reduce the frequency and severity of attacks
provide a comprehensive approach to long-term treatment

Each CORANGIL Tablet contains:—

	<i>for immediate action by sublingual route</i>	
	glyceryl trinitrate 0.5 mg.	
	<i>for sustained action by oral route</i>	
	pentaerythritol tetranitrate	20 mg
	diprophylline	120 mg
	papaverine hydrochloride	60 mg

In the long-term management of angina pectoris, CORANGIL combines all the advantages of the predictable immediate action of glyceryl trinitrate administered sublingually, with the proven sustained action of pentaerythritol tetranitrate taken orally. The inclusion of diprophylline, which exhibits the typical myocardial stimulant effects of theophylline compounds, and papaverine, which acts on cardiac and smooth muscle to diminish spasm, complement the sustained action of pentaerythritol tetranitrate, together providing a comprehensive approach to the long-term treatment of patients with angina pectoris.

Psoriasis ... rapid response to Alphosyl
... even in previously intractable cases. A patient of 48 who had a generalised psoriasis for 20 years was essentially clear in six weeks.² A girl of 10 with a strong familial-history of psoriasis, cleared almost completely after three weeks' application of Alphosyl Cream.² These are just two typical cases from the extensive clinical records underlining Alphosyl's outstanding effectiveness in bringing psoriasis under control.

New Alphosyl lubricating cream. A new water-in-oil dosage form, Alphosyl Lubricating Cream is particularly significant in the treatment of the dry, extremely scaly psoriatic lesion confined to the small site and the intertriginous area. Alphosyl cream is especially helpful in clearing psoriatic plaques exposed to constant friction. By enhancing lubrication of the skin folds, it serves to lessen irritation and facilitate healing. Clearing is prompt, even in previously resistant cases. The effectiveness of Alphosyl in this form is attributable in large measure to its unique cream base. This consists of a combination of saturated and unsaturated free fatty acids, naturally occurring triglycerides and esters that resemble the lipoid constituents of normal healthy skin. The vehicle also contains hydrophylic-lipophilic bipolar substances which

enhance the moisture uptake and retention of the amphoteric proteins of the stratum corneum. Significantly, it has been shown that squalane, one of the components of the base, is most effective in dissolving a cement substance in psoriatic scales.

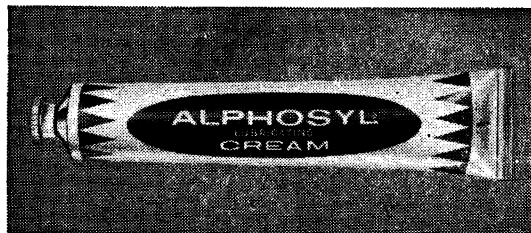

Formula: Allantoin 2% + 90% alcoholic extract of coal-tar (5=1) 5% in a vanishing type cream base or a smooth, non-greasy lotion base.

When a paediatric analgesic
or antipyretic is required
Angiers Junior Aspirin provides a
precisely measured dose.

Each tablet of Angiers Junior Aspirin contains 81 mg. of Acetylsalicylic Acid, equivalent to one-quarter of a normal 5 grain adult tablet. Parents can give children *exactly* the prescribed dosage. Here is the table which is printed on every bottle:

Angiers Junior Aspirin tablets  are small (8 mm in diameter), easily crushed and flavoured with natural orange—so that they are palatable to children.

They are packaged in a safety-seal bottle that considerably reduces the risk of self-administration by children. Angiers Junior Aspirin is the paediatric aspirin most widely used in Great Britain.

It is also available in a dispensing pack of 500 tablets. For a professional sample write to: Bristol-Myers Co. Ltd., South Ruislip, Middx. Bristol-Myers have been making ethical and proprietary medicines for over three quarters of a century.

FORMULA

Choline salicylate 8.7%, Cetyldimethylbenzylammonium chloride 0.01%, Alc. (95%) 39.0%, Menthol 0.057%, Glycer. 4.6%.

