## Obstetrics in General Practice

*To be published soon*

This book is made up of a series of articles printed in the "Current Practice" section of the **BRITISH MEDICAL JOURNAL**. It is designed to give a lucid and practical account of obstetrics as it is carried out in the patient's home or in a maternity unit, with special emphasis on the role of the general practitioner and his relationship to the consultant obstetrician and the hospital. The principal authors are consultant obstetricians, but to ensure that the general practitioner's own view and special experience should be represented the consultant contributors were asked to prepare their articles in collaboration with general practitioners. The book as a whole is a product of such co-operative effort. It will prove a useful guide to this important branch of medical practice.

# allegron

nortriptyline hydrochloride

quickly relieves depression in any guise

The true condition of the depressed and anxious patient may often be hidden behind a variety of misleading symptoms until her appearance in the surgery becomes a problem in itself.

#### **Allegron simplifies treatment**

It is one drug especially suited to treating those mental and emotional states often associated with refractory physical symptoms.

#### **Allegron acts quickly**

It lifts the underlying depression, calms any anxiety and relieves psychosomatic symptoms by removing their cause.

#### **Allegron is well tolerated**

It is without the restrictions of the MAOI's, and is one of the safest of psychotropic drugs.

Usual adult dosage: 25 mg. three times daily.

Tablets of 25 mg. (No. 1011) and 10 mg. (No. 1010) base equivalent. Liquid 10 mg. base equivalent per 5 ml. (No. 5010).

## FURAMIDE provides the simplest safest and most effective treatment available at the present time for intestinal amoebiasis

**Practical** No injections, special diets or enemas are required. Furamide is suitable for ambulant patients.

**Simple** Dosage is simple—one tablet three times a day for ten days in patients of average weight.

**Effective** Cure rates of 75% to 80% in the acute stage and 90% to 100% in the chronic condition may be expected.

**Safe** Side-effects, apart from occasional flatulence, have not been reported, and the toxicity of Furamide is very low.

**Inexpensive** Furamide is less expensive than the drugs conventionally used in amoebiasis, and as hospitalisation is not normally necessary (unless the clinical condition of the patients warrants it) treatment with Furamide often shows a substantial saving compared with the older forms of therapy. Furamide has been the subject of extensive clinical trials in South America, South Africa and Asia. References and detailed literature will be gladly sent on request.

**Furamide** Each tablet contains 0.5 G of diloxanide furoate B.P. Packed in bottles of 15 and 250 tablets.

## SINGLE-DOSE TREATMENT FOR BOTH THREADWORMS AND ROUNDWORMS

"With its high cure-rate, lack of toxicity, ease of administration, and simplicity of dosage, we regard pripsen as, at present, the remedy of choice for enterobiasis...The doses of piperazine were less than half those hitherto used in seven days' treatment, and there were no toxic effects."

*Lancet*, 1960, *i*, 256.

"Pripsen...is a highly effective agent against ascariasis."

"Of the 88 patients completing the trial, 74 (84%) were cured by a single dose and, in the remaining 14, repeated dosage...resulted in a 100% cure-rate...Apart from one patient...there were no undesirable side-effects in this series, which included babies of 4 and 5 months."

**weigh?**

Anxiety and similar emotional factors lie at the root of most overeating problems. Treatment of the obese must therefore not merely curb the appetite—it must compensate for the solace formerly provided by eating. *Durophet-M* does just that. It contains not only laevo- and dextro-amphetamine (ratio 1:3)—probably the most effective appetite depressant available—but also methaqualone, a calmate to counter the underlying emotional factors that motivate the compulsive over-eater. In obesity, with its attendant hazards to health, these agents together provide more effective weight loss than do simple appetite depressants. Dosage is simple—just one capsule daily.

## Psoriasis... rapid response to Alphosyl

... even in previously intractable cases. A patient of 48 who had a generalised psoriasis for 20 years was essentially clear in six weeks.<sup>2</sup> A girl of 10 with a strong familial history of psoriasis, cleared almost completely after three weeks' application of Alphosyl Cream.<sup>2</sup> These are just two typical cases from the extensive clinical records underlining Alphosyl's outstanding effectiveness in bringing psoriasis under control.

**New Alphosyl lubricating cream.** A new water-in-oil dosage form, Alphosyl Lubricating Cream is particularly significant in the treatment of the dry, extremely scaly psoriatic lesion confined to the small site and the intertriginous area. Alphosyl cream is especially helpful in clearing psoriatic plaques exposed to constant friction. By enhancing lubrication of the skin folds, it serves to lessen irritation and facilitate healing. Clearing is prompt, even in previously resistant cases. The effectiveness of Alphosyl in this form is attributable in large measure to its unique cream base. This consists of a combination of saturated and unsaturated free fatty acids, naturally occurring triglycerides and esters that resemble the lipid constituents of normal healthy skin. The vehicle also contains hydrophobic-lipophilic bipolar substances which

Oct. 9th

enhance the moisture uptake and retention of the amphoteric proteins of the stratum corneum. Significantly, it has been shown that squalene, one of the components of the base, is most effective in dissolving a cement substance in psoriatic scales.

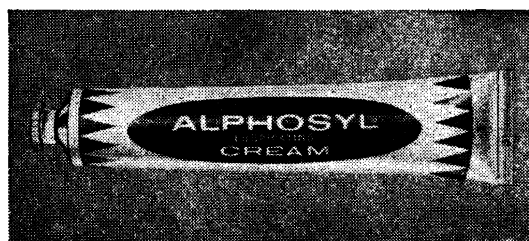

**Formula:** Allantoin 2%+90% alcoholic extract of coal-tar (5=1) 5% in a vanishing type cream base or a smooth, non-greasy lotion base.

