour or so at the wheel.

Throughout the British Isles there are a large number of camping sites, and some hundreds of them are recognized by the National Caravan Council because they attain a fairly high standard of amenities. It is advisable to join one of the caravan clubs as many of the sites are only open to members. In any case, they will always provide you with routes, help you with suggestions, and give advice.

\*Should you, however, plan your own route do book up well in advance for your camping site or sites; and also if you are going overseas book up with the ferry service first. Some people are apt to attempt too great a mileage each day, but it is generally agreed that 150 to 200 miles is sufficient for comfort. Do not forget the 40 m.p.h. speed limit when trying to assess the time your journey will take. On the Continent and in Ireland it is possible to cover greater distances each day because in the former the roads are faster and there is no speed limit and in the latter the roads are relatively free of traffic.

Many people these days prefer to tour in motor caravans. For ease of travel and speed—there are no additional restrictions—they have many advantages. Elderly people and those suffering from physical disabilities find that the motor caravan opens up new horizons.

Dorbanex: trade mark  
softens the stool

the constipated bowel

Pain caused by hard, dry stools can be a distressing aspect of constipation. Discomfort leads to retention and, in turn, overloading of the rectum. But if – as with *Dorbanex* – treatment is directed at softening the stool and stimulating colonic peristalsis, the cycle of pain-retention-accumulation is broken. Defaecation is comfortable; anxiety is allayed; and the bowel is helped back to normal function.

Because *Dorbanex* contains the laxative 1 : 8-dihydroxyanthraquinone, *plus* a new faecal softening agent, poloxalkol, it both softens and mobilises the stool. This dual action is invaluable in patients with anal fissures or haemorrhoids, and in obviating straining – an important consideration in elderly or cardiac patients.

Disadvantages of laxative treatment, such as unpredictability, griping, leakage, or interference with gastro-intestinal function, do *not* arise with *Dorbanex*. Especially appreciated by patients old, young or pregnant are its advantages of small dosage (1 or 2 teaspoonsful at bedtime) and palatability.

Each teaspoonful (5 ml.) of *Dorbanex* contains 25 mg. 1 : 8-dihydroxyanthraquinone and 200 mg. poloxalkol. Bottles of 60 ml. (4/-) and 500 ml. (30/-) P.T. extra.

### **A Faecal Softener**

Dioctyl-sodium sulphosuccinate lowers the surface tension of the faecal mass, allowing water to penetrate a hard, dry

stool. "It is not an irritant, laxative or bulk purgative."<sup>1</sup> Animal experiments have shown that it is not absorbed and does not break down during its passage through the intestine.

### **A Mild Peristaltic Stimulant**

1-8 dihydroxyanthraquinone acts only on the lower bowel and stimulates gentle peristalsis.

The normal dose of Normax is 1-2 capsules at night for 2-3 days or until normal bowel function is restored.

Normax capsules are available in bottles of 30 (basic N.H.S. price 4/10), and 250 (basic N.H.S. price 26/10).

**ERYTHROCIN POWER|SAFETY|COVERAGE**

for 8 out of 10 bacterial infections

seen by GPs in schoolboys (and their teachers)

**ERYTHROCIN (erythromycin, Abbott)** is a suitable first-line treatment for the majority of bacterial infections encountered in general practice. It provides powerful yet safe coverage against many causative organisms, leaving the broad spectrum antibiotics free for the specific cases in which they alone are effective.

**ERYTHROPEd** is the paediatric presentation of Erythrocin and offers the same advantages of power, safety and coverage.

**POWER** The potency of Erythrope against the cocci is considerably more than that of tetracyclines or chloramphenicol.

**SAFETY** Erythrope combines this potency with a remarkable degree of safety. It is, in fact, the least toxic and least allergenic antibiotic currently in use.

**COVERAGE** Erythrope is effective in a high percentage of the common bacterial infections. Its wide clinical spectrum of activity covers most Gram-positive organisms—especially Staphylococci, Streptococci, Pneumococci and Clostridia—and Gram-negative organisms such as Neisseriae and some strains of Haemophilus influenzae.

By prescribing Erythrope or the associated Erythrocin preparations by name, you ensure that your patients receive erythromycin in safe, well-absorbed forms that produce effective blood levels rapidly.

“If the antiseptic is to be of any value at all it must not only kill organisms that are dry and probably embedded in films of some kind but it must act rapidly before it is removed by evaporation, gravity or washing”.

**Dettol meets these two important provisions of  
rapidity of action and compatibility with soap**

1. Rapidity of Action. Dettol kills Staph. aureus including phage type 80, 81, and Ps. pyocyanea in less than 2½ minutes (vide BRIT. MED. J., 1963 i, 498)

2. Compatibility with Soap. 'Unlike the other antiseptics, Dettol appeared to have its efficiency increased by the presence of soap, and against Staph. pyogenes the effect was one of true synergism.' — ("ANTISEPTICS IN MIDWIFERY" BRIT. MED. J., 1956, ii, 202)

Dettol is non-poisonous and is well-tolerated. Its efficiency is well maintained in the presence of organic materials and it is stable in solution.

# one injection can control the symptoms of schizophrenia for 2 to 4 weeks

## Moditen Enanthate,

a long-acting injection of fluphenazine, is capable of controlling the symptoms of schizophrenia for 10 to 28 days with one intramuscular injection. Thus Moditen Enanthate can help to decrease the problem of relapse when the patient cannot be relied upon to take tablets.

**One injection substitutes for phenothiazine tablets for up to 4 weeks in the maintenance therapy of schizophrenics.**

Also available are new presentations of **Moditen** for oral use. These are 2.5mg. and 5mg. tablets (in addition to the 1mg. tablets already available) and a pleasant tasting elixir 2.5mg. per 5ml. In most cases the oral preparation need only be given once a day.

ABSTRACTS OF WORLD  
MEDICINE

## ASSISTANT EDITOR

The Council of the British Medical Association invites applications from registered practitioners for the appointment of Medical Assistant Editor of Abstracts of World Medicine, starting on September 1, 1966, at a salary of £2,783 a year, rising by annual increments of £150 to £3,833 a year. In exceptional circumstances the initial salary may be above the minimum of the scale. The appointment will be for a probationary period of six months in the first place. The Association's Superannuation Scheme will apply on substantive appointment.

Preference will be given to candidates between 35 and 55 years of age with a wide knowledge of medicine (up to M.D. or M.R.C.P. standard) who can present evidence of literary ability and/or journalistic experience. A knowledge of one or more foreign languages is highly desirable.

Applications, giving details of qualifications and experience and accompanied by the names of three persons to whom reference may be made, should be addressed to the Editor of Abstracts of World Medicine, B.M.A. House, Tavistock Square, London W.C.1, and must be received before May 12, 1966.

IF ANY PATIENTS  
ARE IN NEED OF HELP—

*the members of the Medical Profession are reminded that the Distressed Gentlefolk's Aid Association can provide assistance under three main headings:*

The long-term sick and infirm—middle-aged as well as aged who unfortunately are not blessed with loving relatives or friends who can care for them.

The frail and aged—who with financial help can still be cared for in their own homes.

The middle-aged—who through illness or misfortune are in grave financial distress, especially women with young families deprived of their husbands' support through sudden illness or death.