INDICATIONS

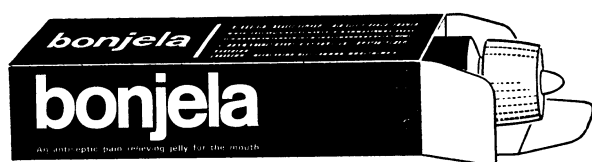

In a series of trials it has been shown to be approximately 90 per cent effective in bringing rapid relief from pain in oral lesions. It was also shown to hasten considerably the healing process.

Among the conditions successfully treated were:

Herpes labialis	Glossitis
Oral ulcerations	Denture sores
Gingivitis	Thrush
Cheilosis	Infant teething

PRESENTATION

Bonjela is available in 10 gm. tubes at a basic N.H.S. cost of 2/8½ per tube. Literature is available on request.

LLOYDS' PHARMACEUTICALS LTD., 36-38 Berkeley Sq., London, W.1
An associate company of Lloyd-Hamol Ltd.

CLINICAL TRIALS

Clinical trials conducted with Bonjela have produced the following results:

1. An investigation with 232 patients showed that relief from pain in lesions of the mouth occurred within one to three minutes. (1)
2. An investigation with 123 patients evaluated the product as effective in 86%, partially effective in 11%, and ineffective in 3%. (2)
3. An investigation with 75 patients showed that the product was significantly effective in 93% of cases, and effective in some measure in all. (3)
4. These American investigators found Bonjela to be more effective than any other therapy available.

Benvil RESTORES EQUANIMITY

Benvil restores equanimity in acute and chronic anxiety states—so encouraging the patient to come to terms with life.

Benvil relaxes tension, calms agitation, and restores well-being in the moody, dejected patient. In clinical trials with this new compound, relief of symptoms was either complete, or more marked than with other psychotropic agents. Notable improvement occurred in cases where the results of previous medication were considered to be equivocal.

Published studies also report less sedation than with chlordiazepoxide, meprobamate, phenothiazines or barbiturates; in addition, reports suggest freedom from habituation or addiction. When prescribing Benvil, it is nevertheless advisable to follow the precautions normally applying to these compounds.

Dosage: One capsule three times a day and one at bed-time. (This may later be adjusted to 3-6 capsules per 24 hours.)