This text is based on the case histories of 2,000 young heart patients diagnosed and treated over a period of 15 years at the Cook County Children's Hospital in Chicago. The accuracy of each diagnosis discussed has been established either by surgery, necropsy examination, or clinical methods. The wide scope of congenital and acquired heart disease which the book covers makes it a unique guide to the problems and dangers peculiar to the paediatric heart patient.

## WRIGHTS of BRISTOL

### A SYNOPSIS OF CANCER : GENESIS AND BIOLOGY

W. Kark

288 pp. 40 illus. April 1966 **42s.**

The author presents cancer as a subject for co-ordinated study rather than as a series of separate-organ subjects. This requires a comprehensive description and discussion of the biology and genesis of neoplasia. The book deals with and tries to remedy the growing schism between clinical practice and different forms of research.

This admirable book, the joint work of ten well-known teachers at the principal London Hospitals, has taken an established place as one of the best and most reliable textbooks on Midwifery in the English language.

'In summary, therefore, Ten Teachers "Midwifery" is a complete textbook for the undergraduate, is readable and well illustrated, and is very practical. It is thus recommended.'—*Guy's Hospital Gazette* (of the tenth edition). **65s. net.**

**ADVANCES IN RESPIRATORY PHYSIOLOGY**

Edited by COLIN G. CARO, B.Sc., M.D., M.R.C.P., Lecturer, Department of Medicine, St. Thomas's Hospital Medical School, London

This book is designed to describe several chosen aspects of the ever widening field of respiratory physiology, in an attempt to stimulate and be provocative of further research.

Several distinguished workers in different specialized branches of this subject have contributed reviews of their research giving details of background theory, methods employed and pointers towards further progress, in addition to demonstrating the inadequacies of present day knowledge.

This book will prove of considerable interest and value to doctors, medical students and physiologists interested in respiration as well as providing an introduction to respiratory physiology for scientists trained in other disciplines. **75s. net.**

H. SMOLKA, Director, Department of Obstetrics and Gynaecology, Robert Koch Hospital, Gehrden-Hanover, and H. J. SOOST, Director, Cytology Laboratory, Hospital for Women, University of Munich. Second Edition

The need for a fully illustrated textbook on gynaecological cytology is now met by this profusely illustrated outline. A number of major changes have been made during the course of revision since the previous edition in order to incorporate information relating to more recent developments in this field.

'... the book is an excellent atlas of the main subject it treats, and the text is full of helpful information. Moreover the authors do not claim too much, and give guidance on the limitations of the method. It can be recommended to all clinical cytologists, and to gynaecologists who wish to be well informed about the examinations done on their patients.' *The British Medical Journal*. **£6 net.**

Since the 'rheumatic' diseases are seen in the present volume as disorders of the Connective Tissue System, a unique, logical approach to these has been made possible.

The book is intended for general pathologists, for postgraduate students of pathology, medicine and orthopaedics and for rheumatologists. The text, supplemented by explanatory line diagrams, is illustrated by photographs and photomicrographs and an Appendix and a full Index is provided. **5 gns. net.**

This entirely new electroencephalograph incorporates a narcose phase indicator needle which provides the anaesthetist with immediate and objective information on the narcose phase. The apparatus permits direct writing of encephalograms and an electron-beam tube facilitates visualization of the electroencephalogram.

The design and technical excellence of this apparatus and its accuracy and reliability in operation were acknowledged at the Leipzig Fair in 1965 where it was awarded the Gold Medal.

# CANCER RESEARCH

## DESERVES TO BE REMEMBERED

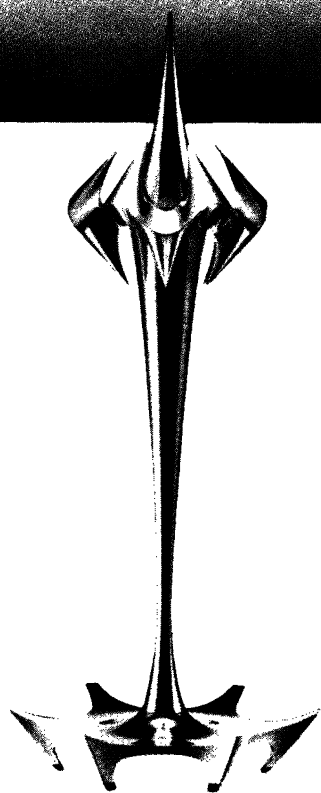

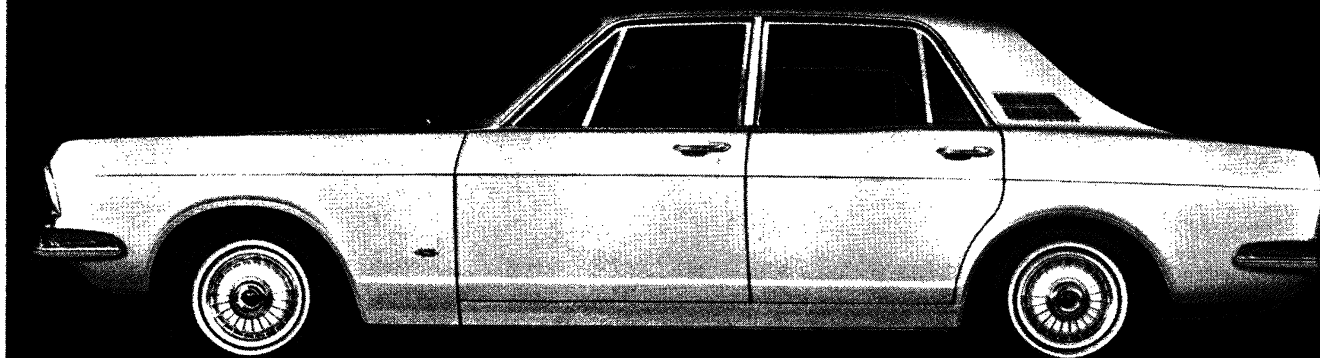

You may be asked from time to time to suggest a deserving cause as the subject of a bequest. Please remember that every year the British Empire Cancer Campaign for Research has to find more and more money for cancer research work not only in this country but in many parts of the Commonwealth. All this money must come from voluntary donations and bequests. The appropriate words to use in a will are: "I bequeath to the British Empire Cancer Campaign for Research the sum of £....." or "I devise and bequeath the residue of my estate to the British Empire Cancer Campaign for Research".