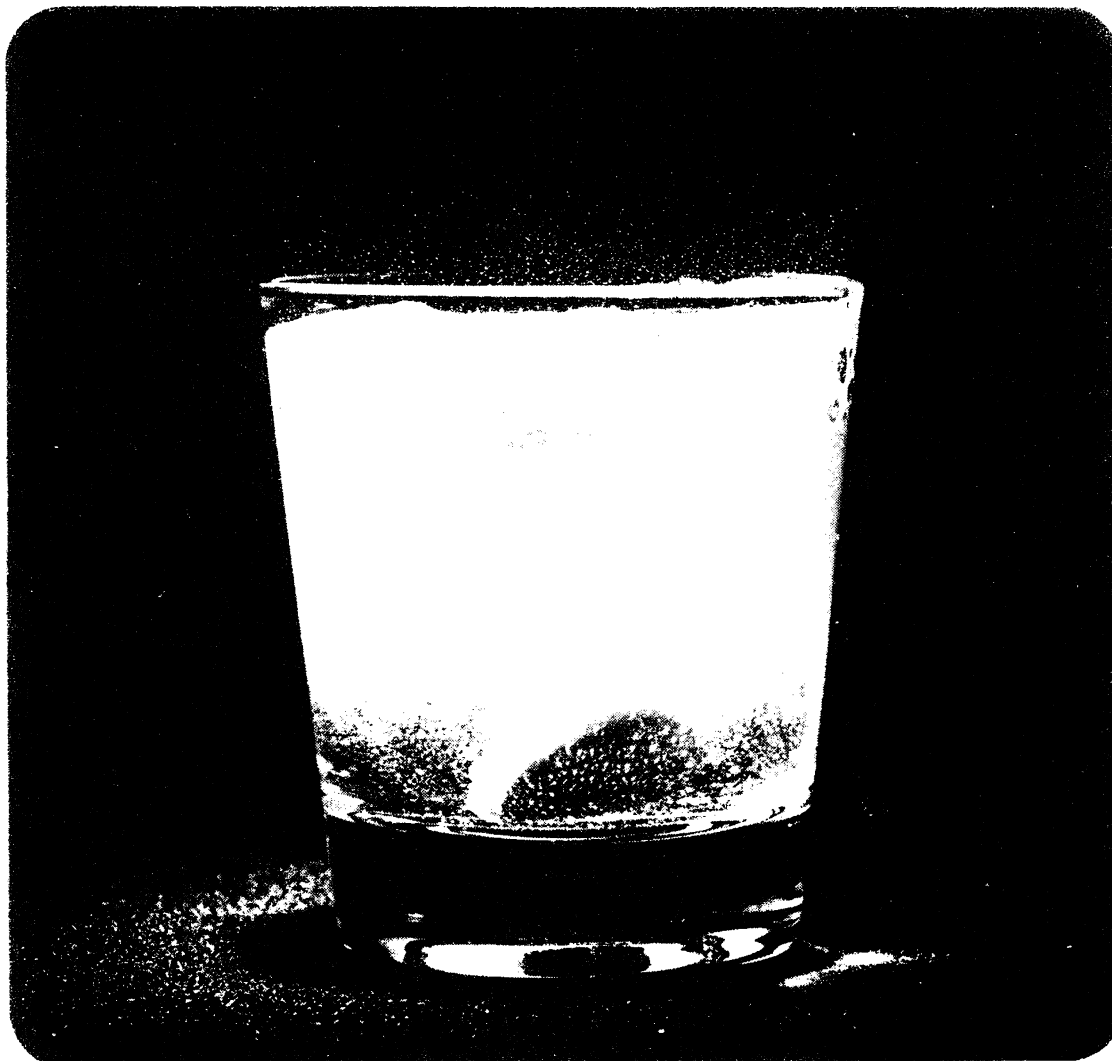

Available as blue/white capsules each containing 350mg. tybamate, in canisters of 50 and 250.

COLOMYCIN

Clinical reports on COLOMYCIN clearly show that it is a valuable addition to the antibiotic armamentarium. Its outstanding value is in the treatment of Gram-negative urinary and other systemic infections (with the exception of proteus), particularly those cases which have been found resistant to antibiotics in current use.

Injections — intramuscular colistin sulphomethate sodium for urinary tract and other systemic infections.

Tablets and Syrup—Colistin sulphate in tablet and syrup form for gastro-intestinal infections and pre-operative bowel preparation only.

"COLOMYCIN is a bactericidal antibiotic with a range of activity against *Ps. pyocyanea* and most coliform organisms. It is clinically effective in the treatment of infections due to *Ps. pyocyanea* and is thought to be the best antibiotic so far available for this purpose. The development of resistance to COLOMYCIN and toxic side-effects were insignificant". *Brit. Med. J.*, (1962) 2, 161.

" . . . colistin with its great efficacy against *Pseudomonas* and *Klebsiella*, is a valuable addition to the antibiotic armoury". *Lancet* (1962) 2, 741.

"A clinical and bacteriological study of forty patients has demonstrated that Colistin methane sulphonate (COLOMYCIN) is effective in the treatment of infections with *Ps. pyocyanea*. In the dosage employed, there were no serious toxic effects". *Lancet* (1962) 2, 737.

"Assessment of these results on the basis of elimination of the infecting organism from the urine indicates that COLOMYCIN is an effective antibiotic in the treatment of *K. aerogenes* infection of the urinary tract". *Brit. Med. J.*, (1963) 2, 791.