For further information please write to Sir Joseph Lockwood, Hon. Treasurer, British Empire Cancer Campaign for Research, Dept. BM.L, 11 Grosvenor Crescent, London SW1.

# Mark of Distinction

To mark the announcement of two distinguished new cars, Zodiac and Zephyr, this symbol in fine silver was commissioned by Ford of Britain. It reflects their particular blend of dignity, craftsmanship and advanced engineering. Many features combine to lend distinction to these fine cars; some of them are listed below. But to appreciate the Zodiac and Zephyr to the full, you should examine and drive them yourself.

**ZEPHYR** Available in two forms: Zephyr V6 with a 2½-litre V6 engine, and Zephyr with a 2-litre V4 engine. Both cars are equipped with: 4-wheel independent suspension. Power assisted disc brakes on all four wheels. Aeroflow ventilation system. Adjustable rake steering column. Options include automatic transmission, or overdrive with manual gearbox on the V6 engine.

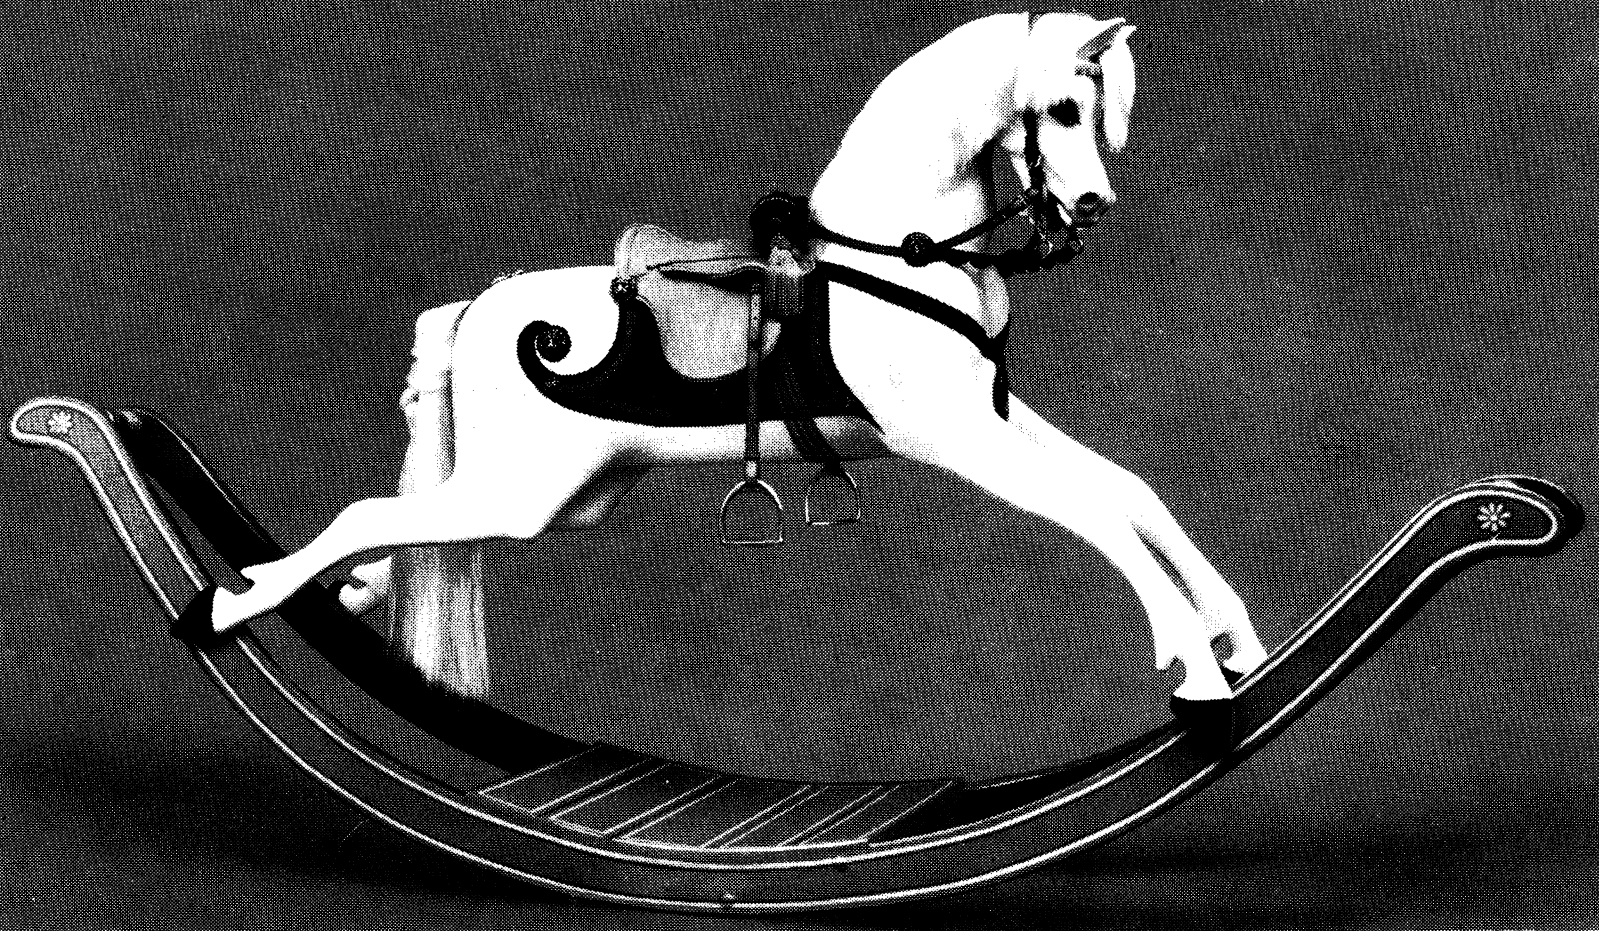

**ZODIAC** Further refinements and luxury features exclusive to the Zodiac: 5-litre V6 engine. Twin headlamps and built-in reversing lamps. Fully reclining individual front seats with centre console and floor gearshift. Distinctive fascia with comprehensive instrumentation. Luxurious interior appointments and upholstery. Recommended delivered prices, inclusive of purchase tax: Zodiac £1,220.8.4, Zephyr V6 £1,005.6.8, Zephyr £952.16.8.

For children  
**PENBRITIN**  
is the safer broad spectrum antibiotic

—the only one which is both oral and bactericidal, with the additional advantage of safety for all ages. Whenever broad spectrum therapy is required, from the neonate to the older child, Penbritin affords the safety of a penicillin. No interference with the calcification of teeth and bone, or significant change in blood picture has been reported in over 700 published papers on Penbritin.

Penbritin is effective

because it is bactericidal, highly active against a wide range of pathogens and well absorbed after oral administration giving high blood, tissue and urine levels.

These factors mean outstanding effectiveness in the treatment of recurrent chest infections, bronchitis, pneumonia, tonsillitis, otitis media, cystitis, pyelonephritis and other bacterial diseases.

And acceptable

because Penbritin Syrups are palatable, pleasant tasting liquids, well liked and well tolerated by children of all ages. Crushable paediatric tablets are also available.

**Dosage**

**Under 2 years** 62.5-125mg. 6 hourly. **2-10 years** 125-250mg. 6 hourly

# Betnovate

the topical steroid  
most likely to succeed

The excellence of Betnovate (betamethasone 17-valerate) in treating psoriasis and eczema of all types has now been firmly established. The evidence from extensive clinical trials—"that a better response is more likely with betamethasone 17-valerate than with any of the other corticosteroids tested"\*—has been fully substantiated by the outstanding results obtained with Betnovate in hospital and general practice. Used increasingly for many conditions other than psoriasis and eczema, Betnovate has also been shown to produce a better response throughout the whole range of steroid-responsive dermatoses. The majority of such skin disorders can in fact be treated satisfactorily by simply applying a Betnovate preparation once or twice daily.

# When the presence of slough delays healing...

## A CASE FOR ASERBINE

Clothing burns. Aserbine has been applied to the lower half of the right thigh. The upper half and the left thigh have been left as control areas. The slough on the treated area has softened and some de-sloughing has taken place. The softened slough is quite free from infection.

Eight days later. Both areas have been treated with Aserbine and the right thigh and the upper part of the left are completely de-sloughed. Rich, uninfected granulation tissue is present and, in this case, provides the ideal surface for grafting.

... in varicose ulcers, pressure sores, burns, trophic ulcers, etc.

... experience has shown that ASERBINE is a true de-sloughing agent which does not affect living tissue.

### Presentation

Aserbine is available as a cream (100 G. jars) and as a solution (500 ml. bottles).

### Method of Application

Aserbine Cream should be applied once or twice daily.

Aserbine Solution should be applied as a wet dressing which should not be allowed to dry out.

continuous drip control of ulcer  
by tablet

---

PRODEXIN tablets give all the benefits of continuous intragastric drip therapy<sup>1</sup> without any of its disadvantages.

The slow suck down tablets are specially formulated to give prolonged antacid buffer effect, unaffected by stomach emptying rate.<sup>2</sup>

Immediate relief of pain is achieved by rapidly raising pH to 2 neutralising excess acid and controlling the acid secretion by slowly building up the pH to a desirable level of pH3.5 and pH4.5

#### DOSAGE:

For continuous therapeutic effect one tablet at a time should be sucked slowly.  
For peptic ulcer one or more tablets an hour.

**19-24 hours relief** In many allergic conditions the antihistamine triprolidine, as 'Pro-Actidil', brings rapid yet prolonged relief. 'Pro-Actidil' acts within 10-30 minutes, but due to the special formulation of the tablet this action is maintained for up to 24 hours.