Triptafen-DA

for concurrent depression and anxiety

As society becomes progressively more complex the problem of emotional disturbance grows steadily more acute. A wide variety of mental and emotional disorders, usually characterised by symptoms of both depression and anxiety, present the General Practitioner with an ever increasing volume of work. The development of psychotropic drugs has partially helped to alleviate this problem but it is now accepted that the treatment of one symptom alone may often lead to the

aggravation of the other¹⁻⁵; and this means that the use of an antidepressant together with a tranquilliser is often desirable.

Triptafen-DA is just such a combination in which both constituents are established and well-tried drugs. The balanced formulation of antidepressant amitriptyline and tranquilliser perphenazine simplifies and facilitates the treatment of emotionally disturbed patients²⁻⁷. Triptafen-DA offers efficacy, economy and simplicity of prescribing.

Each tablet contains amitriptyline hydrochloride 25 mg. and perphenazine B.P. 2 mg. 'Triptafen-DA' is a registered trade mark.

Distalgesic erases pain

Two tablets of Distalgesic taken three or four times daily bring prompt and lasting relief in pain of varying degrees. Distalgesic maintains its effect at this dosage level even in long-term use, such as in the aches and pains of rheumatism. It can be effective against more severe pain, often delaying the need for parenteral narcotics. Distalgesic itself is non-narcotic, does not cause constipation or addiction and does not irritate the gastric mucosa.

Distalgesic tablets each contain 32.5 mg. *dextropropoxyphene hydrochloride*, described as the most promising alternative to codeine, and 325 mg. *paracetamol*, generally regarded as the safest of the antipyretic analgesics.

The invisible wedge

correct flat feet...

Do you recommend an external wedge? Those outside wedges soon wear away, and very often the child is made to feel self-conscious because his shoes look different from other children's. They also disturb the plane of forepart and heel. Surely it's more logical to have a wedge built in between the inner and outer sole where it remains invisible and completely unaffected by wear or repair of the shoe. That is how Start-rite INNERAZE shoes are made—on remedial lasts specially adapted to accommodate the internal wedge. That is why they are the only practical and thoroughly effective solution to this problem. Information from Mr. C. James, Fitting Consultant, James Southall & Co. Ltd., Crome Road, Norwich, NOR 60A. At least 18,000 pregnancies confirmed each week

Based upon Registrar General's live birth returns for 1964

This may mean one in your practice *this* week.

Pregnancy is a physiological process which we all take for granted, but one which can so easily induce pathological changes in the mother-to-be. What is the *first* thing *you* consider when the diagnosis is confirmed and the EDD worked out? Where is she to have the baby? Home? Hospital? Is this likely to be just another *normal* pregnancy?

Whoever cares for the ante-natal patient, the most favourable outcome is likely to be associated with the most favourable nutritional state of the mother. And this just doesn't mean 'eating for two'. The *extra* nutritional requirements have been estimated and agreed upon by British and American authorities^{1, 2}.

Generally, the physiologically mediated demands of increased appetite, an extra milk-intake and a balanced pharmaceutical supplement of iron, other minerals and vitamins including folic acid, are all that will be required. The majority of women in this country may be anaemic when they conceive; in the industrial areas, sub-nutritional states may be common. Foetal demands strain them further. *Iron* is the most important *single* addition to the diet, calcium and phosphorus come next and a full physiological complement of vitamins A, B, C and D completes the ideal supplement — for *all* mothers-to-be.

CONTINUOUS RELIEF from bronchospasm
for several hours

Rapid Initial Bronchodilatation: Isoprenaline in the special outer layer is released and absorbed promptly (within 1 minute).

Immediate Sustained Bronchodilatation: A NEW, soluble, lozenge-type core allows an IMMEDIATE start to release of the core ingredients (methylephedrine/theophylline) on swallowing. A steady, **even** release continues over 50-60 minutes, providing effective bronchodilatation for several hours.

Minimum Side Effects: The use of methylephedrine instead of ephedrine reduces risk of central nervous system stimulation and blood pressure increase. The tablet contains no sedative ingredients.

INFECTION IN HOSPITAL

by R. A. Shooter, M.D., M.R.C.P., F.C.Path.

This REVIEW ARTICLE appears in the May issue of *Abstracts of World Medicine*. The article discusses the spread of infection in hospital, reviews the progress that has been made in its control, and points out that the problem which concerns both hospital staff and practitioners who see the effects of infection in their patients has by no means been solved.

The selective abstracting service offered by the journal is already widely known. The institution of the current series of Review Articles has increased its popularity immeasurably. These articles, like the abstracting service which they are designed to supplement, are directed as much towards the general reader as to the specialist, providing him with authoritative surveys of the growing points of medicine, each complete with an up-to-date bibliography. Other articles that have appeared or are scheduled for early publication are:

**LONDON BOROUGH OF REDBRIDGE
Health and Welfare Department****Applications are invited for the post of
PRINCIPAL MEDICAL OFFICER
(Mental Health and Welfare)**

in this pleasant residential London Borough which is formed by the union of the former Boroughs of Ilford and Wanstead and Woodford. The administrative centre is in Ilford, much of which is served by the Central London Line. The duties will be primarily connected with mental health and welfare, but other experience may be included in order that the post may be a stepping stone for promotion in the public health service. Most of the duties concern the supervision of the mental health services in the Borough and will be partly administrative and partly clinical; but for welfare, the duties will be mainly of a medical nature. In Redbridge the Mental Health Service is being reorganized following modern trends: psychiatric hospitals concerned are within the boundaries of the Borough, there is joint employment of certain categories of staff, including Consultant Psychiatrists and Psychiatric Social Workers with these hospitals. Salary according to experience on special scale £2,610 to £3,075 per annum. Superannuation, Medical clearance. Essential user car allowance. Generous assistance with removal expenses in approved cases. Consideration can be given to easing London housing difficulties.

Applications, on forms obtainable from Medical Officer of Health, 17/23 Clements Road, Ilford, Essex, should be returned not later than June 13, 1966. (14976)

OFFICER**

Applications are invited from registered medical practitioners holding the Diploma in Public Health. Salary scale £2,090 by £85 (9) to £2,855. Starting salary according to experience and qualifications. The duties of the appointment will be mainly in connection with the school health services, maternity and child welfare services, and hospital treatment of infectious disease (but opportunity is offered for work in a wider range of public health services). Car allowance at essential user rate. Assistance given towards removal expenses.

Application forms, and further particulars, may be obtained from Medical Officer of Health, 63-69 Guildford Street, Luton. (14557)

**LONDON BOROUGH OF BARNET
Health and Welfare Department****MEDICAL OFFICER**

whole-time, required for work in maternity, child welfare and school health fields with particular emphasis on developmental assessment and care of handicapped children. Those with previous experience of public health and with D.P.H. and/or D.C.H. will have preference but importance will be attached to initiative and ability to take responsibility for increasing range of duties in relation to social medicine and administration. Salary within scale £1,515 to £2,130 per annum.

Applications to Medical Officer of Health, 322 Regents Park Road, London N.3, by June 17, 1966.—R. H. Williams, Town Clerk. (14763)

**LANCASHIRE COUNTY COUNCIL
Health Department****APPOINTMENT OF PRINCIPAL SENIOR
MEDICAL OFFICER**

Applications are invited for the above appointment on the staff of the Health Department. The medical establishment at County Offices consists of the County Medical Officer of Health, his Deputy, and three Principal Senior Medical Officers. Candidates must possess the D.P.H.

The Health Department is responsible for the administration of personal services under the National Health Service and Mental Health Acts, environmental public health services, school health services and all welfare services under the National Assistance Acts.