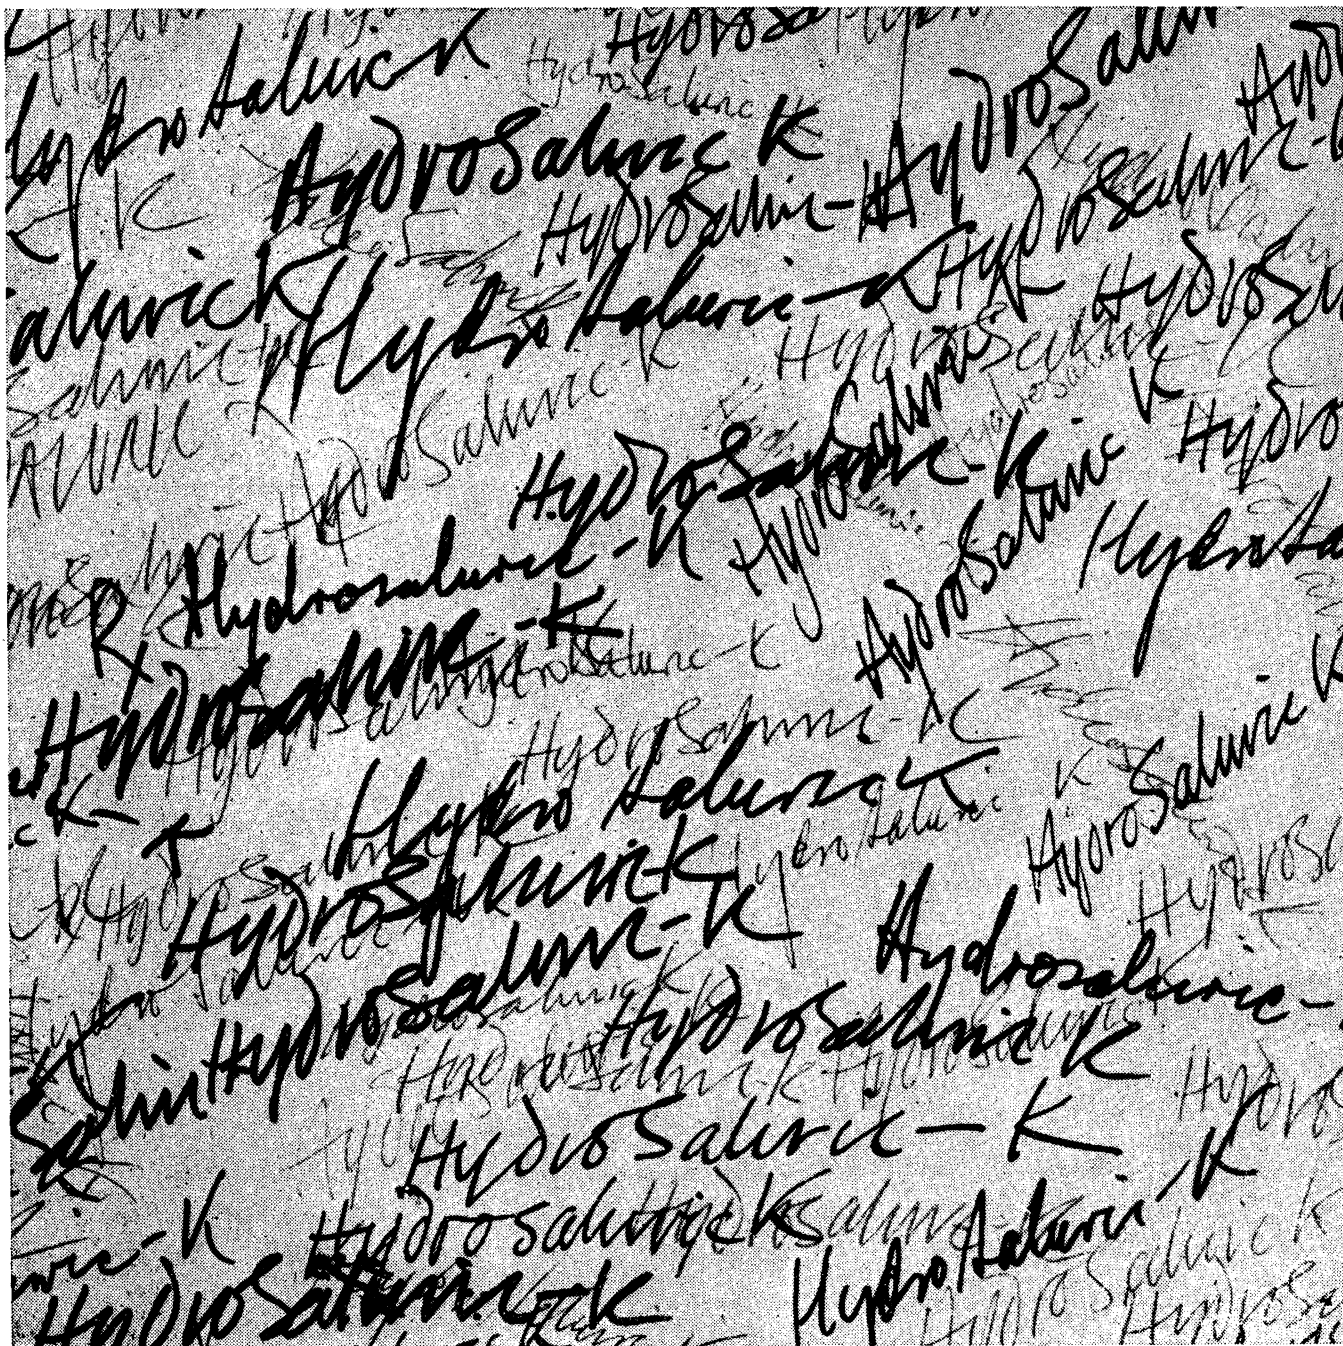

**in hay fever** and rhinitis, angioneurotic oedema, seborrhoeic eczema, pruritus, allergic asthma and allergic dermatoses the response to 'Pro-Actidil' is exceptional. In view of the excellent results that may be occasionally obtained, 'Pro-Actidil' is also worth a trial in solar dermatoses (*Practitioner* (1964) **193**, 434).

Most diarrhoeas are non-specific in origin. Lomotil (brand of diphenoxylate hydrochloride with atropine sulphate) provides the rapid, symptomatic control needed in such cases.

In diarrhoea of specific origin, Lomotil conserves electrolytes and prevents dehydration while antibacterial treatment takes effect.

Lomotil curbs the intestinal hypermotility characteristic of diarrhoea. It is effective in virtually all types of diarrhoea — acute, chronic or recurrent.

### MINI-PULSE MONITOR FOR HEART PULSE INDICATION

This small simple instrument gives immediate warning of impending failure of the circulation. It has been in use in operating rooms of hospitals for many years in fourteen countries and is now redesigned for use by Doctors and Dental Surgeons.

A small pressure transducer is applied to the finger of the patient and retained by a tension strap. The instrument is switched on and thereafter each heart beat is indicated on a meter placed in view of the Surgeon or Anaesthetist. Weakening or irregularities of the heart beat are apparent at once and allow action to be taken at an early stage. The instrument is powered by a small torch battery obtainable everywhere and in normal use lasts several months. *Full technical details on request.*

SOUTH-WEST LONDON AND SURREY  
EXECUTIVE COUNCIL

## LONDON BOROUGH OF CROYDON

Applications are invited from medical practitioners interested in commencing practice on a London Borough of Croydon housing development in the New Addington area, which is to be an extension to the present New Addington Housing Estate. It is anticipated that the development will be completed in approximately two years and will ultimately provide accommodation for about 6,500 persons. Building has commenced and it is understood that some houses are already occupied.

The London Borough of Croydon are prepared to provide a house suitable for use as a residential surgery which would be leased to the practitioner, appointed and have intimated that pending the construction of such accommodation, they would be prepared to let to the doctor one of the houses they are erecting. The question of the rent to be paid both for the temporary and permanent accommodation will be a matter for agreement between the practitioner and the local authority.

The area has been classified as "designated" and an initial practice allowance will be paid provided the successful applicant is eligible. It is possible that a further vacancy may be advertised at a later date.

Applications, on Form E.C.16A, obtainable from H. V. Wiggott, Clerk, South-West London and Surrey Executive Council, 187 Ewell Road, Surbiton, Surrey, to be received by the Council not later than 12 noon on May 17, 1966. (H.6533)

## WOLVERHAMPTON

These posts are to complete the development planned for 1966. Appointments have already been made to eight Chairs and a number of other posts.

The Faculty of Medicine provides courses leading to the M.B., Ch.B. degrees of the University of Birmingham, with which the Medical School is affiliated. The first intake of students was in 1963. Clinical introductory courses, including Pathology and Bacteriology, began in June, 1965. A new Teaching Hospital and Medical School have been planned adjacent to the College: the first section of the new School buildings has already come into use. The appointees to the new Chairs shown above will be responsible for the detailed planning of these new Departments. The Senior Lecturer in Radiology will also be responsible for radiological services in the new Teaching Hospital, and be expected to advise on the facilities and equipment.

The relevant salary scales in force at the College are as follows:

	Clinical £ p.a.	Non-clinical £ p.a.
Professors	Within the scale £4,200 by £150 to £5,400. In exceptional cases appointments might be made at a higher salary.	£3,600 by £150 to £4,200
Senior Lecturers	£2,820 by £150 to £4,020	£2,520 by £120 to £3,480
Lecturers Grade I	£2,500 by £110 to £2,940	£2,256 by £96 to £2,640
Lecturers Grade II	£1,840 by £110 to £2,390	£1,740 by £84 to £2,160

(Entry point according to qualifications and experience.)

Family passages and allowances for transport of effects on appointment. Installation grant of £100 for persons recruited from outside Africa. Travel assistance for appointee for triennial (Professors, biennial) visits overseas and for appointee and family for six-yearly sabbatical leave and on retirement or resignation after five years' service. Superannuation and medical aid schemes. Unfurnished College accommodation at rent of 15% of salary if desired.

Detailed applications (six copies), giving full personal particulars (including full names, place and date of birth, etc.), qualifications, experience and publications, and naming three referees, should be submitted by applicants from Central or Southern Africa by June 25, 1966, to the Registrar, University College of Rhodesia and Nyasaland, P. Bag 167 H, Salisbury, Rhodesia, and by other applicants to the Registrar, University of Birmingham, Birmingham 15, England, from either of whom further particulars may be obtained. (13777)

**RESEARCH PATHOLOGIST**

For Tobacco Research Council Laboratories, Harrogate

With the expansion of biological research facilities at their Harrogate Laboratories, the Tobacco Research Council propose to appoint a medically qualified Research Pathologist. His main immediate responsibilities would be to take charge of mouse skin painting experiments, histological and bacteriological services, tissue culture work, and animal husbandry. These responsibilities have hitherto been undertaken personally by the Director of the Laboratories.

This is a senior appointment, and salary, superannuation, and other conditions of service will be commensurate.

Applications should be marked "Personal" and addressed to The Secretary, Tobacco Research Council, Glen House, Stag Place, London S.W.1. (H.6425)

A short course in Applied Mechanics has been arranged by the staff of the Department of Mechanical Engineering (Professor W. Johnson) in consultation with Mr. John Charney, F.R.C.S., to suit the requirements of those wishing to improve their appreciation of biomechanical problems and literature. The course is primarily directed towards orthopaedic problems but it should also be of interest as a much wider field of postgraduate study.

The course will be from Monday, July 4, to Friday, July 8, 1966, and will consist of lectures and demonstrations in:

1. Mechanics (Statics and Dynamics)
2. Stress Analysis
3. Experimental Techniques

Some time will be allocated for the analysis of set problems, these to be in the medical field wherever possible. A few important published papers on biomechanical problems will be chosen from the literature to be "worked through" to discuss the mechanics involved.