Each of the Principal Senior Medical Officers is concerned with the supervision and development of one or more of these services and the officer now to be appointed will be engaged primarily with the administration of the School Health Service, including attendance at the appropriate committees, and with the direction of the Health Education Service. The facilities provided by the School Health Service are comprehensive in nature and include five residential special schools for epileptic, physically handicapped or delicate children. The school psychological service consists of twelve clinical psychologists on the staff of the County Medical Officer. There are four child guidance clinics and eleven teams of staff dealing with children with impaired hearing. There is close liaison with the University of Manchester and joint research projects are in progress. It is necessary, therefore, that applicants should have had good experience in the administration of health services for school children.

Opportunity will also be given for the successful candidate to keep in touch with developments in all other aspects of the Health Department's work and to attend the various committees involved.

The salary for the appointment is £3,170 per annum, rising by annual increments of £150 to a maximum of £3,620. The appointment will be superannuable and subject to passing a medical examination.

The officer to be appointed will be classified as an essential car user, and will be entitled to mileage and subsistence allowances. The County Council operate an Assisted Car Purchase Scheme.

Application forms, together with further details of the post, available from the Medical Officer of Health, Social 526c, Health Department, East Cliff County Offices, Preston, to whom they must be returned by June 6, 1966. (14676)

MEDICAL ARTIST

Applications are invited for the appointment of Medical Artist in the department of photography. Applicants should have completed an Art Course to degree standard and should have a sound knowledge of design and modern graphic techniques. Several years' experience as a medical artist, particularly as an illustrator of clinical subjects, is desirable.

The work of the department is varied and the graphic section, with a present staff of four, undertakes a wide range of commissions in conjunction with the still, cine and C.C.T.V. sections.

The commencing salary will be at a suitable point on one of the following scales for Medical Artists according to age, qualifications and experience: Grade I, £895 to £1,470; Grade II, £1,470 to £2,630. The successful candidate will be required to join the F.S.S.U. Scheme.

Applications (three copies), including the names and addresses of three referees, and a representative selection of work, should be submitted to the Registrar, The University, Newcastle upon Tyne 2, from whom further particulars may be obtained within three weeks of the appearance of this advertisement. **ST. ANDREW'S HOSPITAL
NORTHAMPTON**

FOR NERVOUS AND MENTAL
DISORDERS

President: The Earl Spencer
Medical Superintendent:
James Harper, M.B., F.R.C.P.(Edin.), D.P.M.

This private hospital receives patients, both
male and female, suffering from nervous and
mental disorders, including alcoholism and
senile illnesses. The fees range from eighteen
guineas per week. Private rooms with special
nurses can be provided, either in the hospital
or in one of the villas in the grounds. The
hospital is situated in 130 acres of pleasant
grounds which provide all recreational facilities.
These include a nine-hole golf course,
sports ground, tennis courts, etc. A Recre-
ation and Occupation Centre, known as
Gloucester House, was opened in 1962,
which comprises an occupational therapy de-
partment, a swimming pool, a squash court,
and a library with an adjoining reading
room.

WANTAGE HOUSE

This is a separate reception unit to which
patients may be admitted. It is equipped
for the complete investigation of nervous and
mental disorders by the most modern
methods. All forms of treatment are avail-
able.

MOULTON PARK

Some two miles from the main hospital is
the farm, approximately 600 acres. Occu-
pational therapy is a feature of this branch.
For terms and further particulars apply to
the Medical Superintendent (Telephone No.:
34354 Northampton), who can be seen in
London by appointment.

**how
much
does**

weigh?

Anxiety and similar emotional factors lie at the root of most overeating problems. Treatment of the obese must therefore not merely curb the appetite—it must compensate for the solace formerly provided by eating. *Durophet-M* does just that. It contains not only laevo- and dextro-amphetamine (ratio 1:3)—probably the most effective appetite depressant available—but also methaqualone, a calmative to counter the underlying emotional factors that motivate the compulsive over-eater. In obesity, with its attendant hazards to health, these agents together provide more effective weight loss than do simple appetite depressants. Dosage is simple—just one capsule daily.