A half-day visit to the Biochemical Laboratory at the Centre for Hip Surgery, Wrightington Hospital, will be arranged. The fee for the course will be £18 inclusive of lunches and light refreshments on each day.

Accommodation in Chandos Hall, a College study-bedroom block, will be available, if required, at an additional charge of 30s. per night (bed and breakfast).

Full particulars can be obtained from the Registrar, The University of Manchester, Institute of Science and Technology, Manchester 1. (13664)

## THE WRIGHT-FLEMING INSTITUTE OF MICROBIOLOGY

St. Mary's Hospital Medical School, London W.2

The Third Alroth Wright Lecture will be given by Professor M. Abercrombie, B.Sc., F.R.C.S., F.R.S., in the Lecture Theatre of the above Institute on Monday, May 16, at 5 p.m. Subject: "The Pathology of Cell Movement." The lecture is open to all members of the medical profession and to all students in medical schools without fee. (13561)

## APPOINTMENTS

Applicants should state name, address, age, nationality, and qualifications, and enclose (unless otherwise specified) one copy each of 3 recent testimonials with short statement of experience and appointments held.

Applications should be sent at once if no closing date is given. House Officers should submit a separate application for each post. Canvassing of members of the Board or Advisory Appointments Committee will lead to disqualification (Statutory Instrument 1950, No. 1259, N.H.S.)

UNIVERSITY OF EXETER  
Postgraduate Medical Institute

A full-time postgraduate course lasting ten weeks will begin on October 3, 1966. These courses are held three times a year starting in October, January and April. Each course includes instruction in general medicine, paediatrics, preventive medicine, pathology, psychiatry, orthopaedics and general surgery. The programme is planned so that students wishing to specialize in a particular clinical subject are given facilities to do so, while other students receive teaching in each of the main clinical departments. Unpaid attachments can be arranged at the end of the course for students requiring a longer period of training.

It is sometimes possible to accept general practitioners for one or two weeks of a course, and attendance for this period is recognized under section 48 of the N.H.S. Act (1946).

Further particulars and application forms for these courses are obtainable from the Director, the Postgraduate Medical Institute, the University, Exeter, Devon.

## **RASTINON** tolbutamide BP

The diabetic's treatment extends, at the moment, throughout his lifetime. The long-term safety of the preparations used is just as important as their ability to maintain satisfactory blood levels. Rastinon has a record of safety exceeding that of any comparable preparation. Its effectiveness is such that during the last 8 years over three million of the world's diabetics have been stabilized on Rastinon. This is why Rastinon is the first choice in initiating and continuing treatment of diabetes.

Ferro-Gradumet® is designed to be taken on an empty stomach. This once-daily haematinic releases its iron gradually over a period of hours as it passes through the intestine. Ferro-Gradumet® should be given before a meal when iron is more readily absorbed; it needs no food to cushion the ferrous sulphate as irritant gastric concentrations do not occur.

Ferro-Gradumet® provides 105 mg elemental iron – the optimum daily dose for all forms of iron deficiency. Each tablet contains the exsiccated equivalent of 525 mg ferrous sulphate BP.

# Donnagel<sup>®</sup> Donnagel<sup>®</sup> with Neomycin Donnagel<sup>®</sup>-PG

Provides effective treatment for all forms of diarrhoea

**Donnagel** for simple acute diarrhoeas – a combination of kaolin, pectin and natural belladonna alkaloids, recognized as an effective formulation for controlling both diarrhoea and cramps. Kaolin and pectin are especially beneficial in providing a soothing, protective coating for the intestinal mucosa at the same time adsorbing harmful bacterial toxins. The antispasmodic (Donnatal) in DONNAGEL is most useful for decreasing visceral hyperactivity and reducing abdominal cramps.

**Formula** Each (30ml.) contains:

Kaolin.....	6.0G.	Hyoscymine sulphate.....	0.1037mg.
Pectin.....	142.8mg.	Atropine sulphate.....	0.0194mg.
		Hyoscine hydrobromide .....	0.0065mg.

**Dosage :** DONNAGEL: Adults: 2 tablespoonfuls (30ml.) at once and 1 or 2 tablespoonfuls (15 to 30 ml.) after each loose stool or every 3 hours as necessary. Children: 2 teaspoonfuls (10ml.) initially, preferably with a little water, and 1 or 2 teaspoonfuls thereafter as above.

**Donnagel with Neomycin** for diarrhoeas of bacterial origin. When a bacterial infection complicates the diarrhoeal picture, DONNAGEL with NEOMYCIN is a logical choice for comprehensive therapy. It provides the well-tolerated antibacterial action of neomycin, plus the adsorbent, demulcent and antispasmodic benefits of the basic DONNAGEL formulation.

**Formula** Each (30ml.) contains the basic DONNAGEL formula plus 500 mg. Neomycin Sulphate.

**Dosage :** DONNAGEL with NEOMYCIN: Adults: 1 or 2 tablespoonfuls (15 to 30ml.) every 4 hours. Children over 1 year: 1 or 2 teaspoonfuls (5 to 10ml.) every 4 hours. Children under 1 year:  $\frac{1}{2}$  to 1 teaspoonful every 4 hours.

**Donnagel-PG** for more severe non-specific diarrhoeas. When severe non-specific diarrhoeas pose a challenge, DONNAGEL-PG, containing paregoric equivalent, has proved exceptionally effective. Paregoric is a good agent for control of diarrhoea and relief from cramps. It is essentially a peristaltic retarder that relieves tenesmus, slows down the passage of intestinal contents making faecal matter less liquid, and alleviates pain.

**Formula** Each 30ml. contains the basic DONNAGEL formula, plus powdered opium, B.P. 24.0 mg. (equivalent to paregoric 6ml.)

**Dosage :** DONNAGEL-PG: Adults: 2 tablespoonfuls every 3 hours or as directed. Children: 2 teaspoonfuls every 3 hours, or as directed.

DONNAGEL, DONNAGEL-PG and DONNAGEL with NEOMYCIN are available as suspensions in bottles of 6fl. ozs.

**A-H-ROBINS** A. H. Robins Co. Ltd., Horsham, Sussex.

Young cubs readily accept Penicals Paediatric Suspension with the wonderful raspberry flavour. Each 5 ml contains 125 mg of Penicillin V B.P. as the Calcium Salt. Dosage: Up to 5 years, 1 teaspoonful or more four times daily. 5 to 12 years, 2 teaspoonsful or more four times daily.

DIRECTOR OF PATHOLOGY**  
Applications are invited from medical practitioners holding a senior degree in pathology for the above position. The vacancy has been brought about by the present director obtaining a professional appointment.

In addition to his professional duties, the Director of Pathology is responsible for the administration and co-ordination of the laboratory services of the hospital, involving cytology, histopathology, serology, haematology, biochemistry and bacteriology. The hospital (7,500 births per annum) is a teaching hospital of the University of Melbourne, and a training school for the College of Pathology of Australia. Some 500 necropsies and 4,500 biopsies are carried out each year.

The Department is comfortably housed in a recently remodelled and extended building of three floors. It is well staffed with graduates in medicine and science, medical technologists, laboratory assistants, and clerks. Facilities for research are available in obstetrical, gynaecological, and neo-natal pathology.

Salary in accordance with the scale laid down by the Hospitals and Charities Commission, at present \$A.8,658 to \$A.10,170 per annum, according to qualifications and experience.

Minor emoluments emanate from a special purposes fund derived from income from private laboratory tests carried out in the Department.

Details of the position may be obtained from the Manager/Secretary, to whom applications, containing a short summary of the inquirer's career, should be addressed.—A. J. Cunningham, Manager and Secretary, The Royal Women's Hospital, 732 Swanston Street, Melbourne, N.3, Victoria, Australia. (H.6412)

ST. ANDREW'S HOSPITAL  
NORTHAMPTON

FOR NERVOUS AND MENTAL DISORDERS

President: The Earl Spencer  
Medical Superintendent: James Harper, M.B., F.R.C.P. (Edin.), D.P.M.

This private hospital receives patients, both male and female, suffering from nervous and mental disorders, including alcoholism and senile illnesses. The fees range from eighteen guineas per week. Private rooms with special nurses can be provided, either in the hospital or in one of the villas in the grounds. The hospital is situated in 130 acres of pleasant grounds which provide all recreational facilities. These include a nine-hole golf course, sports ground, tennis courts, etc. A Recreation and Occupation Centre, known as Gloucester House, was opened in 1962, which comprises an occupational therapy department, a swimming pool, a squash court, and a library with an adjoining reading room.

## WANTAGE HOUSE

This is a separate reception unit to which patients may be admitted. It is equipped for the complete investigation of nervous and mental disorders by the most modern methods. All forms of treatment are available.

## MOULTON PARK

Some two miles from the main hospital is the farm of approximately 600 acres. Occupational therapy is a feature of this branch. For terms and further particulars apply to the Medical Superintendent (Telephone No.: 34354 Northampton), who can be seen in London by appointment.

# Nulacin and only Nulacin provides intragastric milk-alkali drip therapy for the ambulant patient

*“In view of the ineffectiveness of most of the tableted antacids, the milk-alkali tablet (Nulacin) would appear to be the antacid of choice for ambulatory therapy.”*  
Med. Times, N.Y., 1958, 1, 74.

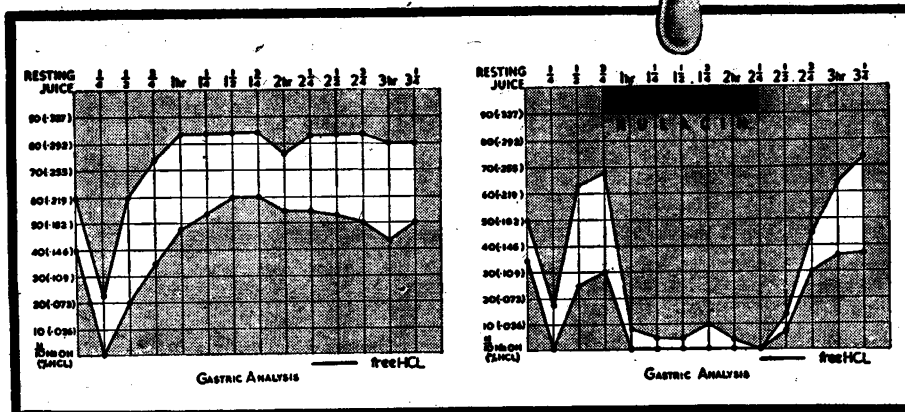

## Safe, Simple, Effective

NULACIN TABLETS provide a safe, simple and effective treatment of peptic ulcer.

In treating peptic ulcer a Ryle's tube may be passed through the nose and into the oesophagus and a mixture of milk and antacid allowed to flow continuously over the affected area. This form of therapy can only be employed in those patients who are in bed and for the ambulant patient Nulacin tablets are preferable. Nulacin tablets are prepared from whole milk combined with dextrins and maltose, together with the trisilicate, oxide and carbonate of magnesium and calcium carbonate. Nulacin tablets when allowed to dissolve slowly in the mouth provide milk-alkali drip therapy. In fact, Nulacin tablets have revolutionized the treatment of peptic ulcer.
